American Railroad Journal.

Saturday, November 12, 1870.

Stock Exchange and Money Market.

The Money market has been very well supplied, all through the week, and the tendency of rates has been favorable to borrowers in good standing. The demand for aid on call has not been urgent. The wants of the Government houses have been readily met at 4@5; and of the prominent Government firms at 5@6 per cent. per annum. The discount market has been comparatively quiet. The offerings of the better grades of commercial paper have been limited and have found a prompt sale at 7@8½ per cent. per annum, as the range on prime to very good names. The City Banks in their last weekly returns, showed a gain of $1,691,918 in their deposit line, and $1,791,240 in their specie average, chiefly through the Treasury disbursements. Nearly a million ($990,152) has been added to the legal tender reserve. They reported a contraction of $2,685,579 in the loan and discount averages. The Sub-Treasury reported its cash (coin and currency) balances down to $68,897,187, against $71,760,815 the preceding Saturday. The receipts from Customs, for the week, were $2,697,238; while the specie exports were $2,156,924 in the aggregate, of which $2,530,343 consisted of Mexican silver dollars, in transit for London. Government sold a million of gold on Wednesday of the current week. The total of the November coin interest disbursements thus far have been $9,639,000. The chief arrival of Coupons from Europe was by the *Scotia* on Thursday of last week, and was given at two millions. The Office has been paying off the amount promptly as practicable. The Treasury Department reported its coin reserve at the close of the week at $98,468,000, including $14,785,000 on deposit on private account, and represented by outstanding coin certificates. On the 1st inst., the aggregate of the Coin balance was $103,131,073. The currency balance stood on Monday at $25,860,000 against $26,815,384 the preceding Monday.

The specie reserve of the city banks according to the latest return is $14,899,646, against $25,219,066 same time last year. The city bank deposits are now $194,769,716, against $182,961,840 week ending Nov. 5, 1869. The legal tender reserve amounts to $53,999,251, against $49,957,599 same time last year. The circulation now stands at $32,374,511, against $24,188,668 same time last year. The loans are now $263,298,906, against $252,799,450 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $91,208,229 a day, against a daily average of $86,283,140 the preceding week. The current weeks' exchanges average about 86½ millions a day. The city banks, last week, reported a gain of $1,791,240 of specie, $1,691,918 of deposits, and $990,152 of legal tender notes. They reduced their loans $2,685,579; and their circulation, $45,998.

The coin reserves of the Treasury Department on Monday were $98,468,000, including about 14¾ millions on deposit on private account; currency balances, $25,860,000.

National Bank notes to the amount of $358,420 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $285,586,858, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $38,338,679 leaving, with the existing 1,612 banks, (having an aggregate capital of $427,285,701,) an actual circulation at this date, of $302,202,179. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $344,888,550; and for the public deposits, $15,884,500—making a total of $360,768,050. The Treasury Department last week redeemed and destroyed $647,100 of worn and mutilated fractional currency, and issued $495,550 of new.

The U. S. Sub-Treasury receipts, week ending with Nov. 5, were $4,490,256 in coin, (including $2,695,000 from customs duties,) and $6,743,858 in currency; payments, $9,190,117 in coin, (including $6,576,079 of coin interest,) and $5,407,178 in currency; balance at the close of the week, included $60,471,872, of coin, against $65,171,784 the preceding Saturday, and $7,925,285 of currency, against $6,589,081 at the close of the pre-

ceding week. The business of the Office on the first two days of the current week, was as follows. On Monday, receipts, $419,584 in coin, (including $248,676 from customs,) and $752,619 in currency; payments $558,450 of coin (including $534,172 of coin interest), and $432,301, of currency. On Tuesday, receipts, $826,402 in coin (including $312,118 from customs), and $293,599 in currency; payments, $769,193 in coin (including $679,000 of coin interest) and $270,515 of currency. The balance at the close of business on Tuesday included $8,268,668 of currency, and $60,390.216 of coin, against a balance a week previous of $6,971,041 currency, and $61,840,106 coin.

The aggregate receipts of the U. S. Sub-Treasury in October were $51,530,870, including $11,724,402 from customs; aggregate payments, $47,417,035, including $2,112,636 of coin interest.

The U. S. Sub-Treasurer issued in October $4,984,500 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $2,356,877 of coin certificates, received for customs.

The revenues of the Government during the week, were up to a fair average. The excises, during the week yielded about three millions; customs at the port of New York, $2,549,877, and at the outports about $350,000 (in coin) more, making the grand total income for the week equal to about $6,739,864 in currency. The income of the Government, from excises, since July 1, 1870, has been $66,268,559.

The Gold market has been quite free from excitement, during the week. The reported signing of an armistice depressed the price to 110 on Friday last. The low rate developed a more active demand, chiefly from speculative operators, to cover outstanding short contracts, which had the effect of strengthening the premium. On Monday, the advices of a sudden breaking off in the armistice negotiations stimulated the purchasing inquiry and led to a rise to 110⅞. The subsequent dealings were on a less confident basis and on Wednesday the range was from 110⅜@110⅜, the final quotations having been 110⅜@110⅛. On Wednesday, Government marketed $1,000,000 of gold at from 110 42@110 50. The bids reached an aggregate of $6,244,000. The aggregate of the November interest obligations on the public debt is $22,851,629, of which the New York office has already paid off $9,639,000 without rebate. There has been less activity in the Gold Loan market, and rates have been working more steadily.

Under the November programme, the Treasury Department will sell Gold, during the remainder of the month, as follows: Wednesday, November 16, $1,000,000; Wednesday, November 23, $1,000,000; Wednesday, November 30, $1,000,000. And purchase Five Twenties, as follows: Thursday, November 17, $1,000,000; Thursday, November 24, $1,000,000.

The export drain last week was $3,156,924 against $303,562 week ending Oct. 29; $556,180 week ending Oct. 22; $654,823 week ending with Oct. 15; $802,174 week ending with Oct. 8; and $465,260 week ending with Oct. 1. The shipments thus far this year have been about 54¾ millions, against 29¼ millions same time in 1869; nearly 68 millions same time in 1868; 48⅞ millions same time in 1867; over 55⅛ millions same time in 1866; and 25¼ millions same time in 1865. The exchanges at the Gold Exchange Bank, which were 46⅛ millions on Thursday of last week, were 64 millions on Saturday, 22 millions on Monday of this week, and nearly 53⅛ millions on Tuesday. On Wednesday they were 30 millions.

The customs demand for Gold last week, averaged $449,539 a day; thus far, this week, it has averaged $280,397, a day, or equal to a weekly aggregate of $1,682,382. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $2,481,541; and since Jan. 1, 1870, $11,108,919, against $14,877,528 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $124,320,770 against $115,835,945, same time in 1869.

The exports of specie, from this port, last week, were $3,156,924 against $640,653 same week last year; and since Jan. 1870, $54,708,285, against $29,248,688 same time in 1869. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $6,576,079; and since Jan. 1, 1870, $75,427,257 against $80,635,846 same time in 1869.

The customs revenue at the port of San Francisco, from Jan. 1 to Oct. 27th, was $7,005,000, against $7,111,000 same time last year.

The specie exports by steamer and railway, from San Francisco, from Jan. 1, 1870 to Oct. 27th, were $29,100,000, against $32,946,000 same time last year.

Foreign exchange has been in moderate request, opening weaker, but closing with more steadiness. Bankers' sixty day bills on London closed on Wednesday at 109@109¼; sight bills on London, 109¾@110. The offerings of produce bills have been fair.

Government securities have varied little in price, during the week. The offerings have been comparatively moderate and the demand has been rather slow, in most instances. The later dealings showed a steady, though tame, market. Government bought in a million of Five Twenties on Thursday at equal to the current rates.

U. S. sixes of 1881 closed here on Wednesday of the current week at 118⅜@118⅝; U. S. Five-Twenties of 1862, ex-coupon 108⅛@108¼; U. S. Five-twenties of 1864 at 107⅜@107½; U. S. Five-Twenties of 1865, 107¼@107⅝; U. S. Five-twenties of 1865 consolidated, 109⅜@109¾; U. S. Five-Twenties of 1867, 109⅜@109¾; U. S. Five-twenties of 1868, 109⅞@110; U. S. Ten-forties at 106⅛@106⅜; U. S. Six per cent. currency bonds, 111⅜@111½.

State bonds have been in more demand, through the week, and have been quoted generally stronger.

Railway bonds have been in more general request for investment purposes at well supported prices. Central Pacific Sixes have been in active demand, closing firmly on Wednesday at 90⅞@91.

The October earnings of the Central Pacific Road were $804,890, against $579,642 in October, 1869—an increase of $225,158. From Jan. 1 to Oct. 31, the aggregate earnings were $6,658,000 against $4,664,800 same time in 1869—an increase thus far in 1870 of $1,993,200.

The Union Pacific Sixes closed on Wednesday at 82⅞@83. The registered First Mortgage bonds of the Chesapeake and Ohio Railroad have been in pretty fair demand at 90 per cent. and accrued interest.

Railway and miscellaneous share property has been more active and decidedly firmer in price, closing strong and buoyant, in most instances.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 26.	Nov. 2.	Nov. 9.
Consols	92⅛	92¾	93⅛
U. S. 5-20's of 1862	89⅜	89¼	89⅜
U. S. 5-20s, 1865	88⅛	88⅛	88½
" 1867	90	—	90⅛
" 10-40s	87¼	87	87¾
Erie	18¾	18¼	19¼
Ill. Central	114	110⅛	112¾
At. and Gt. West	29⅛	28⅛	29

At Frankfort on Wednesday, U. S. Five Twenties were quoted at 95¾.

General business has been less active in the line of domestic produce, and values have been variable and weaker, as a rule. The Cotton movement has been unusually heavy in the line of receipts and shipments,—leaving also enlarged stocks at the ports at the close. The breadstuff business has been checked by the firmness in ocean freights. At the close, Flour, Wheat, and Corn were depressed in price. Oats were firmer, under a speculative demand.

Ocean freights ruled firm most of the week, on a light supply of shiproom; but closed with a downward tendency and with very little animation. The off-rings of sailing vessel room were on the increase. For Liverpool we quote flour at 2s. 6d. by sail, and 8s. by steamer per bbl.; grain at 8¼@8¾d. by sail, and 9⅛d. by steamer per bushel; cotton at ⅛@$\frac{1}{16}$d. by sail and ⅛d@$\frac{9}{16}$d. by steamer per lb.; and heavy goods 20s.@30s. by sail, and 50s.@50s. by steamer, per ton. Total number of vessels in port on Wednesday, 489.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending November 8th, and since the beginning of the year:

	1869.	1870.
For the week	$4,901,610	$5,161,358
Previously reported	154,255,751	152,948,422
Since Jan. 1	$159,157,361	$158,129,780

The imports for the week ending Nov. 5, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,289,156	$1,159,035
Gen. merchandise	3,189,297	3,014,068
Total for the week	$4,428,453	$4,173,103
Previously reported	252,532,800	254,961,780
Since January 1	$256,961,253	$259,134,883

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Georgia 6s, 80⅛; do., 7s, 91¼; South Carolina 6s, new Jan. and July, 72⅝; do., April and Oct., 71¾; North Carolina Fund Act, 1866, 39½; do., special Tax, 21; Connecticut 6s, War Loan, 101⅛; Louisiana 6s, 71½; N.Y. R., 19@21; George's Creek Coal, 60@62; Atlantic Coal, 1.50@2.00; Bare Hill, 0.05@1.00.

☞ At a meeting of the directors of the National Railway Company, held at their office in Philadelphia on the 5th inst., it was unanimously resolved to invite proposals up to the 25th instant, to build several connecting roads, in whole or in sections, between Philadelphia and New York. The length of the connected lines is eighty-six miles, and the whole is to be laid with steel rails. The work is to be begun at once, and prosecuted vigorously.

☞ The Alexandria *Gazette* says it is understood that the route of the Alexandria and Fredericksburg railroad, for the construction of which bids have been made, when examined by Mr. Roberts, the president of the road, was not approved by him, and that probably an entirely new line, running considerably west of the present one, will be adopted, and that engineers will commence surveying the new route in a day or two.

☞ The firm of GIBSON, BEADLESTON & Co., Bankers and Brokers, have dissolved by the withdrawal of Mr. Beadleston, and the business will be continued under the firm name of GIBSON, CASANOVA & Co., the new members admitted being Mr. P. C. Casanova and Mr. Chas. Louis Fincke.

☞ The town of Stockton, Maine, has voted, 151 to 6, to subscribe ten per cent. of its valuation to aid in the construction of the Penobscot Bay and River railroad. Thirty thousand dollars had been previously subscribed by the citizens.

☞ The attention of Contractors is invited to the Advertisement of the National Railway Company, in another column.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH,
BANKERS AND DEALERS IN GOVERNMENT SECURITIES, No. 5 NASSAU ST.,
NEW YORK, Nov. 10, 1870.

☞ THE FUNDING OF UNITED STATES FIVE-TWENTIES into a first-class security, paying the same rate of interest (six per cent., gold), and which cannot be called in under twenty-five years without the consent of the holder, may now be effected at a clear profit of about twenty per cent., by exchanging them for the FIRST MORTGAGE BONDS OF THE CENTRAL PACIFIC RAILROAD COMPANY.

The advantages of the exchange is shown thus:

$5,000 5-20s *cost to-day*	$5,437 50	*ann. int. in gold* $300
$5,000 C. P. R. R. Gld Bds	5,450 00	ann. int. in gold. 360
Gain, $1,000 in Bds., in cash	27 50	gain in ann. inc. $60

The Central Pacific Bonds have the advantage of a ready market on both sides of the Atlantic, of regular quotations at the Stock Exchange, and are based on a finished and equipped road, already placed on a stable and profitable basis.

Having originally negotiated these bonds, and being thoroughly acquainted with their soundness and value, we have introduced them as a specialty in our regular business in connection with our dealings in Government securities, and recommend them without hesitation to our friends and customers desiring to make investments or to fund their five-twenties upon advantageous terms, without reduction of interest.

FISK & HATCH.

Illinois Central Railroad.

The statement of this Company for the month of October, 1870, is as follows:

LAND DEPARTMENT.

Acres Construction Lands sold	5,672.81 for	$54,931 37
Acres Int. Fund Lands sold		
Acres Free Lands sold	159.48 for	3,748 42
Total sales during month of October, 1870	5,832.29 for	$58,679 79
To which add Town Lot Sales		140 00
Total of all	5,832.29 for	$58,819 79
Cash collected in October, 1870		$212,525 85

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois 707 Miles.	In Iowa 400½ Miles.	Total. 1107½ Miles.
Freight	$469,133 00	$113,196 00	$582,329 00
Passengers	157,685 99	48,831 25	206,467 24
Mails	6,376 00	1,029 08	7,404 08
Other sources	84,000 00	1,970 92	85,970 92
Tot. Oct., '70	$707,143 99	$165,027 25	$862,171 24
Total actual earn'gs, Oct. 1869	$739,204 48	$175,201 65	$914,406 13

☞ The Philadelphia and Reading railroad company have leased the Philadelphia, Germantown and Norristown railroad for 999 years from December 1, 1870. The capital stock is to be increased 35 per cent.—or to $2,240,000—upon which dividends of 12 per cent. per annum are guaranteed. The first quarterly dividend of 3 per cent. will be payable March 1, 1870.

☞ The track on the Portland and Ogdensburg railroad was laid to Steep Falls, a distance of 24½ miles, on the 28th ult., and trains commenced running there on the 7th inst.

☞ Pittsylvania county, Va., has voted in favor of a county subscription of $180,000 to the Lynchburg and Danville railroad, and $150,000 to the Norfolk and Great Western railroad.

☞ The survey and location of the Albany, Sandlake and Stephentown railroad is progressing rapidly.

Journal of Railroad Law.

RAILROAD COMPANIES—COMMON CARRIERS—SPECIAL CONTRACT—NEGLIGENCE.

The facts in the late case of the Indianapolis, Pittsburg and Cleveland R. R. Co., vs. Allen, (31 Ind., 143,) are fully and clearly stated in the following opinion by

GREGORY, J.—The main question in this case arises on the construction of a contract for freighting stock, made by the parties, under which the appellee shipped six car loads of fat hogs from Indianapolis to Buffalo.

The contract provides "that whereas said railroad companies transport live stock at only first class rates, as per their tariffs, excepting only in the cases where the owner assumes certain risks and incidents specified below, in consideration of obtaining the transportation at reduced rates; and whereas the said party of the second part, in the present case assumes, and takes upon himself said risks and incidents for said consideration: now, therefore, in consideration that said railroad will transport for the said party live stock at the reduced rate of —— dollars for single decks and —— dollars for double decks, per car load, from Indianapolis to Buffalo, and charges advanced, the said party of the second part does hereby agree to take and does hereby assume all and every the risks of injuries which the animals or either of them may receive in consequence of any of them being wild, unruly, vicious, weak, escaping, maiming and killing themselves or each other, or from delays, or in consequence of heat, suffocation, or the ill effects of being crowded upon the cars of said railroad companies, or on account of being injured by the burning of hay, straw or any other material used by the owner in feeding the stock or otherwise, and for any damage occasioned thereby; and also all risk of any loss or damage which may be sustained by reason of any delay, or from any other cause or thing in or incident to, or from, or in, the loading or unloading said stock. And it is further agreed that the said party of the second part is to load and unload said stock, at his own risk, the said railroad companies furnishing the necessary laborers to assist under the direction and control of the party of the second part, who will examine for himself all the means used in the loading and unloading, to see that they are of sufficient strength, of the right kind, and in good repair and order. And it is further agreed between the parties hereto that each and every of the persons riding free, to take care and charge of said stock, do so at their own risk of personal injury from whatever cause. And the said party of the second part, for the consideration aforesaid, hereby releases, and agrees to release and to hold harmless and keep indemnified, the said party of the first part, of and for all damages, actions, claims, and suits, on account of any and every injuries, loss and damages heretofore referred to, if any occurs or happens."

The injury complained of is thus charged in the complaint "that while said hogs were in the care, custody, and possession of appellants, and while on her cars, and upon her said railroad, by reason of the insecure and insufficient doors, shutters, slides, and windows of defendant's cars, and the fastenings thereto, and by reason of the want of care and diligence of defendant in safe keeping, securing, carrying, transporting, and shipping said hogs, six of them escaped from said defendant's cars, through the insufficiency of the fastenings of the doors, shutters, slides, and windows aforesaid, and defendant's negligence."

The second paragraph of the answer sets up the special contract, and that the hogs were loaded and transported in pursuance thereof, under the direction and control of the plaintiff, the company furnished the cars and necessary laborers. A demurrer was sustained to this paragraph of the answer.

A trial was had under the general denial; finding for the plaintiff; motion for a new trial overruled.

The evidence shows that the hogs were shipped under this contract; that they were loaded by an agent of the plaintiff, who accompanied them to Buffalo; that the six hogs probably escaped through a little window that was open at the end of the upper deck of one of the cars; that after the escape of one of the hogs, the agent of the plaintiff told the conductor to fix the window, but he did not do it, and the agent fixed it himself.

It is claimed that under the contract the appellant is not liable for this loss.

In Lee vs. Marsh, 43 Barb., 102, there was an express stipulation against liability for loss "that may happen from any other cause than the wilful negligence or fraud of said receiver or his agents." In the case at bar there is no such provision. It is true, that the language of the contract is broad enough to cover loss from any cause whatever; but in The Michigan Southern and Northern Indiana R. R. Co. vs. Heaton, at this term, after a careful examination of the subject, this Court came to the conclusion, that a contract as broad in its terms as the one under consideration, did not cover liability for loss occasioned by ordinary negligence. Indeed, it is held in that case, that a common carrier can not contract against liability for loss from his own ordinary negligence; that such a condition is void as against public policy.

The railroad company had the exclusive possession and management of the cars in their transit: the shipper was to load and unload, but this did not include the time embraced in operating the train in the course of transportation, during that time, in the very nature of things, the company controlled it. The evidence shows a case of want of ordinary care on the part of the agents of the railroad company. The Court committed no error in sustaining the demurrer to the second paragraph of the answer, or in overruling the appellant's motion for a new trial.

Judgment affirmed.

☞ A party of engineers belonging to the Kansas and Galveston railway are now running an experimental line through the Indian nation, on the south side of the Arkansas river, in the direction of Fort Smith. The line leaves the Texas railroad at a point twenty miles south of Fort Gibson, on Butler's creek, and crosses the Canadian six miles above its mouth. The route is believed to be entirely practicable—the San Bois mountains being the only obstacles, and they are not difficult to overcome.

☞ Robert Garrett, Esq., of Baltimore, has been elected President of the Virginia Valley Railroad Company.

The Public Debt Statement.

The following is a recapitulation of the public debt statement October 31, 1870:

DEBT BEARING COIN INTEREST.	
Five per cent. bonds	$219,107,300 00
Six per cent. bonds	1,731,562,900 00
Total	$1,950,670,200 00
Accrued interest	48,817,662 74
DEBT BEARING INTEREST IN LAWFUL MONEY.	
Three per cent. certificates	$45,070,000 00
Navy Pension fund 3 per cent.	14,000,000 00
Total	$59,070,000 00
Interest	575,560 02
Debt on which interest has ceased since maturity	$3,398,117 85
Interest	$445,657 96
DEBT BEARING NO INTEREST.	
Demand and legal tender notes	$356,102,821 00
Fractional currency	39,289,793 89
Certificates of gold deposited	13,666,500 00
Total	$409,058,614 89
Total amount outstanding	$2,422,191,932 24
Total interest	49,538,880 72
Total debt, principal and interest, to date, including interest due and unpaid	$2,471,730,812 96
AMOUNT IN TREASURY.	
Coin	$103,131,073 48
Currency	26,815,383 93
Total	$129,946,457 41
Debt less amount in Treasury	$2,341,784,355 55
Debt less amount in Treasury October 1, 1870	2,346,913,652 28
Decrease of debt during the past month	$5,129,296 73
Decrease of debt since March 1st, 1869	$183,678,904 46

Bonds issued to the Pacific Railroad Companies, interest 6 per cent. payable in lawful money:

	Amount outstanding.	Accrued interest, not yet paid.
Union Pacific	$27,236,512	$544,730 24
Kansas Pacific, late Union Pacific, Eastern division	6,303,000	126,060 00
Sioux City and Pacific	1,628,320	32,566 40
Central Pacific	25,881,000	517,620 00
Central Branch Union Pacific—assignees of Atchison and Pike's Peak	1,600,000	32,000 00
Western Pacific	1,970,000	39,400 00
Totals	$64,618,832	$1,292,376 64
Interest paid by United States		$8,815,845 49
Interest repaid by transportation of mails, etc.		2,412,683 12
Balance of interest paid by United States		6,402,662 37

☞ The contract for building the extension of the Portsmouth, Great Falls and Conway Railroad, from Union Village to West Ossipee, a distance of twenty-eight miles, has been awarded to Mr. George F. Hitchings of Portland. Work upon it is to be begun as soon as possible.

☞ The equity case, the Kennebec and Portland Railroad Company vs. the Portland and Kennebec Railroad Company, on trial in Augusta, Me., has been decided in favor of the defendants, dismissing the bill, and thus affirming the right of the new company to the road.

Pittsburgh and Connellsville Railroad.

The track from the western end of the Pittsburg and Connellsville Railroad has reached Indian Creek, a point eight miles east of Connellsville. The bridge abutments over the creek are completed and the workmen are now engaged placing the superstructures on them. There the track will be delayed a short time owing to the two sections immediately east of the creek not being ready for it yet. By the first of January next the track will have a clear course as far up as Brook Tunnel (thirty-one or thirty-two miles east of Connellsville,) where they have a temporary line surveyed over the tunnel to enable them to move on irrespective of the completion of the tunnel. This track is of very light work and only one mile and a half in length, being at a grade of one hundred and eighty-five feet to the mile. Mr. Hoblitzel, the contractor, has been granted one month longer time to try and push the work in the tunnel, when, if he has not advanced with it sufficiently to ensure its completion in the proper time, he has agreed to place a large force on the temporary line, and get it ready at once. He has three hundred feet of heading and six hundred feet of bottoming to take out yet, but by a proper use of his time he may yet complete it. E. D. Yutzy & Co., have section 87 ready for the track, and will finish 86 in two weeks. They have now taken sections 93, 94, 103 and 104 off the hands of the Canadian Company, who had more than they could manage to put a sufficient force on. Major Yutzy has all four of the sections well manned, and is pushing the work vigorously. Patrick Keatiny has finished section 108. The President and Chief Engineer passed over the line recently, and were much pleased with the progress of the work. They say the cars will run through by the 1st of March next without fail. They have six million dollars raised for the Western extension, and will let eighty miles of it early in the spring of '71. The branch roads along the line are progressing rapidly.—*Cumberland Times, Nov. 5.*

West Wisconsin Railway Co.

The present position of the West Wisconsin Railway Co. may be briefly stated.

The company has been running over their road the past month regular trains, daily, on ninety miles of the one hundred and ten (110) miles now completed. There is graded and ready for iron about twenty more which will be shortly completed. After 1st December next there will remain only thirty four miles to build to complete the whole road which is all under contract for grading and to be finished by June next, some work upon which has already been done. The iron for the balance of the road has lately been bought on favorable terms, so favorable as not to require any bond sales in the present stagnant market, nor until six months after the track is finished and opened, which opening will take place next summer. The net receipts on the ninety (90) miles in service are about equal to the interest on the bonds sold, and the debt of the company.

☞ The Hon. Hugh McCulloch, late Secretary of the Treasury, and Mr. John H. Puleston sailed in the Scotia on the 8th inst., for the purpose of establishing an American banking house in London, under the firm of Jay Cooke, McCulloch & Co.

☞ Two additional tracks are to be built along the line of the Boston and Albany Railroad, and the work will probably be begun in the spring.

☞ MOBILE AND MONTGOMERY RAILROAD COMPANY EIGHT PER CENT. FIRST MORTGAGE BONDS, PRINCIPAL AND INTEREST payable IN GOLD. INDORSED BY STATE OF ALABAMA.

We offer the above-named Bonds for sale, and, for the following reasons, confidently recommend them as a most desirable investment.

1. THEY ARE A FIRST MORTGAGE UPON A ROAD ALREADY COMPLETED, THOROUGHLY EQUIPPED AND IN SUCCESSFUL OPERATION. The object in placing this Mortgage upon the Road, and of selling these Bonds, is to build an extension of 15 miles from Tensas, the present terminus, into the City of Mobile, which connection is now made by boat. This extension will give entire through Rail connection to *Mobile* and *New Orleans*, thus saving the cost and trouble of steamboat service, and delay of breaking bulk both at Tensas and Mobile. The Road, including 15 miles extension, is 182 miles long.

2. THE MORTGAGE IS AT A LOWER RATE PER MILE THAN ANY SIMILAR BOND NOW OFFERING, being for little over $18,000 per mile—less than the Iron and Rolling Stock are actually worth. The cost of the Road is over $30,000 per mile.

3. The Road forms the only railroad connection between Montgomery, the capital of the State of Alabama, and Mobile, its chief commercial city, making it exactly the Hudson River Railroad of Alabama, besides being a link in the great through-coast line between New Orleans, Mobile, Montgomery, Savannah, Charleston, Richmond and New York, or the interior line between the same points, via Augusta, Charlotte and Danville.

4. The Net Earnings of the Road have regularly increased at the rate of about 20 per cent. per annum since the organization in 1867, *and are NOW much more than enough to pay the interest upon all the bonds authorized to be issued*, more than one-half of which are in the hands of the Company. These earnings will be largely increased upon the completion of the Mobile and New Orleans Road, which is to be opened for through travel in about four weeks, and probably more than double upon completion of proposed extension of 15 miles.

5. They are indorsed by the State of Alabama, whose high credit is well known, her 8 per cent. currency bonds now selling at par.

6. They bear 8 per cent. interest, both *principal and interest payable in Gold*, interest payable semi-annually in the City of New York in May and November.

7. OVER ONE MILLION OF THESE BONDS ARE ALREADY PLACED—a single well-known and careful investor (Judge Onderdonk, of Long Island,) after personal examination of the Road and its resources, taking $100,000 as a permanent investment, and Executors of Estates and Banking Institutions investing in amounts of from $20,000 to $50,000 each.

8. Only $450,000 are on the market. These are offered by the undersigned at the low price of 95 and accrued interest, in currency.

SQUTTER & CO.,
No. 53 WILLIAM-ST.
DREXEL, WINTHROP & CO.,
No. 18 WALL-ST.

Portsmouth, Great Falls and Conway R. R.

The Portsmouth, Great Falls and Conway Railroad has been leased to the Eastern Railroad Company, on such terms that the stockholders of the Portsmouth, Great Falls and Conway Railroad are to receive at all times the same dividends that are paid to the stockholders of the Eastern Railroad Company and the Eastern Railroad in New Hampshire; and, with the understanding, also, that the new stock to be issued to provide means for extending the Portsmouth, Great Falls and Conway Railroad should be offered at par to the stockholders of the Eastern Railroad Company and Eastern Railroad in New Hampshire. It has been voted to issue new stock of the Portsmouth, Great Falls and Conway Railroad, to be distributed at par to the stockholders of the Eastern Railroad Company, and the Eastern Railroad in New Hampshire, in the proportion of one share in the said stock to eight shares of the stock of the Eastern Railroad Company and of Eastern Railroad in New Hampshire, held by said stockholders respectively.

Nashua and Rochester Railroad.

The Directors of the Nashua and Rochester Railroad Corporation held a meeting in Boston on the 5th inst., and organized by choosing Hon. Thos. H. Kinnicut of Worcester President, and Hon. A. H. Dunlap of Nashua Clerk. T. W. Hammond, Esq., of Worcester, was chosen Treasurer, and Thos. H. Kinnicut of Worcester, J. D. Otterson of Nashua, Chas. H. Waters of Groton, C. W. Smith, E. B. Stoddard and C. S. Turner of Worcester, N. V. Whitehouse of Rochester and T. J. Melvin of Chester, were chosen a Financial and Executive Committee. It is the determination of the Directors to make a thorough survey of the road at once, with a view of putting the whole line under contract at the earliest practical moment. With the well-known business capacity of the Directors, together with the railroad experience of many of them, the public can rest assured that this important link in the great chain of railroads between the East and West will be supplied at no distant day.

☞ The Philadelphia *Ledger* says that the Lehigh Valley Railroad Company have just consumated an important arrangement with the Erie Railway Company by the laying of a third rail on both tracks of the latter road, which is of broad gauge, from Waverly, which is the present terminus of the Lehigh Valley road, north, to Elmira, a distance of some eighteen miles. The laying of the third rail is completed, and the Lehigh Co. will in future ticket passengers and deliver freight through to Elmira instead of Waverly as hitherto.

☞ The incorporators of the proposed Wolfborough Railroad held a meeting at Wolfborough, N. H., recently and made choice of the following board of directors: John M. Brackett, Joseph L. Avery, John L. Peavy, Joseph Varney, Charles W. Thurston, Joseph W. Goodwin, Alphonso H. Rust. At a subsequent meeting of the directors John M. Brackett was chosen President, John L. Peavy Secretary, and Joseph L. Avery Treasurer.

☞ The contract for constructing the Indiana North and South Railway has been let to Chamberlain, Matthews & Co., of Lalowa, Ohio. The same firm have taken the contract to build the New Albany and St. Louis Air Line Road.

Railroad from York to Gettysburg.

The building of a railroad from York to Gettysburg direct is beginning to be agitated with decided earnestness. It is said by the Gettysburg *Sentinel* that parties abroad will furnish a large proportion of the means—probably two-thirds—if the people of York and Gettysburg and along the route will subscribe the balance, that is, Gettysburg to take $25,000 of the stock, York from $50,000 to $75,000, and between the two points about the same as the latter, the estimated cost of the road being $450,000. A project of so much importance, says the *Sentinel*, cannot but command general attention, and it is not doubted that our people will give it the most prompt and liberal aid in their power.

Martinsburg and Potomac Railroad.

The board of supervisors of Berkeley, in response to the voice of a large public meeting, has formally acceded to the terms of the contract between the above company and the Cumberland Valley, or Pennsylvania Central. The contract, in detail, we have not yet seen, but the gist of the change is that Berkeley subscribes as a stockholder and the Pennsylvania contribution stands as a loan. Immediate steps are to be, or have been, taken for the construction of the road as far as Martinsburg. Its extension this way will depend on the action of the people of Frederick. Finished only to Martinsburg, the work will be incomplete. It must come to Winchester, and we hope without avoidable delay.—*Winchester (Va.) News.*

☞ There was no sale of the interest of the State of Tennessee in the fourteen delinquent railroads, offered by auction at the State Capital on the 3d inst., there being no bidders.

To Railroad Contractors.

PROPOSALS will be received at the office of the NATIONAL RAILWAY COMPANY, No. 109 South Third st., Philadelphia, until and including the 25TH DAY OF NOVEMBER, 1870, for the CONSTRUCTION of the NATIONAL RAILWAY, extending from the City of Philadelphia to Yardleyville, on the Delaware River; and the MILLSTONE AND TRENTON RAILROAD and certain other railroads connecting therewith, and forming with said connections a continuous line from the City of Philadelphia to the Hudson River, opposite the City of New York.

Plans and Specifications may be had and examined at the office of the NATIONAL RAILWAY COMPANY, and also at the office of J. B. CULVER, Engineer, No. 23 Montgomery st., Jersey City, on and after the 10th of November.

The Company reserves the right to reject any and all bids.

HEYERDAHL, SCHONBERG & CO.,
32 Pine Street, New York.

NOTICE TO THE PUBLIC.

EXECUTIVE DEPARTMENT,
ATLANTA, GA., October 26th, 1870.

To Whom it May Concern:

By an Act of the General Assembly of the State of Georgia, approved October 24, 1870, authority is given to the Governor to lease the Western and Atlantic Railroad, the property of the State, together with all of its houses, workshops, depots, rolling stock and appurtenances of every character, for the term of twenty years, upon certain terms, and subject to certain restrictions therein named, to-wit:

The monthly rental shall not be less than twenty-five thousand dollars ($25,000) payable monthly. The lessees shall give a bond for the sum of eight millions of dollars ($8,000,000) to secure the prompt payment of the amount of rental agreed upon, and for the return of the road and its appurtenances at the expiration of the lease, or on the termination or forfeiture thereof, in as good condition as at the time of leasing, five millions ($5,000,000) of which security shall be within this State and the balance, if out of the State, shall be upon real estate or railroad property. The lessees to be worth over and above their indebtedness, at least five hundred thousand dollars ($500,000.)

The Legislature reserves to itself the right, from time to time, to examine into the affairs of the lessees, and to require that the amount of security above recited shall be maintained unimpaired.

The lessees shall not be less than seven in number, a majority of whom shall have been for five years bona fide residents of this State, and shall represent a majority of the whole interest in the lease. No railroad or express company, or any combination of them, shall, in any event, become the lessees, but they may become sureties on the bonds of the lessees. The lessees shall not charge a higher rate for local freights over said road than the average rate charged by the Georgia Railroad and Banking Company, the Central Railroad and Banking Company, and the Macon and Western Railroad Company, for like local freights over said roads, and the said lessees shall have the same rights, exemptions, privileges, immunities and guarantees, except the establishment of banks, and shall be subject to the same liabilities, disabilities, and public burdens of said railroad companies last mentioned. The faith of the State is pledged to redeem all mortgage bonds and coupons now resting on the State Road as they fall due, and to save the lessees harmless against all such bonds and coupons.

The lessees are by this act constituted a body corporate and politic for the term of twenty years, under the name and style of the Western and Atlantic Railroad Company, having such powers, liabilities and immunities, as are usual with railroad companies, and not in conflict with the Constitution and Laws of the United States, or of the State of Georgia; but they will not be allowed to make or permit any discrimination in favor of or against any other road or persons having business connections with the said Western and Atlantic Railroad.

For the purpose of carrying out this act, proposals will be received until and including the 25th day of December next and must be addressed "to the Governor of the State of Georgia, at Atlanta," and marked on the wrapper, "Proposals for the lease of the Western and Atlantic Railroad, in accordance with an Act approved October 24, 1870." The proposals must state in full the names and residence of the parties uniting to make proposition, the amount that each of the parties therein named are worth over and above their debts and liabilities, together with a full description of the character of the security which will be offered to complete the bond.

The property to be leased is a single track railroad, one hundred and thirty-eight miles in length, with full and complete equipment of shops, depots, turnouts, sidelings, engines, cars, etc., etc; etc., now in successful operation between the cities of Atlanta, in Georgia, and Chattanooga, in Tennessee. At Chattanooga the line is in direct rail connection with the Memphis and Charleston, Nashville and Chattanooga, Chattanooga and New Orleans, East Tennessee and Georgia, and the Chattanooga and Cincinnati, (now in progress of construction,) railroads, and at Atlanta with the Atlanta and Montgomery, Atlanta and Charleston, Atlanta and Savannah, and the Atlanta and Gulf lines of road, being the only railroad connection between the system of railways centering at Chattanooga and at Atlanta.

Copies of "An Act to authorize the lease of the Western and Atlantic Railroad, and for other purposes therein mentioned," approved October 24th, 1870, can be had upon application at the Executive office.

RUFUS B. BULLOCK.

By the Governor:
ROBERT H. ATKINSON,
Executive Secretary.

To Contractors.

SEALED PROPOSALS will be received until the 15th of November next for the grading, masonry and bridging of the Duxbury and Cohasset Railroad from the South Shore Railroad, in Cohasset, Mass., about 18 miles, to Duxbury, Mass.

The work will be let entire or in sections, as may be desired.

The company reserves the right to reject all bids not satisfactory.

Plans, profiles and specifications may be seen at the office of the company in the depot at Cohasset, or at the office of the Old Colony and Newport Railway in Boston.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or Bar steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable chairs or cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known, but within the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT accepts that effect and enables Railroad Managers to apply all the force and pressure desired.

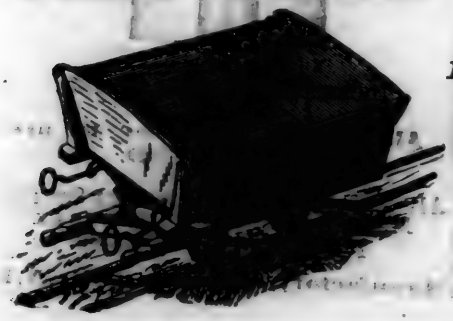
Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.



That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Departure of 20th every month will touch at San Jose Guatemala.

Steamer GREAT REPUBLIC, will leave San Francisco Dec. 1, 1870, for China and Japan.

All freight for San Francisco will go as fast, and be received until 4 P. M. FRIDAY, Nov. 18. Freight for Central American and South Pacific ports will be received until 4 P. M. on THURSDAY, Nov. 17, only.

All the usual facilities afforded shippers in collecting inland charges, &c.

For freight or passage tickets and all further information apply at the Company's ticket office on the wharf, foot of Canal street.

$18 IMPROVED WALTHAM WATCHES.

GET THE BEST, AND BUY WHERE YOU CAN BUY THE CHEAPEST.

Engineers, Railroad Men, Master Mechanics and Machinists, if you wish to obtain a genuine Waltham Watch, with all the late improvements, and run no risk whatever of not obtaining a reliable timekeeper, send for Descriptive PRICE LIST, giving full particulars of Watches, style and quality of cases, or call and examine. In Coin Silver Cases, $18. In 18K Gold Cases, $36. Ladies' Size, $70. Every Watch thoroughly examined and regulated, and if any one should prove imperfect, return it at once and we will correct or exchange it for one that is perfect, FREE OF CHARGE. H. O. FORD & CO.

Eight years with American Watch Company, 44 Tremont street, opposite Tremont House.

Watches sent to any address, and by selecting from Price List you can get as good a Watch as if selecting in person.

New York Saturday, November 19, 1870.

Atchison, Topeka and Santa Fe Railroad.

The earnings of this road for the month of August were $20,829 53; for September, $25,595 98; and for October, $26,783 35—total, $73,572 87. The company has a Congressional land grant of 6400 acres per mile, against which it has located between Topeka and the Arkansas River 790,000 acres. Of this, 385,000 acres within ten miles of the track, come into possession of the company as they build. The remaining 405,000 acres lie within ten and twenty miles of the track, and come into possession of the company upon completion of the road. The road was opened to Emporia for business, sixty-two miles, August 1, and the earnings since that time would enable it to pay 7 per cent. interest on $26,000 a mile, while its mortgage is limited to $15,000 a mile. The road is to be extended this fall from Emporia southwest, which, it is anticipated, will secure a large business in the transportation of cattle from Texas and the Indian Territory. Hon. Ginery Twitchell, of Boston, is President of the company.

From the Boston Journal, Nov. 9.

Boston, Hartford and Erie Railroad.

PROCEEDINGS IN BANKRUPTCY POSTPONED.

The Boston, Hartford and Erie question was again before the United States District Court this morning, Judge Shepley presiding, on a motion to dismiss for want of jurisdiction in bankruptcy.

Immediately upon the opening of the Court, Mr. W. G. Russell, for the petitioners in bankruptcy, said that an arrangement had been made for a withdrawal of the motion until after a contract had been made in which all parties were agreed, that the unfinished portion of the road should be completed rather than allow it to go to waste. Under this arrangement it was intended to apply for its confirmation in the State Courts where Receivers had been appointed, and also to the United States Court. The matter of the injunction was arranged so that the Court would not be troubled with it.

Judge Shepley said that, providing he should entertain jurisdiction, he had no doubt of the authority to allow the contract to be made to prevent the property of the road from running to waste.

After consultation by the counsel, Mr. Russell said that all parties had agreed to a postponement until the 29th of November, on account of a contract made with Mr. Munron under the sanction of the several State Courts in which receivers had been appointed.

The contract provides that the road from Putnam to Willimantic, now unfinished, shall be completed on the 1st of May, 1871, instead of the 1st of January, 1871, as specified in the contract made with Mr. Brooks, one of the Receivers; that it shall be finished for $300,000, instead of $400,000 in that contract, or $460,000 in a previous contract; that the sum shall be payable in Receivers' certificates running three years at six per cent. secured by the 26 miles of road between Putnam and Willimantic, and the income of the road in Connecticut as in former agreements; the certificates to be cashed by Mr. Munson at 80 per cent., and the bondholders to be allowed to take them at *pro rata*.

The Court assented to the agreement of counsel, and the case was postponed until November 29.

(It is understood that the creditors assented to this contract on account of the relief Mr. Munson would get in not being forced to build the road this fall.)

☞ The earnings of the Chicago, Cincinnati and Louisville railroad for October, 1870, were $12,986 89.

Atlantic, Mississippi and Ohio Railroad.

Pursuant to the published notice, and in conformity with the act of the General Assembly authorizing the formation of the Atlantic, Mississippi and Ohio Railroad Company, the stockholders of the Norfolk and Petersburg, Southside, Virginia and Tennessee, and Virginia and Kentucky Railroad Companies convened at Lynchburg, Va., on Thursday, the 10th inst. The several companies held meetings separately, and appointed committees of conference to report some plan for carrying out the consolidation scheme, and to determine the relative value of the stock of their respective companies. Friday the committees made the following report, which was adopted:

The committees have agreed that the value of the stocks of these several roads shall be considered, for the purpose of the organization of the Atlantic, Ohio and Mississippi Railroad Company, the same, and that the stockholders of these several companies who subscribe to the stock of the Atlantic, Ohio and Mississippi Railroad Company shall each be entitled to the same number of shares in said company that they now hold in these several companies. Subscriptions are now being made to the new company in stock of the old companies, share for share.

The organization was finally completed on Saturday, and the following officers elected: Wm. Mahone, President; directors, Thomas J. Corprew, R. C. Taylor, John A. Johnston, Ro. B. Bolling, Ro. D. McIlwaine, John F Slaughter, C. W. Statham, Wm. Watts, James A. Walker and Abram Fulkerson.

☞ The city council of Portland has recently passed an order authorizing the city treasurer to hire $7,500 on twenty years, to be applied to the payment in gold on bonds and coupons issued November 1, 1850, in aid of the Atlantic and St. Lawrence Railroad, due November 1, 1870, the railroad company having declined to pay the gold, after demand for the same.

☞ The sum of $678,000 in U. S. Certificates of Indebtedness, recently paid to the State of Massachusetts, has been received by the State Treasurer of Maine, and will be used in the construction of the European and North American railway, Massachusetts having assigned this old debt to that company to aid in the great enterprise.

Evansville and Crawfordsville Railroad.

The earnings of this road for the years ending August 31, 1869 and 1870, were as follows:

	1869.	1870.
From passengers	$185,283 68	$208,349 94
" freight	245,775 32	279,505 68
" express	12,488 48	14,334 38
" mail	9,400 00	9,583 34
" rents	295 00	1,872 00
" use of engines and cars	3,735 62	3,158 83
	$456,978 10	$516,804 17
Expenses, viz:		
Running road	$75,474 28	$80,972 99
Maintenance of track	74,638 84	128,620 53
" bridges, etc.	11,740 78	15,919 20
Repairs of engines and cars	59,061 80	51,789 59
General expenses	64,535 59	70,021 17
Change of line at Vincennes	....	2,781 41
	$285,451 29	$350,104 89
Net earnings	$171,526 81	$166,699 28
Interest and taxes	106,633 72	116,652 48
Balance	$64,893 09	$50,046 80

The receipts from all sources during the year were $516,826 46; and the expenditures, $513,641 79—balance, increase in assets, $3,184 84.

The expenditures embrace—

Transportation expenses, as above	$350,104 89
Interest and discount	103,553 13
Internal revenue tax	5,317 49
State and other taxes	7,781 86
Redemption of 28 bonds for Sinking Fund	24,900 00
Lands purchased for wood, gravel, etc.	3,099 84
Increase in wood and supplies	554 81
Construction and equipment	18,329 77
Total, as above	$513,641 79

The assets and liabilities of the company at the close of the last and preceding years, were as follows:

Assets:	1869.	1870.
Cash on hand	$40,946 22	$28,795 00
Evansville, Henderson and Nashville R. R. bonds	....	6,800 00
Due from agents	16,750 42	10,024 65
Open accounts	9,767 42	12,780 54
	$67,464 06	$58,400 19
Liabilities:		
Due other lines	$10,793 55	$19,559 10
Other liabilities	38,018 84	17,004 58
	$48,812 39	$36,563 68
Excess of assets	$18,651 67	$21,836 51

The capital account of the company has been increased as follows:

For fencing	$3,252 45
" telegraph line, Rockville Division	661 88
" tools and machinery	2,859 26
" freight cars	11,556 18
Total increase of capital for the year	$18,329 77

The total cost of the road and equipment to date is as follows, to wit:

Construction of road	$2,417,057 92
Equipment	372,969 99
Total	$2,790,027 91

This cost is represented by—

Common stock	$1,044,052 93
Preferred stock	100,000 00
First mortgage bonds	1,185,000 00
Earnings expended	460,974 98
Total	$2,790,027 91

The total length of main track is 182 miles, which has not been increased during the year.

We have laid down during the year in new sidings and extension of old ones, 2,900 feet of new side track.

The length of side track now laid down is 12 miles.

The total of main line and side tracks is 144 miles.

We have constructed at our shops three new compromise box, nine coal, and five platform cars. Total, seventeen cars.

With the exception of one push and four hand cars, this is all the new equipment added during the year.

In addition to ordinary repairs, we have rebuilt one passenger, one box, and one platform car, and four push and seven hand cars.

The cost of renewal of track for the year has been large beyond precedent.

We have paid for 56,500 cross ties at a cost of $20,356 11, and placed 50,000 of them in the track.

We have laid down 102 tons of re rolled rails, and had manufactured under inspection, imported and laid down 500 tons of what is termed "*best best*" English iron rails, making together seven miles of re-rolled and new rails.

These rails, with the splice bars and bolts used, have cost, exclusive of placing them in the track, the sum of $47,002 31.

We have also punched in the track, and put splice bars on eleven miles of old rails, making a considerable improvement in that portion of the track.

Twelve hundred car loads of gravel ballast have been put on those portions of the track most needing it.

The train service for the year is as follows:

	Miles.
Passenger trains have run	159,898
Freight trains have run	123,190
Construction trains have run	32,750
Total mileage	306,838

Showing a gain over the year previous on passenger trains of 20,938, and freight trains of 2,557 miles, and on construction trains of 1,600 miles. Total gains for the year in train mileage, 25,095 miles.

The number of freight cars hauled for the year is 20,531 loaded, and 8,757 empty. Whole number, loaded and empty, 29,288 cars, showing an excess of freight cars hauled over those of the previous year, of 3,045 loaded, and 373 empty. The whole number of miles traveled on the road during the year by freight cars is 1,674,224 miles, showing a gain in freight car mileage over the previous year of 162,685 miles.

Our freight traffic is divided between local and through freight as follows:

Local freights, 90,401 tons, giving a revenue of	$186,066 95
Through freights, 68,606 tons, giving a revenue of	93,438 73
Total tonnage 159,007 tons. Total revenue	$279,505 68

It is observable that our through freights amount to 33⅓ per cent., and our local freights

The number of passengers carried during the to 66⅔ per cent. of our whole revenue of freights and that the through freight tonnage is 43½ per cent. of our whole tonnage.

year was 167,499, being 19,956 passengers in excess of the year previous.

The gross earnings of the road for the year are $516,804 17, being $59,826 07 in excess of the gross earnings of the year previous.

The working expenses, including repairs and renewals of equipment and track, are $350,104 89, being $64,653 60 in excess of the year previous.

This excess is chiefly accounted for in the unprecedented expenses already specified in renewal of track.

The proportion of expense to gross earnings has been greatly affected by the low rates on through freight to the east.

The same freight rates for the past year, which we received for the year 1867, would have added $75,000 to our gross earnings, without at all increasing our expenses.

Whilst we do not hope to regain such rates on such business we have cause to hope for a material increase upon the rates of the past year, and that our local and through North and South freight traffic will early bear such altered proportions to our through East and West traffic as to materially increase our average freight rates.

In previous annual reports it has been repeatedly stated that the current renewals of track were by no means in proportion to its wear and destruction. It is now estimated that at least from eleven to twelve miles of new rail will be required, to keep the track in safe condition, for the coming year.

In equipment it is believed that two or three locomotives will be required, and at least fifty coal and lumber cars, and fifty box cars should be placed upon the road during the coming year.

It will very early be necessary to place a second work or repair train on the road, but our finances do not warrant it at present.

The redemption of our mortgage bonds by the sinking fund has been made as stipulated with the bondholders, and up to date fifty-seven bonds of $1,000 each, have been redeemed.

The Board has entered into arrangements with the city of Vincennes, and the other railroads passing through that city, for a Union passenger depot at that important junction.

This has required a change of our track for one and one-half miles, in and adjacent to Vincennes, without at all lengthening our line. The total cost of this change will probably not ultimately exceed $5,000.

A very commodious brick eating house, with passenger rooms, and all necessary offices, is being erected by private individuals, under written agreement with the railroad companies, which will insure the comfort and convenience of all travelers and train employees at that point.

Since our last annual meeting, the Indianapolis and Vincennes railroad has been opened. Its chief effect upon this road so far, is to take from us the traffic of several towns, and neighborhoods on and near the lower end of its line, which was formerly tributary to this line.

The St. Louis, Vandalia and Terre Haute railroad has also been opened, and has taken from us considerable traffic, formerly brought across the Wabash to our road. It is to be observed that these diversions of business have not prevented a considerable increase in our traffic.

The Evansville, Henderson and Nashville railroad is confidently expected to open before the first day of January next, and is relied upon for giving us a very material increase in traffic.

The Evansville, Terre Haute and Chicago railroad, and the Chicago, Danville and Vincennes railroad, composing the new direct line from Terre Haute to Chicago, though somewhat delayed in their progress, by the effect on the bond market, of the Franco-Prussian war, are both in a fair way for early completion.

The former road is nearly all graded, almost all the ties are delivered, thirty-two miles of rails are in process of delivery, track laying has commenced, and the track will be laid more than half the distance this fall, and it is expected to be completed to Danville, Ills., early next summer.

The managers of the Chicago and Danville portion of the line, assure us that they will complete their road to Danville, at latest by the fourth of July next.

The short section of the lately projected Louisville, New Albany and St. Louis railroad, lying between our road at Princeton, Ind., and the Wabash river at Mt. Carmel, Ills., a distance of ten miles, will be open, and run in connection with this road by the first of January. The road between Princeton and New Albany will not be opened, judging from the character of the work

upon it, for at least two years. This short section will accommodate Mt. Carmel, and a very good country adjacent in Illinois, and bring us some accessions to our traffic.

We have much to hope from the rapidly growing manufacturing interests of Terre Haute, and the coal mining interests now being developed on our line, twenty miles south of that city, about Shelburn and Curryville.

The rapidity of the growth of both Evansville and Terre Haute, our chief terminal cities, as well as the general healthy development of local interests along the line, are very encouraging.

GENERAL BALANCE SHEET, AUGUST 31, 1870.

Construction of road		$2,417,057 92

Railroads in California.

California is making rapid progress, all things considered, in the construction of a home railroad system, connecting with and supplementing the transcontinental road. Three or four principal lines are now being built, which will form the commercial spinal cord of the Pacific coast, its northern end reaching the pine forests, coal beds, and wheat fields of Puget Sound, and the southern end running through the semi-tropical portion of California—the land of the olive, citron, orange and lemon—to the Colorado river and the door of our sister Republic of Mexico. The southern portion of the road will form the Pacific end of the main Southern Pacific transcontinental line. Eighty miles of it—from San Francisco to Gilroy—are already in operation, while 156 miles—from this city to Junction station, via the Central Pacific Road—have long been in use. Nearly 100 miles of the northern end of the great railroad chain are now completed, and form the California and Oregon branch of the Central Pacific Road. The telegraph to-day informs us that J. H. Strowbridge, who acted as Working Superintendent of the Central Pacific Road, has been placed on the California and Oregon Road. He has taken with him a large force of Chinese laborers, who are to be added to the Mongolian army that is already at work on the line. The determination is to reach Tehama—123 miles from Sacramento—before the rain sets in. With Strowbridge leading, and the Central Pacific Company backing, there can be little doubt that this intention will be accomplished. The California and Oregon Road runs through the entire length of the Sacramento Valley, which is the great granary of the State, and the climate of which being much more humid than that of the South, is our most reliable seat of wheat production. The surveyors of this road have reached a point in Shasta Valley nearly 200 miles north of Sacramento, and not far from the Oregon boundary, toward which State both the survey and the grades are rapidly pushing. Progress is also being made for a local road in Oregon, which will be met by and connect with the California and Oregon line in progress northward. This system of railroads will have a total length of 1,300 miles, of which at least 375 miles all told will be completed by the close of November.

We are gratified to be in a position to state—and here is a most important fact for San Francisco—that the parties who are pushing the California and Oregon Road southward are also actively preparing for immediate work on the Southern Pacific. The lately advertised consolidation of the San Jose, Gilroy and Southern Pacific Roads was the initiatory step in the work of progress on the latter road. There is much room for congratulation that such a great internal railroad system is not only mapped out, but is actually making the most satisfactory progress at both its southern and its northern ends. The building and completion of this railroad system must bring both employment, money and population to our State, while it will vastly enlarge the circle of land that may be profitably cultivated. All of these local roads will, of course, be feeders of, and will in time be fed by the main Central Pacific line. The profits of the transcontinental road, on its Pacific side at least, have already surpassed the expectations of its most sanguine friends, but when the Pacific coast is supplied, as it is rapidly being, with much-needed local railroads, and when its invariable western attendants—population and wealth—follow, the profits of the line across the continent will be as greatly increased as our prosperity will be stimulated and strengthened.—*San Francisco Bulletin.*

New Railroad Project in Ohio.

The enterprise of building a northwest road, of which we spoke some weeks since, has at last assumed a somewhat definite shape, and the surveyors are now out on the line. The road as contemplated, will leave the Ohio river at a point near Ironton, pass through the iron and coal regions of Southern Ohio on to Hillsboro, through Vienna, to Wilmington, crossing the Little Miami Railroad at Clinton Valley; thence to Dayton, where there will be connections to Chicago and Toledo. The road, if built, will be an important one, as the southern end will no doubt soon connect with the Chesapeake and Ohio Railroad, when a complete line of road will be opened from Chicago to Norfolk. This enterprise should meet from our citizens every encouragement in their power. The route is a practicable one, and would develop the interests of this county to a great extent, besides opening up the rich mineral fields of Southeastern Ohio. Coal would be cheapened and manufactures encouraged. Let the road be built by all means, and whatever is necessary to be done let our citizens actively encourage. We understand that $4,000 per mile will grade the road, and that the Chesapeake and Ohio Company will finish it. We shall know more definitely the shape matters will take when the engineers report.—*Wilmington (Ohio) Journal.*

St. Paul and Chicago Railroad.

An important section of the railroad lines of Minnesota and Wisconsin has been finished by the opening of the St. Paul and Chicago Railroad to Red Wing. The road will be eventually extended to Winona, and by way of the St. Paul and Milwaukee Road its passengers and traffic will come to this city. From St. Paul to a point on the river opposite Hastings the road runs nearly on an air-line, the whole distance being 19.1 miles. At Hastings an iron bridge, six hundred feet long, is to be constructed, upon which work is already begun, the cost of which is estimated at $200,000. It is to be built with three piers and an improved draw. The distance from Hastings to Red Wing is twenty-one miles, and the last work of laying the rails and getting them in readiness for trains, was last week completed. Along the whole line of the road work will be continued through the winter. There will be finished this year fourteen miles from Minnesota City to the north bank of White River. It is sixty three miles from Winona to Red Wing. The completion of the whole line will shorten the time between Minneapolis and this city very materially.—*Milwaukee, Wisconsin, Nov. 9.*

Albany, Sand Lake and Stephentown R.R.

The Troy *Whig*, of Nov. 12th, says there have been several surveys of the new railroad which is to connect with the New York Central and Hudson River railroads at East Albany and run thence through Sandlake to the Hoosak tunnel, the last of which has just been completed, and it is thought the route thus laid out will be the one adopted. It has been found that the best grade can be obtained by passing north from Albany to within a mile of Troy, whence the road is to be turned eastwardly through Sandlake. It is claimed that this road will cut off forty six miles of the distance between that vicinity and the tunnel, as traveled on existing roads. The residents along the proposed route are highly pleased with the prospect of having a railroad outlet for their produce, and we are told have subscribed for considerable of the stock.

☞ The directors of the Ware River (Mass.) Railroad have located the section of the road from Ware to Baldwinsville by way of the Burnshirt valley, according to the terms of the charter. The route through East Templeton was found to have long grades of more than sixty feet to the mile, and would be more expensive to build and to operate, though promising more business than the easier route which passes a little west of the village of Templeton.

☞ A corps of engineers, under the charge of N. P. Hobart, have commenced to make a survey for a route for the proposed extension of the Wilmington and Reading Railroad from Birdsboro' to Wilmington. The route will probably be located.

☞ At Thurlow Station a branch railroad is is now being built to connect the Philadelphia, Wilmington and Baltimore Railroad with Front street, in the new borough of South Chester, and to extend eastward to the city line.

☞ The Portland and Kennebec Railroad Company advertise that they are ready to pay the bonds given by the cities and towns on the road, twenty years ago, to help build the road.

Movements of Produce.

The Receipts of certain articles of domestic produce at the port of New York for ten months from January 1st, were:

	1869.	1870.
Ashes, bbls.	7,809	6,521
Breadstuffs—		
Wheat flour, bbls.	2,645,951	3,234,637
Cornmeal, bbls.	178,422	163,506
Wheat, bush.	17,868,847	18,340,024
Rye, bush.	270,447	467,016

☞ A transfer track is being laid at the railroad depot in La Crosse, for the transfer of freights and cars across the river, between the Southern Minnesota and the Milwaukee and St. Paul Railways. It is to be so constructed as not to be affected by high or low water.

Buffalo and Lake Huron Railway.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JUNE 30, 1870.

The directors, in their report for the half-year ending 31st December 1869, were enabled to announce that the agreement with the Grand Trunk has been confirmed by the Canadian Legislature, and having received the royal assent, had become law.

The interval since that date has been mainly occupied by your board in carrying out the multifarious and laborious readjustments, conversions of stocks, and other arrangements rendered necessary by the act, and in furtherance of the resolutions passed at the last general meeting of the proprietors. Thus, the Buffalo and Lake Huron ordinary stock—viz., 60,000 shares of 20*l* 10s. each, representing nominally 1,230,000*l*., has been called in for the purpose of cancellation and conversion into half Grand Trunk fourth preference, and half Grand Trunk ordinary stock.

The late Buffalo and Lake Huron preference shares have, in like manner, been called in for cancellation and conversion into the company's newly created shares, 52,513, of 10*l*. each, which will henceforth constitute the sole share capital of the Buffalo and Lake Huron, and be dependent for dividends on the sums receivable from the Grand Trunk after payment of the bond interest, management, and other expenses.

Under the act the annual sums payable by the Grand Trunk to the Buffalo and Lake Huron are as follows:

For the year ending 30th June 1869	£42,500
" " 1870	45,000
" " 1871	50,000
" " 1872	55,000
" " 1873	60,000
" " 1874	65,000
" " 1875	66,000
" " 1876	67,000
" " 1877	68,000
" " 1878	69,000
" " 1879 and thereafter	70,000

The first two amounts as above have been promptly settled by the Grand Trunk, and are in course of rapid distribution in the terms of the act. When this is effected, all due interest on the entire bond debt up to date will have been discharged.

Pending the final adjustment and completion of these operations, the position of the company financially must be regarded as transitional, but the ultimate result may be approximately indicated as follows:

The Bond Debt.

Bonds due 1872	=	£125,000
" 1873	=	175,000
" 1874	=	248,500
" 1875	=	96,192
" 1876	=	123,866
		£763,558

all bearing interest at 5½ per cent. per annum, which will absorb 41,995*l*. per annum, whilst the surplus of rents receivable from the Grand Trunk it is expected will be sufficient to pay the following augmenting dividends on 525,135*l*. of share capital.

For the year ending—	
30th June 1871,	1½ p. ct. per ann. on the par price.
" 1872,	2½ " " "
" 1873,	3½ " " "
" 1874,	4½ " " "

with a further small annual addition, until for the year ending 30th June 1879 and thenceforward the dividend should be, at least 5 per cent.

It is with satisfaction that the board are able to announce the termination of the differences and litigation between the town of Brantford and the company. This was facilitated by the visit of the secretary, Mr. Short, to Canada, in the spring of the year, which was followed by an offer from the Corporation to compromise their claim by a sale of their interest in the bonds of the railway held by them. The opportunity thus presented to terminate a state of things inimical to the interests of all concerned the directors considered it their duty to embrace, and they accordingly purchased the bonds (82,300*l*.) and overdue coupons held by the town, on terms equitable to both parties, and by which, a considerable pecuniary saving to the company is effected. To carry out this purchase, a loan of 60,000*l*. has been contracted, against which bonds and unissued shares of the company have been hypothecated.

St. Louis and the Southeast.

It is about a year since the St. Louis and Iron Mountain Railroad was completed to Belmont, opposite the northern terminus of the Mobile and Ohio Railroad. The extension to that place was made expressly for the purpose of giving St. Louis direct rail connection east of the Mississippi to the South and Southeast. In order that the connection might be as perfect as possible and that cars might run through from St. Louis to New Orleans, Mobile, Nashville, Chattanooga, Atlanta, Augusta, Savannah, Charleston, and the other chief towns of the South, the gauge of the Iron Mountain road was changed from the 4 feet 8½ inch gauge common in the North, to the 5 feet gauge, which prevails south of the Ohio. Thus the Iron Mountain road deliberately relinquished connections with the North and East in order to secure closer relations with the South. It is true that no immediate sacrifice was required, for at that time loaded cars were not transferred across the Mississippi at St. Louis; but the prospective completion of the bridge at that point promised a connection which could hardly fail to be of the greatest advantage. But by this change of gauge the Iron Mountain road was committed to the interests of the South and St. Louis. It is the only road which must take freight exclusively to St. Louis and none through it.

When the extension to Belmont was completed we described the importance of the connections which could be made by a ferry tranferring cars between Columbus and Belmont. The Iron Mountain Company at once made preparations for such a transfer, purchased a boat, and constructed the grade down the river bank. Yet the running of the through trains has been delayed until the present time. This delay has been caused by high water in the Mississippi and other causes which have hindered the construction of the inclined plane on the Kentucky side. Charges have been made that the Mobile and Ohio Company was purposely delaying its completion, but that company in its annual report has expressly denied them.

But at last the arrangements for the transfer have been completed, and the first through passenger train from St. Louis to the South Atlantic coast left St. Louis on the morning of the 20th inst., with a party of excursionists. The train, consisting of one day, one sleeping and one baggage car, left St. Louis in the morning, ran through without delay and with only short halts to Nashville in less than twenty-four hours and arrived at Atlanta, six hundred and sixty-eight miles from St. Louis, on the morning of the second day, in but thirty-three hours running time. Thence the train was run to Macon and Savannah, from Savannah to Augusta, from Augusta to Charleston, back from Charleston to Augusta, thence by the direct route to Atlanta, to Chattanooga by the route followed in the outward journey, thence by the Memphis and Charleston Railroad to Memphis, whence the run was made homeward by way of Grand Junction, we believe, and not by the Memphis and Louisville line.

It is announced that a freight express line will dispatch loaded cars between St. Louis and any of the points mentioned without breaking bulk,

and also that passenger cars will be run through between St. Louis and Chattanooga in about twenty-four hours.

The importance of these connections to St. Louis is not easily over estimated. They give it access at once to the whole South and Southeast by direct and unbroken routes such as no other city except Louisville can boast. And the importance of the connection is the greater because its relations with these sections are naturally intimate. It is or can readily be made a great receiving depot of all the agricultural products needed in the South—corn, forage, flour, provisions and mules—and it should also be able to supply the South with many important manufactured articles, such as agricultural implements and machinery. In this trade it will have Louisville now and Cincinnati hereafter (when it has a Southern Railroad) to compete with, but it ought certainly to obtain a large share of it, and in products peculiarly western to hold the first place.—*Chicago R.R. Gazette*, Oct. 29.

Receipts and Expenditures of the U. S.

The following is a statement of the total net receipts and expenditures of the government of the United States from its organization, March 4, 1789, to June 30, 1870. The detailed statement of the receipts and expenditures, from which this table is taken, is now being prepared at the Treasury Deparment to accompany the annual report of the Secretary:

RECEIPTS.

Customs	$2,774,990,382 66
Internal revenue	1,488,722,307 70
Direct tax	26,659,317 05
Public lands	189,824,825 40
Miscellaneous	198,878,498 58
Dividends	9,720,136 29
Premiums	159,118,950 34
Interest	485,224 45
Total net receipts	$4,847,394,642 47
Add gross amounts received from loans & Treasury notes	6,825,772,517 91
Total	$11,673,167,160 38

EXPENDITURES.

Army	$3,926,888,822 61
Navy	816,220,310 16
Indians	122,616,573 33
Pensions	221,153,156 32
Miscellaneous	858,154,928 33
Premiums	48,096,739 68
Interest	1,046,827,786 17
Total net ordinary expendit'res	$7,034,958,326 55
Add gross expenditure for redemption of loans and Treasury notes	4,357,930,869 86
Total	$11,492,889,196 41
Apparent balance with the Treasurer June 30, 1870	180,277,963 97
From this apparent balance must be deducted the following unavailable items in the hands of depositories credited:	
Treasurer	$2,673,847 46
Deposited with the States	28,101,644 91
	30,775,492 37
Leaving the actual net available balance in the Treasury June 30, 1870	$149,502,471 60

☞ The directors of the Albemarle and Chesapeake Canal are: Marshall Parks, M. Courtright, A. C. Powell, H. A. Richmond, Washington Reed, Henry Ghiselin and S. K. Jackson. President, Marshall Parks. Treasurer, B. F. Tebault.

List of U. S. Patents.

Issued for Improvements in Railroad Construction, Rolling Stock, &c., for the week ending Nov. 15th, 1870, and each bearing that date. Reported weekly for the AMERICAN RAILROAD JOURNAL, from the Office of DAVID A. BURR, Solicitor of Patents and Attorney in Patent cases, Washington City, D. C.

No.

109,182.—Lock for Railroad Switches, Alonzo W. Cram, St. Louis, Mo.

109,188.—Dumping Car, Peter K. Dederick, Albany, N. Y.

109,195.—Steam Boiler, Daniel Flynn, Fall River, Mass.

109,210.—Railway Rail Joint, Noah Hill, Leavenworth City, Kansas.

109,233.—Device for delivering Mail Bag to Cars, James B. McLain, Newark, Ohio, assignor to Henry W. Wyeth, same place.

109,237.—Mode of preventing the heating of Axles or Journals, Eliza D. Murfey, New York, N. Y.

109,239.—Material for Bearings, and Journals, Eliza D. Murfey, New York, N. Y., assignor to "The Manhattan Packing Manufacturing Co.," same place.

109,310.—Railway Car Wheels, John N. Farrar, Pepperell, Mass.

109,312.—Railway Car Spring, Herman Gardiner, New York, N. Y.

109,319.—Journal Bearings, David A. Hopkins, Jersey City, N. J.

109,320.—Railway Car Wheel, Lewis B. Hunt, New York, N. Y.

109,326.—Opening and Shutting Device for Railroad Car Window, John F. Lash, Toronto, Canada.

109,346.—Wood and Coal Dumper for Railways, Richard B. Robbins, Adrian, Mich.

109,347.—Railway Car Bumper and Draw Head, Alex. Ross and John Arthur, Freeport, Ills.

109,358.—Spring for Railway Car Truck, William M. Taylor, Newburg, Ohio.

American Iron Industry.

The report of the Secretary of the American Iron and Steel Association shows a wonderful growth of the Iron industry of the country. Several of the Western States, which a few years ago were dependent upon other sources for their Pig Iron, are now practically self-sustaining. The total product of Anthracite Pig Iron in the United States has grown from 519,211 tons in 1860 to 971,150 tons in 1869. The product of bituminous coal furnaces has increased with equal rapidity. It amounted to 553,341 tons in 1869, which was an increase of 68 per cent. over the product of 1868, of 74 per cent. over that of 1867, of 105 per cent. over that of 1866. In 1854 the product in this class was 54,485 tons, since which the annual average increase has been 54½ per cent. The production of Charcoal Iron in 1869 was 392,150 tons, viz: 88,000 in the New England States, 184,000 in the Middle States, 206,500 in the Western States, and 13,650 in the Southern States. In the Southern States a number of old charcoal furnaces that were out of blast when the war ended have recently been repaired and lighted. Three of these are in Alabama, which State is making a great effort to develop her mineral resources. The total product of Pig Iron of all kinds in the United States in 1869 was 1,916,641 tons, having been more than doubled in a period of four years. The production of railroad Iron in 1869 reached 593,586 tons of 2,000 lbs. each, against 189,818 tons in 1861. Of the product of rails for 1869, 9,650 tons were Bessemer Steel. During 1869, we imported 345,000 tons, making, with the 593,586 tons manufactured here, a total consumption of 938,586 tons. Taking into consideration the growth of our railroad system, the requirements of the country for the coming five years will doubtless average over a million tons per annum. The product of rolling mills other than rails for 1869 was 642,420 tons, comprising 292,500 tons of bar and rod, 36,320 tons sheet, 68,000 tons plate, and 17,200 tons hoop Iron, 146,400 tons spikes and nails, and 72,000 tons axles, &c. Of the same kind of manufactures we imported 120,795 tons; making a total consumption of rolled Iron other than rails, in 1869, of 763,215 tons. Notwithstanding the substantial progress which the American Iron industry is making, we thus continue to draw heavy supplies from Great Britain, the shipments thence to the United States in 1869 of all kinds reaching 596,554 tons. Of this quantity, 300,446 consisted of rails. Great Britain increased her exports of railroad Iron to all parts last year to 53.5 per cent., Russia being the next best customer after the United States.

Lancaster Railroad.

Last winter the Legislature of Massachusetts chartered the "Lancaster Railroad Corporation," with authority to build a new railroad from some point on the Worcester and Nashua Railroad, in Lancaster, through the towns of Bolton, Stow, Acton and Hudson to the Sterling and Lancaster branch of the Fitchburg Railroad. The Sterling and Lancaster branch is chartered, but not built; the present plan is to build the proposed road immediately, making a new route from the city of Boston, leaving the Nashua road in Lancaster, and entering on the Fitchburg road at West Concord, thus obviating the present necessity of going around by Groton Junction. Mr. C. C. F. Bent, formerly engineer of the Lake Superior and St. Paul Railroad, has been appointed engineer of the Lancaster road, and is engaged in locating the line. The directors now expect to break ground in earnest next spring. The president of the Lancaster road is George A. Parker, Esq., of Lancaster, who is himself one of the first engineers of the country.

Iron Trade of Lake Superior.

The following is a comparative table showing the shipments of ore from the ports of Marquette and Escanaba, for the season up the 10th day of November:

IRON ORE.

	Gross tons.	Net tons.
From Escanaba	373,076	417,844
From Marquette	366,671	410,671
Total ore	739,747	828,515

PIG IRON.

From Escanaba (to Nov. 1,)	6,353	7,115
From Marquette "	22,914	25,664
Total pig iron	29,267	32,779
Total ore and pig iron	769,001	861,294

☞ An adjourned meeting of the stockholders of the James River and Kanawha Canal Company was held in Richmond on the 10th inst. The President and Board were authorized to negotiate a loan of $500,000 on the bonds of the company to pay for the repairs of the canal. Major Carrington was re-elected President.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 19, 1870.

Stock Exchange and Money Market.

Money, which ruled quite easy most of the week, closed up with renewed activity, in view of the exciting war reports and rumors, and rates on call loans were advanced about 1 per cent., or 5@7 per cent. per annum. The discount market has shown but little animation. The offerings of prime commercial paper have been quite limited for the season, and have met with a prompt sale at from 7@8½ per cent. per annum. The last weekly exhibit of the city banks was deemed a very favorable one, due largely to the even working of the domestic exchanges, which enabled the banks to add $1,851,221 to their deposit line, and $2,224,848 to their specie hoard, while losing only $167,232 of their legal tender reserve. The loan and discount averages were enlarged $2,882,460. The circulation has varied little in volume. The Treasury Office reported its cash (coin and currency) balances up to $68,709,752 against $68,807,137 the preceding Saturday. The receipts from Customs, for the week, were $2,808,929; the coin interest disbursements, $3,141,790, and the specie exports only $410,135. Government marketed a million of gold on Wednesday of the current week, eliciting bids to the amount of $2,990,000. The Treasury Department reported its coin reserve at the close of the past week at $97,500,000, including $15,000,000 on deposit on private account, and represented by outstanding coin certificates. On the 1st inst., the aggregate of the Coin balance was $103,181,073. The currency balance is now $24,000,000, against $26,815,384 on Nov. 1.

The specie reserve of the city banks according to the latest return is $17,124,489, against $26,755,693 same time last year. The city bank deposits are now $196,620,937, against $188,754,806 week ending Nov. 12 1869. The legal tender reserve amounts to $53,822,019, against $51,095,661 same time last year. The circulation now stands at $32,379,568, against $24,212,867 same time last year. The loans are now $266,176,866, against $251,180,557 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $80,508,571 a day, against a daily average of $91,203,229 the preceding week. The current weeks' exchanges average about 91⅞ millions a day. The city banks, last week, reported a gain of $2,224,848 of specie, and $1,851,221 of deposits, with a loss of $167,232 of legal tender notes. They increased their loans $2,882,460; and their circulation, $45,057.

The city bank exchanges on Wednesday were $94,148,590.

The coin reserves of the Treasury Department on Monday were $97,500,000, including about $15,000,000 on deposit on private account; currency balances, $24,000,000.

National Bank notes to the amount of $205,180 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $335,740,988, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $33,379,124 leaving, with the existing 1,612 banks, (having an aggregate capital of $430,299,301,) an actual circulation at this date, of $302,361,864. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $345,431,400; and for the public deposits, $15,884,500—making a total of $361,315,900. The Treasury Department last week redeemed and destroyed $555,877 of worn and mutilated fractional currency, and issued $740,973 of new.

The abstract of the reports of the national banks of the United States, which has been completed at the office of the Comptroller of the Currency, shows that they possess $18,459,170 in specie and legal tenders; $77,198,121 in fractional currency, and $2,077,705 in three per cent. certificates. The amount of individual deposits reported is $501,259,757.

The U. S. Sub-Treasury receipts, week ending with Nov. 12, were $4,620,024 in coin, (including $2,807,000 from customs duties,) and $4,225,670 in currency; payments, $4,642,280 in coin, (including $3,141,790 of coin interest,) and $3,890,801 in currency; balance at the close of the week, in-

cluded $60,449,617, of coin, against $60,471,872 the preceding Saturday, and $8,260,135 of currency, against $7,925,265 at the close of the preceding week. The business of the Office on the first two days of the current week, was as follows. On Monday, receipts, $352,533 in coin, (including $324,000 from customs,) and $1,112,961 in currency; payments $475,912 of coin (including $416,000 of coin interest), and $423,982, of currency. On Tuesday, receipts, $498,621 in coin (including $416,536 from customs), and $326,835 in currency; payments, $195,701 in coin (including $165,000 of coin interest) and $235,312 of currency. The balance at the close of business on Tuesday included $9,040,635 of currency, and $60,629,158 of coin against a balance a week previous of $8,268,668 currency, and $60,390,216 coin.

The aggregate receipts of the U. S. Sub-Treasury in October were $51,530,870, including $11,724,402 from customs; aggregate payments, $47,417,035, including $2,112,636 of coin interest.

The U. S. Sub-Treasurer issued in October $4,934,500 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $2,004,044 of coin certificates, received for customs.

The Sub-Treasury cash balance on Thursday morning included $60,972,617 of coin, and $9,689,818 of currency.

Government revenues yielded less satisfactorily during the week. The excises during the week yielded about 2¼ millions; customs at the port of New York, $2,245,044, and at the outports about $750,000 (in coin) more, making the grand total income for the week equal to about $5,594,424 in currency. The income of the Government, from excises, since July 1, 1870, has been $68,545,510.

The Gold speculation has been more active and the price has been advanced to 112⅞, influenced mainly by the more exciting war reports and rumors from Europe. The latest quotations on Wednesday was 112⅜. The customs export call was light. On Wednesday, Government marketed $1,000,000 of gold at from 112 05@112 21. The bids reached an aggregate of $2,990,000. The aggregate of the November interest obligations on the public debt is $23,851,629, of which the New York office has already paid off about 11½ millions. There has been rather more activity in the Gold Loan market, and rates have been against the borrowing interest.

Under the November programme, the Treasury Department will sell Gold, during the remainder of the month, as follows: Wednesday, November 23, $1,000,000; Wednesday, November 30, $1,000,000. And purchase Five Twenties, as follows: Thursday, November 24, $1,000,000.

The export drain last week was $410,134 against $3,156,924 week ending with Nov. 5; $303,562 week ending Oct. 29; $556,180 week ending Oct. 22; $654,323 week ending with Oct. 15; $802,174 week ending with Oct. 8; and $465,260 week ending with Oct. 1. The shipments thus far this year have been about 55⅛ millions, against 29⅞ millions same time in 1869; nearly 68¼ millions same time in 1868; 44⅛ millions same time in 1867; over 56⅝ millions same time in 1866; and 25⅛ millions same time in 1865. The exchanges at the Gold Exchange Bank, which were 85¾ millions on Thursday of last week, were 96⅛ millions on Saturday, 79⅜ millions on Monday of this week, and 119 millions on Tuesday. On Wednesday they were 72½ millions.

The customs revenue of the port on Wednesday reached $471,000.

The customs demand for Gold last week, averaged $388,450 a day; thus far, this week, it has averaged $360,000, a day, or equal to a weekly aggregate of $2,160,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $95,609; and since Jan. 1, 1870, $11,204,523, against $14,839,067 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $126,629,705 against $117,788,423, same time in 1869.

The exports of specie, from this port, last week, were $410,134 against $123,221 same week last year; and since Jan. 1870, $55,276,538, against $30,069,340 same time in 1869. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $3,141,790; and since Jan. 1, 1870, $78,569,047 against $82,431,495 same time in 1869.

The customs revenue at the port of San Francisco, from Jan. 1 to Nov. 3d, was $7,361,000, against $7,304,000 same time last year.

The specie exports by steamer and railway, from San Francisco, from Jan. 1, 1870 to Nov. 3d, were $30,298,212, against $33,697,992 same time last year.

Foreign exchange has been in more demand and quoted firmer for prime bankers' bills. Bankers' sixty day bills on London closed on Wednesday at 109⅛@109⅜; sight bills on London, 109¾@110. The offerings of produce bills have been more liberal. The week's exports of domestic produce have been to the currency value of $5,808,002, and sihce January 1, 1870, $163,937,782, against $173,048,188 same time in 1869.

Government securities have been somewhat variable in price, with a very moderate inquiry noted. At the close, the market was tame, but steady. Government bought in a million of Five Twenties on Thursday at about the current rates.

U. S. sixes of 1881 closed here on Wednesday of the current week at 113¼@113⅛; U. S. Five-Twenties of 1862, ex-coupon 107⅞@108; U. S. Five twenties of 1864 at 107@107⅛; U. S. Five-Twenties of 1865, 107@107⅛; U. S. Five-twenties of 1865 consolidated, 107¼@107⅜; U. S. Five Twenties of 1867, 109⅜@109½; U. S. Five-twenties of 1868, 109⅝@109¾; U. S. Ten-forties at 106⅜@106½; U. S. Six per cent. currency bonds, 111⅛@111⅜.

State bonds have been in good demand, through the week, and have been quoted generally firmer, though closing heavily.

Railway bonds have been in fair request for investment purposes at well supported prices. Central Pacific Sixes have been selling quite freely at 90¾@91. The Union Pacific Sixes closed on Wednesday at 82½@82¾.

The First Mortgage six per cent. bonds of the Chesapeake and Ohio Railroad have been in demand at 90 per cent. and accrued interest. This Loan, which was on the market early in the current year, sold more rapidly than the Company had need of money; and, accordingly, through the summer and fall months no effort was made to place the bonds. In view of the prevailing ease in Money, and the increasing investment call for substantial Railway Mortgages, the Company has again authorized its financial agents, Messrs. Fisk & Hatch, to offer a further portion of the Loan at the original price of 90 per cent. and accrued interest. The bonds are a Gold Loan, principal and interest being made payable expressly in United States coin. They have all the attributes of a first-class security and will undoubtedly meet with renewed favor from investment buyers, now that the Loan is again brought on the market.

Railway and miscellaneous share property has been less active and irregular in price, closing weak and feverish.

The latest quotations at the London Stock Exchange compare as follows with former returns:

General business has been fairly active in the line of Cotton and Breadstuffs, the former closing weak, while Wheat and Flour closed buoyantly, Provisions show but little change, Petroleum favored sellers. Middling upland cotton closed tamely on Wednesday at 16⅛ cts. per lb. The stock of cotton now here is given at about 48,500 bales. The receipts at the port this week, have averaged about 7,000 bales a day. The receipts at all the ports, since Sept. 1, 1870, have been 674,547 bales, gainst 612,800 bales same time in 1869–'70; exports same time 285,500 bales, against 258,500 bales same time in 1869–'70; stock on hand at latest dates, 314,400 bales, against 236,405 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870 have been 13,497 pkgs., against 18,483 pkgs., same time in 1869. From Boston, 5,074 pkgs. in 1870, against 6,762 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves of good quality continue in fair request and steadier in price; we quote the range at from 8@16c. per lb.; week's receipts, 6,633. Milch cows quiet at $40@$100 each, receipts, 113. Veal calves have been in less demand at from 5@12c. per lb.; receipts, 2,297. Sheep in limited request at from 4@6½c.; lambs at 5@8¼c. per lb.; receipts, 43,180. Swine have been in demand at 7½@7⅞c. per lb.. all live weight; receipts, 22,345.

Foreign Goods have been in less demand and less buoyant in price. The dry goods entries at this port, last week, were $2,132,213, making with the general merchandise imports a total of $4,906,600 against $6,310,229 the preceding week.

Ocean freights have been fairly active, closing buoyantly. For Liverpool we quote flour at 2s. 6d. by sail, and 3s. by steamer per bbl.; grain at 8½@8¾d. by sail, and 9⅛@10d. by steamer per bushel; cotton at ¼@$\frac{5}{16}$d. by sail and ½d.@$\frac{9}{16}$d. by steamer per lb.; and heavy goods 20s.@30s. by sail, and 30s.@50s. by steamer, per ton. Total number of vessels in port on Wednesday, 488.

The following will show the exports (exclusive of specie) from New York to foreign ports or

the week ending November 15th, and since the beginning of the year:

	1869.	1870.
For the week.....	$3,890,927	$5,808,002
Previously reported..	169,157,261	158,129,780
Since Jan. 1.....	$173,048,188	$163,937,782

The imports for the week ending Nov. 12, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,164,943	$2,132,128
Gen. merchandise..... ..	2,988,017	2,774,472
Total for the week.....	$4,152,960	$4,906,600
Previously reported....	256,961,253	259,134,883
Since January 1.....	$261,114,213	$264,041,483

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Albany and Susquehana R. R. 2d mort., 92½; Toledo, Wabash and Western consol. bonds, 88; Quincy and Toledo 1st mort., 81¼; Mil. and St. Paul 1st mort., Iowa Div., 88; Jefferson R. BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH,
BANKERS AND DEALERS IN GOVERNMENT SECURITIES, No. 5 NASSAU ST.,
NEW YORK, Nov. 17, 1870.

☞ THE FUNDING OF UNITED STATES FIVE-TWENTIES into a first class security, paying the same rate of interest (six per cent., gold), and which cannot be called in under twenty-five years without the consent of the holder, may now be effected at a clear profit of about twenty per cent., by exchanging them for the FIRST MORTGAGE BONDS OF THE CENTRAL PACIFIC RAILROAD COMPANY, which can now be had at 91—that is $910 for a bond of $1,000.

The Central Pacific Bonds have the advantage of a ready market on both sides of the Atlantic, of regular quotations at the Stock Exchange, and are based on a finished and equipped road, already placed on a stable and profitable basis.

Having originally negotiated these bonds, and being thoroughly acquainted with their soundness and value, we have introduced them as a specialty in our regular business in connection with our dealings in Government securities, and recommend them without hesitation to our friends and customers desiring to make investments or to fund their five-twenties upon advantageous terms, without reduction of interest.

FISK & HATCH.

Cast Steel Works of Fried. Krupp,
ESSEN RHENISH-PRUSSIA.

American Office, 13 *Gold Street*,
New York, Nov. 7, 1870.

We take this opportunity to announce to our friends, that our business suffers no interruption from the war in Europe. We are receiving goods from Essen, regularly as usual, at ante-war prices.

During the War, our goods will come out in Neutral Steamers from Neutral Ports, so that our customers need not entertain any fears about delay in delivery of Orders.

We make this statement in order to remove a misapprehension, which appears to exist in the minds of some of our customers, caused mainly by the fact of the German Steamers having stopped running regular trips, in consequence of the blockade.

THOMAS PROSSER & SON,
Sole Representatives in America of Fried. Krupp.

☞ The following gentlemen have been elected directors of the Pacific Mail Steamship Company for the ensuing year: Allan McLane, Francis Skiddy, Howard Potter, William Dennistoun, James M. Brown, Jonathan Thorne, Abiel A. Low, William H. Webb, and Sidney Mason.

☞ Wm. R. Arthur, formerly General Superintendent of the Illinois Central Railroad, has been appointed General Superintendent of the North Missouri Railroad, vice S. K. Knight, resigned.

☞ Addison Day, of New York, has been appointed General Superintendent of the St. Louis and Iron Mountain Railroad.

Journal of Railroad Law.

RAILROAD COMPANIES—SPECIAL CONTRACTS—COMMON CARRIERS LIABLE IN ALL CASES FOR ORDINARY CARE.

The following is the opinion of Judge Gregory in the case of The Michigan Southern and Northern Indiana R. R. Co. *vs.* Heaton, (31 Ind., 397,) so far as the question of "Special Contract" is concerned:

GREGORY, J.—It was with great reluctance that the courts of several of our American States at last yielded their assent to the proposition that the strict and severe responsibility which the common law imposes upon a common carrier could be limited by special contract. The Camden and Amboy R. R. Co. *vs.* Baldauf, 16 Penn. St. 67; N. J. Steam Nav. Co. *vs.* Merchants Bank, 6 How. U. S. 344; Atwood *vs.* Reliance Transp. Co. 9 Watts, 87. And this regret will be more deeply felt as the business of transporting goods passes more and more into the hands of extensive corporations, controlling vast capital, and, by combination with each other, virtually destroying competition. The shipper will not be in a position to contract with them on equal terms—he must submit to oppressive conditions, if they choose to impose them, or fail to procure the carriage of his merchandise to market. But if the general question is not now open, and has been so fully settled by judicial decision that the rule *stare decisis* is absolutely controlling, and a remedy is called for by the great public interests of commerce, it must be sought in legislation. We have, however, not now to do with that question necessarily, and we do not propose to ourselves its decision at present.

The language in the contract in the case before us is capable of a very broad construction. It would do no violence to its words, to say that it was intended to exempt the carrier from liability for loss by fire or accident, though such fire or accident were the result of the grossest carelessness on the part of the carrier, but the appellant concedes that such a construction cannot be sustained, for the reason that gross carelessness, under the circumstances, would be fraud, and a contract whereby a party stipulates for immunity for his own fraud is against public policy and will not therefore be tolerated. But why would gross carelessness be fraud? It is the absence of the slightest care. Why should it be fraud, if the parties have contracted for exemption from all care, and have adjusted the compensation accordingly? Shall the carrier be compelled to exercise some degree of care, though he is to receive no compensation for it, and the property has been put into his warehouse upon an express agreement that he need not trouble himself about it at all? Must he do more than he has contracted to do, and more than he is paid for doing, to avoid the imputation of fraud? Nay, is fraud ever predicated of a transaction were a contract fairly entered into has been fully and scrupulously performed according to the very intention of both parties to it, and according to its letter? It seems to us that the reason why a carrier may not, because of public policy, stipulate for his own gross carelessness, is a different one, and does not necessarily involve the idea of fraud. The law has a tender care for great public interests, pecuniary as well as moral, and in many cases will hold contracts void because they are plainly in contravention of the public welfare in mere business aspect. Trade and commerce are objects of this fostering care. Hence a contract never to carry on a particular business, however ample the consideration, is illegal and void. It injuriously affects the public, by depriving it of men's services in departments in which they may be most useful; it discourages industry and enterprise, diminishes the products of ingenuity and skill, prevents competition, enhances prices, and exposes the community to all the evils of monopoly. Alger *vs.* Thacher 19 Pick. 51. But there is no element of fraud in it. And there are other classes of contracts, not needful now to be enumerated, also held illegal and void as being against public policy, merely because their performance would tend to affect injuriously important interests of society. Contracts in general restraint of marriage, and marriage brokerage contracts may be mentioned as examples. Now the shipper puts his goods in the custody of the carrier, and thereby excludes himself from all opportunity to care for their safety until the transit is terminated. If the carrier do not guard them against spoliation, damage, or destruction, the goods are subject to multiplied hazards; the perils of transportation become a most serious check to the great interests of commerce; and interchanges of commodities between distant sections are rendered precarious and uncertain. Transportation generally, without any care by the carrier for the safety of the goods, would be a tax upon the industry of the country impossible to be estimated. If adopted and maintained as a rule, in a country of such large extent and diversified production as ours, it would ruinously diminish the home value of such of the fruits of industry as must be sent to distant markets, and greatly enhance it to the ultimate consumer, thus operating to the serious detriment of both. But the consequences to the community need not be further dwelt upon. It may be enough to say, that none of the great corporations engaged in the carriage of goods to market would perhaps be willing to publish to shippers, that it is a fact that they give no care whatever to avoid the loss, by fire or accident, of goods confided to them for shipment. It would injuriously effect the business of any one of them, if believed by shippers. Traffic would seek other channels, if others claimed to bestow reasonable care for the safety of their cargoes; nor would low tariffs be deemed enough to induce the exposure of goods to so many probabilities of destruction. It is not quite true, then, that the contract between the shipper and the carrier concerns only themselves, as has sometimes been assumed; it does affect also great public interests most seriously and vitally, and therein rests a reason entirely satisfactory to us, for the conclusion, that the parties are not at liberty to make such a contract as they please.

There is still another reason, why, in such a contract, a general exemption of the carrier from the consequences of gross negligence should be held void. Some care on the part of the carrier is absolutely essential to the performance of the contract in any reasonable sense. Property cannot take of itself; the carrier, during the transit, has exclusive custody and control of it, and he only has the right to give that attention to it without which the chances of its loss and destruction are so imminent that it is not fair to assume that it would have been shipped at all. A condition that no care, or anything less than reasonable care, shall be bestowed upon it, is therefore repugnant to the general intention of the contract and should be rejected.

Indeed it was once supposed to be a proposition not liable to be controverted, that a common carrier was, in his relations to society somewhat different from a private party—that he exercised a sort of public employment, was bound to carry all goods offered for reasonable compensation and that the law imposed upon him his duties and responsibilies as incident to the character voluntarily assumed. We have seen that the American Courts, following those of England, have in many quarters evinced a reluctant tendency wholly to disregard this ancient doctrine. The same disposition in England compelled the timely interposition of parliament to check it. Here there has been a fortunate hesitancy and doubt evincing a purpose to refuse to sanction such stipulated exemptions from the carriers' common law liability as would impair the reasonable efficiency of the contract for shipment and thus defeat its purpose. To dispense with the duty of exercising at least ordinary care for the safety of the goods, would, it is plain, have this effect; and this court upon the fullest consideration of the subject, finds itself free from all doubt that a condition so repugnant to the general and chief purpose plainly intended by the contract is void, and must be disregarded. The doctrine is elementary and of universal application. The contract for shipment necessarily implies that the carrier shall use some measure of diligence to deliver the goods at the place of their destination. Slight care—the least measure of diligence—is not reasonably sufficient to preserve valuable merchandise from the depredations of thieves, or from destruction by the elements. The plain purpose of the contract of shipment is to secure the safe transportation and delivery of the goods, and it surely is equally plain that a provision in it that the carrier need not make a reasonable effort to accomplish that purpose—such an effort as men of ordinary prudence would make if engaged in transporting their own goods—is destructive of this purpose and intent. And it has accordingly been held, that such a provision, however broad in its terms, has only the effect of reducing the liability for negligence of a common carrier to that of a private carrier for hire, who is bound to the use of ordinary care. So the rule was declared by the Supreme Court of the United States, in the N. J. Steam Nav. Co. *vs.* Merchants Bank 6 How. 344, the leading American case sustaining such special contracts. It was only the "extraordinary duties annexed to the employment" which it was there held might be dispensed with by special contract. The language of the agreement was of the most comprehensive character, expressly declaring that the goods should "be at all times at the exclusive risk" of the shipper, and the carrier "will not in any event be responsible for the loss of any goods." And yet the court held this language: "The owner by entering into the contract virtually agrees that in respect to the particular transaction the carrier is not to be regarded as in the exercise of his public

employment, but as a private person who incurs no responsibility beyond that of an ordinary bailee for hire, and answerable only for misconduct or negligence." And again, "we think it would be going further than the intent of the parties, upon any fair and reasonable construction of the agreement, were we to regard it as stipulating for wilful misconduct, gross negligence, or want of ordinary care," &c. And such was stated to be the result of the English cases. The effect of the case is, that general language, however comprehensive, and however plainly it may declare a purpose to exempt the carrier from every possible risk incident to the shipment, shall nevertheless not be understood to include losses resulting from want of his reasonable care. We know not upon what principle such a construction of the contract in that case could be maintained, save that which we have stated above. See also Lyon *vs.* Wells 5 East. 28. In Wyld *vs.* Pickford, 8 M. & W. 442, the contract pleaded provided against the carriers' liability unless the goods were insured according to their value, and paid for at the time of delivery, which had not been done. The question arose upon a demurrer to the plea, and the court, upon a review of the cases, held that the carrier was liable for ordinary negligence, notwithstanding the contract. The court, per Parke, B., said "But still he undertakes to carry from one place to another, and for some reward in respect to the carriage, and is therefore bound to use ordinary care in the custody of the goods. See also Hinton *vs.* Dibbin 2 Q. B. 646, Story on Bailm, § 571; Thomas *vs.* Boston and Prov. R. R. 10 Metc. 472; Penn. R. R. Co. *vs.* McCloskey 23 Penn. St. 526, Powell *vs.* Pa. R. R. 32 id. 414, Welsh *vs.* P. F. W. & C. R. R. Co. 10 Ohio St. 65. Citations might be multiplied; but we choose to rest our decision of the case before us quite as much on principle as upon the decided cases. The latter are not uniform, and are incapable of reconciliation. It will be seen from the cases cited, that whether the negligence of the carrier be gross or ordinary, does not in such a case, effect the question of liability.

The Illinois Central Railroad in Iowa.

The Illinois Central Railroad Company recently took possession of the Iowa Falls and Sioux City Railroad from Fort Dodge to Sioux City. This completes a line from Dubuque to Sioux City, directly across the State of Iowa, at a distance of about 70 miles from its northern boundary. This line, which is leased and operated by the Illinois Central Company, was constructed and is owned by two separate companies, who receive a percentage of the earnings as a rental. The Dubuque and Sioux City Railroad Company owns that part of the line between Dubuque and Iowa Falls, 143¼ miles, and the Iowa Falls and Sioux City Railroad Company the 183 miles between Iowa Falls and Sioux City. The entire line has been called by the managers the "Iowa Division" of the Illinois Central, but it is best known to the public as the Dubuque and Sioux City road, and this probably will continue to be its popular name. This is the fourth great railroad stretching across Iowa from east to west, all having direct connections with Chicago. It is noticeable that the distance to the Missouri river from Chicago is nearly the same by all four of these routes, the variations not being more than 25 miles, and the distances varying from 490 to 514¼ miles. So far this is the most northerly of the routes, but the Milwaukee and St. Paul Company is constructing a line nearly parallel with and about 40 miles north from it. On the south the nearest line is that of the Chicago and Northwestern, distant generally from 30 to 40 miles. Thus it has a broad belt of country on each side of it whose traffic it will naturally obtain. There will soon be three lines crossing it from north to south, but these can draw very little from its business, as they will form routes to the south rather than to the east. It has itself one feeder from the north, the Cedar Falls and Minnesota Railroad, which extends from Cedar Falls, 98 miles west of Dubuque, in a northwesterly direction to Mona, on the Minnesota line, a distance of 74 miles. Thus the entire length of line in Iowa operated by the Illinois Central is 400¼ miles. These lines pass through an extremely fertile country, of which a very small percentage is waste land. As far as to Fort Dodge it is pretty well settled, but beyond, most of the land is yet to be occupied, and east of Fort Dodge even, there is room for double the present population in the country, to say nothing of the towns. The country in the western half of the road is one of the most attractive to settlers in America, the land being fertile and cheap, and provided with excellent routes of transportation. —*Chicago Jour. of Com.*

Commerce of the Pacific.

A tolerably well authenticated rumor comes to to us from San Francisco to the effect that a grand consolidation is about to be formed between the Pacific Railroad and its eastern connections on the one hand, and the China and Australian steamship lines on the other—to the end of controlling and developing the commerce of the Pacific Ocean.

For this purpose a new company is to be formed, embracing the stockholders of both the railroad and steamship lines, and placed under the official management of several well-known English and American capitalists who are concerned in railroad and navigation enterprise on that side of the continent. The existing steamship lines will be continued under this new combination, with increased facilities, more frequent trips and additional termini on the other side of the Pacific. The overland lines will co-operate, and freight can then be billed through at probably reduced charges, from any shipping point upon the Atlantic seaboard to the Sandwich Islands, or to any port in Eastern Asia and Australia, or *vice versa*.

It strikes us that this is a good movement, and if the plan is carried out in a liberal spirit of accommodation to the commercial public, it will not only serve to develop the resources of the Pacific coast, but vastly benefit all who are interested in the Oriental trade. A large portion of that trade is bound to change its direction, and hereafter come to us eastward instead of westward around the semi-circumference of the globe.

If our trans-continental railroads and Pacific steamship lines can make arrangements to "pull together," they will easily secure the bulk of this valuable carrying trade, besides greatly simplifying and economizing the through business. All that is wanted to insure success to this enterprise is more capital and greater facilities; and both of these conditions will probably be obtained in the new combination which has been projected.

Our trans-continental railroad system has opened up a vast field of commercial enterprise on the Pacific seaboard, which is susceptible of indefinite expansion. But if these gentlemen, who have associated themselves together for the purpose of controlling this enterprise, expect to build up a monopoly of the Pacific and overland traffic, they will find themselves laboring under a great mistake.

Both the northern and southern routes to the Pacific will soon be opened, and their respective termini will necessarily divide this trade with San Francisco. This will lead to the organization of new steamship lines, having for their objective points the same Oriental ports that are visited by the ships of the existing American Mail Company. New combinations for the accommodation of through traffic will then be formed; competition will be lively, and the public will be benefited and business stimulated in proportion.—*Boston Com. Bulletin.*

Massachusetts Central Railroad.

A call is now made upon merchants and capi alists of Boston for the remainder of stock subscriptions necessary to the beginning of this important enterprise under the provisions of its charter. Some four-fifths of the stock have already been taken by the towns along the route of the proposed line, several of them having voted appropriations for that purpose to the extent of five per cent. on their entire valuation.

The Massachusetts Central, as well known, is intended to accommodate the trade and travel of that large and populous section of the State lying between the Boston and Albany Railroad on the south, and the Fitchburg Railroad and its western connections on the north. This section comprises nearly the whole central and western portions of Massachusetts, or a territory some two hundred miles long and thirty miles broad, including parts of the counties of Worcester, Franklin, Hampshire, Hampden and Berkshire. It abounds in excellent water powers and other natural resources, and is thickly studded with flourishing towns and villages—such as Lancaster, Sterling Barre, Ware, Gardner, Amherst, Hadley, Williamsburg and Northampton—some of them of considerable manufacturing and commercial importance.

The present company was organized to complete a road through, by this central route, from Boston to the western border of the State; and, perhaps, ultimately to the valley of the Hudson.

As things are now situated, the towns embraced in this large belt of territory are practically destitute of railroad communication with Eastern Massachusetts and the capital and commercial centre of the State. To be sure, some o them, located on the cross-roads leading to New York and Long Island Sound—such as the Fitchburg, Worcester and Norwich, the Amherst Palmer and New London, the Canal and Connecticut River, the Pittsfield, North Adams and Housatonic—are able to reach the eastern seaboard by a circuitous route, intersecting our western lines at various points. But this mode of communication involves great delay, from want of connection of trains, and necessitates the breakage of bulk for freight. Although the distance by rail from all parts of this central and western Massachusetts region is from thirty-five to fifty miles shorter to Boston than to New York, yet the difference in freight charges and time of delivery is so much in favor of the latter city that the merchants of the interior towns now buy nine-tenths of their goods there, and never come or send orders here except on extraordinary occasions—*Boston Com. Bulletin, Nov.* 12.

☞ The certificate of incorporation of the Piqua, St. Mary's and Celina Railroad Company was filed at Columbus, Ohio, on the 10th inst. The proposed road runs through Miami, Shelby, Auglaize and Mercer counties. The corporators are J. F. McKinney, Henry Flesh, William Scott, John G. Young, Charles C. Chute. Capital stock, $400,000.

☞ A branch road has just been completed from Greene to Oxford, Chenango county, by the Delaware, Lackawana and Western Railroad Company.

☞ The first division of the St. Louis and Southeastern railroad, extending from St. Louis to Mt. Vernon, Ills., was opened on the 10th inst.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 31st of October, inclusive, during the years 1869 and 1870, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1869..	364,800	12,840,000	5,561,500	197,700
1870..	347,000	13,387,100	4,481,200	1,950,400
Dec..	17,800	*347,100	1,080,300	*1,752,700

* Increase.

The barley received in 1870 is all new crop but 82,000 bushels. By reducing the wheat to flour the quantity of the latter left at tide water this year, compared with the corresponding period last year, shows a increase of 51,260 bbls. of flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of October in the years indicated:

	1868.	1869.	1870.
Canal opened—	April 23.	May 6.	May 10.
Flour, bbls.	339,100	364,800	347,000
Wheat, bushels..	9,913,700	12,840,000	13,187,100
Corn, bushels...	15,959,200	5,561,500	4,481,200
Barley, bushels.	2 346,100	197,700	1,950,400
Oats, bushels...	9,189,100	2,670,300	5,117.300
Rye, bushels....	500,700	234,300	485,000
Malt, bushels...	360,000	206,900	640,000
Feed, lbs.....	.....	8,526,100	10,511,300

Portland and Ogdensburg Railroad.

The town of Conway, N. H., has voted, almost unanimously, to take five per cent. of its valuation, amounting to $21,500, in the capital stock of the Portland and Ogdensburg Railroad Company. Some two years ago the same aid was voted to the Portland, White Mountain and Ogdensburg Railroad, and that corporation having, by Legislative action and the concurrent action of its directors and corporators, become merged in the Portland and Ogdensburg Railroad corporation, it was found necessary that the town vote again on the question of taking stock in the new corporation. The directors of the road are now looking over the two routes from Fryeburg through Conway, one passing through North Conway and the other through Conway Corner, and intersecting at Bartlett, preparatory to fixing upon an immediate location, when the road to Bartlett line will probably be put under contract for construction for next summer travel to the Mountains.

☞ The Camden (Ark.) *Journal* says that the cars are now running on the Mississippi, Ouachita and Red River Railroad to within a few hundred yards of Bayou Bartholomew, 16 miles from the Mississippi; and that at the present rate of track laying the road will be completed to Camden by the 1st of August next.

☞ The Georgia Legislature granted State aid to the Macon and Knoxville Railroad to the amount of $15,000 per mile, and it is thought work will be commenced immediately. The enterprise is intended as a continuation of the Cincinnati Great Southern Railroad, and is a very important work.

☞ It is reported that the contract for building the Lowell and Framingham Railroad has been awarded to Levi Phelps of Springfield, and that the work will begin in about ten days.

☞ Sturbridge, Mass., has voted to invest $48,600 in the Palmer and Southbridge Railroad.

Texas Central Railroad.

The Texas Central Railroad is going towards the northern boundary of that state with industrious zeal. In a few months Houston, the rich cotton lands of Brazos and the Trinity, Dallas, the great centre of the wheat region, and many of the best grazing sections will be connected, near Sherman with the Indian Territory, at a point which is fixed upon as the terminus of a road which is to extend from that point to Neosho, in southwestern Missouri, where it will join the South Pacific Railroad from St. Louis. A stage and mail line will begin running from Neosho to Red River this month, and the gap of 260 miles will be filled by a railroad at no distant day.—*Arkansas Gazette*, Nov. 8.

Boston, Hartford and Erie Railroad.

We print in another column the arrangement assented to by all parties to suits against the Boston, Hartford and Erie Railroad, only adding that under the original arrangement the contractor was to put on night gangs of extra men and thus complete the work by the 1st of January, and, of course the expense was proportionately increased.

So much time has been lost in the discussions of the lawyers that no particular good would be effected in hastening the work on account of the lateness of the season. The work, however, will be pushed forward with as much rapidity as the day laborers can exercise, and the whole finished by 1st of May next.

☞ Work on the Connecticut River Railroad extension from South Vernon to Bellows Falls has been begun about half a mile above South Vernon Station, and will be pushed forward rapidly. The extension is to be built under the charter of the Brattleborough and West River Railroad, and will cross the river at Whithead's, three miles above South Vernon.

☞ The new railroad from Fonda to Gloversville, (N. Y.,) is nearly completed, and will probably be open for the use of the traveling public in a short time.

☞ Messrs. Irwin & Kavenay, the new contractors on the Queen Annei's (Md.) Railroad, are pushing the work with commendable energy.

To Railroad Contractors.

PROPOSALS will be received at the office of the NATIONAL RAILWAY COMPANY, No. 109 South Third st., Philadelphia, until and including the 25TH DAY OF NOVEMBER, 1870, for the CONSTRUCTION of the NATIONAL RAILWAY, extending from the City of Philadelphia to Yardleyville, on the Delaware River; and the MILLSTONE AND TRENTON RAILROAD and certain other railroads connecting therewith, and forming with said connections a continuous line from the City of Philadelphia to the Hudson River, opposite the City of New York.

Plans and Specifications may be had and examined at the office of the NATIONAL RAILWAY COMPANY, and also at the office of J. B. CULVER, Engineer, No. 23 Montgomery st., Jersey City, on and after the 10th of November.

The Company reserves the right to reject any and all bids.

NOTICE TO THE PUBLIC.

EXECUTIVE DEPARTMENT,
ATLANTA, GA., October 26th, 1870.

To Whom it May Concern:

By an Act of the General Assembly of the State of Georgia, approved October 24, 1870, authority is given to the Governor to lease the Western and Atlantic Railroad, the property of the State, together with all of its houses, workshops, depots, rolling stock and appurtenances of every character, for the term of twenty years, upon certain terms, and subject to certain restrictions therein named, to-wit:

The monthly rental shall not be less than twenty-five thousand dollars ($25,000) payable monthly. The lessees shall give a bond for the sum of eight millions of dollars ($8,000,000) to securing the prompt payment of the amount of rental agreed upon, and for the return of the road and its appurtenances at the expiration of the lease, or on the termination or forfeiture thereof, in as good condition as at the time of leasing, five millions ($5,000,000) of which security shall be within this State and the balance, if out of the State, shall be upon real estate or railroad property. The lessees to be worth over and above their indebtedness, at least five hundred thousand dollars ($500,000.)

The Legislature reserves to itself the right, from time to time, to examine into the affairs of the lessees, and to require that the amount of security above recited shall be maintained unimpaired.

The lessees shall not be less than seven in number, a majority of whom shall have been for five years *bona fide* residents of this State, and shall represent a majority of the whole interest in the lease. No railroad or express company, or any combination of them, shall, in any event, become the lessees, but they may become sureties on the bonds of the lessees. The lessees shall not charge a higher rate for local freights over said road than the average rate charged by the Georgia Railroad and Banking Company, the Central Railroad and Banking Company, and the Macon and Western Railroad Company, for like local freights over said roads, and the said lessees shall have the same rights, exemptions, privileges, immunities and guarantees, except the establishment of banks, and shall be subject to the same liabilities, disabilities, and public burdens of said railroad companies last mentioned. The faith of the State is pledged to redeem all mortgage bonds and coupons now resting on the State Road as they fall due, and to save the lessees harmless against all such bonds and coupons.

The lessees are by this act constituted a body corporate and politic for the term of twenty years, under the name and style of the Western and Atlantic Railroad Company, having such powers, liabilities and immunities, as are usual with railroad companies, and not in conflict with the Constitution and Laws of the United States, or of the State of Georgia; but they will not be allowed to make or permit any discrimination in favor of or against any other road or persons having business connections with the said Western and Atlantic Railroad.

For the purpose of carrying out this act, proposals will be received until and including the 25th day of December next and must be addressed "to the Governor of the State of Georgia, at Atlanta," and marked on the wrapper, "Proposals for the lease of the Western and Atlantic Railroad, in accordance with an Act approved October 24, 1870." The proposals must state in full the names and residence of the parties uniting to make proposition, the amount that each of the parties therein named are worth over and above their debts and liabilities, together with a full description of the character of the security which will be offered to complete the bond.

The property to be leased is a single track railroad, one hundred and thirty-eight miles in length, with full and complete equipment of shops, depots, turnouts, sidelings, engines, cars, etc., etc., etc., now in successful operation between the cities of Atlanta, in Georgia, and Chattanooga, in Tennessee. At Chattanooga the line is in direct rail connection with the Memphis and Charleston, Nashville and Chattanooga, Chattanooga and New Orleans, East Tennessee and Georgia, and the Chattanooga and Cincinnati, (now in progress of construction,) railroads, and at Atlanta with the Atlanta and Montgomery, Atlanta and Charleston, Atlanta and Savannah, and the Atlanta and Gulf lines of road, being the only railroad connection between the system of railways centering at Chattanooga and at Atlanta.

Copies of "An Act to authorize the lease of the Western and Atlantic Railroad, and for other purposes therein mentioned," approved October 24th, 1870, can be had upon application at the Executive office.

RUFUS B. BULLOCK

By the Governor:
ROBERT H. ATKINSON,
Executive Secretary.

Notice to Contractors.

The Directors of the Great Western Railway of Canada invite tenders for the construction of the second division of their CANADA AIR LINE. Plans and specifications for the division from Aylmer to Simcoe will be on exhibition at the office of the Chief Engineer, George Loew Reid, Esq., Hamilton, from the 8th to the 25th November.

All tenders must be in the hands of the undersigned by ten o'clock on the morning of the 25th instant, sealed and marked "Tenders for the construction of Second Division Canada Air Line."

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

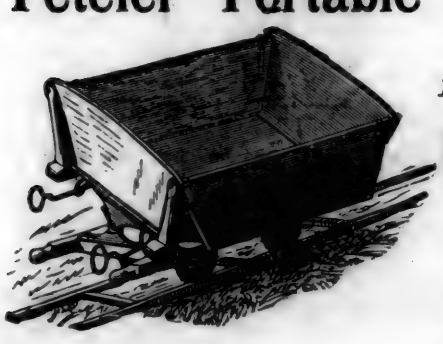
Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.



That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Memphis and Little Rock Railroad.

Mr. W. B. Greenlaw has taken the contract for completing the Memphis and Little Rock Railroad, and has appointed Mr. S. B. Beaumont General Manager, with full power and instructions to finish the road by the 10th of February next. Mr. Greenlaw has been a contractor for many years, and has carried out some of the largest undertakings in that section of the country. He states that he wishes nothing from the citizens of Memphis, and only wants their generous sympathy in this undertaking. At the present time the road is completed from Hopefield to Brinkley, and from Little Rock to Devalls Bluff. There remains only thirteen miles to build between Brinkley and the Bluff, together with the bridge over White river, opposite the Bluff. The bridge, which will be of iron, with a "draw" to allow steamers to pass up and down the river, is in course of erection in Louisville, and is nearly completed. It is stated that Mr. Brinkley has issued to Mr. Greenlaw one million dollars of stock.

☞ Messrs. C. C. & E. G. Smith, of Dunleith, Ills., have taken the contract to build the railroad bridge over the Mississippi river at La Cross On the east shore it will begin just above the elevator, and touching several islands, reach the depot on the other side. The bridge is estimated to cost about $200,000, and the expense will be defrayed equally by the Milwaukee and St. Paul and the Southern Minnesota roads.

East Tennessee, Virginia and Georgia R. R.

The East Tennessee, Virginia and Georgia Railroad is formed by the consolidation of the East Tennessee and Virginia Railroad, extending from Bristol (State Line) to Knoxville, Tenn., 130 miles, and the East Tennessee and Georgia Railroad from Knoxville, Tenn., to Dalton, Ga., 112 miles—making, with the Branch from Cleveland, Tenn., to Dalton, Ga., (28 miles,) a total length of 270 miles. The consolidation of these companies was effected by a unanimous vote of the shareholders on the 29th of November, 1869; but as the fiscal year of the company terminated on the 30th of June, it was thought advisable to condense and give the consolidated earnings of the two properties, commencing on the 1st day of July, 1869, and ending on the 30th day of June, 1870. Adopting that system of reporting, the gross earnings of the past compared with those of the preceding year were as follows:

	1869.	1870.
From passengers....	$421,526 86	$508,108 36
" freight.....	548,972 34	696,452 99
" express.....	28,434 78	26,484 51
" mail	29,190 63	33,535 51
" other sources..	30,607 29	14,282 43
	$1,053,731 90	$1,278,863 80

The total expenses for the year ending June 30, 1870, were as follows:

Repairs of road....	$299,914 08	
Motive power	187,959 45	
Maintenance of cars.....	104,824 85	
Transportation.....	149,396 31	
Wood account.....	49,964 21	
Salaries	20,171 63	
U. S. internal revenue....	12,496 13	
Great Southern mail route	11,191 19	
Law expenses.....	11,025 55	
Va. and Tenn. Air Line...	8,778 24	
Agents' expense account.	5,923 00	
Reven'e & postage stamps	339 00	
Taxes	108 44	
London bridge....	754 77	
Depot buildings.....	717 42	
		863,064 27
Leaving a balance of....		$415,799 53

From the above expenditures should be deducted the following, viz:

New iron rails, spikes and chairs.....	$69,200 00
New cars built and increased in value	36,450 00
Permanent masonry, and filling Swan Pond trestle.....	11,803 35
Wood on hand....	29,428 80
Total.....	$146,882 15

Deducting this amount from the total expenditures, will leave for ordinary expenses the sum of $716,182 12—making the earnings over and above operating expenses, $562,681 68. In 1868–'69, the expenses were $689,494 81, and the net earnings, $364,237 09. The Vice President of the company, Joseph Jacques, Esq., in his report dated September 7, 1870, says:

It is with feelings of the deepest sorrow that we announce to you the death of Thomas H. Callaway. He had for a long time been identified with your road, and was at the time of his death President of your company; which office he had filled for several years, with entire satisfaction to the stockholders and with much credit to himself. His great financial ability, untiring energy and sound judgment, were special traits in his character that eminently qualified him to govern and protect the interest of your company. A mere allusion is sufficient on my part to call your attention to his valuable services. Suitable proceedings in regard to his death have already been passed by the Board of Directors; and as a further tribute of respect to his memory, the additional action taken by the stockholders, expressive of the feelings of this convention, are appropriate to the sad and melancholy occasion. I regard his loss as a great public calamity, and no one feels it more than myself.

Gentlemen, this being the time fixed at your last annual convention, we have met to-day for the purpose of electing a Board of Directors, to serve for the ensuing year; and furthermore, that you may learn through the reports of the different officers of your company, the operations of your road for the year ending June 30th, 1870; and, also, to ascertain, as far as practicable, the condition of your company.

I refer you to the report of James G. Mitchell, Secretary and Treasurer, which will give you a full statement of the financial condition of your road, excepting the debt that was due the State of Tennessee, which was not adjusted in time to appear on the books of your company, for the year ending June 30th 1870.

The Government claim still stands unsettled, as it did at the time of your last annual meeting. But we still hope that the Government, through

Congress, or through its officials outside of Congress, will do us justice in the end, and this is all we look for or have any right to expect.

The Legislature of our State very wisely, as we think, passed a law allowing all railroads that had received State aid, to pay back to the State any portion of their indebtedness in the bonds of the State, at par. This system, if carried out by all the railroads in the State, would soon relieve our State of so much of its indebtedness that the debt of Tennessee would compare favorably with almost any State of the Union.

Before the consolidation of the East Tennessee and Virginia and the East Tennessee and Georgia Railroad Companies, the debt due to the State from the East Tennessee and Virginia R. R. Co. was $2,449,038 55, and from the East Tennessee and Georgia Railroad Company, $1,467,277 50, making the entire debt due from the consolidated East Tennessee, Virginia and Georgia Railroad company $3,916,316 05. Your officers determined to avail themselves of the law, for the benefit of your company, and pay the debt as the law had marked out we had a right to do; and we hope, when we can make a full report of all the facts, that it will meet the approval of every stockholder in the road.

The report of the Secretary and Treasurer shows the State debt just as it was, for the reason that the transaction could not be got upon the books for the year ending June 30th, 1870, but will all appear on the books for the year ending June 30th, 1871. As evidence of the fact that the State debt is paid in full, please find herewith the receipted account of the Comptroller of the State of Tennessee, dated August 11th, 1870:

COMPTROLLER'S OFFICE,
NASHVILLE, August 11, 1870.

STATEMENT.

Debt of E. T. & Va. R. R. Co., as per statement	$2,563,870 70
Debt of E. T. & Ga. R. R. Co., as per statement	1,553,890 40
Total amount due State July 1, '70.	$4,117,761 10

CREDITS.

I hereby acknowledge to have received from the East Tennessee and Virginia and East Tennessee and Georgia Railroad Companies, the following number of bonds and coupons of the State of Tennessee, in liquidation of said debt due to the State July 1, 1870, viz:

3835 State Bonds, of $1,000 each	$3,835,000 00	
9425 past due coupons, $30 each	282,750 00	
Currency paid 4th National Bank, N. Y.	11 10	
		$4,117,761 10

(Signed,) ED. R. PENNEBAKER,
[*Seal of State of Tenn.*] *Comptroller, &c.*

The above amounts represent the entire indebtedness of the railroads above mentioned, and have been credited with such amounts in my office.

(Signed,) ED. R. PENNEBAKER,
Comptroller, &c.

The entire debt due to the State, although very large, has all been paid in full, principal and interest, amounting to $4,117,761 10, and it cost your company fifty-five cents on the dollar. If your company had possessed the means for the payment of this debt, we could have saved, as you will see, nearly one-half the entire debt; but as we did not have the means, we had to borrow money so as to enable us to make the transaction. Under the law, your company had the right to issue a first mortgage bond, which takes the place of the lien of the State, and makes that bond a prior lien over every other bond we have issued. We have issued a first mortgage bond, bearing seven per cent. interest in currency, interest payable semi-annually in the city of New York, and the bonds payable in thirty years, from June 1st, 1870, in New York. The bonds are endorsed by the Comptroller of Tennessee, showing that the debt that was due the State has been paid in full, and that these bonds stand in the same priority as the State lien did upon the Railroad. With these bonds we expect and believe that we can save for your company, in principal, from one million to one and a quarter million of dollars in this transaction. Besides, it is believed that the amount in interest that will be saved from year to year, will, if properly applied as a sinking fund, be sufficient to pay the entire debt before it falls due. With this view of our indebtedness, we do dot hesitate to say that our bonds will be sought after as an investment, believing it as good a bond as can be made in this country. With honesty and proper management, the credit of our East Tennessee, Virginia and Georgia Railroad Company will yet stand high, where it ought to stand, and rank as one of the great Southern thoroughfares. We have full confidence in our road, and time will sustain our position. Long before our connection with your road, we believed the day would come when this would be a great line; and since our connection with the road our faith in its final success has b en increased. If we are suffered to pursue the usual avocations of life, undisturbed from outside influences, and the commerce of our country left free to seek the channels of trade and interchange of products that God in his wisdom intended they should, we can see no reason why our road should not prosper, passing as it does through the very heart of East Tennessee, this favored section of ours, having bestowed upon her in such unstinted measure the elements of wealth and prosperity, which her people have only to put forth the hand and grasp. East Tennessee, with her rich lands, susceptible of bringing forth products so varied and bountiful; with her water power, which, when brought properly into use, may make her the manufacturing district for surrounding States; with her mountains of iron and inexhaustible beds of coal; together with her zinc, copper and other valuable minerals, all pointing her out as a section requiring only the hand of industry to make her the garden spot of our Southern country.

Since your last anual meeting the Selma, Rome and Dalton Railroad made their connection with our road at Dalton, which occurred about the first of June. This will give to East Tennessee an outlet for her products that she never had before, and will give to your road a large amount of freight and passenger business, which otherwise we could not get. The Alabama and Chattanooga Railroad is being pushed forward with great energy, and we are assured by her officers that they will run through from Chattanooga to Meridian, Miss., as early as January next. With these two new connections, we hope that our business will be largely increased, both in passengers and freight. We believe it all important to the line that a double-daily train should be run, and hope that our connecting roads will see it in the same way. We want a double-daily train; then, with these two new connections, with the other connections that we have, it will very soon be shown to the traveling public that we have the shortest line from New Orleans to New York, and should be several hours quicker than by any other route. Let us offer to the traveling public the same accommodations that are now by other lines, and see what the results will be. Let us try to avail ourselves of the natural advantages that this route has over all others. We want harmony and good feeling throughout the whole line, and none of us should look to private or selfish interests, but we should work together for the good of all.

It is well known throughout East Tennessee that the crops of 1869 were unusually light, on account of a protracted drought. But notwithstanding this fact, the earnings of your road for the year just closed will compare favorably with the combined earnings of the East Tennessee and Virginia and East Tennessee and Georgia Railroads for the two preceding years. The total receipts of both roads for the year ending June 30th, 1868—$1,050,555 55—and for the year ending June 30th, 1869—$1,053,731 90—show the receipts for the year ending June 30th, 1869, $3,176 35 more than the receipts of the preceding year.

By comparing the above figures, it will be seen that the earnings for the year ending 30th June, 1870, exceed the earnings for the year ending 30th June, 1868, $228,208 25, and the increase over the year ending 30th June, 1869, $225,131 90, being an increase of more than twenty-one per cent. upon the entire receipts of both roads, for the year ending June 30th, 1869.

This increase in the business of your company will no doubt be gratifying to every stockholder, and when considered in connection with the fact that your debt will be reduced one million to one and a fourth million of dollars, will, we hope, fully meet the expectations of all interested.

It has been the intention and desire of the officers of your road to foster and encourage the agricultural, manufacturing and mineral interests of East Tennessee, and to develop the resources of the country in every particular. It has been our honest aim to do this, as well as to look after the interest of your company. We have been prompted to this course by a sense of justice, as well as by a knowledge of the fact that in the building up of East Tennessee the interest of your road is promoted. We have tried to do justice to all parties along the entire line of road, making no discrimination in favor of any section or locality. We fully appreciate the fact that the interests of East Tennessee and the interests of your company are inseparably connected.

We regret that the Knoxville and Kentucky Railroad has not been pushed forward, so as to allow East Tennessee to go direct to the Ohio River, to establish more intimate commercial relations with Kentucky and Ohio.

The Knoxville and Charleston Railroad has only been completed from Knoxville to Maryville a distance of sixteen miles. The completion of the Knoxville and Kentucky and the Knoxville and Charleston Railroads, thus connecting Cincinnati and Louisville with Charleston, South Carolina, by a direct line of road passing through East Tennessee, would be of great benefit to our section of the State and especially to the city of Knoxville.

The Cincinnati, Cumberland Gap and Charleston Railroad, which is completed from Morristown to Wolf Creek, a distance of about forty miles, will be, when finished, an important feeder to your road. The same also can be said with regard to the East Tennessee and Western North Carolina Railroad, which connects with your road at Johnson's Depot. Unfortunately, however, work on all the roads above mentioned has been suspended for want of funds. The completion of these roads would have a very beneficial influence on East Tennessee, and on this account we much regret that we are not in a condition to assist them. We hope that at some day not far distant, the Legislature of our State will agree upon some plan to aid the roads referred to. The large interest that the State has in all the roads mentioned, is too much capital to lay idle. In their present unfinished condition the country can derive but little benefit from them, and it will be impossible for them to pay.

Permit me to call your attention to the exhibit of Mr. J. R. Ogden, General Freight Agent, showing the amount of different articles shipped from each station on the line. The shipments of cotton over your road during last year, appeared to be light, but you will see that we forwarded from Dalton, 37,600 bales, and from Chattanooga, 36,187 bales; total shipments of cotton over the road, for the year ending June 30th, 1870, 73,787 bales; showing an increase of about 15,000 bales on the preceding year. It is believed that our new connections, Selma, Rome and Dalton, and Alabama and Chattanooga Railroads, will give us a further increase in this article of freight.

By reference to the reports of the two roads separately for the year ending June 30th, 1869, it will be found that the expenses of operating the East Tennessee and Georgia Railroad amounted

to 61.4 per cent., and the East Tennessee and Virginia Railroad, 63.7 per cent. of the gross earnings, making the aveage expenses of operating the two roads separately about 62½ per cent. of gaoss earnings. By reference to the report of Maj. R. C. Jackson, Superintendent, for the year ending June 30th, 1870, it will be found that the expenses of operating the consolidated road amount to about 56 per cent., of the gross earnings; showing a difference in expenses of about 6½ per cent. on gross earnings in favor of the consolidated road. This difference of 6½ per cent. on the gross earnings of your road, for the year just closed, ($1,278,863 80,) amounts to $83,126 09. This exhibit will no doubt be gratifying to every stockholder, showing, as it does, the beneficial results of consolidation and one management. The difference mentioned above, between operating the roads separately and under one management, amounts to over four per cent. on the entire stock of your company.

To meet the increased demands of business, we ordered two new first-class passenger coaches; and they have been received since the close of your fiscal year. And in order to be prepared to do all the work that may be offered, we have ordered two new locomotive engines, to be delivered about the 1st November next.

I fully endorse the suggestion of your Superintendent, as to the policy of laying down new iron, as fast as the means of the company will admit. With forty or fifty miles of new rails, to put your track in first rate condition, you can hardly estimate the difference that would be made in the expenses of operating your road.

I refer you to the statement of O. H. P. Rogan, General Book Keeper, showing the earnings of your road for the year ending 30th June, 1870, and the ordinary expenses of operating the road. This statement shows the net profits, $562,681 68; and also shows what disposition has been made of the remainder of the earnings, in the way of extraordinary expenses, interest accounts, amount due from the United States Government, which has not been collected, &c.

CAPT. J. JAQUES, *Vice President*,—DEAR SIR:

The gross earnings of the East Tennessee, Virginia and Georgia Railroad, for the year ending June 30th, 1870, as appears on the General Books of the company, is.....	$1,278,863	80
Ordinary expenses for same time ..	716,182	12
Net earnings, not including extraordinary expenses.....	562,681	68
Amount expended for wood, (not consumed,) new cars, new iron, &c., as per statement of expenses.	146,882	15
Interest and exchange paid.....	166,094	89
Interest due July 1, 1870.....	151,816	68
Mail and other transportation for the United States, included in earnings	49,561	90
Balance of earnings, included in amount sent to New York, to pay for materials, iron, &c.....	48,326	06
	$562,681	68

O. H. P. ROGAN, *Gen. Book Keeper.*

I wish to call your attention to a note of explanation made by the Treasurer, and attached to the condensed balance sheet, fully explaining the items standing to the credit of profit and loss account, and showing how this account has been created, and how the amounts mentioned therein have been disposed of. This will show that while you have not been getting dividends on your stock, the surplus earnings of your road have been used in paying off the debts of your company.

The company have 39 locomotives, 19 in good order, 16 in running order, and 4 that need expensive repairs. The Superintendent recommends that two first-class freight engines be purchased for early delivery.

The car equipment consists of 12 first-class and 9 second-class passenger coaches, 7 mail and baggage, 1 pay, 1 wrecking, 312 box, 54 coal, 83 platform, 10 stock, 7 cab and 62 hand cars.

CONDENSED BALANCE SHEET JUNE 30, 1870.

Capital stock.....	$1,937,175	00

President.—R. T. WILSON.

Vice President.—JOSEPH JAQUES.

Directors.—Joseph R. Anderson, William Galbraith, C. M. McGhee, P. Dickinson, Robert Snead, Thomas G. Barrett, Joseph H. Jaques, John White, R. T. Wilson, R. C. Jackson, G. M. Branner, S. D. Reynolds, Joseph Callaway, E. W. Cole, Joseph H. Earnest.

Superintendent.—R. C. JACKSON.

Secretary and Treas.—JAMES G. MITCHELL.

Auditor.—O. H. P. ROGAN.

Railroad Cars for South America.

Persons passing through Twenty-seventh street, near the New Haven Railroad depot, cannot fail to notice several peculiar-looking horse-cars, now in front of the manufactory of John Stephenson & Co. They differ from those generally in use in this city, by being provided with broad winding stairways from each platform to the roof, where seats are ranged in equal number to those in the body of the car; the entire car load seated thus being forty-four persons. Upon the sides of each car is the inscription, "Tramway de la Bocay Barracas." They are intended for an English company, and are to be used in the city of Buenos Ayres. With the exception of being slightly narrower and possessing the roof accommodation mentioned, these cars are the same as those used in this city, and will cost, when delivered at their destination, eleven hundred dollars each. Thirty is the number of the present shipment, fifty having preceded them.

The same firm lately shipped an omnibus to the Canary Islands, and are filling like distant orders. The roof cars now in use in London were made by John Stephenson & Co., but differ from the present make in only being provided with a single ladder, which is moved as occasion requires to the rear platform of the car. The present perfect roof arrangements would almost prove the advisability of introducing these cars in this city.

Locomotive Engines.

HISTORICAL REMINISCENCES—HOW THE ENGINES ARE MADE—HOW TESTED—NUMBER, VARIETY, AND POWER FROM ONE ESTABLISHMENT.

Eighteen hundred men make a locomotive engine in one day—boiler, cylinders, frame, driving-wheels, truck, stack, cab, pilot and tender complete—the speed of forty miles an hour and the power of a thousand tons created in a day.

On the 25th of April, 1831, a miniature locomotive engine, drawing two cars with seats for four persons, was set in motion on a track laid in the rooms of "Peale's Museum," in the City of Philadelphia. Great numbers of people, not only from the city but from distant parts, visited the Museum to witness the performances of this wonderful machine. Previous to that date only three attempts had been made in the construction of locomotives by American mechanics. Two engines, the "Phœnix" and the "West Point," had been built at the West Point Foundry, in 1830, for the South Carolina Railroad, and a third, the "De Witt Clinton," for the Mohawk and Hudson Railroad, was completed in the Spring of 1831. Two locomotive engines had been imported from England, one in 1828, for the Carbondale and Honesdale Railroad in Pennsylvania, and another for the Mohawk and Hudson Road, in 1830. The little engine amusing the visitors at Peale's Museum was the invention and work of Mr. Matthias W. Baldwin, then a skillful and enerprising mechanic of Philadelphia.

In the following year Mr. Baldwin received an order from the Germantown Railroad Company for the construction of a locomotive engine to run on their road. This was, at the time, a very formidable undertakiug. Only one mechanic in America had yet succeeded in erecting a locomotive that would draw more than its own weight on a horizontal track. Several unsuccessful attempts had been made, resulting in loss and discouragement to the experimenters. However, Mr. Baldwin had confidence in his ability to surmount all difficulties, and he agreed to build the engine. Without tools, patterns, or models, he entered upon the work with only his genius to guide him, and on the 23d of November, six months after receiving the order, he placed the "Ironsides" on the road. Its success and the sensation which it produced are now matters of history. It is enough to say that it established a repntation for its builder that secured for him more work than the capacity of his shop could accommodate. Before the close of 1834 he had completed five engines. New shops were erected and in 1835 fourteen locomotives were built: in 1836, forty; and in the next year, forty-five. The business was, therefore, fully established and grew from year to year, experiencing with other departments of manufacture and trade periodical revulsions, but yet moving forward until the "Baldwin Locomotive Works" assumed and maintained the enviable distinction of being the most extensive locomotive establishment in the world, and from the capacity of one small engine in six months, the works, within a third of a century, attained the capacity of one engine a day, or over three hundred of the most powerful and complete railroad locomotives in a year.

One of the secrets of the great success of the works lay in the genius of their founder. Mr. Baldwin was gifted with a mind fertile in practical inventions to a degree rarely found in any country. During the earlier years of his experience as a locomotive builder, almost every engine

produced was in some particular an improvement over any of its predecessors, many new devices or changes in combination giving increased strength, durability and general efficiency to his machines. The first great improvement in his engines was the invention of the "ground joint," which superseded the old canvas and red lead joints then in use. The device of the half crank axle, by which an inside connected engine with outside cylinders was made possible; the flexible parallel-beam truck for the two forward pairs of drivers on the old pattern of freight locomotive with four pairs of drivers, and the arrangement, in connection with it, of coupling all the wheels in such a manner as still to permit a free and flexible action on curves and undulations on the track—these are some of the major improvements in locomotive building which were introduced by Mr. Baldwin. The device last named has since been superseded, but at that time it was an important step in the direction of the present flexible machines. Among the minor inventions may be named the forming of the pump-chamber within the guide-bar, and the use of the iron wheel center with wood filling between rim and tire. This latter device was patented by Mr. Baldwin in 1835. The copper ferule-band, on the outside of the fire-box end of locomotive tubes, was also patented by Mr. Baldwin in the same year. All the Baldwin patents taken out before the burning of the Patent Office building at Washington, in 1836, were suffered to expire, as no effort was made to renew the records. Some of these, as the two last named, were afterward patented by other inventors. Many of the most valuable improvements made by this thoroughly liberal mechanic were not reserved to his own use by patents, but were given to the public; more reliance being placed in superiority of skill and workmanship than in letters patent to maintain the leadership in American production. The Baldwin Locomotive Works are located on North Broad-st., Philadelphia, and occupy the greater part of three blocks, from Pennsylvania-ave. to Spring Garden-st., and an area of 240,000 square feet. On the centre of the Broad-st. front stands the old shop, three stories in height, erected by Baldwin in 1834. Here are the offices, store-room, and drawing department, and also what is called the Hamilton-st. shops, including boiler shop, smith shop, brass foundery, "first, second, and third story machine shops," and pattern loft. South of this building is the Willow-st. shop, where cylinders and frames are finished, and tanks, trucks, stacks and cabs are made. Adjacent to this building on the west is a brick building 266 feet long, 60 feet deep in the central part, and with two wings 108 feet deep at either end. The central part of the building and the east wing are used for the iron foundery, where all the cast-iron work used about a locomotive, except the truck wheels, is made. The west wing is used as a hammer shop. One large steam hammer, rated at five thousand pounds, is in constant use here, working up scrap and bar iron into blooms from which the engine frames are made. On the north side, beyond Buttonwood-st., is the erecting shop, whither all parts tend, and whence complete locomotives emerge. Two large buildings and a lot of ground, detached from the main establishment, are employed as a blacksmith shop, stable, and storage-room, not enumerated in the above.

The different varieties of locomotives usually manufactured in the establishment are technically designated in the Baldwin classification by certain letters and numbers. The letters indicate the plan or kind of engine; the numbers, the size or weight. The combination of the letters and numbers indicates precisely the class. To explain more clearly: the letter B is used to designate all engines having a single pair of drivers; C, those with two pairs of drivers; D, those with three; and E, those with four pairs of drivers connected. Then certain numbers, now merely arbitrary, but originally intended to indicate the weight of the machine in gross tons, are joined with the letters, and the combination designates a particular plan and size of locomotive. The ordinary type of the American locomotive, it is well known, is an engine on eight wheels, four of them under the fire box part of the machine, and acting as "drivers," and four smaller wheels combined into a truck to carry the forward part of the engine. Such an engine, in the Baldwin technicology, would be a "C" engine, by virtue of its having two pairs of drivers connected. If its cylinders are sixteen inches in diameter, the boiler must be large enough to furnish them with steam, and all the other parts of the machine must conform in size. The aggregate weight of the engine is accordingly governed by the dimensions of the cylinders. Now the figures 27½ indicate these facts. We have then the combination 27½ C to designate a locomotive with eight wheels, four of them drivers, with cylinders sixteen inches in diameter, and a certain aggregate weight for the whole machine. In like manner all the other classes of engines are appropriately designated.

More definitely for the benefit of the profession and of those who like Mr. Gradgrind, delight in absolute "facts," we may tabulate the different classes of engines covered by their designs and practice, as follows:

Class.	No. of Wheels.	Service.	Cylinder. Inches.	Drivers. Nos.	Drivers. Diameter. Inches	Remarks.
7 B	6	Passenger	7x14	2	42	Built with tank on boiler or separate tender.
6 C	4	Mining	9x12	4	30	
8 C	4	Shifting	9x16	4	36	
101 C	4	Shifting	11x16	4	36	
14 C	4	Shifting	14x22	4	48	
144 C	6	Shifting	14x22	4	48

From these classes and varieties the cusotmer makes choice. Perhaps because of some special service, special modifications are required; these are noted, and the price is agreed upon. The purchaser goes to his home, and his order to the "drawing department." Here the engine is, as it were, analyzed and dissected. The proposed machine, existing as yet only in imagination, must be composed, it is found, of a certain definite number of parts. The smith-shop accordingly receives a written order, in a book provided for the purpose, to make the forgings; the foundry, the castings, the boiler-shop, the boiler, and so on. The several machine-shops also have their orders to fit up and finish these several parts which may come to them from the other departments. But not only is the bare order to do the work thus made, the manner in which it is to be done is also to be provided for. Drawings and patterns are already in existence for every one of the parts to be constructed, unless the engine is of a class never before built. These drawings and patterns all have their separate distinguishing numbers. Each order for the production of any part, or for the finishing or fitting of it, bears also the number of the drawing or pattern to which the work is to be done. These order-books and the necessary plans and patterns now go to the several departments, and with the fulfillment of the orders which they communicate must result all the parts required for the complete locomotive.

Following these orders, we are led first to the boiler shop. Here the sheets of iron or steel, as the case may be, are laid out. Both materials are now used for boilers, according to the preferences of customers. The homogeneous cast steel manufactured in this country, and which has come into use within the past few years, gives a metal for fire-boxes and boilers which is surpassed by no other yet used for the purpose. To the credit of American manufactures it may be said, moreover, that for these uses the homogeneous cast steel plates manufactured in the United States are superior to any steel which can be imported. The steel plates used for boilers are 5-16 of an inch thick; iron plates are ½. The former, although thinner, give, on account of the superior character of the metal, a tensile strength of about 30 per cent. greater than the ½-inch iron plates. For fire-boxes, steel has now almost entirely superseded all other metals. For boilers it is gradually but slowly coming into use. The first cost for a steel boiler is from $250 to $500 greater than for iron, but the superior strength and durability of those made of steel plate fully warrant the expenditure, in the judgment of many railroad officers.

Before being put into a boiler, every sheet, whether of steel or iron, is carefully tested, and the slightest flaw or imperfection in the metal is at once detected by the expert who devotes his whole attention to this important duty. If tried and not found wanting, the great jaws of steam shears cut them to the required size; four great flange fires then receive them, where they are softened so as to be pressed and beaten into the proper curve; the steam punching machines or the drilling machines, as the case may be, perforate the edges with holes of exact size, form, and equidistant; then with hammer and tongs, the sheets are tacked together by an occasional rivet, a powerful crane takes the skeleton up and delivers it to the steam riveting machine, where every rivet is clenched under three strokes of 60,000 pounds each. The precision and power with which this machine does its work is a marvel of mechanical skill.

The "fire-box" having gone through a similar process now meets the "shell of the boiler," and the two are joined firmly together by screw stay-bolts; the waist or cylindrical part is then attached, and the boiler is complete. It is placed upon wheel-trucks and sent over a track to the erecting shop.

In the same time that it requires to do this work in the boiler shop, by an exact distribution of force, the workmen in the foundry have drawn the liquid metal from their roaring furnaces, have cast it into forms for cylinders, driving-wheel centres, chests, valves, &c. These, received in the Willow-st. machine shop, have been bored, planed, heads turned and ground to a perfect fit, and, as complete cylinders and steam-chests, are sent to the erecting shop. The drivers are sent from the foundry to the first-floor machine shop; the axles, forged under a heavy steam hammer, are delivered to the same place. The tires for many of these drivers are made at "The Wm. Butcher Steel Works," at Nicetown, and are pronounced, by competent judges, equal to the best imported. Seven thousand have been in use, some in hard use, for several years, and give entire satisfaction. Note this fact to the credit of American steel manufacture. The crank-pins are received in the rough from the Baldwin & Liveszey Steel Works, Frankford. In the machine shop the tires are bored and shrunk on the centres of the drivers, the axles and pins are turned, the tires are shaved down to exact equality of size, the axles and

crank pins are forced into the wheels by hydraulic pressure of from 20 to 80 tuns, and the drivers complete are sent to the erecting shop. The truck wheels go through the same process, and are sent to the erecting shop.

Under the ponderous strokes of the steam hammer of 2½ tons power, great iron frames are forged out, and pedestals are welded to them un the same weight. These frames are roughly dressed up by hand in the smith shop; they are then taken to the Willow-st. shop, where they are planed, slotted, drilled, and completed in every part. The "frame" is the basis or foundation to which all the parts of the locomotive are bound. It too is sent to the erecting shop. Meantime the trucks, smokestacks, cabs, and tenders have been made in their respective departments, and are ready for the engine proper.

Having thus made the tour of the construction department, we now enter the erecting shop, that general receptacle where all parts are received and whence issue complete locomotives destined for all parts of the continent. Here in an area 168 feet long by 140 wide, under an arched roof, netted with steam pipe, water pipe, and suspended tracks, the parts prepared in other departments of the established are brought together. Boilers, cylinders, frames, guides, crossheads, drivers, and other articles innumerable, are here tossed together in what, to the unpracticed eye, seems inextricable confusion. Upon closer inspection it is found that every article has plainly marked upon it the letter and number of the engine of which it is to form a part. We find here twenty or more boilers mounted on trestles, gangs of men at work, managed by as many master mechanics, under the direction of the foreman of the shop, the whole under the supervision of the superintendent of construction. To these boilers the parts are brought and attached: and, what is most marvelous, here are bolts made in one part of the works to be inserted into holes made in another; bars, screws, pins, yokes, &c., fit to such exactness that the thinnest film of oil is an obstruction. The wonder is how such absolute precision is possible in an establishment employing nearly two thousand men, distributed throughout different shops. Upon expressing surprise at this circumstance, I was taken to the department of "standard measurements." There I saw gauges made of hardened steel for the measurement of every fraction of an inch, gauges for turning bolts, for boring holes, for cutting threads or screws, for planing surfaces, gauges for reamers, for crossheads, for bolts, and bolt-heads. Also calipers for every length of inside and outside measurement required in the works. Each department is supplied with a complete set of these gauges and calipers required for the measurement of parts made therein; and these are carefully inspected and compared with the standard once a week by the superintendent of this department. There is thus no excuse for any workman who makes his bolt, bar, or screw too long or too short, too thick or too thin, and such blunders are exceedingly rare. This is the clue to the marvelous exactness in all the work. If an engineer in Oregon should telegraph to the Baldwin Locomotive Works that the piston-rod or crosshead of locomotive No. 2,300 is broken, a duplicate, certain to fit with absolute exactness, could be forwarded at once.

The system of standard gauges, together with the plan of doing all work to drawings or patterns, explains why an establishment of its size can not only build so many engines in a year, but can turn out machines in which the parts are so accurately finished and absolutely interchangeable. A complete system and thorough subdivision of the work reveal the secret. The same gang of men under the same foreman works from one year's end to another on the same work, as fitting up rods, boring out and finishing cylinders, fitting the valves, or putting the engine together when all the parts are completed. Each man having only his specialty to attend to, becomes thoroughly an expert at its details, and can do his work better and faster for this very reason. In fact, the very quantity of the work produced in itself conspires to exactness in all the details, by making possible a complete system and thorough subdivision of labor.

But from this digression let us return to the erecting shop. One of the gangs has carried the erection of the engine under its charge to that point where trial is made. No boiler is riveted perfectly steam-tight under the first process. Each undergoes inspection, first under water pressure so as to detect leaks, and after that under steam pressure so as to insure strength. This duty in the Baldwin Works is committed to an expert who, by many year's experience, has acquired such perfect knowledge in his specialty as to make it, humanly speaking, impossible that any imperfection of construction should escape his detection. Strength and tightness are thus secured in all the boilers. The parts are finally connected, a strong puff of steam is sent through the pipes, valves, cylinders and escapes, so as to blow out any iron fillings, chips, or other loose matter, the cylinder-heads are then bolted to the cylinders. The men lay hold of the drivers and turn them two revolutions forwards and backwards to ascertain whether any obstructions exist. Finally steam conveyed through pipes beneath the roof is let on, the valves are opened and the drivers revolve, at first slowly, then at fair "service speed." The inspector is again present; he lays his finger on the piston-rod, connecting arms, drivers, and cylinder heads, and feeling the pulse of the new machine, detects the slightest jar, tremor, or irregularity in motion, and orders its correction with infinitely more exactness than the most skillful practitioner discovers, and cures the disorders of his human patient. The locomotive is then pronounced complete, it is so entered upon the books of the firm; the trestle-work is removed, and the engine is lowered by means of powerful "jacks" to the track on the turn-table, whence it is run out on the siding of the Reading Railroad to be shipped to the place designated by the purchaser.

During the past twelve months two hundred and seventy-one complete locomotives have been sent from this shop, as follows: In October, 1869, 22; in November, 26; in December, 22; in January, 1870, 21; in February, 21; in March, 21; in April, 21; in May, 23; in June, 23; in July, 23; in August, 24; in September, 24. This is certainly a decided progress from the five engines turned out by Mr. Baldwin in 1835. But the progress which has been made in the methods of construction, resulting in increased efficiency, strength, speed, economy in fuel, and in repairs, is no less wonderful. The archives of the establishment, containing as they do communications covering a period of thirty-five years, and in the handwriting of railroad managers, engineers, and master mechanics, are not only a reflex of the general progress of railroad practice, but bear strong testimony to the efficiency and durability and superior workmanship for which the Baldwin engine has achieved an enviable reputation. An acquaintance with the *personnel* of the firm will compel the conviction that this reputation is well deserved. Mr. M. W. Baldwin conducted the business of the locomotive building in person from 1831 to 1839. In 1839, he associated with himself Messrs. Vail and Hufty, and the business was conducted by the firm of Baldwin, Vail & Hufty, until 1841, when the latter withdrew, and Baldwin & Vail continued the copartnership until 1842. In that year Mr. Vale retired, and Mr. Asa Whitney, who had been superintendent of the Mohawk and Hudson Railroad, became a partner with Mr. Baldwin until 1846, when he retired, to engage in the manufacture of car wheels, with which business he is still connected as senior member of the firm of A. Whitney & Sons, Philadelphia. From 1846 to 1854, Mr. Baldwin was sole proprietor of the establishment; and, in the latter year, Matthew Baird, a practical mechanic and successful manufacturer, who had been connected with the establishment since 1836, joined Mr. Baldwin under the firm name of M. W. Baldwin & Co. In 1866, Mr. Baldwin died, and in the following year the business was reorganized, and the works designated the Baldwin Locomotive Works, M. Baird & Co., proprietors. George Burnham and Charles T. Parry were admitted to the copartnership; and three years later, January, 1870, Edward H. Williams, William P. Henszey, and Edward Longstreth became members of the firm. Here are six active, practical, experienced men, each in charge of a department the operations of which he thoroughly understands. Mr. Baird, by reason of a long and intimate acquaintance with the trade, practical experience as a manufacturer, wealth, and social position, rightfully is at the head of the establishment, and is referred to in all matters of importance, both in the production and selling of engines. Mr. Burnham has, since 1838, been in the counting-room; he is properly, therefore, the financial manager, holds the keys of the vaults, looks after the bank account, and takes care of the exchequer, which in an establishment doing a business to the amount of three and a half million dollars annually, is by no means an ordinary responsibility. Mr. Parry, who began service here in 1836, now holds the general supervision of the works of the eighteen hundred men employed, of the condition and order of the shops, materials brought in, and manufactures sent out; no general of an army has his subordinates under more perfect discipline, nor his supplies more punctually, precisely where needed, than has the generalissimo of these works the men and things under his charge. Mr. Williams is a "railroad man," with eighteen years' experience in the management of the best conducted roads in the United States; his knowledge of what is required in actual service enables him to put into the construction of engines special adaptability to special service. His acquaintance with active railroad men and the experimental knowledge of their needs, enables him intelligently to receive and apply their suggestions in the detail of their orders. Mr. Henszey is the chief of the drawing department, with fifteen years' experience as a mechanical engineer. All orders for work, as related above, are received by him and distributed from his department to all the shops. Mr. Longstreth, thirteen years ago, entered the works an apprentice in the machine shops, and before the end of his apprenticeship was made foreman of one of the shops. He is now the superintendent of construction, ordering and overseeing the work in every department. Under these are private secretaries, bookkeepers, draughtsmen, assistants, foremen, managers, inspectors, bosses, and watchmen, who see that orders are delivered and obeyed with precision and dispatch. This explains why, in so large an establishment, doing a business so extensive, machines are produced so uniform in quality and so satisfactory in service.—*N. Y. Tribune.*

☞ The Monroe (W. Va.) *Register* says there is a report current there that the Baltimore and Ohio Railroad Company, and other wealthy patrons of the Virginia Valley railroad, have an agent in Monroe county who is examining a route for the extension of that road down the valleys of Potts and Indian creeks, thence on through Tazewell to Cumberland Gap, continuing to Memphis, Tennessee. The report states that this is a favorite project of the Baltimore capitalists.

☞ The Belfast and Moosehead Lake railroad, recently completed, and which was to have been leased by the Maine Central Railroad Company from the 1st of November, has, it is said, been rejected by that company, "as not being built in accordance with the contract entered into."

☞ The completion of the first hundred miles of the Southern Minnesota railroad is soon to be celebrated in the customary manner.

☞ The Thomaston and Barnesville (Ga.) Railroad is completed to within eight miles of Barnesville.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "‡."

American Railroad Journal.

Saturday, November 26, 1870.

Stock Exchange and Money Market.

Money has been in better supply, and less urgent request, especially for speculative use. Rates have favored the borrowing interest, the range on call having been from 4@6, and in the discount line from 6½@8½ per cent. per annum. The exciting war reports and rumors on Thursday and Friday of last week tended to stiffen rates, but toward the close, the offerings to the street houses were in excess of their requirement at the current quotations. The last city bank return was regarded as less assuring, as it exhibited a decrease of nearly 1¾ millions in the deposit line and about 1⅛ millions in legal tender reserve. A gain of about half a million of specie was reported. The loan and discount averages were reduced 1½ millions; and the circulation was contracted a little. The Sub Treasury reported a loss of $604,412 of specie, and a gain or $837,403 of currency as the result of the week's business.

The specie reserve of the city banks according to the latest return is $17,580,225, against $27,929,071 same time last year. The city bank deposits are now $194,900,406, against $188,734,190 week ending Nov. 19, 1869. The legal tender reserve amounts to $52,716,773, against $48,455,121 same time last year. The circulation now stands at $32,301,222, against $24,231,925 same time last year. The loans are now $264,609,216, against $253,068,008 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $89,509,846 a day, against a daily average of $80,508,571 the preceding week. The current weeks' exchanges average about 101½ millions a day. The city banks, last week, reported a gain of $455,763 of specie, with a loss of $1,720,531 of deposits, and of $1,115,246 of legal tender notes. They reduced their loans $1,567,150; and their circulation, $78,346.

National Bank notes to the amount of $243,980 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $335,984,918, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $33,035,114 leaving, with the existing 1,612 banks, (having an aggregate capital of $430,299,301,) an actual circulation at this date, of $302,949,804. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $345,845,000; and for the public deposits, $15,834,500—making a total of $361,179,500. The Treasury Department last week redeemed and destroyed $758,800 of worn and mutilated fractional currency, and issued $313,121 of new.

The U. S. Sub-Treasury receipts, week ending with Nov. 19, were $3,293,548 in coin, (including $2,180,000 from customs duties,) and $6,929,284 in currency; payments, $3,897,961 in coin, (including $2,261,277 of coin interest,) and $6 091,882 in currency; balance at the close of the week, included $59,845,205, of coin, against $60,449,617 the preceding Saturday, and $9,097,537 of currency, against $8,260,135 at the close of the preceding week. The business of the Office on the first two days of the current week, was as follows. On Monday, receipts, $549,795 in coin, (including $425,000 from customs,) and $303,479 in currency; payments $217,866 of coin (including $205,128 of coin interest), and $1,255,384, of currency. On Tuesday, receipts, $584,435 in coin (including $471,000 from customs), and $412,958 in currency; payments, $80,032 in coin (including $47,317 of coin interest) and $235,812 of currency. The balance at the close of business on Tuesday included $9,188,660 of currency, and $60,681,537 of coin, against a balance a week previous of $9,040,635 currency, and $60,629,158 coin.

The aggregate receipts of the U. S. Sub-Treasury in October were $51,530,870, including $11,724,402 from customs; aggregate payments, $47,417,035, including $2,112,636 of coin interest.

The U. S. Sub-Treasurer issued in October $4,934,500 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $1,798,971 of coin certificates, received for customs.

Government revenues have been on a quite moderate scale since our last. The excises during

the week yielded about two millions; customs at the port of New York, $2,037,911, and at the outports about $700,000 (in coin) more, making the grand total income for the week equal to about $5,080,200 in currency. The income of the Government, from excises, since July 1, 1870, has been $70,504,430.

Gold has been more freely dealt in, opening quite buoyantly and advancing to 113½, under the exciting war reports and rumors from Europe; but closing tamely, and irregularly, having receded to 111⅜@111½. The final quotation was 111¾, as against 112⅜ the preceding Wednesday. The customs export inquiry has been light. On Wednesday, Government sold $1,000,000 of gold at equal to market rates. The aggregate of the November interest obligations on the public debt is $23,851,629, of which the New York office has already paid off about 13 millions. There has been a moderate show of activity in the Gold Loan market, and rates have been variable.

The export drain last week was $655,078 against $410,184 week ending with Nov. 12; $3,156,924 week ending with Nov. 5; $303,562 week ending Oct. 29; $556,180 week ending Oct. 22; $654,328 week ending with Oct. 15; $802,174 week ending with Oct. 8; and $465,260 week ending with Oct. 1. The shipments thus far this year have been about 55¾ millions, against 30 millions same time in 1869; nearly 68½ millions same time in 1868; 44⅜ millions same time in 1867; over 57⅛ millions same time in 1866; and 26½ millions same time in 1865. The exchanges at the Gold Exchange Bank, which were 98¼ millions on Thursday of last week, were 118⅛ millions on Friday, 76⅞ millions on Monday of this week, and 85¼ millions on Tuesday.

The customs demand for Gold last week, averaged $363,334 a day; thus far, this week, it has averaged $448,000, a day, or equal to a weekly aggregate of $2,240,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $11,490; and since Jan. 1, 1870, $11,216,018, against $14,845,789 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $128,812,540 against $119,798,156, same time in 1869.

The exports of specie, from this port, last week, were $655,078 against $172,074 same week last year; and since Jan. 1870, $55,768,447, against $30,012,562 same time in 1869. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $2,261,277; and since Jan. 1, 1870, $80,830,324 against $85,530,937 same time in 1869.

The customs revenue at the port of San Francisco, from Jan. 1 to Nov. 10th, was $7,516,000, against $7,441,000 same time last year.

The specie exports by steamer and railway, from San Francisco, from Jan. 1, 1870 to Nov. 10th, were $31,006,000, against $33,815,900 same time last year.

Foreign exchange has been in less demand and quoted a fraction lower, closing heavily. Bankers' sixty day bills on London closed on Wednesday at 109@109¼; sight bills on London, 109¾@110. The offerings of produce bills have been quite liberal. The week's exports of domestic produce have been to the currency value of $4,843,804, and since January 1, 1870, $168,281,586, against $176,287,619 same time in 1869.

Government securities have been somewhat weaker in price, on a lighter volume of dealings; but close about steady. The offerings have not been large.

U. S. sixes of 1881 closed here on Wednesday of the current week at 113¼@113⅜; U. S. Five-Twenties of 1862, ex-coupon 107¾@107⅞; U. S. Five-twenties of 1864 at 107@107⅛; U. S. Five-Twenties of 1865, 107⅛@107¼; U. S. Five-twenties of 1865 consolidated, 109¼@109⅜; U. S. Five Twenties of 1867, 109⅜@109½; U. S. Five-twenties of 1868, 109¾@109⅞; U. S. Ten-forties at 106⅛@106⅝; U. S. Six per cent. currency bonds, 110¾@111.

State bonds have been in less confident demand, through the week, and have been quoted generally firm, closing irregularly.

Railway bonds have been in good request for investment purposes at firm prices. Central Pacific Sixes have been selling more freely at 91@91¼. This price covers the accrued coin interest for nearly five months, equal to about 2½ per cent. in gold, making the net cost of the bonds only about 88¼. Union Pacific Sixes closed at 82@82¼.

Railway and miscellaneous share property has been less freely dealt in and have been lower and irregular in price, closing rather heavily.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 9.	Nov. 16.	Nov. 23.
Consols	93⅜	92	92¾
U. S. 5-20's of 1862	89⅜	87¼	88
U. S. 5-20s, 1865	88⅛	86¾	87¼
" 1867	90⅛	88¾	89¼
" 10-40s	87¾	85¾	87
Erie	19¼	18	18½
Ill. Central	112¾	109¾	111
At. and Gt. West	29	31½	32

General business has been moderately active, especially in the line of Cotton and Breadstuffs, but prices have been unsettled, closing, as a rule, with more steadiness. Middling upland cotton closed buoyantly on Wednesday at 16⅜ cts. per lb. The stock of cotton now here is given at about 55,000 bales. The receipts at the port this week, have averaged about 6,200 bales a day. The receipts at all the ports, since Sept. 1, 1870, have been 799,000 bales, against 692,850 bales same time in 1869-'70; exports same time 373,600 bales, against 305,000 bales same time in 1869-'70; stock on hand at latest dates, 336,800 bales, against 261,000 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870 have been 13,626 pkgs., against 18,516 pkgs., same time in 1869. From Boston, 5,085 pkgs. in 1870, against 6,826 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves have been in less request and heavy in price; we quote the range at from 7@15¼c. per lb.; week's receipts, 8,311. Milch cows quiet at $40@$100 each, receipts, 129. Veal calves have been in moderate demand at from 5@11½c. per lb.; receipts, 2,776. Sheep in limited request at from 4@6½c.; lambs at 5@8c. per lb.; receipts, 39,829. Swine have been in less demand at 7¾@8¼c. per lb., all live weight; receipts, 23,696.

Foreign Goods have been less sought after, though buyers have not had any existing advantages as to price. The dry goods entries at this port, last week, were $1,985,148, making with the general merchandise imports a total of $6,219,745, against $4,906,600 the preceding week.

Ocean freights have shown less activity outside the line of Flour, Wheat and Cotton shipments, which have been pretty liberal. For Liverpool we quote flour at 2s.6d.@2s.7½d. by sail, and 3s. by steamer per bbl.; grain at 8¾@9d. by sail, and 9¼@9½d. by steamer per bushel; cotton at ¼@$\frac{5}{16}$d. by sail and ½d.@$\frac{9}{16}$d. by steamer per lb.; and heavy goods 20s.@30s. by sail, and 30s.@50s. by steamer, per ton. Total number of vessels in port on Wednesday, 479.

The following will show the exports (exclusive of specie) from New York to foreign ports or the week ending November 22d, and since the beginning of the year:

	1869.	1870.
For the week	$4 088,188	$4,343,804
Previously reported	173,048,188	163,937,782
Since Jan. 1	$177,136,376	$168,281,586

The imports for the week ending Nov. 19, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$885,582	$1,985,118
Gen. merchandise	2,263,269	4,234,627
Total for the week	$3,148,851	$6,219,745
Previously reported	261,114,213	264,041,483
Since January 1	$264,263,064	$270,261,228

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—N. Y. Central 6s, sub. bonds, 89; Central of New Jersey new bonds, 102; Ohio and Miss. consol. bonds, 88; Am. Dock and Imp. 7s, 98½; Jefferson R. R. 1st mort., 90½; Hannibal and St. Joseph 8s, con., 106; St. Louis and Iron Mt. 1st mort., 89; Toledo, Wabash and Western consol bonds, 83¼; Cedar Falls and Minnesota 1st mort., 84; Long Island R. R., 67½; South Carolina 6s, new, Jan. and July, 69¾; do. April and Oct., 68¾; North Carolina 6s, special Tax, 18½; do. Fund Act, 1868, 24½ do. 1866, 37; Arkansas 6s, issued to L. R. and Ft. S. R. R., 19@20; George's Creek Coal, 60@65; Atlantic Coal, 1.50@2.00; Bare Hill, 0.05@1.00.

☞ The earnings of the European and North American Railway for October, 1870, were $22,857 91, against $13,086 90 in October, 1869, and $20,298 58 in October, 1868.

Madeira and Mamore Railway.

A railroad is projected in Brazil, which is likely to be of considerable benefit to the commerce of the United States. It is to be called the Madeira and Mamore Railway, and will extend from San Antonio to Guajara-Merim, a distance of about 170 miles. Its object is to furnish transportation of goods going to and from Bolivia, around the falls of the Madeira river, which are an insuperable obstacle to navigation, and now compel traffic to take an unnatural and very expensive route over the Andes to Peru. It costs $200 to carry a ton of freight from Europe to Bolivia; whereas, when the projected railroad is completed, it will go by the way of Para, costing only one-third as much, and still yielding a handsome profit to the carriers. The region which will thus be opened to American as well as European merchants, is highly productive, and contains a large population, so that its trade will be extremely valuable.

☞ The Easton *Journal* says that the contractors for the completion of the Maryland and Delaware Railroad Extension are making rapid progress. Construction trains are now running to Peach Blossom Bridge. Several other bridges have been finished, and but one remains to be completed, while the grading is finished almost to Oxford, the proposed terminus. It is expected that the road will be opened early in January.

☞ The *Saratogian* says that steps have been taken to build a new railroad from Saratoga to Albany, and an immediate survey of the route has been ordered. The new road will be so located as to connect conveniently with the steamboat lines in Albany, and will be several miles shorter than the old route. The project is in the hands of gentlemen who possess both the means and the energy to push it to a successful termination.

☞ A cable despatch from London to the Treasurer of the Great Western Railway Company of Canada, dated Nov. 15th, says all the bonds put on the London market by that company to raise funds to build at air-line from Buffalo to Glencoe have been subscribed. This will cause the expenditure of $5,000,000 in Ontario within the next few months.

☞ The bridge over the Monocacy, on the line of the Western Maryland Railroad, is completed and the track is laid to Rocky Ridge, several miles beyond. It is not yet fully ballasted, but an engine has passed over it, and the Westminster *Sentinal* learns that trains will run regularly to the Ridge in a few days.

☞ Falmouth (Me.) has voted, 259 to 14, to take stock in the Cape Cod Railroad to the amount of $60,000. It is said that this action will insure the construction of the road from Monument through Falmouth Village to Wood's Hole.

☞ Work on the Oxford section of the Maryland and Delaware Railroad is progressing rapidly. It is said the road will be finished to Oxford by winter.

☞ The Supreme Court of Errors at Norwich, Conn., has decided that railroad mortgage bonds of the Norwich and Worcester Railroad, made prior to 1862, must be paid in coin.

☞ The grading of the Portland and Oxford Central Railroad is progressing rapidly.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH,
BANKERS AND DEALERS IN GOVERNMENT SECURITIES, No. 5 NASSAU ST.,
NEW YORK, Nov. 21, 1870.

☞ THE FUNDING OF UNITED STATES FIVE-TWENTIES into a first-class security, paying the same rate of interest (six per cent., gold), and which cannot be called in under twenty-five years without the consent of the holder, may now be effected at a clear profit of about twenty per cent., by exchanging them for the FIRST MORTGAGE BONDS OF THE CENTRAL PACIFIC RAILROAD COMPANY. The Central Pacific Railroad is well and economically managed, and its revenues are large, certain, and constantly increasing, as is shown by the following statement of earnings of the main line for the current year:

January	$418 104 41	June	$729,274 46
February	394,176 47	July	784,099 64
March	488,332 91	August	807,815 68
April	633,758 06	September	833,412 50
May	768,719 77	October	804,800 00

The Central Pacific Bonds have the advantage of a ready market on both sides of the Atlantic, of regular quotations at the Stock Exchange, and are based on a finished and equipped road, already placed on a stable and profitable basis.

Having originally negotiated these bonds, and being thoroughly acquainted with their soundness and value, we have introduced them as a specialty in our regular business in connection with our dealings in Government securities, and recommend them without hesitation to our friends and customers desiring to make investments or to fund their five-twenties upon advantageous terms, without reduction of interest.

FISK & HATCH.

☞ MOBILE AND MONTGOMERY RAILROAD FIRST MORTGAGE 8 PER CENT. GOLD BONDS, indorsed by the State of Alabama, on completed road, $13,000 per mile, of established and increasing earnings. Security indubitable, examined, recommended, and for sale at 95 and accrued interest by

SOUTTER & Co., 53 William-st.
DREXEL, WINTHROP & Co., 18 Wall st.

☞ The Brookville (Pa.) *Jeffersonian* says the route of the Allegheny Valley Railroad between Brookville and the Allegheny river has been changed, and the Mahoning route abandoned. The route now selected is along the valley of the Red Bank, and the survey on this part of the line is already completed, and the right of way secured. By this change it is said the company will save from $700,000 to $1,000,000, in the construction of the road.

☞ At a meeting of the stockholders of the Cincinnati and Springfield Short Line Railroad Company in Cincinnati on the 15th inst., the following gentlemen were elected directors: H. F. Clark, of New York; James M. Marvin, of Saratoga; J. H. Devereaux, L. M. Hubby and Oscar Townsend, of Cleveland; R. M. Shoemaker, Seth Evans and Joseph N. Kinney, of Cincinnati. The Board organized by electing R. M. Shoemaker President, and M. C. Shoemaker, Secretary.

☞ O. F. Moore, of Cincinnati has been appointed Superintendent of the Indianapolis, Cincinnati and Lafayette Railroad.

Journal of Railroad Law.

RAILROAD COMPANIES—RECIPROCAL DUTIES OF CORPORATIONS AND PERSONS IN CROSSING AND TRAVELING A PUBLIC ROAD.

The case of Dunn *vs.* The Pittsburgh, Fort Wayne and Chicago Railway Company, (56 Penn., 280,) was an action for damages caused by defendants negligently running their engine against the plaintiff's wagon as he was crossing their railway on a public road: that the crossing for the road over the railway had been so badly constructed by the company, and was so much out of repair, that one of the wheels of his wagon got fastened between the rail and the planks of the crossing so that he could not extricate it, and whilst in this situation a collision took place: by which one of his horses was killed, and wagon and harness injured. The principal question, and the only one specially noticed in the opinion of the Supreme Court, was, whether the road on which the plaintiff was traveling, was a public road.

The testimony on this question was from Thomas Dunn, a son of the plaintiff. He said: "The road made down to crossing in 1853 or 1854 or 1855; runs over father's land; has been open to the public ever since; put up a permanent board fence on one side 1866, fence on the other side, where it needed it, some time before that; planks between the rails were considerably higher than the rail; wagons have been caught there frequently; I spoke to the superintendent several times about the condition of this road, and told him it was dangerous, and he promised to repair it, but never did."

Other evidence was given for the plaintiff. The verdict was for the plaintiff for $358 28. The following is the able opinion of

READ, J.—In the Queen *vs.* Inhabitants of Dukinfeld, 32 L. J. N. S. Mag. cases, p. 230, Mr. Justice Blackburn said: "The common law enabled any owner to dedicate land as a highway, and then at common law followed the consequence that it became repairable by the inhabitants of the parish or district." In Re Milford 4 Barr., 305, the Court said: "The authority of the owner of a town plot to dedicate his ground to public use is as effective as that of the legislature;" and in Borough of Birmingham *vs.* Anderson, 12 Wright, 258, it is said: "It has been the practice in this country in laying out towns to have the plot surveyed and a plan made in accordance with a survey designating the streets, public squares and open spaces left for commons, wharves or any other public purpose. Those streets, squares and open spaces are thus dedicated to the public by the proprietors of the soil, whether they be the State or private individuals. When a town is situated on a navigable river, it is generally the custom to leave an open space between the line of the lots next the river and the river itself. This was done by William Penn in 1682 in the original plan of the City of Philadelphia on the Delaware front, and he called it a top-common, and in 1784 his descendants, the former proprietors, in their plan of Pittsburg, adopted a similar measure of leaving such an open space, and they called it Water Street. In 1789 the proprietors of the land on which the City of Cincinnati is built pursued the same policy, and in their plan the ground lying between Front Street and the Ohio River was set apart as a common for the use and benefit of the town for ever." In Commonwealth *vs.* Cole, 2 Casey, 189, Knox J. speaking of a road in Carbon county, said: "To prevent any future controversy, it is proper for us to add that the use of the ground by the public as a highway for more than twenty-one years made it a public road just as effectually as though it had been originally laid out and opened by the proper authorities." In Schenly *vs.* Commonwealth, 12 Casey, 29, a peculiarly strong case, my brother Strong said (p. 59): Wherever there is an actual giving of land for a public highway accepted by the public, though there be no need, the dedication is complete.

The acceptance there was the user by the public. Eight years is quite a sufficient time for presuming a dedication of the way to the public. In a great case, which was much contested, six years was held sufficient: 11 East, 375; and in Jarvis *vs.* Dean, 3 Bing., 447, Chief Justice Best said: "As it had been used for four or five years as a public road, the jury were warranted in presuming that it was used with the full assent of the owner of the soil.

"If the act of dedication be unequivocal, it may take place immediately:" Woodyear *vs.* Hadden, 5 Taunt., 126, per Chambre, J. and "It may be established by acts unequivocal in their character on the part of the owner and the public, although occurring on a single day." Hunter *vs.* Trustees of Sandy Hill, 6 Hill, 414.

The defendants in this case, say, the principal question is whether the road leading from the Beaver road to the State Road and to the Remington Station, was a public or a private road, and that the crossing over their railroad was a private one which should be kept in repair by the owner thereof."

The plaintiff alleged and proved that the road was laid out by him, the owner of the land, and opened to public use as long ago as 1855 or 1856, as testified to by the witnesses, and fenced on one side all the way and on the other till it reached the bank, where no fence was necessary, and the Court, on this state of facts, charged the jury, if they believed these to be the facts, "and if this strip of ground so thrown out was dedicated to the public use without any intention of resuming the exclusive right to or use of the said ground, and if from that time to this, the public has used the same as a public road leading to the defendants' station, then it has become public so far as that question can have any legitimate bearing on this issue. You will determine whether the facts are so or not."

We can perceive no error in this guarded instruction, for it is clear that so far as regarded the plaintiff and the public using it, it was not a private road but a public one, and was so treated by the defendants and the community.

The Court further say: "In addition to the evidence introduced to show the laying out and fencing this road, the plaintiff called witnesses to prove that at or soon after the opening of this road by the plaintiff, the railroad company made a crossing of plank, but that it is improperly constructed because the edges of the plank were higher by an inch or more than the top of the rail, thus forming a groove or net between them, dangerous to the passage of wagons because the wheels, owing to the angle at which the road crossed the railroad, were liable to be caught and injured therein. That the officer in charge of that portion of the road was notified by different persons several times of the dangerous condition of the crossing and promised to repair it, but had not done so."

These facts the verdict of the jurry fully established.

1. That it was a public road and so treated by the defendants and the public.

2. That the crossing was constructed by the defendants and neglected to be repaired by them after full notice of its defects.

3. That it was dangerous and known to be so by the defendants.

The plaintiff's hired man was driving his team along this road with a loaded wagon and when he came to the crossing could neither see nor hear any train approaching, he then attempted to drive across the railroad, but in doing so one of his wheels became fast in this groove, and while the driver was attempting to extricate it a gravel train belonging to the defendants came up the road, collided with the plaintiff's team, and produced the injury complained of.

This statement and the very clear and lucid charge of the Judge make it unnecessary to say more than that the errors assigned are not sustained, and that the defective state of the defendants' crossing being the cause of the injury suffered by the plaintiff.

Judgment affirmed.

Bridge Over the Housatonic River.

The New York and New Haven Railroad Company will soon commence the construction of a handsome iron truss bridge of great strength over the Housatonic river, about five miles east of Bridgeport. Its entire length will be 1,091 feet, consisting of two stationary spans of 190 feet each, three stationary spans of 168 feet 4 inches long each, and a draw or swing-span 206 feet long. The piers will be built of stone, and of such a form as will be best calculated to resist large masses of floating ice, when it breaks up and floats down the river during the Spring freshets. When the draw shall be opened, there will be a clear space on each side of eighty-five feet for the passage of vessels. The iron girders, one on each side, will be twenty-two feet high, and sufficiently apart for two tracks, with a space of six feet in the clear between them. The columns, girders and beams are to be of cast iron. The wrought iron work is to be capable of withstanding a tension strain of not less than 60,000 pounds to the inch without breaking. The floor beams are to consist of two heavy Phœnix I beams properly trussed. The stationary spans of the bridge are to correspond in style and appearance with the bridge built for the Newark and New York Railroad Company over Railroad avenue, in the city of Newark, except that the end posts are to be vertical. The draw or swing-span is to be of the same general style and appearance as the draw constructed by F. C. Lowthorp across Bridgewater Harbor.

It is agreed on the part of the contractor, that it shall not require more than two men to open or close the draw with ease inside of two minutes, and in case it shall be found on completion, that more than two men shall be necessary to perform the work of opening or closing the draw in the time prescribed, a stationary steam engine is to

be provided for the motive power to turn it, and the turn table is to be so constructed, that in case any part thereof liable to break or wear out by ordinary use of the draw, may be replaced without interrupting the use of the swing span.

The bridge, when entirely finished and declared ready for the passage of trains over it, is to be subjected to a load of 5,000 pounds per lineal foot, without deflecting in any part more than one inch on any of the spans, and when removed all parts of the bridge to assume their original position, and no greater deflection is to occur to any part of the bridge while a train is passing over it. The Company reserves the right to select at random pieces of wrought iron from each of the sizes and forms used in the construction of the bridge, and subject the same to a test strain of 60,000 pounds per sectional inch.

The bridge will form a straight line across the river and level grade. It will be constructed on the north side of the present railroad bridge, and as near as it can be without the work being interfered with.

The cost of the iron superstructure will be $140,000. Including the piers and approaches, the cost of the bridge is estimated at something over $300,000. The bridge, with the exception of the draw-span, is to be completed by the end of October, 1871, and the swing-span is to be finished within one month after the close of navigation next year.

New Orleans, Mobile and Chattanooga R.R.

$2,825,000 FIRST MORTGAGE SINKING FUND BONDS, INTEREST AT 8 PER CENT. IN CURRENCY OR 7 PER CENT IN GOLD, at the option of the holder, secured by a first mortgage, at the rate of $12,500 per mile, upon the trunk line of road, from the City of *New Orleans* to the Western boundary of Louisiana, a distance of 226 miles, in the direction of *Houston*, Texas; the name being the Louisiana Division, of the railroad of THE NEW ORLEANS, MOBILE AND CHATTANOOGA RAILROAD COMPANY, extending from the City of Mobile, Alabama, to the City of Houston, Texas, a distance of 475 miles. These bonds are payable, forty years from their date, and are secured by a first mortgage, made to HON. OAKES AMES and HON. E. D. MORGAN, Trustees, upon the Louisiana Division of the road, with the equipment, real estate and franchises pertaining thereto. The principal of the bonds is payable in New York, in currency, or in London, in sterling, at the rate of £200 for each $1,000; the interest is payable in January and July of each year, at the rate of *eight per cent.* in currency, in New York, or at the rate of £7 for each coupon of forty dollars, in London, at the option of the holder, in all cases, and *free of United States Government Tax.* By the terms of the mortgage, a Sinking Fund is provided, to be paid to the Trustees and invested by them, only in these bonds, sufficient to pay the whole amount of the bonds at their maturity. The Mobile Division of the Company's road, extending from New Orleans to Mobile, has been constructed and equipped in the very best manner, and is now opened for traffic. The road of the Texas Division, extending from the western boundary of Louisiana to the City of Houston, will be opened for traffic in a few months. The Louisiana Division, upon which the mortgage securing these bonds is made, is now being constructed, and the first section of sixty miles will be opened for traffic early in January; and the Company expect to finish the whole division in about twelve months thereafter. The prompt completion of this division of the road, is amply assured by the resources of the Company, which are applicable to the construction and equipment thereof, viz:

Cash Subscription by Stockholders, 25 per cent. of which has been paid and balance to be paid at the rate of 5 per cent. each month	$2,000,000
8 per cent. Bonds of the State of Louisiana, donated by the State to the Company, for this Division of its road	2,250,000
Second Mortgage 8 per cent. Bonds, principal and interest guaranteed by the State of Louisiana	2,825,000
	$7,075,000
First Mortgage 8 per cent. Bonds now offered for sale	$2,825,000
Total	$9,900,000

The above resources being solely for the construction of this division of the Company's road, amply assures its prompt completion, *and entitles its first mortgage bonds to be considered as one of the most safe and desirable securities ever offered for sale in this market.* This road is owned by a Company of capitalists, who have furnished all the means for the other divisions of the road, without offering to the public any of its securities, and, under whose supervision the line is being constructed and equipped in the most thorough manner, and when completed, its track and equipment will compare favorably with that of any other road in the United States. The revenue of the road is amply assured by the large traffic already existing between the cities upon its line and from the country which will be tributary to it.

The Company offer these bonds for sale, at NINETY-TWO AND ONE-HALF per cent. and accrued interest, recommending them to investors, as an undoubted security in every respect.

Circulars with maps of the line of the road, and full particulars concerning it, furnished on application to the *Treasurer of the Company*, at its office, NO. 31 PINE STREET.

JAMES A. RAYNOR, *President*, JOHN A. GRISWOLD, *Vice President*, LOCKWOOD L. DOTY, *Treasurer*.

EDWIN D. MORGAN, Chairman,
OAKES AMES,
HENRY J. GARDNER,
} Finance Committee.

NEW YORK, November 15th, 1870.

Bedford and Bridgeport Railroad.

The President and board of directors of the Bedford and Bridgeport railroad have let the eastern or Mount Dallas end of the road. The successful bidders were Messrs. Lowry, Williams & Co., of this county, and J. M. Campbell, Esq., of Altoona. The former got five miles of the road west of Mt. Dallas, for the grading of which they are to receive $68,455 26, and which is to be ready for the ties by July 1st, 1871. The latter got the remaining three sections, for which he is to receive $21.344 74, and which is to be ready for the ties by July 15th, 1871.—*Bedford (Pa.) Gazette.*

☞ R. M. Pomeroy, of Boston, has been re-elected President, and E. H. Nichols, of New York, Treasurer of the Central Branch Union Pacific Railroad.

☞ A new survey of the proposed extension of the Androscoggin Railroad is being made. The new road will strike the Grand Trunk Railway in the vicinity of Hotel Road Station, thus giving direct connection with Mechanic Falls and Portland by this route. It is confidently asserted that this extension will soon be put under contract.

The New Drift of Money-Capital.

The Secretary of the Treasury has given notice that he expects soon to begin funding the outstanding Five-Twenties into new Bonds, having from ten to forty years to run, and bearing 4, 4½ and 5 per cent. per annum, respectively. Preference is given to the subscribers to the new 5 per cent. Bonds in proportion to the amounts of the lower rate Bonds which accompany them. In other words, Mr. Boutwell expects to convert the fifteen hundred millions of Five-Twenties now out into the same amount of Bonds, whose average rate of interest he means to make as near 4½ per cent. interest as possible. Such is the steady advance of our national credit abroad, that Five-Twenties are now nearly at par in gold, and Ten-Forties are only a few points below them. With the cessation of war in Europe, and the return of capital and labor to our shores, the improvement must continue to increase until the Secretary is enabled to give notice that the old Bonds, upon which the privilege of redemption is already reached, will be paid off, and after a certain date, cease to bear interest.

It is a pertinent question of the day, especially to capitalists and holders of Government Bonds, "What new channel will this amount of capital, now fixed, be likely to flow into?" Will the holders consent to accept the new 4½ per cent. Bonds in exchange, or will they abandon Government Bonds to foreigners, national banks and the like, with whom the lower rates of interest are satisfactory? Now 4½ per cent. is a low rate of interest for this country; although there is every probability that as property accumulates the tendency of the interest-rates will be lower; yet the average for the older States is nearer 6 per cent., and in the Western States nearer 10 per cent. The guarantee and superior mobility of Government Bonds are advantages which will always tell in their favor. Before the war, there were many corporate and private parties whose credit ranked equally high with that of the United States. There are some of them to-day whose securities have equal readiness of sale, with nearly equal market values. The issue of paper money, and the outpouring of twenty five hundred millions of interest bearing obligations of the Government, created a revolution in our banking and financial usage. Will not the withdrawal of these vast sums into the Sinking Fund bring about a counter current?

A railroad is about the most indestructible and powerful and wealth-producing agent known to our time. The whole people have grown sick of railroad stocks or shares, for they are too much connected with gambling risks. But Mortgage Bonds are a safe compromise between unwieldy liens on real estate and the more mobile but more treacherous stocks.

In railroad mortgages, however, as in most investments, selection is important. While there are few of which it may be said that they are baseless, there are some which are not only safe, and yielding a fair rate of interest, but which have such personal and material support that they will improve in estimation as time passes. Of the great railroads of the country, we have had occasion heretofore to refer to the Pacific Central Road, in which the Government has so large a moneyed interest, and which must be, for years, without a rival in revenues. Its securities are now regularly quoted at the money centres here and in Frankfort. Beside it, perhaps, in importance, as we have said, may be placed the Great Central Line between the Atlantic and the West, the Chesapeake and Ohio, whose directory comprises some of the best names in American commerce.

This line, which is nearing completion, will ultimately command an enormous freightage by reason of its short line between inland and sea navigation, its low grades and iron and coal deposits. There can be no better drift for unloosed capital than into the securities of such enterprises.

St. Louis and Iron Mountain Railroad.

A change has occurred in the management of the above road through the resignation of Mr. J. H. Morley, of the position of general superintendent. The connection of Mr. M. with this road, upon which he still retains the position of chief engineer (the two offices having been sundered at his request), has been of marked consequence to the commercial interests of St. Louis. He was the first engineer of the road, and directed the first effort made to connect by rail this city with the gulf. Retiring from the position for a time, he resumed direction of the road upon its purchase by Mr. Allen, and has now fully completed the work he began more than a decade since, and has had the satisfaction of directing the running of the first through trains from St. Louis to the interior South and Mobile, without delay from or the breaking of bulk at the crossing of the Mississippi river, and now as chief engineer of the road is giving wonted energy to surmount whatever obstacles may exist to the extension of the same road from Pilot Knob to Arkansas, and the interior of the cotton producing regions west of the Mississippi.

Mr. Morley will be succeeded as general superintendent by Mr. Ansyl Day, formerly superintendent of the Watertown and Rome (N. Y.) railroad, and more lately of the Midland railroad of the same state—*St. Louis Republican, Nov.* 16.

☞ The directors of the Baltimore, Calverton and Powhattan Railroad Company are: James A. Gary, Gen'l J. Lazaer, Joshua Zimmerman, E. G. Ulery, Lewis Turner, Wm. P. Webb, John D. Hammond, and Cary McClelland. President, James A. Gary. Treasurer, Wm. Loney. Secretary, Edward Freeman. Engineer and Superintendent, Samuel T. Shipley. The length of the road is 5¾ miles.

☞ The Worcester and Nashua Railroad Company are pushing forward the work for their second track with rapidity, having nearly completed the grading and laid the rails for a greater portion of the distance to West Boylston. Oakdale will soon be reached, and during another season the double track will probably be completed to Sterling Junction.

☞ The following gentlemen have been elected directors of the Arkansas Western Railroad Company: Benton J. Brown, James O. Churchill, Luther C. White, John B. Ogden, Asa P. Robinson, Edward Wheeler, William P. Denckla, Daniel C. Wheeler and John H. Haney.

☞ The Baltimore and Cincinnati Railroad Company, and the Huntington and Chicago railroad Company have been consolidated under the name of the Baltimore, Pittsburg, Continental and Chicago Railroad Company.

☞ The Addison (Vt.) Railroad is to be begun forthwith, and ex-Governor Page says it will be completed to Ticonderoga, N. Y., by next fall.

☞ Work has been resumed on the Cartersville and Van Wert (Ga.) Railroad.

☞ The extension of the Sturtevant Branch Railroad, Lebanon (N. H.), is completed.

Hempfield Railroad.

We are informed by one who has been looking after this county's interest in the Hempfield railroad, that the road bed, rolling stock and depots belonging to that corporation were sold in Pittsburg last Monday. President Garrett, of the Baltimore and Ohio, was the purchaser. We understood the price paid to be fifteen thousand dollars. Should this prove to be true, we are inclined to the opinion that a bright future is in store for the Hempfield as it will in all probability be extended to some point on the Pittsburg and Cumberland road, now rapidly approaching completion. The distance to Cumberland by that route would be only 150 miles, or fifty miles shorter than that via Grafton. This saving of distance and the time lost in overcoming the high grades on the present route, would reduce the time required to reach Cumberland from this city three or four hours—a consideration with those who regard their time as money. We hope the connecting link from Washington, Pa., to the Pittsburg and Cumberland road will be speedily built.—*Wheeling (W. Va.) Intelligencer.*

List of U. S. Patents.

NOTICE TO THE PUBLIC.

EXECUTIVE DEPARTMENT,
ATLANTA, GA., October 26th, 1870.

To Whom it May Concern:

By an Act of the General Assembly of the State of Georgia, approved October 24, 1870, authority is given to the Governor to lease the Western and Atlantic Railroad, the property of the State, together with all of its houses, workshops, depots, rolling stock and appurtenances of every character, for the term of twenty years, upon certain terms, and subject to certain restrictions therein named, to-wit:

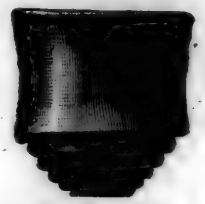
The monthly rental shall not be less than twenty-five thousand dollars ($25,000) payable monthly. The lessees shall give a bond for the sum of eight millions of dollars ($8,000,000) to securing the prompt payment of the amount of rental agreed upon, and for the return of the road and its appurtenances at the expiration of the lease, or on the termination or forfeiture thereof, in as good condition as at the time of leasing, five millions ($5,000,000) of which security shall be within this State and the balance, if out of the State, shall be upon real estate or railroad property. The lessees to be worth over and above their indebtedness, at least five hundred thousand dollars ($500,000.)

The Legislature reserves to itself the right, from time to time, to examine into the affairs of the lessees, and to require that the amount of security above recited shall be maintained unimpaired.

The lessees shall not be less than seven in number, a majority of whom shall have been for five years *bona fide* residents of this State, and shall represent a majority of the whole interest in the lease. No railroad or express company, or any combination of them, shall, in any event, become the lessees, but they may become sureties on the bonds of the lessees. The lessees shall not charge a higher rate for local freights over said road than the average rate charged by the Georgia Railroad and Banking Company, the Central Railroad and Banking Company, and the Macon and Western Railroad Company, for like local freights over said roads, and the said lessees shall have the same rights, exemptions, privileges, immunities and guarantees, except the establishment of banks, and shall be subject to the same liabilities, disabilities, and public burdens of said railroad companies last mentioned. The faith of the State is pledged to redeem all mortgage bonds and coupons now resting on the State Road as they fall due, and to save the lessees harmless against all such bonds and coupons.

The lessees are by this act constituted a body corporate and politic for the term of twenty years, under the name and style of the Western and Atlantic Railroad Company, having such powers, liabilities and immunities, as are usual with railroad companies, and not in conflict with the Constitution and Laws of the United States, or of the State of Georgia; but they will not be allowed to make or permit any discrimination in favor of or against any other road or persons having business connections with the said Western and Atlantic Railroad.

For the purpose of carrying out this act, proposals will be received until and including the 25th day of December next and must be addressed "to the Governor of the State of Georgia, at Atlanta," and marked on the wrapper, "Proposals for the lease of the Western and Atlantic Railroad, in accordance with an Act approved October 24, 1870." The proposals must state in full the names and residence of the parties uniting to make proposition, the amount that each of the parties therein named are worth over and above their debts and liabilities, together with a full description of the character of the security which will be offered to complete the bond.



The property to be leased is a single track railroad, one hundred and thirty-eight miles in length, with full and complete equipment of shops, depots, turnouts, sidelings, engines, cars, etc., etc, etc., now in successful operation between the cities of Atlanta, in Georgia, and Chattanooga, in Tennessee. At Chattanooga the line is in direct rail connection with the Memphis and Charleston, Nashville and Chattanooga, Chattanooga and New Orleans, East Tennessee and Georgia, and the Chattanooga and Cincinnati, (now in progress of construction,) railroads, and at Atlanta with the Atlanta and Montgomery, Atlanta and Charleston, Atlanta and Savannah, and the Atlanta and Gulf lines of road, being the only railroad connection between the system of railways centering at Chattanooga and at Atlanta.

Copies of "An Act to authorize the lease of the Western and Atlantic Railroad, and for other purposes therein mentioned," approved October 24th, 1870, can be had upon application at the Executive office.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

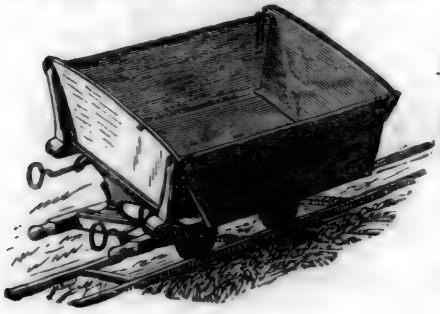
Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail,* with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.



That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Peat Fuel—Its Special Value for Steam Service, etc.

BY T. H. LEAVITT, BOSTON.

The fact that the article of fuel is of prime necessity for the railway service of the country, as in fact for all branches of business where steam is required, will perhaps warrant the statement at length of some facts and opinions concerning *peat fuel*, its qualities and characteristics as adapted for this service and the method and cost of production as also the extent and location of supply.

It is well known that for several years past the subject has been more or less discussed, that in some sections considerable has been done in the production and use of it, and that it did at one time lead to a good deal of speculation in peat lands, &c., which, as far as practical results were concerned, resulted in very little direct good in the matter of placing the fuel in market or developing its use for the various purposes for which fuel is required; and undoubtedly many who embarked in the enterprise with the hope of realizing immense gains, but unintelligently and without devoting to it any proper personal attention, lost heavily in some cases.

Published statements show that the value of wood alone used on our railroads the last year amounted to $56,000,000. The amount used for stationary steam service, steamboats, the burning of brick and lime and for domestic purposes, and the amount destroyed by fires which have raged in our forests, we have no means of knowing, but it is evident that the annual draft is immense, and as evident that it becomes us early to consider if we have any other source of supply from which to draw for fuel as wood shall fail or in those regions where coal and wood are available only at high cost by reason of distance from point of supply.

In the case of many brick yards, charcoal smelting-furnaces, lime works, &c., it is already, as is well known, a very serious question, how long their present supply can be depended upon, and efforts are repeatedly made to substitute coal.

Many railroads have already done this; but coal is at all times expensive, and the constant fluctuations in price are a source of unmitigated annoyance and vexation to all consumers, especially to those at a distance from the mines, where the item of transportation is large, and is subject to frequent and excessive variations.

Wood and coal have long been our main dependence for fuel for steam service generally, as well as for use in the arts and for domestic purposes. How much longer they may continue to be is a more serious question than many are prepared to believe, though none will deny that it may be desirable to avail ourselves of any other fuel which may prove to be of value either as a substitute or as an auxiliary, especially if it be shown to possess for any special service, distinct qualities or characteristics which render it peculiarly valuable for those purposes.

That Great Britain owes, in a large measure, her present political power to her coal-fields is a well understood and indisputable fact; but already, political economists are calculating the period of their exhaustion and the effect upon the nation, and within the last five years several carefully prepared and telling articles, relating particularly to this subject, have appeared in European journals and have been extensively copied and commented upon by prominent writers in our own country.

Already, and for several years, gigantic efforts have been made in England to restore, by artificial planting, the forests which have been ruthlessly destroyed to an extent of which we of the present day have little idea, though reference to the histories of the wars of England, where century after century has witnessed devastation and destruction, will indicate to any thoughtful mind not only what has occurred in that line but what is equally liable to occur and recur time and again in the vicissitudes of peace and war and the whole catalogue of tribulations which are imminent in the affairs of that and other lands.

In our own country, during the recent war, it was repeatedly the case that immense tracts of valuable wood were cut down and destroyed either by reason of military necessity or from that spirit of waste and destruction incident to war in any land.

Year by year, too, we read accounts, and some of us are made personally cognizant of the fact, of the destruction of immense tracts of timber by fires accidentally set. The past season has told severely in this manner, if we may judge from the terribly destructive fires which have raged in the forests of Canada, New Brunswick, Maine, New Hampshire, New York, New Jersey and perhaps elsewhere. The accounts, too, which come to us only recently of the destruction of those beautiful and valuable forests in France, which have enlisted an involuntary protest in the heart of every lover of the beautiful in nature, as well as public comment in no measured terms, are telling facts as relating to this matter of which we write and which, in the light of the question of supply or deficiency of fuel in either the near or more remote future, no one can deny is of great importance.

It needs no argument then to demonstrate the necessity of economizing the supply of fuel which we can at present call our own, and of giving reasonable attention to a comparatively new article of fuel the value of which, though well known by some, is comprehended by but few,—which has for ages been accumulating in immense deposits all through our land, waiting only for the development of its special virtues, against the time of need.

The numberless and in many cases immense peat bogs which lay distributed as freely as forests, and much more freely than coal mines, all through our northern and western States and Canada, valueless as they have generally been

considered, are just so many depositaries of pure decomposed vegetable matter, in fact partially carbonized wood, which having grown in the lesser forms of mosses, grasses and rushes instead of trees, has for ages repeated its annual growth and decay, almost undisturbed, until, as in the progress of events is now made apparent, these vast accumulations which none will claim were created to be either useless or noxious, are demonstrated to be available with less labor and expense than is required in our forests, and far less than is required in our coal mines, to yield us a fuel equal to either and for some purposes superior to both.

A kind Providence has allowed these rich stores to accumulate there, and we can now hardly fail to read, in the progress of events, the purpose to which they are to be applied.

Like most other products of the earth, peat requires some preparation before it is in its best condition for the service to which we would put it. This preparation is now accomplished by simple means and at small cost, so that we have from it a fuel in form, consistency and appearance somewhat resembling coal.

The general heating power of condensed peat has often been claimed to be superior to coal. That it is superior to the best hard wood and nearly, if not quite, equal to coal is no more than a fair statement of facts repeatedly demonstrated not only by experimental tests but by long continued and severe practical service both in this country and in Europe, while there are other qualities which, for some purposes, plainly entitle it to preference over either.

For steam service under locomotive, stationary and marine boilers, it is shown to be admirably well adapted. It ignites readily, burns freely, with large volume of clear flame, yielding quick and intense heat with very little smoke, no soot, no cinders from the chimney, no clinker on the grate bars and no trace of sulphur.

Its use has been found to effect a saving of full one-half the time in getting up steam, and that the fire is very easily regulated and a given temperature steadily held, which, with the comparative absence of smoke, soot and cinders, and the preservation of grate-bars and boilers from the destructive effects of clinker and sulphur are important advantages which, aside from economy in first cost, should evidently commend it to favorable consideration; indeed so clearly are these advantages demonstrated wherever used that the most sceptical and prejudiced are left without shadow of footing on which to dispute its manifest claims to favor.

In many parts of Europe peat is the only fuel used for locomotive service. In several of the German States it is universally used on all railroads and in nearly all manufacturing establishments and for domestic purposes, and is as common an article of product, traffic and consumption as is the coal from our mines or the wood from our forests. That this is not generally known here, or if known is not generally comprehended by the mass of our people, does not affect the *fact*, as any one familiar with either the publications or the people of those sections may easily discover.

With many in this country the idea of peat is indistinctly associated with the bogs of Ireland, and as indistinctly considered "the poor man's fuel," fit only for the hut and the hovel—whereas a moment's conversation with almost any intelligent German, Austrian, Prussian, Swede, or Norwegian, and in many cases with French (from the north of France), Swiss and Italians, will discover to the inquirer not only the extent and variety of its uses, but special merits which entitle it to no mean estimate, and that it is in reality "fit for the King's use."

To undertake to make report of trial trips, tests and experiments with peat on locomotives in Germany would be like reporting in like manner upon the use of wood or coal for the same service with us.

It is freely and extensively used, and its value is not only acknowledged but is established and unquestioned. Official reports treat of its value, and the economy effected by its use in the wear and tear of engines.

In France, England and Ireland its use is much more generally confined to the peasantry, though among artizans it is held in high estimation for the working of iron and steel and, to a limited extent, is employed there for that purpose, but for locomotive service it has been used but little, and the accounts of its use there for this purpose are more in the nature of trial trips, reports of which as published may serve to show its peculiarities in new hands, first impressions, "how it strikes a stranger," &c.

A trial on the Paris and Lyons railway is thus reported by the engineer: "We got up steam with peat in thirty minutes, coal requiring two hours. We ran sixteen miles to a gravel pit, up a steep grade, and from there took a load of 136 tons eighty miles farther, when the blaze escaped a considerable distance above the chimney which became red hot, and the boiler covering taking fire we had to stop and extinguish it. After repairs we returned to Paris at a speed of thirty-eight miles per hour, the heat again increasing as we advanced. The fuel having no smoke and much gas keeps up a constant hot flame—in fact, while using it the generation of steam was so rapid that I stood with my hand on the valve lever all the time, fearing an explosion."

The superintendents of several railways in Ireland, in order to test the fitness of condensed peat for locomotives, made a trial on the Belfast and Northern Counties railway. During a trip of twenty-seven miles there was an excess of steam, though the fire-box door was constantly open and the damper down for the greater part of the distance. The pressure at starting was 100 lbs. The commencement of the trip was up an incline of 1 to 80, four miles long, with double curves. While ascending this incline the pressure rose to 110 lbs. and afterwards to 120 lbs. with the fire door open. The speed was forty miles per hour. While running, there was no smoke, and little at stoppages. The fire-box was examined at the end of the trip, and very little clinker was found, and the smoke-box was free from cinders and dust, a proof that the fuel had stood the blast well. The recorded opinion of the superintendents was that "the peat is, in every respect, well suited for locomotives."

At a colliery in England, connected by a railway with large iron works, several trips were made with condensed peat fuel, a number of empty trucks being conveyed to the pit's mouth and brought back loaded. The fuel served admirably, and all present were satisfied that it did quite as much duty as coal. On one trip, however, they were obliged to wait some time at the pit's mouth, the load not being ready. The fireman, from some cause, neglected his fire, and consequently, when the trucks were loaded and the train ready to start, he found the steam guage indicated a pressure of only sixty pounds and the fire was very low. This alarmed him as the return trip was up a steep incline and he was far behind time. However in *three minutes* after throwing into the furnace a few shovels full of peat, the steam stood at one hundred and ten pounds and the train was speeding on its way. Had coal been thrown in instead of peat, it would have smothered the fire, so little was there in the furnace at the time.

These instances are perhaps sufficient to illustrate the freedom of combustion of peat and the quick, clear and intense heat produced by it.

In view of all the facts known it is hardly to be understood why it has not come into more general use in England for steam service.

In our own country not a few of our quick sighted railroad superintendents and engineers have discovered and appreciated the peculiar merits of this fuel for their special service, and many of them would gladly make use of it were the necessary supply manufactured on their respective lines.

Most of the establishments for the manufacture of peat fuel have been conducted on a limited scale while, with a few exceptions, the larger enterprizes, of which several have been inaugurated, have stopped short of legitimate business operations and resolved themselves into stock speculations—a fact which has tended much to the hindrance of the introduction of the fuel into general use, especially among large consumers who have wanted it, and has undoubtedly been prejudicial to the otherwise general favor to which the enterprize is entitled, and which in real merit as relating to the business interests of the community no less than to the cause of humanity as promoted by *cheap fuel*, merits encouragement and a place in public favor second to none in the land.

It has been used on the Eastern Railroad, Boston and Albany, Vermont Central, Hartford, New Haven and Springfield, Hudson River, N. Y. Central, Erie, Grand Trunk and several other roads. The Grand Trunk were able to arrange for a steady supply, and have used it on one section of their road for the past four years. Several published reports concerning its cost, its qualities, the particulars of its service and comparative results have appeared in Montreal papers and have been copied in the States. The official reports of the company show, from careful observations, that the actual service performed with a ton of peat is ascertained to be 14 per cent. in excess of the service obtained from a cord of best hard wood, while their contract prices paid for the two fuels are $3 per ton for peat and $5 per cord for wood; showing an actual saving in the cost of fuel on the section served with peat to be very nearly one half.

The Hartford, New Haven and Springfield Railroad Company are fortunate in having procured from the Meriden Peat Co., whose works are di-

rectly on the line of the road, a moderate quantity last year and a largely increased supply the present season, sufficient to run several locomotives. The price paid is six dollars per ton at the works.

The personal statements of Mr. E. M. Read, the Superintendent of this road, to the writer, are distinct and unqualified as to the peculiar merits claimed for the fuel, the excellence of the service performed, and the favor which, in his estimation, it is sure to command on any road which can get it for use.

In order to determine more definitely than they had heretofore known, its relative value and merits for the service of the road, a series of experiments covering some six weeks' time, were conducted under the personal supervision of an experienced engineer, the results of which are reported at some length in a recent issue of the *Iron Age*, and from which the following statement is condensed.

The locomotive C. F. Pond, with 15 by 20 inch cylinders, 6 feet drivers, fire-box 38 by 47 inches and copper flues, was for forty days kept hot on passenger, freight and switch duty, in order to give the peat fuel a complete test under all conditions. The depth of fire over the grate bars was seldom more than nine inches, or say 250 pounds continually burning fuel. With this even and never exceeded amount, steam can be kept at any desired pressure above 100 lbs. per square inch, without difficulty, by any intelligent fireman. The quantity of fuel in the fire-box is less than of coal, but requires to be replenished much more frequently, though the labor for this is not increased proportionately, for the fire door may remain open as long as required and the grates fed without any haste in the operation.

Of some twenty-five trips between Hartford and Springfield, 26 miles,—up and return is 52 miles,—the average result running passenger express of two, three or four cars, as demanded, was as follows: Time each way 65 minutes; allow for 8 stops 8 min. each is 24 min., leaving running time for 26 miles 41 minutes, equal to a rate of 38 miles per hour.

Peat used for the whole trip of 52 miles 2,620 lbs.; water evaporated 2,831 gallons or 18,209 lbs., which equals an average evaporation of 6.95 lbs. of water, *cold*, by 1 lb. of peat;—the average pressure throughout the trials, having been 105 lbs. per square inch, or 7¼ atmospheres. The maximum of evaporation was 7¾ lbs. of water for 1 lb. of peat burned.

The remark is made that no doubt exists that as experience is gained in firing, these results will be so far exceeded as to "place peat fuel above coal or wood, at one half the price throughout the whole domain of the United States, for the deposits of peat are every where evenly and generously distributed."

The special advantages, aside from its heating properties, in the use of peat over coal, as observed in these tests are stated as follows: "No destructive agent, such as sulphur, phosphorus or arsenic, exists to corrode the grate-bars, sheets or flues; there is no accumulation or deposit of clinker or unburned peat upon or between the grate bars; no incrustation or soot along the flues; no deposit of ash in the smoke box, nor is there any emission of heavy sparks, lighted coals or smoke from the top of the stack; *four very important considerations* in the expense of keeping the railroad locomotive in prime condition and always ready for service."

Of the same fuel, a car load of some ten tons was placed at the disposal of the officers of the American Institute, for trial at the recent fair in New York City, where it was used under the large boilers (50 to 60 horse power) from which was furnished the steam for driving all the machinery on exhibition there, a service of unusual extremes, from the fact that all or any portion of the machinery might be put in operation or thrown off at any moment, without notice to firemen or engineer, requiring therefore full head of steam at all times.

The firemen and engineer were familiar with coal but unacquainted with peat and prejudiced against it. The fire-boxes were not adapted for using it properly, and other disadvantages incident to an off-hand trial were apparent, the results shown surprised all and astonished some.

Careful observations were made and noted, by an engineer employed by the committee of the fair, which it is presumed will in due time be given in their report; but the simple statements of those in charge were that "it beats coal all to pieces;" that while with coal it was difficult to keep steam up to 45, with peat they *blowed off freely at* 75 all day; and one of the firemen declared that from his experience then had he would, for severe service, give the preference to peat instead of coal.

Steam was raised from cold water in just about half the time required for coal, was more easily kept at a given pressure; and on raking down the fires at night, discovered no clinker and only a moderate quantity of ash; a result quickly appreciated by any fireman who is accustomed to the hard labor of cleaning off and hauling away large quantities of clinker, slag and ash.

The crude material from which the fuel used in these cases was prepared is of no more than ordinary quality, and the service performed, although surprising to many, is actually considerably below results shown in numerous other cases; so that the statements cannot be considered as in any wise exagerated, but are so far within bounds as to be safely taken as a basis for practical calculations and operations.

These trials are perhaps sufficient to indicate the character of numerous others which might be cited from our railroads and manufacturing establishments where the fuel has been used, but only in the limited quantities which they were able to procure.

Its adoption involves no serious alteration of machinery or appliances for burning. A suitable apportionment of spaces between the grate bars and proper adjustment of draughts and exhaust is all that will generally be required to adapt any wood or coal fire-box to the requirements of peat.

It is understood that movements are in progress which are likely to result in the supply of several roads the coming season.

In the face of instances like these, bearing the testimony they do to the fitness of properly prepared peat as steam fuel, the wonder is that it has not, long since, been brought into general use on the railroads and in the manufacturing establishments of this country.

Doubtless a principal reason, aside from the universal hesitancy to depart from the old beaten track, which so often bars the way of improvement, lies in the fact that the consumers of fuel are rarely the producers, and that the roads and establishments as well as the families who would gladly have used it, have been unable to procure sufficient supply, by reason of the limited amount manufactured in any one locality, and it should be remembered that for no one article of consumption is there so universal and irrepressible demand as for fuel, and that too in quantities not only large but often times immense, and he who would undertake to manufacture a quantity sufficient to supply "the market" should be reminded that the field is large, and few would undertake to produce the quota required for all demands while many might reckon on constant employment and gains sufficient to meet the dreams of avarice even, if they should content themselves with simply supplying the wants of even one of many of our roads or large manufacturing establishments or the town, village or limited section within the range of their works.

Did space permit, it might be profitable to trace the subject in its relations to other than railroad interests, which has been our main purpose here; but a hasty glance must suffice.

Of the purposes to which this fuel can be applied, the range is as wide as for wood or coal.

For domestic purposes, as the heating of dwellings, whether by furnace or any of the innumerable varieties of stoves, or the open grate, it is equal if not superior to wood or coal of any kind, save only the fact that it requires, in most cases, to be replenished more frequently than coal; but it yields a more steady, intense, yet mellow and agreeable heat than any other fuel. In open grates, as a substitute for cannel coal it is admirable, and produces the most cheerful fire imaginable. For cooking it is excellent, and for the sick room it has no equal.

For the burning of brick and lime it is advantageously and economically used. In manufacturing and mechanical establishments it is available wherever fuel is required, and for many purposes possesses characteristics which render it decidedly superior; as for instance the production of iron and steel and the working and manufacture of them where, aside from other advantages, the simple fact of the entire absence of sulphur or any substance prejudicial to the quality of the metal is a consideration of incalculable value.

In this connection it may not be amiss to refer those who would investigate the whole subject, to a little work recently published by Lee & Shepard, Boston, entitled Peat Fuel; How to make it and how to use it; What it costs and what it is worth," (price 50c.), which besides containing much practical information makes reference also to other and numerous authorities, available for consultation by any who would investigate the subject in its widest range.

The use of peat fuel is by no means confined to modern times. Repeated mention is made of it in Europe from the twelfth century to the present time, and often in such manner as to show that its peculiar virtues were known and appreciated.

It is not, however, until within the present century that it has been used in other than its crude, or at best, but very imperfectly manufactured

state; but during the past fifty years repeated efforts have been made to solidify it in such manner as to increase its value and cause it to present more generally the appearance of coal, which in its composition it so nearly resembles. Most of these efforts have been only partially successful and many have proved futile.

Numerous machines have been devised and a good many have been built and operated; some with good measure of success and others at loss. Some have been constructed upon principles entirely at variance with the character of the material to be treated or the results to be obtained, while many have made a fair commencement, gone about so far, and stopped just short of the one or two steps more which would have afforded a good degree of success.

More recently, however, a process has been discovered and applied by which peat is converted into a solid, dry fuel, in good shape, in large quantities and at moderate cost. The appliances for the purpose are exceedingly simple and by no means expensive when compared with the amount and value of the fuel produced. It can be produced in good merchantable shape, at a cost not exceeding two dollars per ton (measuring about 36 bushels) at the works.

The want for the fuel is widely and earnestly expressed. The consumers of fuel are not, however, as a general thing, the parties to produce it; but in view of the facts, is it not apparent that an immense field for enterprize is open to those who would embark in the manufacture of it? for the margin for profit is large, and even at rates which shall clearly characterize it as a *cheap* fuel,—and a good fuel at low price always commands purchasers.

Reliable information concerning the manufacture of fuel is available and can be obtained as readily as upon any other subject. The whole process is reduced to a well demonstrated system, and the business can be entered upon as prudently and understandingly and on as fair an estimate of expenditure and return as any other, and with the proper means and appliances, and the same ordinary prudent and intelligent management which any other business demands, this surely invites attention and gives promise of reward far in excess of most kinds of manufacturing.

Through a very large portion of the New England, Northern and Western States and in Canada, the deposits of peat, often times miles in extent, are so freely distributed that it would probably average as near a market or place of consumption as does the ordinary supply of wood now used for domestic purposes.

For the supply of iron works, machine shops and manufacturing establishments, whether for the purpose of working metals or generating steam for power, it will, in most cases, be found that deposits of peat lie within a short distance of the place of consumption; and for some of our largest establishments, requiring immense amounts of fuel, it is known that supplies of an extent equal to their requirements for many years, lie almost at their doors; and as to railroads, there is hardly a line in the whole northern part of the country which does not pass either directly over or near to, extensive and valuable deposits of it.

And one word on the score of philanthropy. There is probably no one enterprize now before us as a people, which may be made to tell so directly upon the great question of *cheap fuel for the people* as this of which we treat. It is of wide range and acknowledged importance.

The writer desires to invite correspondence from parties interested in this subject, in any part of the country, and will esteem it a favor to be informed of any facts, however trifling, bearing upon it.

There is more in *peat* than is dreamed of in most men's philosophy.

Cumberland Valley Railroad.

The earnings of this road for the years ending September 30, 1869 and 1870, were as follows:

	1869.	1870.
From passengers	$191,831 76	$186,738 88
" freight and exp	326,053 85	362,856 61
" mail	6,107 24	6,300 00
	$523,992 85	$555,895 49
Expenses, viz:		
Motive power	$77,028 75	$65,654 43
Conducting transp	93,451 07	106,270 45
Maintenance of way	90,371 46	70,767 33
Maintenance of cars	12,543 80	16,361 76
General expenses	11,362 94	11,211 68
Construction & equipm't	62,318 62	26,435 46
	$347,076 64	$296,701 11
Net earnings	$176,916 21	$259,194 38

The receipts of the company from all sources during the years named have been as follows:

	1869.	1870.
Balance from previous year	$312,155 04	$164,289,24
Earnings as above	523,992 85	555,895 49
Other sources of revenue	15,776 39	9,623 58
Stock issued	200,395 00	15,230 00
Total	$1,052,319 28	$745,038 31
Expenditures, viz:		
Dividends	$94,438 53	$101,634 67
Interest on bonds	27,557 10	24,974 37
Expenses, as above	347,076 64	296,701 11
Materials		4,690 82
Construction of Potomac Extension	23,967 77	167,671 94
Real estate		6,252 25
Trustees of sinking fund	394,990 00	24.556 48
Balances of accounts	28,240 45	20,856 98
Cash, October 1	136,048 79	97,699 69
Total, as above	$1,052,319 28	$745,038 31

Compared with the previous year, the gross earnings show an increase of $31,902 64, with a decrease in expenses of $50,375 53—making the increase in net earnings $82,278 17. The report says:

The past year has been no exception to the continued increase of the business of your road. Whilst it has been conducted in the even tenor of its way, its condition has been greatly improved by the completion of the ballasting throughout the entire road, with broken limestone, in the most perfect manner, which we have reason to believe will relieve us in all time to come from much expense in repairs. The road of the South Mountain Iron Company has been completed, and as it was anticipated, has developed immense deposits of iron ore, which are now being sent to market. At least eight mines of ore have been opened, by as many individuals and firms, and doubtless the quantity to be shipped over your road will be greatly increased during the coming year. In our last Annual Report it was stated that the South Pennsylvania Iron and Railroad company contemplated to build a road from a point about six miles south of Chambersburg, to their iron mines near Loudon, a distance of twenty-five miles, through the fertile lands of Franklin county. These mines have been opened, and afford evidence of an inexhaustible quantity of good ore obtained at the cheapest cost of mining. To induce this company to prosecute their enterprise, your board agreed to loan them three hundred thousand dollars, upon a mortgage of their road and estate, and upon condition of a lease to our company of the road for 100 years; thus virtually adding to our road a track of twenty-five miles, the cost of which will be about eight hundred thousand dollars. The work on this road is now about one-half done, and that company expect to finish it by the first of April, next. In the purchase of their lands, the erection of furnaces, the building of their road and other improvements, this company will have expended, perhaps, a million and a half of dollars, to pay for which will necessitate a large amount of business in transportation of iron ore, iron and coal, and greatly increase the tonnage upon our road; this, together with the freight of ore and iron from the South Mountain Road, has induced the board to hasten the laying of another track from Mechanicsburg to Bridgeport, a distance of about eight miles, and to increase the sidings at the latter point. This second track between Bridgeport and Mechanicsburg has been so far done, that the grading will be completed the present season and made ready for the iron; there has been expended upon this work $5,793 34. A new siding, 1,810 feet long, has been put in at Kingston station, and one 447 feet long at Hagerstown. We have expended for new sidings, and finishing the ballasting of the main track and sidings $8,208 52, and for sidings partly finished at Bridgeport and Harrisburg, $2,775 19. A new passenger station house has been built at Bridgeport, and one at Hagerstown, costing together. $3,880 69. The new passenger engine, commenced last year, has been completed at a cost of $2,465 82. Our necessities requiring additional sidings at Bridgeport, rendered it necessary to purchase additional land, and we obtained a strip about three-fourths of a mile long, and sixty feet wide, which it is believed will be quite sufficient for all our purposes at that point. It also became necessary to purchase lands for sidings at Hagerstown, the purchases at both these points amounted to $6,-252 25. The grading of the extension from Hagerstown to the Potomac at "Powell's Bend," is about being completed, and we have expended this year, $167,671 94. This work has not been urged, in consequence of an act of unfavorable legislation in Maryland, which had for its object, to prevent our connection with the Chesapeake and Ohio Canal. Strange as it may seem, the Legislature of Maryland was so far imposed upon by individual influence as to prohibit the Chesapeake and Ohio Canal from affording facilities for the receipt of freight from and the delivery of freight to our road. This act was passed on the very last day of the session of the Legislature, and was, doubtless, a fraud which will be corrected as soon as it meets again. We have made no arrangements for the purchase of iron for this extension for the reason stated, although the grading is nearly completed, and cross-ties are upon the ground, ready to be laid.

A summary of the extraordinary expenditures of the last year is as follows:

Williamsport extension	$167,671 94
Real estate purchased at Bridgeport and Hagerstown	6,252 25
Freight cars purchased and built	2,710 80
Ballasting main track and sidings	8,208 52
Grading at Bridgeport	2,775 19
Grading and ballasting second track	5,793 34
Station houses at Bridgeport and Hagerstown	3,880 69
New locomotive engine	2,465 82
New tools	601 10
Total	$200,359 65

Early in May we ordered one hundred and fifty tons of steel rails from the Pennsylvania Steel Company, of which we have only yet received thirty-eight tons, and have been greatly disappointed by the pressure upon that company from other quarters; but we hope to receive them in

time that they may yet go into the road this season.

The motive power is in the best possible condition two of the heaviest engines, the "Judge Watts" and "T. B. Kennedy," having been rebuilt, and newly constructed fire-boxes put into them, under the direction of our Superintendent, Colonel Lull, and at our own shop, experience proving a saving of more than one-third of the fuel heretofore used in them to do the same amount of work. A new freight engine, we expect, will be upon the road during this month, and thus our locomotive power will be quite adequate to the increased business of the coming year.

We will require about eight hundred tons of iron or steel rails during the next year, and it is contemplated to build two passenger cars, and to supply the shop with some additional tools.

With regard to the further extension of the double track west from Mechanicsburg, it is questionable whether it may not be dispensed with for the present. The completion of the South Pennsylvania Iron and Railroad Company's road, and the realization, approximately, of their anticipations of business must be provided for, but whether this may not be by adding to the length of our sidings, whereby more than one train may be passed, is a question which our experience in the next year will determine.

A company has been incorporated by the laws of West Virginia to build a road from the termi nus of ours, at "Powell's Bend," via Martinsburg to the line of that State, and Virginia has incorporated a company to continue this improvement to Winchester, and thence into the Luray Valley, looking to a further extension to points crossing the Manassas Gap and Chesapeake and Ohio Railroads, and, indeed, communicating with the entire Southwest. Little or nothing has yet been accomplished in the execution of these projects, except the organization of the Martinsburg and Potomac Company, whose road embraces the line between the terminus of our road at "Powell's Bend," and the West Virginia State line near Winchester. This company has been organized with the Hon. Chas. J. Faulkner at its head, a sufficient amount of stock subscribed, and the work will be let and commenced immediately. This will render necessary the erection of a bridge over the Potomac river at the present terminus of our road, having a span of eight hundred and forty feet. The river here is shallow, with an entire rock bottom. Within the next year we may reasonably expect to have a connection with the Baltimore and Ohio Railroad at Martinsburg, and the Chesapeake and Ohio Canal at "Powell's Bend," enabling us to furnish that extensive region with lumber and anthracite coal, and to receive their bituminous coal and agricultural products in return.

The immense discoveries and developments of iron ore all along the line of our road, and the preparations now being made for mining it, naturally suggest the question, will there be a demand for it? But when we contemplate the fact that all the iron now made in the United States is not adequate to supply the demand for the construction and repair of railroads alone, and that we annually import nearly half a million of tons, we may readily imagine, that the country will not very long endure the use of foreign iron in competition with that produced by the industry of our own people. Our road has peculiar facilities for the supply of ore, as it connects with the Pennsylvania and Northern Central Railroads at Harrisburg, by which we reach all the furnaces on the Susquehanna River, and the Reading Railroad, by which we can supply all those upon the Lehigh and Schuylkill. We mus be prepared to meet this demand.

The company have 16 locomotives. Miles run with passenger trains, 134,746; with freight trains, 104,573; with construction trains, 8,651—total miles run, 247,970. Passengers carried east, 144,582; do. west, 153,073—total, 297,605.

STATEMENT, OCTOBER 1,

	1869.	1870.

President.—FREDERICK WATTS.

Directors.—Frederick Watts, Thomas A. Biddle, Thomas A. Scott, Washington Butcher, Wistar Morris, H. J. Lombaert, Daniel O. Gehr, Thomas B. Kennedy, Edmund Smith, J. Edgar Thomson, Josiah Bacon.

Secretary and Treasurer.—EDWARD M. BIDDLE.

Superintendent.—O. N. LULL.

New Orleans, Mobile and Chattanooga R.R.

$2,825,000 FIRST MORTGAGE SINKING FUND BONDS, INTEREST AT 8 PER CENT. IN CURRENCY OR 7 PER CENT IN GOLD, at the option of the holder, secured by a first mortgage, at the rate of $12,500 per mile, upon the trunk line of road, from the City of *New Orleans* to the Western boundary of Louisiana, a distance of 226 miles, in the direction of *Houston*, Texas; the name being the Louisiana Division, of the railroad of THE NEW ORLEANS, MOBILE AND CHATTANOOGA RAILROAD COMPANY, extending from the City of Mobile, Alabama, to the City of Houston, Texas, a distance of 475 miles. These bonds are payable, forty years from their date, and are secured by a first mortgage, made to HON. OAKES AMES and HON. E. D. MORGAN, Trustees, upon the Louisiana Division of the road, with the equipment, real estate and franchises pertaining thereto. The principal of the bonds is payable in New York, in currency, or in London, in sterling, at the rate of £200 for each $1,000; the interest is payable in January and July of each year, at the rate of *eight per cent.* in currency, in New York, or at the rate of £7 for each coupon of forty dollars, in London, at the option of the holder, in all cases, and *free of United States Government Tax.* By the terms of the mortgage, a Sinking Fund is provided, to be paid to the Trustees and invested by them, only in these bonds, sufficient to pay the whole amount of the bonds at their maturity. The Mobile Division of the Company's road, extending from New Orleans to Mobile, has been constructed and equipped in the very best manner, and is now opened for traffic. The road of the Texas Division, extending from the western boundary of Louisiana to the City of Houston, will be opened for traffic in a few months. The Louisiana Division, upon which the mortgage securing these bonds is made, is now being constructed, and the first section of sixty miles will be opened for traffic early in January; and the Company expect to finish the whole division in about twelve months thereafter. The prompt completion of this division of the road, is amply assured by the resources of the Company, which are applicable to the construction and equipment thereof, viz:

Cash Subscription by Stockholders, 25 per cent. of which has been paid and balance to be paid at the rate of 5 per cent. each month	$2,000,000
8 per cent. Bonds of the State of Louisiana, donated by the State to the Company, for this Division of its road	2,250,000
Second Mortgage 8 per cent. Bonds, principal and interest guaranteed by the State of Louisiana	2,825,000
	$7,075,000
First Mortgage 8 per cent. Bonds now offered for sale	$2,825,000
Total	$9,900,000

The above resources being solely for the construction of this division of the Company's road, amply assures its prompt completion, *and entitles its first mortgage bonds to be considered as one of the most safe and desirable securities ever offered for sale in this market.* This road is owned by a Company of capitalists who have furnished all the means for the other divisions of the road, without offering to the public any of its securities, and, under whose supervision the line is being constructed and equipped in the most thorough manner, and when completed, its track and equipment will compare favorably with that of any other road in the United States. The revenue of the road is amply assured by the large traffic already existing between the cities upon its line and from the country which will be tributary to it.

The Company offer these bonds for sale, at NINETY-TWO AND ONE-HALF per cent. and accrued interest, recommending them to investors, as an undoubted security in every respect.

Circulars with maps of the line of the road, and full particulars concerning it, furnished on application to the *Treasurer of the Company*, at its office, NO. 31 PINE STREET.

JAMES A. RAYNOR, *President*, JOHN A. GRISWOLD, *Vice President*, LOCKWOOD L. DOTY, *Treasurer*.

EDWIN D. MORGAN, Chairman,
OAKES AMES,
HENRY J. GARDNER,
} Finance Committee.

NEW YORK, November 15th, 1870.

☞ The directors of the New York and Long Branch Railroad have decided to commence the building of the road between Red Bank and South Amboy before the middle of December. $150,000 of the capital stock has been subscribed. W. S. Sneden, of Red Bank, N. J., has been chosen chief engineer.

☞ The stockholders of the Housatonic Railroad have accepted the act of the legislature whereby the directors were empowered to settle or compromise with the holders of the preferred or guaranteed stock, for all claims on account of back or unpaid dividends.

☞ B. F. Newcomber, Esq., of Baltimore, has been elected vice president of the Wilmington and Welden Railroad Company and of the Wilmington, Columbia and Augusta Railroad Company.

☞ The Richmond and Petersburg Railroad Company have abolished the office of superintendent, and elected the late Superintendent Thos. H. Wynne, president.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained."
Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, December 3, 1870.

Stock Exchange and Money Market.

Money has been in fair demand, throughout the week, on the basis of 5@6 per cent. on call, as the governing rates to the leading street borrowers, and 6½@8½ per cent. per annum on mercantile credits. At these figures, the available supply has been quite liberal, from the banks, as well as from private lenders. The market has been wholly free from excitement. The City banks on last week's business made a further gain of $642,392 in the specie item, while reporting a loss of $890,217 of legal tender notes, and of $485,333 of deposits. Their specie reserve is now about 18¼ millions, against 11⅝ millions on the 15th of October. Their legal tender hoard stands at 51⅞ millions, against 54 millions Nov. 5. Their deposits are now 194½ millions, against 187⅛ millions on Oct. 15. The U. S. Treasury lost $880,532 of currency, and gained $189,047 of coin, as the result of the week's business.

The specie reserve of the city banks according to the latest return is $18,222,617, against $29,687,896 same time last year. The city bank deposits are now $194,415,673, against $183,597,395 week ending Nov. 26. 1869. The legal tender reserve amounts to $51,826,556, against $48,181,890 same time last year. The circulation now stands at $32,353,679, against $34,155,838 same time last year. The loans are now $264,608,116, against $252,678,474 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $84,805,289 a day, against a daily average of $89,509,346 the preceding week. The current week's exchanges average about 78⅝ millions a day. The city banks, last week, reported a gain of $642,392 of specie, with a loss of $485,339 of deposits, and of $890,217 of legal tender notes. They reduced their loans $1,100; and added to their circulation, $52,457.

The city bank exchanges on Wednesday were $75,010,784.

National Bank notes to the amount of $365,750 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $336,350,668, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $32,998,899 leaving, with the existing 1,612 banks, (having an aggregate capital of $430,299,301,) an actual circulation at this date, of $303,351,769. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $345,403,450; and for the public deposits, $15,834,500—making a total of $361,237,950. The Treasury Department last week redeemed and destroyed $284,400 of worn and mutilated fractional currency, and issued $396,583 of new.

The U. S. Sub-Treasury receipts, week ending with Nov. 26, were $2,881,507 in coin, (including $1,911,000 from customs duties,) and $3,047,782 in currency; payments, $2,692,460 in coin, (including $1,165,012 of coin interest,) and $3,878,314 in currency; balance at the close of the week, included $60,034,251, of coin, against $59,845,205 the preceding Saturday, and $8,267,005 of currency, against $9,097,537 at the close of the preceding week. The business of the Office on the first two days of the current week, was as follows. On Monday, receipts, $339,348 in coin, (including $245,818 from customs,) and $349,684 in currency; payments $268,552 of coin (including $171,000 of coin interest), and $512,115, of currency. On Tuesday, receipts, $586,241 in coin (including $348,749 from customs), and $185,774 in currency; payments, $394,416 in coin (including $216,000 of coin interest) and $341,181 of currency. The balance at the close of business on Tuesday included $7,949,167 of currency, and $60,296,872 of coin against a balance a week previous of $9,188,660 currency, and $60,681,537 coin.

The aggregate receipts of the U. S. Sub-Treasury in November were $56,296,837, including $9,576,224 from customs; aggregate payments, $62,134,566, including $14,025,558 of coin interest.

The U. S. Sub-Treasurer issued in November $4,741,000 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $1,592,568 of coin certificates, received for customs,

Government revenues have been yielding less satisfactorily since our last. The excises during the week yielded about 2¼ millions; customs at the port of New York, $1,784,569, and at the outports about $600,000 (in coin) more, making the grand total income for the week equal to about $4,932,640 in currency. The income of the Government, from excises, since July 1, 1870, has been 72¾ millions.

The Gold speculation has been devoid of spirit. The more pacific tenor of the advices from Europe has operated sharply against a buoyant market. The speculative demand has been less confident. The customs inquiry has been light. The export drain has been unimportant. The range of the price has been from 110⅞@111⅞, and the closing quotations on Wednesday were 110⅞@111. On Wednesday, Government sold $1,000,000 of gold at from 110 82@110 91. The aggregate of the bids was $3,757,000. The specie exports on Wednesday were $203,523.

Under the new Department programme of the Treasury for December Government will sell four millions of Gold, as follows: Wednesday, December 7, $1,000,000; Wednesday, December 14, $1,000,000; Wednesday, December 21, $1,000,000; Wednesday, December 28, $1,000,000. And will buy in, during the month, five millions of Five Twenties as follows: Thursday, December 1, $1,000,000; Thursday, December 8, $1,000,000; Thursday, December 15, $1,000,000; Thursday, December 22, $1,000,000; Thursday, December 29, $1,000,000.

The programme differs from the operations of November only in the fact that the figures on the gold and bonds are reversed in consequence of the first of December falling on Thursday, which makes the month open with a bond purchase instead of a gold sale.

The export drain last week was $449,984, against $655,078 week ending with Nov. 19; $410,134 week ending with Nov. 12; $3,156,924 week ending with Nov. 5; $303,562 week ending Oct. 29; $556,180 week ending Oct. 22; $654,323 week ending with Oct. 15; $802,174 week ending with Oct. 8; and $465,260 week ending with Oct. 1. The shipments thus far this year have been about 56¼ millions, against 80⅛ millions same time in 1869; nearly 68½ millions same time in 1868; 44¾ millions same time in 1867; nearly 58 millions same time in 1866; and 27¼ millions same time in 1865. The exchanges at the Gold Exchange Bank, which were 53⅛ millions on Friday, of last week, were 34¾ millions on Monday of this week, 65¾ millions on Tuesday, and 39¼ millions on Wednesday.

The customs demand for Gold last week, averaged $382,200 a day; thus far, this week, it has averaged $294,783, a day, or equal to a weekly aggregate of $1,768,698. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $68,958; and since Jan. 1, 1870, $11,284,976, against $14,870,752 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $130,723,112 against $121,889,687, same time in 1869.

The exports of specie, from this port, last week, were $449,984 against $161,704 same week last year; and since Jan. 1870, $56,218,431, against $30,184,636 same time in 1869. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,165,012; and since Jan. 1, 1870, $81,995,336 against $87,425,887 same time in 1869.

The customs revenue at the port of San Francisco, from Jan. 1 to Nov. 17th, was $6,985,426, against $7,519,955 same time last year.

The specie exports by steamer and railway, from San Francisco, from Jan. 1, 1870 to Nov. 18th, were $30,644,971, against $34,508,886 same time last year.

Foreign exchange has been dull and lower, on a freer offering of bills, closing with a downward tendency. Bankers' sixty day bills on London closed on Wednesday at 108¾@109; sight bills on London, 109⅝@109⅞. The offerings of produce bills have been again liberal. The week's exports of domestic produce have been to the currency value of $4,810,040, and since January 1, 1870, $173,091,626, against $181,214,578 same time in 1869.

Government securities have shown much steadiness, throughout the week, though the dealings have been very moderate in all issues. At the close, the market was tame on the basis of our revised quotations.

U. S. sixes of 1881 closed here on Wednesday of the current week at 113¼@113⅛; U. S. Five-Twenties of 1862, 107⅛@107⅝; U. S. Five-Twenties of 1864 at 106⅞@107; U. S. Five-Twenties of 1865, 106⅞@107; U. S. Five-twenties of 1865 consolidated, 109¼@109⅜; U. S. Five Twenties of 1867, 109¼@109⅜; U. S. Five-twenties of 1868, 109⅝@109¾; U. S. Ten-forties at 106⅛@106⅝; U. S. Six per cent. currency bonds, 110¾@111.

State bonds have been in moderate demand, through the week, and have been quoted generally firm, though closing somewhat irregularly.

Railway bonds have met with a fair sale for investment purposes at firm prices. Central Pacific Sixes closed on Wednesday at 94¼, with a very light floating supply of the bonds available at this figure, which covers the gold interest from July 1, or nearly five months, making the net currency price only about 88⅛. There has been a freer call from investment buyers for the First Mortgage six per cents of the Chesapeake and Ohio Railroad Company, a further portion of which loan is being marketed by Messrs. Fisk & Hatch, the financial agents of the Company, at the original price of 90 per cent. and accrued interest. The bonds are a gold loan, principal and interest being made payable expressly in United States coin; and they are regarded as a strictly first-class security. Union Pacific Sixes, which fell to 80⅛ on Tuesday, closed on Wednesday at 79@80.

The Land Grant and Income Bonds of the Union Pacific Company have also been unfavorably affected, as well as the First Motrgages of the same company, by the influence of the somewhat mysterious fall in the Union Pacific Stock, which latter was said to have been owing in some measure, to the manipulations of speculative operators, interested in depressing the price. The closing quotations on Wednesday were as follows: Stock, 17@¼; First mortgage bonds, 79¼@80; Land grant bonds, 68@68; and Income bonds, 59½@60.

Railway and miscellaneous share property has been more active, but at more variable prices, closing weak and irregular.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 16.	Nov. 23.	Nov. 30.

At. and Gt. West	31½	32	28

There has been less activity in General Business. The Cotton movement has been exceptionally brisk, but under free receipts, prices have declined. Breadstuffs have been in less demand and closed decidedly in favor of buyers. Provisions have been moderately dealt in at irregular. Middling upland cotton closed steady on Wednesday at 16⅛ cts. per lb. The stock of cotton now here is given at about 63,000 bales. The receipts at the port this week, have averaged about 9,500 bales a day. The receipts at all the ports, since Sept. 1, 1870, have been 919,400 bales, against 778,100 bales same time in 1869–'70; exports same time 465,200 bales, against 374,700 bales same time in 1869–'70; stock on hand at latest dates, 343,750 bales, against 261,500 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 13,696 pkgs., against 20,046 pkgs., same time in 1869. From Boston, 7,064 pkgs. in 1870, against 6,878 pkgs. same time in 1869.

At the auction sale of Scranton Coal on Wednesday, 80,000 tons were sold at a material reduction in price, the range having been from $3 45@$4 55, as against $3 85@$5 05 in October.

At the Live Stock markets, this week, Beeves have been in rather better request and a shade firmer; we quote the range at from 9@16¼c. per lb.; week's receipts, 5,883. Milch cows quiet at $40@$110 each, receipts, 113. Veal calves have been in limited demand at from 5@11½c. per lb.; receipts, 2,053. Sheep in quite moderate request at from 3½@6¼c.; lambs at 5@8c. per lb.; receipts, 35,768. Swine have been in slack demand at 6¾@7⅛c. per lb., all live weight; receipts, 24,082.

Foreign Goods have been quiet at less buoyant prices. The dry goods entries at this port, last week, were $1,892,837, making with the general merchandise imports a total of $5,899,787, against $6,219,745 the preceding week.

Ocean freights have been less active, and rates have been variable. For Liverpool we quote flour at 2s. 6d.@2s. 7½d. by sail, and 3s. by steamer per bbl.; grain at 7½@8¾d. by sail, and 8@8¼d. by steamer per bushel; cotton at ¼@ 5/16d. by sail and ½d.@9/16d. by steamer per lb.; and heavy goods 20s.@30s. by sail, and 30s.@50s. by steamer, per ton. Total number of vessels in port on Wednesday, 515.

The following will show the exports (exclusive of specie) from New York to foreign ports or the week ending November 29d, and since the beginning of the year:

	1869.	1870.
For the week	$4,078,197	$4,810,040
Previously reported	177,136,876	168,281,586
Since Jan. 1	$181,214,578	$173,091,626

The imports for the week ending Nov. 26, and

since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,168,847	$1,892,837
Gen. merchandise	3,013,850	4,006,950
Total for the week	$4,182,697	$5,899,787
Previously reported	264,263,064	270,261,228
Since January 1	$268,445,761	$276,161,015

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The contract for building the Illinois Grand Trunk railway from Mendota to Prophetstown, also for the extension of the American Central railway from Boston to Keithsburg, has been awarded to Messrs. Daniel L. Wells & Co., of Milwaukee.

☞ The first passenger car on the Portland and Rochester Railroad, from Alfred to Springdale, was run on the 22d ult.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

☞ FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,

No. 5 NASSAU ST.,
NEW YORK, Nov. 28, 1870.

FUNDING FIVE TWENTY BONDS.

The disposition on the part of the holders of United States Five-twenty Bonds to fund them into some reliable Security bearing the same rate of interest, having a longer time to run, and in the exchange for which a difference may be realized, is now very general throughout the country.

Within the past three months *over three million dollars* in Five Twenty Bonds have been funded through our office into substantial and desirable Railroad Loans, dealt in and recommended by us, viz.: The CENTRAL PACIFIC, the WESTERN PACIFIC, and the CHESAPEAKE AND OHIO—in addition to large sales of the same securities for cash. We can recommend them with confidence for new investments, or for funding Five-twenties, without reduction of interest, and with unimpaired security.

THE CHESAPEAKE AND OHIO RAILROAD LOAN, originally offered by us last Winter, was so rapidly taken up, that prior to June last, a sufficient amount had been sold (over $5,000,000) to supply the Company with all the money that would be required during the current year. We are now selling a further amount, at the original price of 90 and accrued interest from Nov. 1.

The Bonds are in denominations of $100, $500 and $1,000, Coupon or Registered. Interest 6 per cent. in gold, payable in New York, May 1 and Nov. 1.

THE CENTRAL PACIFIC BONDS are all Coupon Bonds of $1,000 each, interest payable Jan. 1 and July 1. They are well known, and have a ready market in all the money centres of this country and Europe, and are daily quoted at the Stock Exchange.

We deal in them the same as in Government Bonds, and furnish them at current market price. Price to-day 91, including the accrued interest due Jan. 1, (three per cent., Gold.)

We continue, as heretofore, to buy and sell Government Bonds, make Collections, receive deposits subject to check at sight without notice, and allow interest on balances, and do a general Banking business.

FISK & HATCH.

Lockwood & Co.

We invite attention to the Advertisement of Messrs. LOCKWOOD & Co., Bankers, on the last page of this week's issue. Mr. LE GRAND LOCKWOOD, the senior partner, has been in this business for 25 years, where his ability, and reputation for liberality, built up a house whose commission business during the war was the largest in New York—amounting at times to more than one hundred millions per month. It has been a standing principle with this house to suffer loss themselves rather than do a possible injustice to others. This has, we believe, given them a reputation for honorable dealing unsurpassed by any in the city. Their very large experience, covering every species of transaction in stocks, etc., and their ample facilities, are a guarantee that their customer's business will be done on the best terms, and in the most satisfactory manner.

Iron Production in the United States.

The following statistical facts in reference to the production of Iron in the United States are from advance sheets of the Report of Mr. Henry McAllister, Jr., Secretary of the Pennsylvania Iron and Steel Association, 522 Walnut St., Philadelphia. He says:

The development of the pig-iron manufacture, that was noticed at length in our report for the years ending 1866, 1867 and 1868, continued with increased vigor during the year 1869. The remarkable growth of this branch of business during the past few years has by no means been confined to the older iron regions, from which, until recently, the principal supply of iron for the whole country has been drawn. Localities that have long been known as admirably adapted to the manufacture of iron, but which it has been supposed would not be called upon to yield their stores of mineral wealth for years to come, have suddenly loomed up into importance. Several States, that five years ago were compelled to purchase every pound of pig iron for consumption, now produce many thousands of tons annually.

For some years prior to 1860 Indiana produced a small quantity of charcoal pig iron, about 1,000 tons per annum. From that time until 1867 no pig iron of any kind was made in the State. In 1867 a large bituminous coal furnace, with a capacity of 9,000 tons per annum, and employing a capital of $150,000, was erected at Brazil, Clay county. In the following year two furnaces were built, with a capacity of 7,500 tons each, with a capital of $200,000. The same year another furnace was built in Clay county, with a capacity of 3,600 tons, and employing a capital of $100,000.

Last year a fifth furnace was blown in the same locality, having a capacity of 3,600 tons and capital of $125,000. A sixth furnace, at Terre Haute, has just been completed, having a capacity of 7,500 tons and employing a capital of $150,000. These furnaces produced, in 1869, about 23,500 net tons of iron. Their united capacities are 35,000 tons per annum, and a capital of $725,000 is employed in their operation. Four additional furnaces would have been erected during the course of the present year but for fear of legislation adverse to the iron interest. In Illinois prior to 1859, a few hundred tons of pig iron was made annually. From that time to the beginning of last year there was not an active furnace in the State. Within the past eighteen months, however, the business has received a new impetus. Six large stone-coal furnaces have been erected; four of these are in the vicinity of Chicago, and two at Grand Tower, in Jackson County, on the Mississippi River. We hear of a seventh in course of construction, but cannot now name the locality. Thus, in the short space of eighteen months, Illinois has acquired a capacity for producing from 50,000 to 60,000 tons of pig iron. A bituminous coal furnace, having a capacity of thirty-five tons per day, has been erected at Milwaukee, Wis. Five large stone-coal furnaces have been built in Missouri within the past year. That great and growing State has now a capacity of 300 tons of pig iron per day, with means for greatly increasing the production should legislation be propitious.

To show the condition of the iron manufacture in Eastern Kentucky, we cannot do better than quote from a letter recently received from a gentleman living near Ashland, in that State. He says: "During the last three years two large stone-coal furnaces and two charcoal furnaces have been built near this place, all within sight of each other, on the bank of the Ohio River. Raccoon, Buffalo, Lovel, Greenup and Kenton furnaces, that were all idle during the depression before the war, have started again within three years.

In the States north and east of Pennsylvania, the production of Anthracite Iron in 1869 was 269,256 tons, as follows:

	Tons.
New Jersey	54,201
New York	210,855
Massachusetts	4,200

The production of Anthracite Iron in these States has risen from 64,969 tons, in 1864, to the quantity above given, in 1869. The anthracite furnaces in the State above named were erected as follows: 1 in 1844, 2 in 1845, 3 in 1847, 2 in 1848, 3 in 1850, 3 in 1852, 2 in 1853, 4 in 1854, 1 in 1855, 2 in 1857, 2 in 1860, 3 in 1861, 1 in 1862, 3 in 1864, 2 in 1865 and eight since 1865; eight of the whole number erected have been abandoned and dismantled.

The following statement shows the progress of this branch of manufacture in the States above named:

Years.	Mass.	New York.	New Jersey.	Total.
1854	4,978	35,619	24,372	64,969
1855	7,181	49,728	31,754	88,663
1856	3,855	52,826	29,247	85,928
1857	3,900	46,486	22,785	73,171
1858	3,300	49,380	16,447	68,827
1859	1,000	68,282	28,394	97,686
1860	....	79,509	27,092	106,601
1861	....	66,793	24,000	90,793
1862	....	72,702	27,500	100,202
1863	....	109,992	38,000	147,992
1864	2,509	121,863	41,000	162,863
1865	3,000	80,420	16,195	99,615
1866	3,606	118,274	40,680	162,560
1867	3,500	151,586	36,919	192,000
1868	4,000	160,681	47,209	211,895
1869	4,200	210,855	54,201	269,256

The production of anthracite pig iron in Pennsylvania in 1869 was 592,739 tons. Of this quantity 300,916 tons were made in the Lehigh region, 150,409 tons in the Schuylkill regions, 123,273 tons in the Upper Susquehanna, and 118,141 tons in the Lower Susquehanna. This product exceeds by 20,784 tons, or 3.09 per cent., that of 1868; 98,469 tons, or 36¼ per cent., that of 1867; 118,980 tons, or 20¾ per cent., that of 1866.

The following statement shows the whole product of anthracite pig iron in Pennsylvania for the past eight years:

Years.	Production.	Years.	Production.
1862	370,304	1866	573,759
1863	432,072	1867	594,270
1864	590,690	1868	671,955
1865	377,443	1869	692,739

The production in Maryland for 1869, of anthracite pig iron, was 9,155 tons.

The total product of anthracite pig iron in the United States in 1869, is shown to be as follows:

	Tons.
Massachusetts	4,200
New York	210,855
New Jersey	54,200
Pennsylvania	692,739
Maryland	9,155
Total	971,150

The yearly product of anthracite pig iron for the past ten years has been as follows:

	Production. Tons.	Inc. or Dec. per cent.
1860	519,211	....
1861	409,229	Dec. 21.18
1862	470,315	Inc. 14.90
1863	577,638	Inc. 22.82
1864	684,018	Inc. 18 41
1865	479,558	Dec. 29.89
1866	749,367	Inc. 56.26
1867	798,938	Inc. 6.57
1868	893,000	Inc. 11.80
1869	971,150	Inc. 8.74

The production of raw bituminous coal and coke pig iron, in 1869, amounted to 553,341 tons, an increase of 213,341 tons, or 62.74 per cent. over that of 1868, and 234,694 tons, or 78.65 per cent. over that of 1867, and 284,345 tons, or 105.7 per cent. over that of 1866. In 1854 the production of this class of iron was 54,485 tons, since which the average annual increase has been 54½ per cent. The great progress made by this branch of business in several localities during the past few years is truly astonishing. In illustration of this we will cite a few instances:

In 1864 there were eleven furnaces of this class in the Shenango Valley, Pennsylvania, the oldest of which was erected in 1844. The capacity of these furnaces was about 45,000 tons annually. During the five following years, to 1869 inclusive, there were erected in that locality ten additional stone-coal furnaces, having a capacity of from 85,000 to 95,000 tons, and employing a capital of $800,000. During the same time three charcoal furnaces were built in the valley, with a capacity of 8,000 tons, costing about $50,000. The capacity of the old furnaces has been increased fully twenty-five per cent. by revision and enlargement during the past five years. In the Hanging Rock region of Ohio, five bituminous coal furnaces have been built or rebuilt within three years, increasing the capacity of that region 40,000 tons per annum. These new furnaces employ a capital, in works and ore and coal lands, of over $1,000,000. A similar development in the charcoal manufacture has taken place in the same locality. In the Mahoning region, in Northeastern Ohio, twelve large new bituminous coal furnaces have been built within three years; four were blown in in 1867, five in 1868, and three in 1869. These new furnaces have an annual capacity of 95,000 tons, and cost $750,000. Two large bituminous furnaces have recently been erected in Michigan—one in the vicinity of Detroit, the other in the Upper Peninsula. The latter, according to the latest advices, is about to be blown in. Of the growth of this branch of the pig iron manufacture in Indiana, Illinois and Missouri, we have previously spoken.

The production of charcoal iron in 1869 amounted to 392,150 tons, as follows:

	Tons.
New England States	38,000
New York, New Jersey, Pennsylvania and Maryland	134,000
Western States	206,500
Southern States	13,650

This quantity exceeds by 22,150 tons or about 6 per cent., the product of 1868; 47,809 tons, or 13.88 per cent., that of 1867, and 5,570 tons, or 17.91 per cent., that of 1866.

The annual production of charcoal pig iron in the United States for many years past has been quite variable, as the following statement will show:

	Production. Tons.	Inc. or dec. per cent.
1854	342,298	....
1855	339,922	Dec. 7.10
1856	370,470	Inc. 9
1857	330,321	Dec. 10¼
1858	285,815	Dec. 13½
1859	584,041	Dec. 4.10
1860	278,331	Dec. 2
1861	195,270	Dec. 29
1862	186,660	Dec. 4
1863	212,005	Inc. 13
1864	241,853	Inc. 14
1865	262,342	Inc. 8
1866	332,580	Inc. 26¼
1867	344,341	Inc. 3
1868	379,000	Inc. 7
1869	392,150	Inc. 6

It will thus be seen that with the exception of a single year there was a steady falling off in the production of charcoal iron from 1854 to 1862 inclusive, and as steady an increase from 1862 to the present time.

While but little progress has been made in this branch of manufacture in the New England and Middle States during the past three years, its growth in the West has been exceedingly gratifying.

Within that period a number of furnaces have been built in Ohio, largely increasing the capacity of that State for making this kind of iron. In Michigan, six new charcoal furnaces have blown in, having a total capacity of between 30,000 and 40,000 tons. In Wisconsin, a new charcoal blast

furnace was put in blast in 1869, another has been blown in since the beginning of the present year, and a third is now in process of construction. Two new furnaces, using charcoal for fuel, have been built in Missouri, and several in Kentucky. In the Southern States, a number of old charcoal furnaces that went out of blast when the war ended, have recently been repaired and lighted.

They are located as follows: One near Lincolnton, N. C., making about 1,500 tons per annum, a considerable part of which is converted into hollow-ware and other light castings for local consumption; two in Cass County, Georgia, which made, in 1868, 487 tons of charcoal iron, most of which was also made into hollow-ware; three in Alabama, which made respectively 500 tons, 4,908 tons, and 1,756 tons. The last named State is making a great effort to develop her mineral resources. The late Legislature passed an act granting aid to several important railroad companies, upon the condition that in the construction and equipment of said roads preference must be given, terms being equally favorable, in all contracts for cross ties, rails, chairs, spikes, joint fastenings, locomotives, cars of all kinds, and other materials and equipments, to the proprietors of such foundries, mills, manufactories, and other works, as are engaged in the manufacture of iron, of ores, and other raw materials found in the limits of the State of Alabama."

The whole product of pig iron of all kinds, in the United States in 1869, was 1,916,641 tons, as follows:

Anthracite pig iron	971,150
Raw bituminous coal and coke pig iron	553,341
Charcoal pig iron	392,150

The product in 1865 was 931,000 tons, it having more than doubled in four years.

The production of the rail mills for 1869 was as follows:

	Tons of 2,000 lbs.
Massachusetts	32,238
New York	79,463
Pennsylvania	319,653
Maryland	27,328
Ohio	41,837
Kentucky	7,817
Michigan	6,885
Illinois	53,261
Wisconsin	8,680
Other States	16,424
Total	593,586

The progress of this branch of manufacture during the past ten years is shown by the following table:

Year.	Production, in tons of 2,000 lbs.	Inc or Dec. per cent.
1860	205,038	....
1861	189,818	Dec. 7.4
1862	213,912	Inc. 12.6
1863	275,768	Inc. 28.9
1864	335,869	Inc. 21.6
1865	356,292	Inc. 6.2
1866	430,778	Inc. 20.9
1867	462,108	Inc. 7.3
1868	506,714	Inc. 9.6
1869	593,586	Inc. 17.12

Of the product of rails as above given for 1869, 9,650 tons were Bessemer steel. The construction of one or two large rail mills is now in contemplation, which will increase the capacity of our works beyond the total consumption of rails last year.

The product of the rolling mills, other than rail, for the year 1869, was 642,420 tons, which may be divided about as follows:

	Tons.
Merchants' bar and rod	292,500
Sheet	86,320
Plate	78,000
Hoop	17,200
Nails and spikes	146,400
Axles, and other	72,000

Of these manufactures we imported 120,796 tons, making a total consumption of rolled iron other than rails, in 1869, of 763,215 tons.

The product of the forges and bloomaries in 1869 was 69,500 tons, a slight decrease as compared with the average of the past five years.

Of steel of all kinds the product was 35,200 tons, of which nearly 12,000 tons were made by the Bessemer process.

The history of the iron-ore trade of Marquette or Lake Superior region for the year 1869 is exceedingly satisfactory. During the year 709,387 tons of ore were mined, the value of which, when loaded in the cars at the mines, is estimated at $3,166,190. The existence of iron ore in this region was made known in the year 1830, but the first opening was not made until late in the year 1846. From that time to the end of the year 1855, only about 25,000 tons were mined. Since the latter year the trade has grown with wonderful rapidity, the total quantity mined during the fourteen years that have since elapsed reaching the vast aggregate of 3,274,400 tons. From this ore over 2,000,000 tons of pig iron have been smelted, a quantity equaling the whole production of the country during the year just closed. From the excellent history of the iron mines and furnaces of the Lake Superior District, by A. P. Swineford, Esq., recently published, the following statement, showing the yearly production of ore in that region since 1856, is complied:

Year.	Tons of 2,000 lbs.	Year.	Tons of 2,000 lbs.
1856	7,840	1864	263,338
1857	23,520	1865	219,807
1858	34,759	1866	332,609
1859	73,560	1867	522,005
1860	130,937	1868	568,750
1861	50,882	1869	709,387
1862	129,608		
1863	207,488	Total	3,274,490

Journal of Railroad Law.

RAILROAD COMPANIES—NEGLIGENCE—PERSONS CROSSING TRACK MUST LOOK BOTH WAYS.

The case of Havens *vs.* The Erie Railway Co., (41 N. Y., 296,) was an action under the statute for negligently causing the death of the plaintiff's intestate, at a railroad crossing in the town of Corning.

Evidence given by the plaintiff's witnesses tended to show that no whistle was blown or bell rung upon the defendant's train when approaching the crossing where the accident occurred.

The defendant's counsel requested the court to charge, that if the bell was rung as the defendant's engineer and fireman swear it was, the plaintiff cannot recover. The court refused and the defendant excepted. The jury brought in a verdict for the plaintiff for $1,300.

The following is the opinion of the court delivered by

GROVER, J.—The questions argued by the counsel for the appellant, are those arising upon exceptions taken by the defendant's counsel upon the trial to the charge of the judge to the jury, and to his refusal to charge as requested. It appears from the case, that when the judge concluded his charge, to which no exception was taken, that the plaintiff's counsel requested him to charge that the deceased was not bound to stop and look up and down the road unless there were signals given; and that if they heard no signals they would have the right to think that there was no train within eighty rods, and the court so charged. The defendant's counsel here asked the court to charge, that if the deceased might at any point within ten rods of the crossing have easily seen the approaching train nearly a mile off, he was bound to survey the space, or in other words to look up the road, and if by omitting so to do he lost his life, the plaintiff cannot recover. The court refused, and the defendant's counsel excepted. This request of the defendant's counsel must be read in connection with the propositions charged by the court upon the request of plaintiff's counsel immediately preceding it. When so read, it is clear that the point in controversy between the counsel was, whether the omission to give the signals upon the train required by statute excuses the traveller approaching the crossing from all obligation to look up and down the track, when that can readily be done, to ascertain whether trains are approaching, and whether the omission to use his eyes for that purpose constitutes negligence that will preclude a recovery for an injury received by a collision with such train.

From the charge given, and the refusal to charge as requested, the jury must have understood the court as holding that the omission to give the signals did excuse the traveler from looking up and down the track, and that his omission so to do was no obstacle to a recovery. At the time the case was tried, some doubt existed as to the law upon these points in this State. Opinions given in this court published in the reports, had laid down the law, as it was given by the judge to the jury in the present case, but a close examination of the cases in which they were given will fail to show that such was the doctrine of the court. On the contrary, the rule that any negligence of the party injured contributing thereto will bar a recovery therefor has been uniformly adhered to. It may now be regarded as settled by this court that a traveler approaching a crossing is required to use his eyes and ears in looking and listening to ascertain whether trains are approaching, irrespective of the question whether the signals required by statute are given upon the train, and if an injury is received in consequence of his omission so to do, he cannot recover therefor. (Ernst *vs.* Hudson R. R. Co., 39 N. Y. 61; Wilcot *vs.* Rome and Watertown R. R. Co., id., 858.) The principle of these cases has been applied in several subsequent cases not reported. A further discussion of the principle or examination of the cases is unnecessary. The evidence in the case clearly made it the duty of the judge to charge upon these points. There was evidence tending to show, that by looking, the train could have been readily seen, and thus the danger avoided. The judge erred in refusing to charge as requested by the defendant's counsel. He should have instructed the jury that an omission to ring the bell, or blow the whistle, would not excuse the deceased from the observance of proper care on his part, and that this care required him to look for trains when he had opportunity so to do, while riding in the wagon; and that if the injury would have been avoided by his so doing, the plaintiff could not recover. The judgment should be reversed and a new trial ordered.

Judgment reversed.

☞ The formal opening of the Extension of the Boston, Concord and Montreal Railroad from Whitefield to Lancaster, N. H., took place on the 29th ult.

List of U. S. Patents.

Chesapeake and Ohio Railroad.

The annual meeting of the stockholders of this company was held in Richmond, Va., on the 24th ult. The Report of the President, Hon. C. P. Huntington, shows that the affairs of the company are in a flourishing condition, and states that the entire lines to the Ohio river will be completed and in running order by July, 1872. The report gives the total receipts for the year ending September the 30th, as $677,325 27, and the total expenses $617,439 03, making the net receipts $59,886 24. The following board of directors for the ensuing year were unanimously elected: C. P. Huntington, A. A. Lowe, W. H. Aspinwall, Richard Irvin and William B. Hatch, of New York; H. C. Parsons, of West Virginia, and John Echols, William C. Wickham and Jos. R. Anderson, of Virginia.

☞ The Tredegar Works at Richmond, Va., work from 800 to 1,000 hands, and water power and horse power equivalent, perhaps, to ten thousand hands more. They turn out thirty-eight cars per month, besides vast quantities of railroad spikes, fish bars, bar iron, &c.

☞ The Central Ohio Railroad Company have declared a semi-annual dividend of three per cent. on both common and preferred stock, payable on the 31st inst. at the Western National Bank, Baltimore.

☞ The Chicago and Northwestern Railway Company has declared a semi-annual dividend of 5 per cent. cash, free of government tax, payable December 30. The dividend is on both classes of stock.

☞ The quarterly dividend of the Erie and Pittsburg Railroad Company will be paid at the office of the Union Trust Co., New York, on the 10th inst.

Vermont Central Railroad.

The annual meeting of the first mortgage bondholders was held in Boston on the 30th ult. From the Trustee's report, which was submitted by J. Gregory Smith, it appears that the net earnings of the road during the past year were $2,084,884 49, and the net expenses for operating the same, $1,495,907 50, leaving a balance on hand of $588,976 99. The proceeds from bonds and equipment loans were $484,310 08, which added to the above earnings, made the total receipts $2,571,814 58. The disbursements were $2,553,880 61, and the assets $578,588 33.

The increase of earnings over those of last year was $32,029 52, which was an excess of $135,454 07 over those of any preceding year. The increased expense caused by the great flood, from which the railroad suffered severely, was $137,810 05, making a reduction in the net earnings of $2,355 98.

The trustees speak in the most satisfactory terms of the increased business of the road. Within the year there has been added to the rolling stock 7 new first-class locomotives, 14 passenger, 7 baggage, 209 box, 166 platform and 20 coal cars. The changeable gauge system in cars has proved of great advantage. The trustees believe that the time has arrived when the road can be advantageously transferred to the corporation, with profit to the stockholders.

☞ The Duxbury and Cohasset Railroad Company have contracted with H. G. Reed, of Scituate, Mass., for the building of its entire road, 18½ miles long, the road to be ready for the rolling stock by July 1, 1871.

☞ Messrs. Watson & Co., of Paterson, N. J., have secured the contract for the erection of an iron bridge across the Connecticut river at Holyoke, Mass., for $141,600. The bridge is to be 1,600 feet in length.

☞ The New York canals will close on the 8th of December.

NOTICE TO THE PUBLIC.

EXECUTIVE DEPARTMENT,
ATLANTA, GA., October 26th, 1870.

To Whom it May Concern:

By an Act of the General Assembly of the State of Georgia, approved October 24, 1870, authority is given to the Governor to lease the Western and Atlantic Railroad, the property of the State, together with all of its houses, workshops, depots, rolling stock and appurtenances of every character, for the term of twenty years, upon certain terms, and subject to certain restrictions therein named, to-wit:

The monthly rental shall not be less than twenty-five thousand dollars ($25,000) payable monthly. The lessees shall give a bond for the sum of eight millions of dollars ($8,000,000) to securing the prompt payment of the amount of rental agreed upon, and for the return of the road and its appurtenances at the expiration of the lease, or on the termination or forfeiture thereof, in as good condition as at the time of leasing, five millions ($5,000,000) of which security shall be within this State and the balance, if out of the State, shall be upon real estate or railroad property. The lessees to be worth over and above their indebtedness, at least five hundred thousand dollars ($500,000.)

The Legislature reserves to itself the right, from time to time, to examine into the affairs of the lessees, and to require that the amount of security above recited shall be maintained unimpaired.

The lessees shall not be less than seven in number, a majority of whom shall have been for five years *bona fide* residents of this State, and shall represent a majority of the whole interest in the lease. No railroad or express company, or any combination of them, shall, in any event, become the lessees, but they may become sureties on the bonds of the lessees. The lessees shall not charge a higher rate for local freights over said road than the average rate charged by the Georgia Railroad and Banking Company, the Central Railroad and Banking Company, and the Macon and Western Railroad Company, for like local freights over said roads, and the said lessees shall have the same rights, exemptions, privileges, immunities and guarantees, except the establishment of banks, and shall be subject to the same liabilities, disabilities, and public burdens of said railroad companies last mentioned. The faith of the State is pledged to redeem all mortgage bonds and coupons now resting on the State Road as they fall due, and to save the lessees harmless against all such bonds and coupons.

The lessees are by this act constituted a body corporate and politic for the term of twenty years, under the name and style of the Western and Atlantic Railroad Company, having such powers, liabilities and immunities, as are usual with railroad companies, and not in conflict with the Constitution and Laws of the United States, or of the State of Georgia; but they will not be allowed to make or permit any discrimination in favor of or against any other road or persons having business connections with the said Western and Atlantic Railroad.

For the purpose of carrying out this act, proposals will be received until and including the 25th day of December next and must be addressed "to the Governor of the State of Georgia, at Atlanta," and marked on the wrapper, "Proposals for the lease of the Western and Atlantic Railroad, in accordance with an Act approved October 24, 1870." The proposals must state in full the names and residence of the parties uniting to make proposition, the amount that each of the parties therein named are worth over and above their debts and liabilities, together with a full description of the character of the security which will be offered to complete the bond.

The property to be leased is a single track railroad, one hundred and thirty-eight miles in length, with full and complete equipment of shops, depots, turnouts, sidelings, engines, cars, etc., etc., etc., now in successful operation between the cities of Atlanta, in Georgia, and Chattanooga, in Tennessee. At Chattanooga the line is in direct rail connection with the Memphis and Charleston, Nashville and Chattanooga, Chattanooga and New Orleans, East Tennessee and Georgia, and the Chattanooga and Cincinnati, (now in progress of construction,) railroads, and at Atlanta with the Atlanta and Montgomery, Atlanta and Charleston, Atlanta and Savannah, and the Atlanta and Gulf lines of road, being the only railroad connection between the system of railways centering at Chattanooga and at Atlanta.

Copies of "An Act to authorize the lease of the Western and Atlantic Railroad, and for other purposes therein mentioned," approved October 24th, 1870, can be had upon application at the Executive office.

RUFUS B. BULLOCK.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

LOCKWOOD & CO., No. 94 Broadway.

Pittsburg and Connellsville Railroad.

At the annual meeting of the stockholders of this company in Pittsburg on the 5th inst., the following gentlemen were elected directors for the ensuing year: Wm. Oden Hughart, G. L. B. Fetterman, Wm. Phillips, Wm. Baldwin, Wm. S. Bissell, Pittsburg; Cyrus P. Markle, West Newton; Cyrus Meyers, Somerset; Johns Hopkins, Wm. H. Perkins, Israel Cohen, Hazeltine G. Vickery, Hugh Sisson, Baltimore.

At a subsequent meeting of the directors the following officers were chosen: President—W. O. Hughart; Secretary and Treasurer—J. H. Page, Jr.; Chief Engineer—B. H. Latrobe; Solicitor—George Shires, Jr.; Master of Transportation—D. D. Angell; Master of Machinery—D. P. Rannie; Master of Road—F. W. Smith; General Agent and Paymaster—W. B. Stout.

The gross earnings of the road for the year ending September 30, 1870, were $655,786 11; the expenses $469,887 60; and the net earnings $185,848 51.

☞ The Monadnock Railroad is graded from Winchendon to within about a mile and a half of Peterboro' village, and the rails are laid and trains running to Jeffrey and Moone's Mill in Peterboro.'

Louisville and Nashville Railroad.

The following is a condensed statement of the earnings of the Main Stem and Branches for the year ending June 30, 1870:

	Memphis Branch.	Knoxville Branch.	Main Stem.

		2,272,155 05
Balance to credit June 30, 1870		$748,976 97

The following is a comparative statement of the earnings, expenses and net earnings during the past and preceding years:

	1869.	1870.
Gross earnings	$2,381,138 55	$2,954,658 80
Operating expenses.	1,349,461 79	1,812,525 47
Net earnings	$1,031,676 76	$1,142,133 33

This shows an increase in gross earnings of $573,520 25; in expenses of $463,063 68, and in net earnings of $110,456 57.

Included in the operating expenses is the sum of $141,649 36 expended in the improvements. Deducting these expenditures the operating expenses proper were $1,670,876 11, and the net earnings $1,283,782 69, or 43½ per cent.

The bonded debt of the company, June 30, 1869, was		$5,218,500
Consolidated mortgage bonds executed during the fiscal year		3,500,000
		$8,713,500
Main Stem mortgage bonds redeemed during this fiscal year	$139,000	
Memphis Branch mort. bonds redeemed during this fiscal year	70,000	
Bardstown and Louisville Railroad mort. bonds redeemed during this fiscal year	26,500	
		235,500
Total Bonded Debt		$8,478,000

The above amount includes—

City of Louisville bonds without mortgage	$849,000	
Consolidated mort. bonds unsold	132,000	
		981,000
Making the total mort. debt this date		$7,497,000

Seven per cent. cash dividends have been de-

clared upon the stock of the company during the fiscal year.

There has been redeemed during the year of the mort. bonds.....	$235,500 00
Expended on Lebanon Branch Extension south of Lebanon.....	178 845 24
Interest paid during same period...	351,930 88
Additional rolling stock and depot grounds.....	593,107 09
	$1,354,383 16

The traffic of the Lebanon Branch is gradually increasing, and when extended so as to connect with the East Tennessee and Virginia Road we may reasonably expect some return for the large expenditure made.*

By order of your Directors, George MacLeod, Esq., Chief Engineer, has made a survey and estimates for a railroad from London to Cumberland Gap, which is hereby annexed. Two routes have been surveyed—one, 55.2 miles, is estimated to cost $2 146,230; total cost per mile, $39 022 which includes ballast and rolling stock. The other is 54 miles, and is estimated to cost $2,117, 219, or $39,207 per mile.

General Mahone, President of the Southside Railroad and the Virginia and Tennessee Railroad, reports that he expects soon to effect the permanent consolidation of the several companies, which will make up a line from Norfolk, Va., to Cumberland Gap. There is only about one hundred miles from Bristol to Cumberland Gap to be constructed in Virginia.

When we shall have received satisfactory evidence that the link from Bristol to the Gap can be constructed, it will remain for you to determine what shall be done to enable us to join rails with the Virginia Railroad at Cumberland Gap, giving us an unbroken connection with the railway system of this great State, and a direct line to Norfolk.

The Glasgow Railroad, from Glasgow, in Barren County, to Glasgow Junction, on our road, was commenced many years since, but failed of completion for the want of the necessary funds. Through the energy and perseverance of J. B. Garnett, Esq., its President, and other friends of the road, the necessary funds for the completion of the work were this year obtained, and the road will soon be opened for traffic, which will add another feeder to our road.

We continue to operate under lease the Memphis and Ohio Railroad, leading from Memphis to Paris, Tenn. This road is in good condition, and its traffic is gradually increasing, as you will see by referring to the General Superintendent's report for the results of the year's operations.

There has been no change in the situation of the Memphis, Clarksville and Louisville Railroad. It remains in the hands of a Receiver of the State of Tennessee, and this company continues to run it under and as the agent of the Receiver, by which arrangement, and by our lease of the Memphis and Ohio Road, we operate the line from Louisville to Memphis as one line. The total length of road now operated by this company is 605.8 miles.

Our connections with New Orleans, Texas, and other southern and southwestern points, over the Mobile and Ohio, Mississippi Central, and New Orleans, Jackson and Great Northern Railroads, have been materially improved. The New Orleans, Jackson and Great Northern and the Mississippi Central roads are both under the management of the same President, giving in effect, so far as running arrangements are concerned, but two companies between here and New Orleans, which will facilitate and increase the traffic over this line materially. Trains from New Orleans connect with ours at Humboldt, and sleeping cars run through from here to New Orleans daily. Freight is also transported without change of cars to and from New Orleans, Mobile, Savannah, Ga., Charleston, S. C., Wilmington, N. C., and all intermediate points.

The Elizabethtown and Paducah Railroad has been opened for business thirty-nine miles west of Elizabethtown, and track laying is steadily going forward. Rails have been purchased and are now being delivered sufficient to extend the track seventeen miles further. It is expected that fifty-six miles of this important road will be opened for business early in November, and early in January next to Green River, seventy-seven miles from Elizabethtown. The ability and energy manifested by the managers of this enterprise is a guarantee that this road will be completed to Paducah at an early day. It opens to trade and commerce a section of country hitherto not traversed by railroads, and passes through a rich mineral and agricultural district, which will be developed by this road, and add largely to the traffic of this company.

The Louisville, Cincinnati and Lexington Company are extending their road to Newport, where a bridge is being erected which will enable the Pennsylvania Railroad Company, lessees of the Little Miami, Columbus and Xenia Railroad, to form a continuous line from Louisville to all points East. They have secured the right of way through this city for the purpose of building, in conjunction with this company, a connection between our respective lines. When the connection at Cincinnati and this place is perfected our facilities for business will be materially improved, and you may reasonably expect an increased traffic.

The railroad bridge over the Ohio River at this point, in which this company is a large stockholder, has been completed, and the cars of the Jeffersonville, Madison and Indianapolis Railroad Company are daily crossing. It is a noble structure, highly creditable to the President and Directors, to those who initiated the enterprise, and to the engineer (Albert Fink) who made the plans and superintended its erection, and it doubtless will meet the expectations of the public, and the enterprising stockholders who provided the means for its construction, when proper provisions are made for crossing the trains of all railroads that terminate at Jeffersonville. When this is accomplished you may expect a large increase in the traffic of your road, besides satisfactory dividends upon the large sum invested by this company in the bridge.

Large expenditures have been made during the past year for additional rolling stock, to enable us to meet the increased demands for transportation, and additions made to the real estate of the company, and a system of improvements initiated which, when completed, will enable the company to manufacture its own cars and engines; thus securing cars and engines of a uniform character, and obtaining more durable and economical rolling stock than we have heretofore been able to purchase. The rolling stock and entire property of the company is in a better condition than at any former period.

It will be perceived that there has been an increase in the running expenses the last fiscal year over the preceding year. This has arisen mainly from the reduction in the tariff, the extension of switches, and the general improved condition of the road bed and equipment.

Our depot accommodations and offices are inadequate to the necessities of the company. We have commenced building a freight depot, and large expenditures will be required during the coming year for depots, offices, shops, etc., to meet the wants of the growing business of the company.

There has been a large increase in the income of the company during the past over the preceding year, and with improved connections in almost every direction and good crops, judicious and able management on our part will insure a continuance of increasing revenues. The roads of this company are but in their infancy. If managed in a comprehensive and judicious manner, they should be extended, as the means of the company and the business of the country justify, so as to develop the agriculture and commerce of the country, thereby building up the villages and cities along the line your roads.

The total length of the Main Line (Louisville, Ky., to Nashville, Tenn.,) is 185 miles; sidings, 21.62 miles—total, 206.62 miles. Length of Bardstown Branch (Junction to Bardstown) 17.30 miles; sidings, 0.82 mile—total, 18.12 miles. Knoxville Branch (Lebanon Junction to Mount Vernon) 99.46 miles; sidings, 9.92 miles—total, 109.38 miles. Richmond Branch, (Junction with Knoville Branch to Richmond,) 32.46 miles; sidings, 2.50 miles—total, 35.96 miles. Memphis Branch, (Junction to Tennessee State Line,) 46.41 miles; sidings, 3.63 miles—total, 50.04 miles. Total length of road and branches, 381.63 miles. Total length of sidings, 38.49 miles. Total miles of iron, 420.12.

Including the Memphis, Clarksville and Louisville Railroad (operated for the receiver) 82.6 miles, and the Memphis and Ohio Railroad (leased) 130.8 miles, the total length of road operated by the company is 594.3 miles.

Including the above roads, the following is the result of last year's operations:

Gross earnings of Louisville and Nashville Railroad and branches.		$2,954,658 80
Gross earnings of Memphis, Clarksville and Louisville Railroad		409,198 53
Gross earnings of Memphis and Ohio Railroad.....		790,648 74
Total earnings.....		$4,154,506 07
And total expenditures—		
Louisville and Nashville Railroad and branches.....	$1,812,525 47	
Memphis, Clarksville & Louisville Railroad.	408,061 45	
Memphis & Ohio R. R.	591,808 40	
		2,812,395 38
Total net earnings on 594.3 miles of road.....		$1,842,110 69

As compared with the previous year it will be seen that there has been an increase of 25.91 per cent. in the gross and an increase of 13.81 per cent. in the net earnings.

The following statement contains in a condensed form the general results of the operations of the Main Line and Branches during the years ending June 30, 1869 and 1870:

	1868–'69.	1869–'70.
Gross earnings.....	$2,881,188 55	$2,954,658 80
Operating expenses.	1,849,461 79	1,812,525 47
Net earnings.....	$1,031,676 76	$1,142,133 33
Proportion of expenses to earnings.....	56.67 per ct.	61.34 per ct.
No. of miles run by trains	887,965	1,229,056
Earnings per mile of train	$2.68	$2.40
Expenses " "	1.51	1.47
Net earnings " "	$1.16	$0.93
Av. length of road in use.	367.92m.	381.4m.
Earn'gs per mile of road.	$6,471 89	$7,746 87
Expenses " "	3,667 81	4,752 29
Net earnings " "	$2,804 08	$2,991 58
Mileage of freight cars..	7,243,969	10,631,525
" passenger cars	2,207,044	2,526,507
Number of tons carried.	817,208	438,413
Do. carried one mile ...	40,813,713	57,885,740
No. of passengers carried	891 827	456,065
Do. carried one mile....	22,561,417	27,230,015

The results of the operations of the Main Stem and Branches are shown separately in the annexed statement;

* The track has been extended to Big Rockcastle River, eleven miles beyond Mount Vernon, and opened for business since the 30th June.

	Main Stem.	Bardstown Branch.	Knoxville Branch.	Memphis Branch.	Richmond Branch.
Gross earnings	$2,340,944 62	$26,358 98	$284,419 97	$269,112 83	$33,822 40
Operating expenses	1,362,250 71	22,174 48	173,810 06	220,855 44	33,434 78
Net earnings	$978,693 91	$4,184 50	$110,609 91	$48,257 39	$387 62
Proportion of exp. to earnings	58.19 per ct.	84.12 per ct.	61.11 per ct.	82.06 per ct.	98.85 per ct.
Number of miles run by trains	887,681	11,668	181,155	161,508	36,744
Earnings per mile of train	$2.63	$2.25	$2.16	$1.66	$0.92
Expenses per mile of train	1.53	1.90	1.82	1.36	91
Net earnings per mile of train	$1.10	$0.35	$0.84	$0.30	$0.01
Length of road in operation	185 miles.	17.3 miles.	99.3 miles.	46 miles.	33.8 miles.
Earnings per mile of road	$12,653 75	$1,523 64	$2,864 24	$5,850 28	$1,000 66
Expenses per mile of road	7,363 51	1,281 76	1,750 85	4,801 20	989 20
Net earnings per mile of road	$5,290 24	$241 88	$1,113 89	$1,049 08	$11 46
Passengers carried one mile	20,983 121	297,000	2,609,595	3,048,438	391,861
Tons of freight carried one mile	46,437,658	196,341	4,277,762	6,458,590	515,389
Earnings per passenger per mile	3.7743 cts.	3.9565 cts.	3.9785 cts.	3 661 cts.	3.9269 cts.
Earnings per ton per mile	3 cents.	6.57 cents.	3.734 cents.	2.184 cents.	3.18 cents.

In 1868-'69 the gross earnings of the Main Stem were $1,891,323 25, the expenses, $1,013,574 71, and the net earnings, $877,748 54; showing an increase in earnings of $449,621 37 with an increase in expenses of $348,676—making the increase in net earnings $100,945 87.

The earnings of the Bardstown Branch in 1868-'69 were $25,677 31, and the expenses $31,058 72—showing a loss of $5,381 41. This year the net earnings are $4,184 50—an improvement of $9,565 91.

Only 94 miles of the Knoxville Branch was in operation in 1868-'69, the earnings upon which were $234,321 73, the expenses $146,658 47, and the net earnings $87,663 26. In 1869-'70 an average of 99.8 miles were operated. A comparison of the earnings of this branch during the past and preceding years shows an increase in earnings of $110,609 91, with an increase in expenses of $27,151 59—making the increase in net earnings $83,458 32.

The earnings of the Memphis Branch in 1868-'69 were $208,065 55, the expenses $135,521 09, and the net earnings, $72,544 46—showing an increase in earnings of $61,047 28, with an increase in expenses of $85,334 35, making the decrease in net earnings, $24,287 07.

The average length of the Richmond Branch in operation in 1868-'69 was 25.62 miles, upon which the gross earnings were $21,760 71, and the expenses $22,648 80—showing a loss of $898 09. In 1869-'70 33.8 miles were operated, upon which the earnings were $33,822 40, the expenses $33,434 78, and the net earnings $387 62—showing a gain of $1,285 71.

Statements are given showing the profits accruing to the Main Line from the operations of the several branches thus: the freight business transacted at the stations of the Bardstown Branch amounted to $33,683 65; the proportion due the branch was only $12,914 80—leaving for the Main Line $20,768 85. The total earnings from passenger business which originated on the same branch was $27,225 82; $11,750 82 of which was due to the branch, and $15,475 to the Main Line—making the gross revenue from business brought to the Main Line from the Bardstown Branch, $36,243 85, and the net revenue derived therefrom, $15,144 26. To which add $4,184 50, net revenue of the branch—making a total net revenue derived from the branch of $19,328 76.

The total earnings from freight received at and forwarded from all stations on the Knoxville Branch, were $217,391 08, of which only $159,758 84 were due the branch—leaving for the Main Stem and other branches, $57,632 24. The earnings derived from the passenger business were $134,221 57; the proportion due the branch was $103,694 18—making the gross earnings of the Main Stem and other branches, $80,527 39. The total gross earnings were therefore $88,159 63, and the net revenue, $36,904 53. To which add net revenue of the branch, $110,609 91—making a total net revenue derived from the branch directly and indirectly, of $147,514 44. In which amount is included the sum of $22,446 97 net revenue contributed by the Richmond Branch.

The estimated value of the Memphis Branch as a feeder to the Main Stem and other branches is as follows: earnings from freight received at and forwarded from stations on the branch, $502,526 38; proportion due the branch, $141,074 63. Earnings from passenger business which originated on the branch, $282,638 98; the proportion due the branch, $111,623 20. The amount due the Main Line and other branches from both passenger and freight business being $582,467 58, and the net revenue therefrom $223,023 39. To which add net revenue of the branch, $48,257 39—making the total net earnings $271,280 78.

The freight business of the Richmond Branch amounted to $80,650 65, and the passenger business to $29,951 17—together, $110,601 82; $31,809 40 of which is due the Branch, leaving for the Main Stem and other branches, $78,792 42, which distributed according to distance on the Main Stem and Knoxville Branch, will give to the former, $22,329 53, and to the latter, $56,462 89—the net earnings of the Main Stem being $9,881 61, and of the Branch, as above, $22,446 97. Total net earnings derived from the Richmond Branch, $32,218 20.

The company have 76 locomotives, 45 passenger, 15 baggage, 3 postal, 11 express, 628 box, 187 rack, 74 gondola, 204 flat, 84 stone, 12 boarding and 1 wrecking cars. Miles run by locomotives with passenger trains, 577,977; with freight trains, 835,847; distributing trains, 87,125—total, 1,500,949.

Number of local passengers carried north, 190,334; do., south, 185,656—total, 375,990. Number of through passengers carried north, 38,909; do., south, 41,166—total, 80,075. Total local and though, 456,065. Total mileage of through passengers, 18,943,152; do., local, 18,386,868—total, local and through, 27,330,015. Miles traveled by each passenger, 69.92; do., by each local passenger, 35.60. Revenue from through passengers per mile, 3.6284 cents; do., local, 3.9532 cents. Number of tons of freight carried, 438,413; do., carried one mile south, 35,070,222; do., north, 22,815,518—total tons carried one mile, 57,885,740.

President.—H. D. NEWCOMB.

Directors.—H. D. Newcomb, Geo. W. Norton, Thos. J. Martin, R. A. Robinson, W. H. Smith, W. B. Caldwell, James Whitworth.

Secretary.—WILLIS RANNEY.

Gen'l Superintendent.—ALBERT FINK.

Pneumantic Railway.

The Secretary of the Navy visited the Broadway Underground Railway, corner Warren street, to-day, escorted by Mr. Joseph Dixon, Superintendent of the Company, Mr. S. H. Wales, of the Union League Club, and Mr. M. S. Beach, Treasurer of the Seamen's Association. The pneumatic postal dispatch was set in motion and a large mail of letters and newspapers was sent through the tubes by the air pressure, at a velocity of sixty-three miles an hour. The rapidity with which the letters shoot into the receiving box is so great that they are scarcely visible, and the fact of their transmission is hardly realized until they are seen emerging from the hopper at the bottom of the box. These postal pipes are intended, as our readers will remember, to be laid under the streets in connection with the present lamp post letter boxes, in such a manner that when letters are deposited in the boxes they fall down into the air tubes and are instantly swept along to the post office, or sub post office, thus saving all delays.

The Secretary then entered the pneumatic passenger car, with a distinguished party of ladies and gentlemen, and rode back and forth for a couple of miles or so under Broadway. Great interest was manifested in the practical working of this simple method of locomotion, and with many expressions of gratification the Secretary departed, highly pleased with his novel experience of atmospheric railway riding under the great thoroughfare of New York.—*Com. Adv., Dec.* 1.

Finances of the United States.

EXTRACTS FROM THE REPORT OF THE SECRETARY OF THE TREASURY.

The financial condition of the country has improved during the past year. The average rate of gold for the year 1869, as shown by weekly sales was 32.9 per centum premium, and for the first eleven months of the year 1870 15.2 per centum premium, indicating an improvement in the value of paper currency of about seventeen per centum. From the 1st day of July, 1869, to 30th of June, 1870, inclusive, the public debt, as shown by the warrant account, was reduced in the sum of $101,601,916 88. From the first day of December, 1869, to the 30th day of November, 1870, inclusive, the reduction was $119,251,240, as shown by the monthly statements of the public debt; and the total reduction from the 1st of March, 1869, to the 1st of December, 1870, was $191,154,765. The consequent reduction in the interest account is at the rate of more than $10,000,000 per annum.

The receipts for the fiscal year ending June 30, 1870, were as follows:

From customs	$194,538,374
Internal revenue	185,128,859
Sales of public lands	3,350,382
Miscellaneous sources	28,237,762
Total	$411,255,477

The expenditures for the same period were:

For civil and miscellaneous purposes	$69,234,017
War Department	57,655,675
Navy Department	21,780,229
Indians and pensions	31,748,141
Interest on public debt	129,235,498
Total	$309,653,560

This statement exhibits a surplus applicable to the payment of the public debt, including the amount pledged to the sinking fund by the act of February 25, 1862, of $101,601,916 88.

The receipts for the first quarter of the present fiscal year were:

From customs	$57,729,474
Internal revenue	49,147,137
Sales of public lands	842,437
Miscellaneous sources	7,382,182
Total	$115,101,230

The expenditures for the same period, excluding payments on account of the sinking fund were:

For civil and miscellaneous purposes	$18,207,242
War Department	10,218,538
Navy Department	4,815,237
Indians and pensions	13,825,462
Interest on the public debt	39,496,451
Total	$86,562,920

The estimate of receipts for the remaining three quarters of the present year are as follows:

From customs	$128,000,000
Internal revenue	98,000,000
Sales of public lands	2,000,000
Miscellaneous sources	16,000,000
Total	$244,000,000

The estimated expenditures for the same period are:

For civil and miscellaneous purposes	$54,000,000
War Department	80,000,000
Navy Department	15,000,000
Indians and pensions	24,500,000
Interest on the public debt	80,000,000
Total	$203,500,000

Showing a balance applicable to the payment of the national debt, including, however, the amount payable on account of the sinking fund of $69,038,309. In estimating the expenditures for the next fiscal year I have included the sum of $24,500,000, properly chargeable to the current revenue as an appropriation under the acts of February 25, 1862, and July 14, 1870, relating to the sinking fund. There will be required also the sum of $4,866,933, being the amount answering to the interest on the capital of the sinking fund, as represented upon the books of the department. This sum I have included in the estimate of expenditures for the fiscal year ending June 30, 1872. Upon this basis I submit the following estimate of receipts and expenditures for the next fiscal year ending June 30, 1872.

Receipts from customs	$175,000,000
From internal revenue	128,418,000
From sales of puplic lands	3,000,000
From miscellaneous sources	16,000,000
Total	$320,418,000

Expenditures:

Legislative establishment	$3,263,966
Executive establishment	17,288,165
Judicial establishment	2,348,751
Military establishment	28,488,195
Naval establishment	20,045,417
Indian affairs	5,021,569
Pensions	30,000,000
Public works	22,338,278
Postal service	4,694,383
Miscellaneous	14,305,428
Permanent appropriations	132,528,234
Sinking fund	24,500,000
Interest upon capital of sinking fund	4,866,933
Total	$309,639,319

According to this estimate there will be a surplus applicable to the payment of the principal of the public debt, in addition to the payments made on that account through the sinking fund, of $10,778,680. An analysis of expenditures develops facts tending to sustain the opinion that the balance will be considerably larger than appears from the foregoing estimates. The sum of $22,338,278 is the estimate for public works. The appropriations for these objects for the present year are less than $12,000,000, and it is reasonable to presume that the appropriations for the next year will not much exceed that amount. It is believed, also, that the estimates made by the several departments for the different branches of the public service are for the maximum amounts which will be required under any circumstances. If such is the case there will remain on the 30th of June, 1872, unexpended balances to be covered into the Treasury. It may, therefore, be reasonably anticipated that the total reduction of the public debt during the next fiscal year, including payments on account of the sinking fund, will be about $50,000,000. It is a noticeable fact that the estimated expenditures for the next fiscal year, including payments on account of the sinking fund and for the interest on the public debt, are so nearly equal to the receipts as to justify and demand the greatest caution in dealing with the revenues and business of the country. It is apparent that a disaster or even a serious check to business would reduce the revenues below our necessary expenditures. It is apparent, also, that the prosperous condition of the country is largely due to the revenue system inaugurated during the war, by which manufactures and the mechanical arts have been extended and established. This policy cannot now be rashly abandoned or suddenly and radically changed without great injury to business and labor and serious consequent losses of revenue. The war in Europe has rendered it impracticable to refund the national debt as authorized by act approved July 14, 1870. A portion of the paper has been manufactured and the preparation of the plates has been so far advanced that whenever a favorable opportunity arises the loan may be offered and the bonds delivered without delay. Inasmuch as the war in Europe and the consequent demand for money make it doubtful whether the four and four and a half per cent. bonds will be taken, it seems to me wise to authorize the issue of $300,000,000 additional of bonds bearing interest at the rate of five

per cent. The interest can be paid quarterly without inconvenience, and I, therefore, respectfully recommend that the loan act be so modified that the payment of interest may be made quarterly instead of semi-annually. Should these recommendations be approved by Congress, it is of great importance that an act authorizing the changes be passed without delay.

Since the 1st of July the currency balance in the Treasury has been unusually and for immediate purposes unnecessarily large. The act of July 12, 1870, authorizing an increase of national bank notes, imposed upon the Secretary of the Treasury the duty of providing for the redemption of equal amounts of their present certificates. The certain though progressive decrease in revenues, both of coin and currency, made it my duty to reserve a sum sufficient to enable the department to comply with the law without resorting to extraordinary means.

Happily the financial condition of the country has not been unfavorably affected by the accumulations in the Treasury. During the year ending September 30, 1870, the national banks paid in interest the sum of $6,486,172. It is estimated that of this sum two millions were paid to private parties. I cannot doubt that the practice of paying interest, except upon balances due from one government to another, is a means by which large amounts of capital are diverted from the extreme portions of the country to the commercial and financial centres, to the injury of business generally. The province of a bank is to lend money, and its proper duty is, by loans and discounts, to facilitate and develop business in the neighborhood of its location. As a matter of fact, under the present system banks are agencies by which capital is gathered in and sent away to distant cities, there to be loaned on call and used for speculative purposes.

Complaints are made from all parts of the country that the bills of the national banks are worn and defaced to such an extent as to be no longer fit for circulation. As many new banks are soon to be organized under the law of the last session of Congress, I respectfully recommend that an appropriation be made and authority given for the issue of new bills, upon such paper and in such form as may be designated by the Secretary of the Treasury. The Comptroller of the Currency, in his report for 1869, recommended the establishment of an agency in the City of New York, under the control of the national banks, for the redemption of their issue. The substance of this recommendation seems to me not only proper but necessary. The expense should be borne by the banks. Coupled with the recommendation I take this occasion to say that the banking system of the country appears to be well managed, and to answer reasonably the purposes for which it was established. It is no doubt true that treasury notes representing an equal amount of public debt, without interest, are most economical circulation for the government; but it should be considered that the banking institutions of the country are agencies by which business is established and fostered. Upon the whole, the system of banking should be extended only for the purpose of meeting the demands of business, but when the demands are urgent the concession should be made upon the ground that the prosperity of business is more important than the mere saving of interest arising from the circulation of Treasury notes, excinding re-deposits. The amount of gold and silver deposited at the mints and its several branches during the last fiscal year was $30,408,788; the coinage for the year was $24,636,011, and the value of gold and silver bars stamped was $8,748,852.

* * * * * * * * *

In my annual report of December last I advised the continuance of the existing system of taxation as an essential condition to the success of the proposed loan. The circumstance that war was declared between France and Prussia simultaneously with the passage of the Loan bill, put it out of the power of the department to make the negotiation, as had been expected. The large revenues, however, of the government continuing, without material abatement, until the present time, improved the credit of the country, enabled the Treasury Department, by weekly purchases, to reduce the amount of surplus bonds offered for sale, and contributed to depreciate the market value of gold.

I also expressed the opinion that the settled policy of the country should contemplate a revenue sufficient to meet the ordinary expenses of the government, pay the interest on the public debt and from twenty-five to fifty millions of dollars of the principal annually. The reduction of the public debt since the 30th day of June last has been so great as to render it certain that the total reduction for the fiscal year will exceed $60,000,000. The natural increase of the business of the country during the next eighteen months is likely to be such as to show a surplus for the fiscal year ending June 30, 1872, of about $40,000,000. The principal of the public debt on the last day of November, 1870, not deducting moneys on hand, was $2,418,673,044; of this amount $395,269,237 was represented by United States notes and fractional currency not bearing interest. The banks of the country acting within the authority of existing laws will require about $398,000,000 of bonds to be placed on deposit as security for their circulation. Should the present system of furnishing a paper circulation for the country partly by the Treasury and partly by the national banks be continued, or the entire circulation be furnished by the Treasury or by the banks, the credit of the United States will be the security for the redemption of the notes. From this view of the policy of the country it follows that about $800,000,000 of the public debt will remain unpaid, existing either in the form of Treasury notes in circulation without interest, or in bonds owned by the banks and held as security for the redemption of their notes, and that only about $1,600,000,000 of the principal of the debt is subject to payment. The financial prospect, although highly favorable, is not such as to warrant important changes in the revenue system at the present session of Congress; but should the result during the coming war meet my expectations it will be possible at the December session of the Forty-second Congress to make a very material reduction in the revenues without impairing the ability of the government to make satisfactory payments of the public debt.

The reduction already made has been advantageous to the country, not only in the particulars indicated but in other respects hardly less important. There is much evidence tending to show that no other event since the conclusion of the war has contributed so much to the diffusion of republican opinions in Europe. The spread of these opinions stimulates emigration from Europe and at the same time prepares the way for the establishment of free institutions on that Continent. Nor can there be any doubt that a policy accepting the debt as permanent would retard emigration from Europe, especially of the reading and reflecting classes. Whatever arguments may be adduced or whatever theories may be advanced, the fact must ever remain that a public debt is a public evil. It is especially burdensome to the laboring classes, and it is therefore in their interest to provide for the constant reduction of the existing national debt. This policy will not prevent such changes in the revenue system from time to time as will equalize the inevitable burdens of our present condition, and within a comparatively short period the taxes may be removed from many articles of prime necessity.

It is the occasion of satisfaction that no other nation ever passed through a great war with so slight a check to industry and business. Specific information and general intelligence from various parts of the United States show that all classeses, and especially the laboring classes, are in the enjoyment of more than average prosperity, whether tested by the experience of this country or by the present condition of other nations. No reason can be found, however, in the favorable condition of public and private affairs for neglecting any proper means for equalizing and diminishing the burden of taxation; but it does justify the statement that the nation can make provision for the public debt in the manner recommended without embarrassing its industry or retarding its progress.

The Public Debt Statement.

The following is a recapitulation of the public debt statement November 30, 1870:

DEBT BEARING COIN INTEREST.	
Five per cent. bonds	$218,977,300 00
Six per cent. bonds	1,724 774,800 00
Total	$1,943,752,100 00
Accrued interest	40,654,451 07
DEBT BEARING INTEREST IN LAWFUL MONEY.	
Three per cent. certificates	$45,050,000 00
Navy Pension fund 3 per cent.	14,000,000 00
Certificates at 4 per cent.	678,000 00
Total	$59,728,000 00
Interest	364,304 34
Debt on which interest has ceased since maturity	3,341,087 35
Interest	438,503 24
DEBT BEARING NO INTEREST.	
Demand and legal tender notes.	$356,102,321 00
Fractional currency	39,166,916 08
Certificates of gold deposited	16,582,620 00
Total	$411,851,857 08
Total amount outstanding	$2,418,673,044 43
Total interest	41,457,318 65
Total debt, principal and interest, to date, including interest due and unpaid	$2,460,130,363 08
AMOUNT IN TREASURY.	
Coin	$97,368 577 81
Currency	28,453,290 62
Total	$125,821,868 43
Debt less amount in Treasury	$2,334.308,494 65
Debt less amount in Treasury November 1, 1870	2,341,784,355 85
Decrease of debt during the past month	$7,475,860 90
Decrease of debt since March 1st, 1869	$191,154,765 86

Bonds issued to the Pacific Railroad Companies, interest 6 per cent. payable in lawful money:

	Amount outstanding.	Accrued interest, not yet paid.
Union Pacific	$27,236 512	$680.912 80
Kansas Pacific, late Union Pacific, Eastern division	6,303.000	157,575 00
Sioux City and Pacific	1,628.320	40,708 00
Central Pacific	25,881,000	647,025 00
Central Branch Union Pacific—assignees of Atchison and Pike's Peak	1,600,000	40,000 00
Western Pacific	1,970.000	49,250 00
Totals	$64,618,832	$1,615,470 80
Interest paid by United States		$8,815,345 49
Interest repaid by transportation of mails, etc.		2,417,493 95
Balance of interest paid by United States		6,397,851 54

☞ Track laying on the Chartiers Valley Railway has been completed to within about four miles of Canonsburg. It is confidently expected that the cars will commence running to that point by the 20th of December, or by the 1st of January at farthest.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "§."

American Railroad Journal.

Saturday, December 10, 1870.

☞ CAUTION.—THE PUBLIC ARE CAUTIONED against having transactions with any persons issuing circulars or undertaking to transact business under the name of our firm who are not connected with it.

LOCKWOOD & CO., No. 94 Broadway.

Stock Exchange and Money Market.

Money has been in more general demand for speculative and mercantile purposes and with somewhat less liberal offerings, rates have shown a little more firmness, the range on call having been from 5@7, generally 6@7 per cent.; and on strictly prime to very good commercial credits, at from 7@8⅛ per cent. per annum. There has been some outflow of currency chiefly to Cincinnati and New Orleans, but not of sufficient magnitude thus far to make any very serious impression on the bank reserves. The city banks, on last week's business made a gain of $576,246 in their deposit line; while reporting a loss of $568,900 of legal tender notes, and $1,114,551 of specie. They added $1,655,027 to their loan and discount averages. The U. S. Sub Treasury added half a million to its specie balance, while reducing its currency balance $1,188,193. The President's message and accompanying documents, as published by the daily journals, had little, if any influence on financial or commercial movements.

The specie reserve of the city banks according to the latest return is $17,108,066, against $30,633,539 same time last year. The city bank deposits are now $194,991,319, against $182,690,140 week ending Dec. 4, 1869. The legal tender reserve amounts to $51,257,656, against $45,989,274 same time last year. The circulation now stands at $32,238,388, against $24,140,468 same time last year. The loans are now $266,263,143, against $253,235,996 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $81,952,824 a day, against a daily average of $84,805,289 the preceding week. The current week's exchanges average about 101⅝ millions a day. The city banks, last week, reported a loss of $1,114,551 of specie, with a gain of $576,246 of deposits, and a loss of $568,900 of legal tender notes. They increased their loans $1,655,551; and reduce their circulation, $115,291.

The city bank exchanges on Wednesday were 87 millions.

National Bank notes to the amount of $452,130 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $336,802,798, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $33,086,304 leaving, with the existing 1,612 banks, (having an aggregate capital of $430,299,301,) an actual circulation at this date, of $303,716,494. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $345,567,650; and for the public deposits, $15 834,500—making a total of $361,402,150. The Treasury Department last week redeemed and destroyed $815,215 of worn and mutilated fractional currency, and issued $719,017 of new.

The U. S. Sub-Treasury receipts, week ending with Dec. 3, were $3,216,742 in coin, (including $2,053,000 from customs duties,) and $3,084,408 in currency; payments, $2,759,630 in coin, (including $124,483 of coin interest,) and $4,272,601 in currency; balance at the close of the week, included $60,491,363, of coin, against $60,034,251 the preceding Saturday, and $7,078,812 of currency, against $8,267,005 at the close of the preceding week. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $258,434 in coin, (including $225,046 from customs,) and $314,325 in currency; payments $418,833 of coin (including $364,964 of coin interest), and $445,198, of currency. On Tuesday, receipts, $353,887 in coin (including $284,047 from customs), and $128,448 in currency; payments, $245,835 in coin (including $236,361 of coin interest) and $305,904 of currency. The balance at the close of business on Tuesday included $6,770,483 of currency, and $60,439,016 of coin, against a balance a week

previous of $7,949,167 currency, and $60,296,872 coin.

The aggregate receipts of the U. S. Sub-Treasury in November were $56,296,837, including $9,576,224 from customs; aggregate payments, $62,134,566, including $14,025,558 of coin interest.

The U. S. Sub-Treasurer issued in November $4,741,000 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $1,666,848 of coin certificates, received for customs.

The U. S. Sub-Treasury balance at the close of business on Wednesday was $60,382,535 of coin, and $6,660,594 of currency.

Government revenues have been yielding moderately since our last. The excises during the week yielded about three millions; customs at the port of New York, $1,904,848, and at the outports about $650,000 (in coin) more, making the grand total income for the week equal to about $5,873,362 in currency. The income of the Government, from excises, since July 1, 1870, has been $75,680,904.

The Gold movement has been on a comparatively steady basis, though without remarkable activity. The speculative demand has been fair. The customs call has been light. There has not been much of an export drain reported within the week. The range of the price has been from 110⅝ to 111⅜; and closing quotation on Wednesday was 110¾ against 111 the preceding Wednesday. There has been a livelier borrowing inquiry for Gold, and gold loans have been quoted rather stringent, though closing with renewed ease. On Wednesday, Government sold $1,000,000 of gold at from 110 59@110 65. The aggregate of the bids was $5,229,500. The specie exports on Wednesday were $200,000.

The customs revenue on Wednesday was $350,170. The coin interest disbursements at the Sub-Treasury were $492,462.

Under the December programme of the Treasury Department Government will sell Gold, during the month, as follows: Wednesday, December 14, $1,000,000; Wednesday, December 21, $1,000,000; Wednesday, December 28, $1,000,000. And will buy in, during the month, of Five-Twenties as follows: Thursday, December 15, $1,000,000; Thursday, December 22, $1,000,000; Thursday, December 29, $1,000,000.

The export drain was $519,863 week ending with Dec. 3, against 449,984 week ending with November 26; $655,078 week ending with November 19; $410,134 week ending with Nov. 12; $3,156,924 week ending with Nov. 5; $303,562 week ending Oct. 29; $556,180 week ending Oct. 22; $654,323 week ending with Oct. 15; $802,174 week ending with Oct. 8; and $465,260 week ending with Oct. 1. The shipments thus far this year have been about 56¾ millions, against 30⅜ millions same time in 1869; nearly 69⅛ millions same time in 1868; 45 millions same time in 1867; over 58½ millions same time in 1866; and 27⅜ millions same time in 1865. The exchanges at the Gold Exchange Bank, which were 49¼ millions on Friday, of last week, were 37¼ millions on Monday of this week, 45½ millions on Tuesday, and 27⅛ millions on Wednesday.

The customs demand for Gold last week, averaged $342,166 a day; thus far, this week, it has averaged $254,546, a day, or equal to a weekly aggregate of $1,527,276. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $102,581; and since Jan. 1, 1870, $11,387,557, against $14,876,852 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $132,764,278 against $123,735,833, same time in 1869.

The exports of specie, from this port, last week, were $519,863 against $190,489 same week last year; and since Jan. 1870, $56,738,294, against $30,846,340 same time in 1869. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $124,463; and since Jan. 1, 1870, $83,228,416 against $88,407,134 same time in 1869.

The customs revenue at the port of San Francisco, from Jan. 1 to Nov. 24th, was $7,005,000, against $7,716,000 same time last year.

The specie exports by steamer and railway, from San Francisco, from Jan. 1, 1870 to Nov. 24th, were $31,013,000, against $31,816,000 same time last year.

Foreign exchange has been in slack request and quoted cheaper, on a freer offering of bills. Bankers' sixty day bills on London closed on Wednesday at 108⅝@108⅞; sight bills on London, 109⅛@109¾. The offerings of produce bills have been unusually liberal. The week's exports of domestic produce have been to the currency value of $7,077,229, and since January 1, 1870, $180,168,855, against $185,627,995 same time in 1869.

Government securities have been quoted generally firm as to price, through the week; but the demand has been unusually limited for all issues. The offerings of bonds have been light. The last monthly exhibit of the public debt showed a further liquidation of $7,475,000 in November, making the total reduction in the funded and unfunded debt, since March 4, 1869, $191,154,764.

U. S. sixes of 1881 closed here on Wednesday of the current week at 113¼@113½; U. S. Five-Twenties of 1862, 107⅜@107½; U. S. Five-Twenties of 1864 at 106⅞@107; U. S. Five-Twenties of 1865, 106⅞@107; U. S. Five-twenties of 1865 consolidated, 109¼@109⅜; U. S. Five Twenties of 1867, 109¼@109⅜; U. S. Five-twenties of 1868, 109¾@109⅞; U. S. Ten-forties at 106¼@106⅜; U. S. Six per cent. currency bonds, 110⅜@110⅞.

State bonds have been in fair demand, through the week, and have been quoted generally stronger, though closing irregularly.

Railway bonds have met with a more ready sale for investment purposes at generally buoyant prices. Central Pacific Sixes have been in good request and buoyant in price, closing at 91⅛@91¾. The earnings of the Central Pacific road in November were $761,600, against $535,366 same month last year; and from Jan. 1 to Dec. 1, $7,417,317, against $5,260,882 same time in 1869, showing a gain thus far this year of $2,156,435. The present promise is that the earnings for the whole of the current calendar year will exceed $8,000,000. Chesapeake and Ohio First Mortgage Bonds have been selling at 90 per cent. and interest. Union Pacific Sixes closed at 80½.

Railway and miscellaneous share property has been less active, at depressed and variable prices, closing heavily as a rule, though in Pacific Mail, and Western Union Telegraph the later dealings indicated buoyancy.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 23.	Nov. 30.	Dec. 7.

* Ex-dividend.

General Business has been moderately active in the line of Cotton and Breadstuffs but without notable animation in most other kinds of produce. The tendency of Breadstuffs has been to higher values, under a reduced offering. The cotton market closed more steadily. Middling upland cotton closed on Wednesday at 15⅝@15¾ cts. per lb. The stock of cotton now here is given at about 70,000 bales. The receipts at the port this week, have averaged about 7,500 bales a day. The receipts at all the ports, since Sept. 1, 1870, have been 1,057,989 bales, against 877,850 bales same time in 1869–'70; exports same time 587,900 bales, against 448,400 bales same time in 1869–'70; stock on hand at latest dates, 388,819 bales, against 277,767 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 13,696 pkgs., against 20,046 pkgs., same time in 1869. From Boston, 7,064 pkgs. in 1870, against 6,878 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves have been in moderate request from 8@16c. per lb.; week's receipts, 6,684. Milch cows quiet at $40@$110 each, receipts, 80. Veal calves continue in limited demand at from 5@11½c. per lb.; receipts, 1,457. Sheep have been moderately sought after at from 3½@6¼c.; lambs at 5@7½c. per lb.; receipts, 32,620. Swine have been in more demand at 6⅞@7⅜c. per lb.. all live weight; receipts, 24,527.

Ocean freights have been more active, and rates have been firmer. For Liverpool we quote flour at 2s. 6d.@2s. 9d. by sail, and 3s. by steamer per bbl.; grain at 7¾d. by sail, and 8¼d. by steamer per bushel; cotton at 5/16@⅜d. by sail and 9/16d. by steamer per lb.; and heavy goods 20s.@30s. by sail, and 30s.@50s. by steamer, per ton. Total number of vessels in port on Wednesday, 520.

The following will show the exports (exclusive of specie) from New York to foreign ports or the week ending December 6th, and since the beginning of the year:

	1869.	1870.
For the week	$4 413,422	$7,077,229
Previously reported	181,214,573	173 091,626
Since Jan. 1	$185,627,995	$180,168,855

The imports for the week ending Dec. 8, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,287,657	$1,788,120
Gen. merchandise	4,233,8 2	4,159,559
Total for the week	$5,521,529	$5,947,679
Previously reported	268,445,761	276,161,015
Since January 1	$273,967,290	$282,108,694

Foreign Goods have been moderately dealt in at less buoyant prices. The dry goods entries at this port, last week, were $1,788,120, making with the general merchandise imports a total of $5,947,679, against $5,899,787 the preceding week.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

☞ FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,

No. 5 NASSAU ST.,
NEW YORK, Dec. 6, 1870.

FUNDING FIVE TWENTY BONDS.

Within the past three months a very large amount of Five-Twenty Bonds have been funded through our office into the FIRST MORTGAGE BONDS of the CENTRAL PACIFIC RAILROAD COMPANY, besides large sales of the same securities for new investments.

We deal in Central Pacific Bonds the same as in Government Securities, and regard them as affording the desired medium for funding Five-Twenty Bonds, *without reduction of interest and with unimpaired security.*

They are all Coupon Bonds of $1,000 each, interest payable Jan. 1 and July 1.

☞ *They are well known, and have a ready market in all the money centres in this country and Europe, are daily quoted at the Stock Exchange, and can be sold at current market price as readily as the Bonds of the Government.*

The EARNINGS of the Road for 1870 will reach *Eight Million Dollars*, and the increase is shown in the following figures:

Earnings from Jan. 1 to Dec. 1, 1870...	$7,417,317
Earnings from Jan. 1 to Dec. 1, 1869...	5,260,882
Increase	$2,156,435

We keep a supply of these Securities on hand, and furnish them at current market price, which to-day is 91½.

This price includes the coupon due Jan. 1, for which three per cent. in gold will be received by the purchaser, on bonds bought during this month.

Proceeds of $1,000 5-20 bond of 1867, sold to-day at 109¼	$1,092 50
Cost of $1,000 Central Pacific bond, to-day at 91½	912 50
Difference realized	$180 00

We continue, as heretofore, to buy and sell Government Bonds, make Collections, receive deposits subject to check at sight without notice, and allow interest on balances, and do a general Banking business.

FISK & HATCH.

☞ LOUISVILLE AND NASHVILLE SEVEN PER CENT. CONSOLIDATED MORTGAGE BONDS.—The small amount left of the last issue of these bonds will be sold at 90 and accrued interest. Parties desiring an *entirely safe* investment are invited to call for information on either of the undersigned.

☞ The Connecticut Western road is now nearly ready for laying track between Collinsville and Hartford. By the 1st of July, 1871, the entire road will be in running order. At this time over $1,400,000 have been expended on the road, all of which has been received from the stockholders.

Journal of Railroad Law.

RAILROAD COMPANIES—CARE TO BE SHOWN INVALIDS—WHEN DUTY IS DISCHARGED—EXPOSURE TO PERSONAL DANGER.

The facts in the late case of The Pittsburg and Connellsville Railroad Company *vs.* McClurg, (56 Penna., 294,) are fully and clearly stated in the following opinion by

THOMPSON, C. J.—The plaintiff below, as we learn from the very brief history of the case by the plaintiff in error, no portion of the testimony being given, was injured while a passenger in the cars of defendant, by reason of the protrusion of his elbow beyond the sill of the car window next to which he sat during the journey, or part of it, coming in contact with a car standing on a switch on the defendant's road. The plaintiff had a verdict on the ground of negligence on the part of the company, as we are informed, in carrying the plaintiff, by reason of which he was hurt, but in what the negligence consisted it is not easy to say, as neither the *narr.* nor its substance is given. Was it for negligence in constructing the switch? Or was it because the defendant had not barricaded its car windows? We do not know: but still, perhaps we may be able to discuss the only point of importance presented, without knowing this.

Assuming the fact, or claiming that negligence on part of the company in performing their duty towards the plaintiff in carrying him had been proved, his counsel prayed the Court below to charge as follows:—

"A passenger on a railway car who has unconsciously suffered his elbow to slip beyond the window sill is not necessarily guilty of negligence: N. J. Railroad Co. *vs.* Kennard, 9 Harris, 203."

This learned Judge unqualifiedly affirmed, doubtless on the authority of the case referred to in the point. He did right in following the precedent cited; even if wrong he was bound to do so. If, therefore, there was error in the instruction, it was not his fault.

That unconsciousness, arising from insensibility, the result of disease or injury, might qualify what would otherwise be negligence, may be conceded, but that would arise from the difference in the degree of care required on part of the carrier. If a passenger was known to be afflicted with epileptic fits, or was entirely insane, it would be reasonable to require of the carrier more care and attention than in the case of ordinary passengers: but then the carrier must know the condition of the passenger, and that extra care and control were necessary, and his duty. This, however, we need not discuss, for nothing like this existed in this case. We must regard the remark "unconsciously suffering his elbow to slip out beyond the window sill," to mean inattentively. In that sense it was negligently suffered to slip. Of course, this was negligence *in se*, unless he was under no obligation to take care of himself. But no case asserts that, and every case the contrary. Out of the omission to do so springs the doctrine of contributory negligence, which defeats a plaintiff, and which is so firmly established as a principle of law that nobody dreams of doubting it. We have the case, then, broadly, I think, that negligence is not to be inferred, when injury accrues from an exposure of an elbow or an arm out of a car window, while the train is moving, if it be not willfully done.

This cannot be maintained on any reasonable principle, we think. When a passenger on a railroad purchases his ticket it entitles him to a seat in the cars. In the seat no part of his body is exposed to obstacles outside of the cars. He is secure there, ordinarily from any contact with them. When he is thus provided with a seat, safe and secure in the absence of accident to the train, and the carrier has a safe and convenient car, well conducted and skillfully managed, his duty is performed towards the passenger. The duty of the latter on entering arises, namely, that he will conform to all the reasonable rules and regulations of the company, for occupying, using and leaving the cars; and after doing so, if injury befall him by the negligence of the carriers, they must answer: if he do not so conform, but is guilty of negligence therein, and is injured; although there may be negligence on the part of the carriers, their servants and agents, he cannot recover: Sullivan *vs.* Read, Railroad Co., 6 Casey, 234: The Penna. Railroad Co. *vs.* Zebe and wife, 9 id., 318, and other authorities. In the latter case we said what is quite apposite to this: "We hold on these principles, that the company's liability could not be fixed for the injury consequent on a choice of the passenger in disregard of the provisions made by it for his safety. It was we think, error in the Court, to submit the question of the right of the parties to leave the cars at either side to the jury in the absence of proof or justifying necessity for so doing. It was not negligence on the part of the company, that they did not by force of barriers prevent the parties from leaving at the wrong side. People are not to be treated as cattle; they are to be presumed to act reasonably in all given contingencies and the company had no reason to expect anything else in this case."

Here the duty of care on the part of the passenger is asserted: and it was a case in which two passengers, the plaintiff and son instead of leaving the cars by the platform on the station, left on the opposite side, and the son was killed by a passenger train on the other track. We held that this was negligence *in se* on part of the passengers, and, in the absence of circumstances justifying the exit on that side of the car, the Court erred in not charging that it was negligence in law. The authority of this case has not been shaken in this particular. We have repeatedly held that it is the duty of Courts in cases of clear negligence, arising from an obvious disregard of duty and safety, to determine it as a question of law: 2 P. F. Smith, 282. 11 Casey, 71: 9 id., 318. Numerous other authorities might be cited for this. Where the inference from the facts is necessarily that there is negligence, the Court ought to determine the negligence as a matter of law. Of course the assertion of the principle in this way presupposes no answer to the facts, so as to rebut the inference to be drawn, and implies that this may be done in all cases, if there be facts to that effect.

A passenger, on entering a railroad car, is to be presumed to know the use of a seat, and the use of a window: that the former is to sit in, and the latter is to admit light and air. Each has its separate use. The seat he may occupy in any

way most comfortable to himself. The window he has a right to enjoy—but not to occupy. Its use is for the benefit of all, not for the comfort alone of him who has by accident got nearest to it. If, therefore, he sits with his elbow in it, he does so without authority; and if he allows it to protrude out and is injured, is this due care on his part? He was not put there by the carrier, nor invited to go there; nor misled in regard to the fact that it is part of his seat, nor that its purposes were not exclusively to admit light and air for the benefit of all. His position is, therefore, without authority. His negligence consists in putting his limbs where they ought not to be, and liable to be broken without his ability to know whether there is danger or not approaching. In a case, therefore, where the injury stands confessed, or is proved to have resulted from the position voluntarily or thoughtlessly taken, in a window, by contact with outside obstacles or forces, it cannot be otherwise characterized than as negligence, and so to be pronounced by the Court. This is undoubtedly the rule in Massachusetts: Todd *vs.* The Old Colony Railroad Co., 30 Allen, 21, and again in 7 Allen, 207. In that case the point was distinctly presented whether it was negligence to ride with an arm or an elbow out of a car window, and was declared that it should have been so ruled by the Court instead of referred to the jury: and the Court below was reversed for not so ruling. (See opinion C. J. Bigelow in the last case.) So in substance is Holbrook *vs.* The Utica and Sch. Railroad Co., 236. It is true, the judge below having given a very decided opinion on the fact of negligence in sitting with an elbow on the window, and that it was negligence, the Court of Errors and Appeals refused to interfere: but Ruggles J., indicated his opinion to be in favor of the doctrine. We held, in North Penna. Railroad Co. *vs.* Heilman, 13 Wright, 60, that a failure of a traveller, when crossing a railroad track, to look out for passing trains, is negligence in law, and so to be pronounced. This was fully in accord with what we had repeatedly held, that "what in a given state of facts constitutes negligence, is generally a question of law:" per Woodward C. J. in Catawissa Railroad Co. *vs.* Armstrong, 2 P. F. Smith, 286: and in Penna. Railroad Co. *vs.* Ogier, 11 Casey, 71, we said "there may undoubtedly be cases in which only the facts proved may present so clearly and incontestably features of negligence in regard to the specific ground of complaint, that it may become the duty of the Courts to pronounce it such as matter of law." There are many cases in other States in support of this rule.

In the absence of some justifying necessity or incapacity to take care of himself on part of the passenger, no one can doubt, I think, from the reason of the thing, in view of the nature of the vehicle used, being a railroad car, that to extend an arm or a hand beyond the window sill is dangerous, and is recklessness or negligence. Whenever the facts present such a case singly and without any controlling or justifying necessity, we think the Court ought to declare the act negligence; and as there was nothing like this shown in the case before us, we think the Court ought not to have affirmed the plaintiff's point. Unconsciously exposing himself did not help the plaintiff's case, as it was not shown that this unconsciousness was not the result of a want of prudent attention to his situation on part of the plaintiff. It would be a novel answer to the allegation of negligence, to allege that the plaintiff had slept in the position he was in when hurt: and that would be a condition of unconsciousness. Sleeping when due care would require one to be awake, or in dangerous circumstances, is negligence, and no answer to the company can be given to such act. Of course these views are predicated of a case in which there are no facts to qualify or justify the act. It is possible that a state of facts might be found to show an exception to the rule, and where that occurs the rule ceases. But none such appear as this case is presented.

It must be admitted that the case of New Jersey Railroad Co. *vs.* Kennard, 9 Harris, 203, announces a different rule. There the plaintiff's elbow came in contact with a post or upright of a bridge. The case was not put upon the ground that there was negligence on the part of the company in constructing the bridge, but upon the ground that the company were negligent in not placing barriers around the window to prevent passengers from exposing their limbs outside. The learned Judge, Gibson, C. J. instructed the jury that a car which was not so provided was not, to use his peculiar expression, "roadworthy." Predicated of this idea, he held that passengers had a right to ride as they pleased, and to sit with elbows on the window sills and beyond if they chose. In fact, he seems to have required no duty of care on part of the passenger in this particular; for, had he, it seems to me he would, even on his own theory of the duty of the company to barricade the windows, have come to the conclusion, if the want of it was negligence it was also negligence on part of the passenger not to take greater care on account of the want of the precaution, and that would have been contributory negligence, which would have prevented the plaintiff from recovering.

The case was affirmed in a *per curiam* opinion, for the reasons given by the learned judge below, but with a reservation of approval of that which was really the ground on which the case was put. "The language of the learned Judge," says the opinion, "who presided at the trial seems to be too broad as a general principal, where he says that no car is good if the windows are not so constructed as to prevent the passengers from putting their limbs through them. But in its application to a road which in places is so narrow as to endanger projecting limbs, the instruction is proper."

It is not unjust to this *per curiam* to say that it repudiated the main ground on which the case was put in the Court below, and affirmed it on a principal not in the case at all, namely, the narrowness of the passage-way under the bridge. The bridge was not built by the railroad company. As it was over a canal, it was probably built by the canal company. The passage-way was wide enough for the cars to pass conveniently, but that is nothing to the purpose: the narrowness of the passage-way was not the ground of the recovery. The report of the case says the "whole question was whether the defendants were obliged to construct their cars with slats, bars, wire gauze or other barricades, so that a passenger could not put his arms out of the windows? If the defendants did not do so, whether they are liable? It is evident the case was very little considered, and, in the presence of authorities cited, ought not now to be regarded as the law. It is very remarkable that it should have been said in the opinion, that the doctrine of barricades about the car windows was too broad, as a general principle, but just in its application where the passage-way was so narrow as to endanger projecting limbs. This was a limitation of the principle impracticable in practice. The windows would necessarily be the same on the entire road, if made to suit any particular portion of it. In this again is shown that it was not a case which had been considered much.

In conclusion, we have simply to reassert, that where a traveller puts his elbow or an arm out of a car window, voluntarily, without any qualifying circumstances impelling him to it must be regarded as negligence *in se* and when that is the state of the evidence it is the duty of the Court to declare the act negligence in law.

We think the Court erred in answering the plaintiff's point in the affirmative, and the defendants' in the negative, and for these reasons the judgment must be reversed.

Judgment reversed, and a *venire de novo* awarded.

Union Pacific Railroad.

There appears to be a very needless panic in the Union Pacific securities, which started on account of a rumor from Washington that the Secretary of the Treasury will refuse to pay the one-half earnings for Government transportation. No communication of the kind has been received by the Company from Mr. Boutwell. The amended act of Congress, passed in 1864, is very explicit upon the subject. Sect. 5 declares that "only one half of the compensation for services rendered for the Government by said Companies shall be required to be applied to the payment of the Bonds issued by the Government in aid of the construction of said roads." The amount, however, is not a matter of vital interest to the road, although at present, while its earnings are small compared with its future prospects, it is a convenience to the Company. The whole amount of earnings on freight and mails for Government for the year ending July, 1870, was $657,945 36, and the half received $328,972 68. The community may feel no sort of apprehension that there will be a failure on the part of the corporation to pay the interest on all its Bonds.—*Boston Journal.*

☞ The Pine Bluff (Ark.) *Republican* says that six hundred men are pushing the work on the Little Rock, Pine Bluff and New Orleans Railroad from the Mississippi toward Pine Bluff, while the three sections of ten miles each, extending from Pine Bluff are already let to enterprising contractors, who will shortly begin work on that end of the line, and the two working parties will meet about thirty miles from town. Forty-five miles of this road are graded, thirty miles of ties are laid, three miles of track are down, and twelve miles of iron are landed.

☞ The following gentlemen have been elected directors of the Parkersburg Branch Railroad Company: Johns Hopkins, Wm. McKim, Thomas Swann, John W. Garrett, Albert Schumacher, Galloway Cheston, Columbus O'Donnell, Wm. Keyser and Charles M. Keyser of Baltimore, and P. G. Van Winkle and J. N. Camden, of Parkersburg. Wm. Keyser, Esq., was elected President *vice* P. G. Van Winkle who declined a re-election.

Chesapeake and Ohio Railroad.

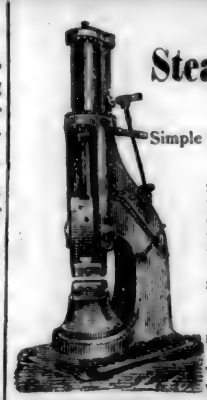
At the third annual meeting of the stockholders of this company, held at the Exchange Hotel, Richmond, Va., on the 24th ult., the following gentlemen were unanimously elected directors for the ensuing year: C. P. Huntington, of New York; A. A. Low, of New York; W. H. Aspinwall, of New York; Pliny Fisk, of Pennsylvania; Richard Irvin, of New York; Jonas B. Clark, of New York; Wm. B. Hatch, of New York; H. C. Parsons, of West Virginia; John Echols, of Virginia; Wm. C. Wickham, of Virginia; Jos. R. Anderson, of Virginia. The Committee to whom was referred the report of the President and directors of the Chesapeake and Ohio Railroad Company, and the accompanying documents, made the following report:

That they have examined the report and find in it the most gratifying assurance of the prosperous condition of the road. The receipts have steadily increased, notwithstanding the unfavorable seasons for agriculture and the suspension of operations occasioned by the destruction of bridges and other injuries to the road by the extraordinary freshet. More than eighteen miles of the road between Richmond and Staunton have been relaid with new rails of the most approved pattern and in the best manner. Many thousands of new ties have been substituted for those that were decayed, and a large quantity of ballasting has been done. In regard to the portion of the work extending from Millboro' to the Ohio River, the report furnishes the most substantial grounds for the belief that the present temporary tracks between Millboro' and the White Sulphur will, within two years, be replaced by a new and permanent line of railway, and that within the same period the entire line from Richmond to the Ohio River will be finished and in actual operation.

The Committee, therefore, cordially congratulate the stockholders on the flattering prospects of the road, and concur with the President in the opinion that "the Chesapeake and Ohio Railroad will, at no distant day, assume a position second to none of the great lines leading westward from the Atlantic coast."

They therefore recommend the adoption by the stockholders of the following resolution:

Resolved, That the stockholders of the Chesapeake and Ohio Railroad Company, in general meeting assembled, do approve and adopt the report of the President of the Company, and also the reports of subordinate officers thereto appended.



The report and resolution of the Committee were unanimously adopted by the meeting.

Locomotive Building—Extensive Establishment.

The locomotive works of M. Baird & Co., North Broad street, are the largest in this country, or perhaps in the world. 1,900 men are now employed in the various shops which occupy the space from Willow street to near Spring Garden, and from Broad to Fifteenth streets. Rather more than one locomotive is completed and sent out for every working day in the year, to supply the wants of railroads in every part of the United States and portions of Europe. Three locomotives, one nearly completed, are intended for the Don Pedro Railroad, in Brazil. Each of them weighs 90,000 pounds, being the heaviest locomotives yet constructed. They are to be used as freight engines, and on a road with heavy mountain grades. This firm are also constructing small mining locomotives, that weigh bit 14,000 pounds, and are to be used in place of mule power, in hauling coal from the head of mines. They are five feet high and five feet broad.—*Philadelphia Ledger.*

FERRIS & MILES,
Steam Hammers & Machine Tools,
24th and Wood Sts., PHILADELPHIA.
THE STEAM HAMMER AS IT SHOULD BE!
Simple in Construction—Powerful in Action—Convenient in Handling—Moderate in Price!

These Hammers have our Patent Skew Ram, which secures the most extensive die surface, and our patent valve gear; by which is accomplished, with the most perfect adjustment, either the heavy dead blow for drawing down work, or the light, quick blow for finishing, AND THIS WITH ONLY TWO MOVING PIECES—NOTHING TO GET OUT OF ORDER.
All sizes, from 100 lbs. upward, with single or double frames.

ENGINE LATHES,
extra strong and heavy, capable of doing the heaviest and most accurate work.
Also, our PATENT SCREW CUTTING LATHES, which will do either general turning or screw cutting, without change of gear-wheels.

NEW YORK
Belting and Packing Co.,
MANUFACTURERS OF
VULCANIZED RUBBER FABRICS,
Adapted to Mechanical Purposes.
Patent Smooth Belting, (Patented Nov. 22, 1859,) vulcanized between layers of a patent metallic alloy, by which the stretch is entirely taken out, the surface made perfectly smooth, and the substance thoroughly and evenly vulcanized. This is the only process that will make reliable Rubber Belting.
Hose never needs oiling, and warranted to stand any required pressure.
Steam Packing in every variety, and warranted to stand 300 degrees of heat.
Solid Emery Vulcanite.—Wheels made of this are solid, and resemble stone or iron; will wear out hundreds of the ordinary wheels.
Car Springs of the best quality *only.*

NOTICE TO THE PUBLIC.

EXECUTIVE DEPARTMENT,
ATLANTA, GA., October 26th, 1870.

To Whom it May Concern:

By an Act of the General Assembly of the State of Georgia, approved October 24, 1870, authority is given to the Governor to lease the Western and Atlantic Railroad, the property of the State, together with all of its houses, workshops, depots, rolling stock and appurtenances of every character, for the term of twenty years, upon certain terms, and subject to certain restrictions therein named, to-wit:

The monthly rental shall not be less than twenty-five thousand dollars ($25,000) payable monthly. The lessees shall give a bond for the sum of eight millions of dollars ($8,000,000) to securing the prompt payment of the amount of rental agreed upon, and for the return of the road and its appurtenances at the expiration of the lease, or on the termination or forfeiture thereof, in as good condition as at the time of leasing, five millions ($5,000,000) of which security shall be within this State and the balance, if out of the State, shall be upon real estate or railroad property. The lessees to be worth over and above their indebtedness, at least five hundred thousand dollars ($500,000.)

The Legislature reserves to itself the right, from time to time, to examine into the affairs of the lessees, and to require that the amount of security above recited shall be maintained unimpaired.

The lessees shall not be less than seven in number, a majority of whom shall have been for five years *bona fide* residents of this State, and shall represent a majority of the whole interest in the lease. No railroad or express company, or any combination of them, shall, in any event, become the lessees, but they may become sureties on the bonds of the lessees. The lessees shall not charge a higher rate for local freights over said road than the average rate charged by the Georgia Railroad and Banking Company, the Central Railroad and Banking Company, and the Macon and Western Railroad Company, for like local freights over said roads, and the said lessees shall have the same rights, exemptions, privileges, immunities and guarantees, except the establishment of banks, and shall be subject to the same liabilities, disabilities, and public burdens of said railroad companies last mentioned. The faith of the State is pledged to redeem all mortgage bonds and coupons now resting on the State Road as they fall due, and to save the lessees harmless against all such bonds and coupons.

The lessees are by this act constituted a body corporate and politic for the term of twenty years, under the name and style of the Western and Atlantic Railroad Company, having such powers, liabilities and immunities, as are usual with railroad companies, and not in conflict with the Constitution and Laws of the United States, or of the State of Georgia; but they will not be allowed to make or permit any discrimination in favor of or against any other road or persons having business connections with the said Western and Atlantic Railroad.

For the purpose of carrying out this act, proposals will be received until and including the 25th day of December next and must be addressed "to the Governor of the State of Georgia, at Atlanta," and marked on the wrapper, "Proposals for the lease of the Western and Atlantic Railroad, in accordance with an Act approved October 24, 1870." The proposals must state in full the names and residence of the parties uniting to make proposition, the amount that each of the parties therein named are worth over and above their debts and liabilities, together with a full description of the character of the security which will be offered to complete the bond.

The property to be leased is a single track railroad, one hundred and thirty-eight miles in length, with full and complete equipment of shops, depots, turnouts, sidelings, engines, cars, etc., etc, etc., now in successful operation between the cities of Atlanta, in Georgia, and Chattanooga, in Tennessee. At Chattanooga the line is in direct rail connection with the Memphis and Charleston, Nashville and Chattanooga, Chattanooga and New Orleans, East Tennessee and Georgia, and the Chattanooga and Cincinnati, (now in progress of construction,) railroads, and at Atlanta with the Atlanta and Montgomery, Atlanta and Charleston, Atlanta and Savannah, and the Atlanta and Gulf lines of road, being the only railroad connection between the system of railways centering at Chattanooga and at Atlanta.

Copies of "An Act to authorize the lease of the Western and Atlantic Railroad, and for other purposes therein mentioned," approved October 24th, 1870, can be had upon application at the Executive office.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY
VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.
COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

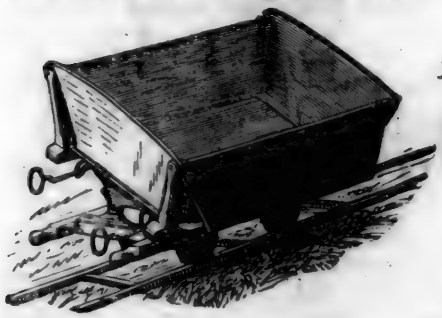
Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.



That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Lowthorp on the Use of Cast and Wrought Iron in Bridge Construction.

BY THOMAS C. CLARKE.

In the AMERICAN RAILROAD JOURNAL for October 22d and 29th, is a paper stated to have been read before the American Society of Civil Engineers by F. C. Lowthorp, a member of the Society and builder of iron bridges.

Whatever prestige this paper may derive from the fact of its having been read before a learned body, its author is welcome to. But when it was read, there was no time for discussion; and had it been published by the Society in the usual course of its papers, we should have combatted its deductions and opinions before the Society, in the usual way.

But as Mr. Lowthorp has seen fit to publish it himself, without waiting for the action of the Society, he has made it public property, and we feel no delicacy in criticising it in the public press, and pointing out wherein we think his recommendations would lead to a dangerous style of construction.

This paper is made up, according to its author, of "facts and observations." The "facts" consist in giving a list of iron bridges built by him, in which the upper chords and posts were made of cast iron. The "observations" are mainly to the effect that because these bridges have successfully borne the traffic of the railways for a number of years, therefore cast iron is better than wrought for the compressive members of a bridge truss.

But there are many cast iron bridges that have done the same thing, and there are some wrought iron bridges that have utterly failed. The natural inference is that the former were well proportioned and the latter not. The success of Mr. Lowthorp's bridges does not prove anything as to the value of the two materials.

If moreover it can be shown that some of his bridges are strained beyond what the best practice of the engineering profession has fixed as the limit of safety, this merely shows that Mr. Lowthorp has more hardihood than most of his professional brethren. It certainly does not prove that the practice is safe.

Mr. Lowthorp quotes various authorities to show that the power of cast iron to resist compression much exceeds that of wrought iron. Everybody knows that this is true; but there is another fact to be taken into account, and that is that a compressive force acting along the axis of a column will produce a tensile strain at right angles to it. In other words, if the length of the column exceeds a certain ratio of the diameter, it will first bend and then break, as it would do if laid horizontally and loaded with a weight in the centre. All of Mr. Lowthorp's columns are long enough to come under this law.

Mr. Lowthorp quotes Hodgkinson, whose experiments are our sole authority upon the strength of cast iron struts. From these experiments Hodgkinson derived a formula which is the best means we have of ascertaining the strength of any cast iron column. By this formula, a hollow cylindrical cast iron column whose length does not exceed 14 or 15 diameters, which is about the proportion of Mr. Lowthorp's upper chords, will bear before failing, about 50,000 lbs. per sq. inch. The factor of safety as usually taken by engineers, is from one-fifth to one-seventh of the ultimate strength. Mr. Lowthorp admits that in one instance he has subjected his cast upper chords to a strain of 19,000 lbs. per sq. inch, and wishes us to believe, on his sole authority, that the elasticity of the metal is not impaired.

It is evident that Mr. Lowthorp has not followed the excellent advice of Mr. Whipple, quoted by himself. "It is necessary to take into account the length and diameter, as well as the area of cross section, in order to determine the amount of negative (compressive) strain which a piece of cast iron, or any other material may be relied upon to sustain."

We have thus shown that the value of a cast iron column depends upon its tensile as well as its compressive strength. Now we do not mean to say that it is not possible to procure cast iron of a high tensile strength; for the Government specification for artillery requires cast iron of a tensile strength of over 30,000 lbs. per sq. inch, which is more than double that of ordinary cast iron.

But such iron is obtained by a special process of re-melting several times and "boiling," that is keeping it in a state of fusion for several hours in an air furnace, in which the fuel is burnt on a separate grate, and only the natural draft employed.

Neither Mr. Lowthorp nor any other bridge builder ever puts such cast iron as this into their chords and columns, for the simple reason that it would cost more than wrought iron. Moreover, although its tensile strength is so great, it is by no means a tough iron; it is hard and brittle, and would not make as strong a column as would wrought iron of the same tensile strength.

As there is a greater range in the quality of cast irons than of wrought, the chances are greater that the owners of a bridge, which admitted cast iron in the chords and columns, would pay the price of a good material for a poor one, than if they insisted on the use of wrought iron only.

It is not only more difficult to detect an inferior quality of material in cast iron than in wrought, but it is almost impossible to detect flaws, honeycombs, etc., in column castings, and very difficult to ascertain whether the core has remained truly centred.

The main difference between the two kinds of material is this: in wrought iron the very pro-

cess of manufacture eliminates flaws; in cast iron it conceals them. Wrought iron moreover gives warning before it begins to fail, under compression at least, while cast iron snaps like glass.

The greater elasticity of cast iron under a compressive strain, has the effect of causing greater deflection in a bridge built with cast iron chords than in one which has them of wrought iron. And here we prefer the authority of Edwin Clark to that of Mr. Lowthorp.

E. Clark in his work on the Brittania and Conway bridges, shows as the result of experiments (see p. 305 to 320) that cast iron under equal loads per sq. inch with wrought iron, compresses twice as much, and that while cast iron takes a sett even under the first ton, wrought iron does not do so until about 10 tons per sq. inch are put on it; and he farther shows that in all cases cast iron breaks under the ultimate strain, while wrought iron bends, and still remains useful.

But we may be asked, "would you condemn the use of cast iron altogether in bridge construction?" Certainly not, if used *legitimately*, that is to say in circumstances where *there can be neither tensile nor cross strain upon it.* Here it is as safe and as fit to be used as in the case of car-wheels, quoted by Mr. Lowthorp. Any other view would exclude its use in bed-plates, washers, and in those pieces used for connecting parts of wrought iron together, which are subject to compressive strain only.

No one in their senses would allow of the use of cast iron in the floor beams of a bridge; but very few consider that the upper chords and posts are subject to a precisely similar strain, and yield, when they do, in the same manner as a beam placed horizontally and loaded in the centre. Hence we say, that the use of cast iron, for the upper chords and posts of bridges is as dangerous as it would be to use it for floor beams.

And the fact that Mr. Lowthorp's bridges are still standing—(and we hope they will stand for many a day, along with the Quincy bridge, and other bridges where upper chords are of cast iron,)—does not reconcile us to what we always have considered and shall consider the improper use of cast iron.

Little Miami and Columbus and Xenia Railroads.

Since December 1, 1853, and to November 30, 1868, the L. M. and the C. and X. companies were united in partnership. In January, 1865, the joint companies leased the Dayton and Western R. R., and in February of the same year purchased the Dayton, Xenia and Belpre R. R. This connection was dissolved December 1, 1868, and from that date the L. M. company took a 99 years' lease of the C. and X. and of all the interest of that company in the D., X. and B. and the D. and W. railroads, agreeing to pay all partnership and other debts of the leased roads, except the principal of the bonds of the C. and X. company, and to pay the last named company a sufficient sum to yield 7 per cent. on its capital stock free of taxes, etc. In December last a further change was effected. The L. M. company then leased their property and rights in perpetuity to the Pittsburg, Cincinnati and St. Louis company, the lease being guaranteed by the Pennsylvania company, at an annual rental of $480,000, free of tax, etc. This rental is equivalent to 8 per cent. on $6,000,000, and to that amount the stock of the L. M., including that of the C. and X. company, has been increased. By this arrangement a through line of 668 miles under a consolidated administration has been established between Philadelphia and Cincinnati with several converging branches of no little importance. The report of the L. M. and Col. and X. railroads for the year ending Nov. 30, 1869, recently issued, will be the last separate statement for that line, and hence, though late after date, we transfer to our columns the main facts of the statements made therein.

The following statement compares the earnings of the fiscal years 1867-'68 and 1868-'69:

	1867-'68.	1868-'69.
Passengers	$708,923 33	$694,631 55
Freight	812,054 69	848,247 45
Expresses and mails	120,193 06	115,331 42
Rents of depots	3,304 50	3,109 81
Mileage of engines & cars	23,723 99	32,014 20
D. & W. R.R. earn'gs.	94,593 56	96,018 75
Interest on investments, &c	64,353 51	43,642 00
	$1,837,146 64	$1,832,995 18

The working expenses in the same years were as follows:

Transportation	$504,597 74	$525,133 89
Cars	120,677 42	111,451 66
Locomotives	95,068 91	69,933 31
Roads	288,452 80	228,909 42
General	63,655 38	58,220 30
Loss and damage	24,647 96	15,846 42
D. & W. R. R. exp.	86,123 38	65,266 02
	$1,183,223 59	$1,073,761 02
Net Earnings	$653,923 05	$759,284 16

From which deduct—

Interest and rents	$126,813 92	
Taxes	83,754 50	
D. and W. R. R. interest and taxes	58,255 26	
Dividend No. 47 May, 1869	131,614 74	
" No. 48 Nov., 1869	131,614 74	
Lease, &c., C. and X. R.R.	100,664 44	
		532,717 60
Leaving undivided surplus		$126,516 56
L. M. surplus, Nov. 30, 1868	$290,480 89	
L. M. and C. and X. surplus, Nov. 30, 1868	565,478 64	
		855,959 53
Total surplus		$982,476 09
Transferred to C. and X. Co. on execut'n of lease	$45,523 76	
Charged to profit and loss	341,760 74	
		387,284 50
Surplus Nov. 30, 1869		$595,191 59

The following is the chief substance of the Director's Report:

Since your last annual meeting many important changes have taken place in the railroad system of the country, changes involving in many particulars, the immediate interests of this Company.

The consolidation of the lines of road between Buffalo and Chicago became the subject matter of serious consideration. So long as the companies owning the roads between Cleveland and Buffalo had no interests west of Cleveland, this company had no reason to doubt that by continuing the policy which it had always pursued toward those companies in connection with the Cleveland and Columbus company, the relations heretofore existing would continue, and our road would continue to be used by them as their line to Cincinnati, the South and Southwest, but when their interest became identified with the roads west of Cleveland, it was not difficult to foresee that a state of things might arise in which their interests might be adverse to those of this company, and in which this company, without a large expenditure of money, would be powerless for its own protection. Shortly after this consolidation, and before the combined companies had given any evidence of what might be expected in the future, the Pittsburgh, Cincinnati and St. Louis company, the immediate ally and representative of the Pennsylvania company, became the owner by purchase of the Cincinnati and Zanesville road, with arrangements already made for the extension of the latter road from Zanesville to Dresden, there connecting with its own line of road, thus bringing the road of that company within thirty-six miles of the City of Cincinnati. To wait for the completion of the road between Zanesville and Dresden, was in the opinion of your Board of Directors, but to wait until the alternative was presented of giving to the Pittsburgh, Cincinnati and St. Louis company an unrestricted right to use your road between Morrow and Cincinnati, or the building of an independent road between Morrow and Cincinnati.

The Baltimore and Ohio company had already obtained the control of the Cincinnati and Marietta road, and adopted that as their Cincinnati connection. The Erie company had, in like manner, such control as it desired over the Hamilton and Dayton road, and had its independent Cincinnati connection.

Under these circumstances it became a serious question for those in charge of your property and interests to determine what was proper, best and wise for them to do, and giving to the subject that consideration its importance demanded, they could not doubt that their true line of duty led to an alliance of some kind with the Pennsylvania interests, and thus impressed, interviews and negotiations followed, which have resulted in a lease of your road to the Pittsburgh, Cincinnati and St. Louis company.

Without going into the details of the lease, its general provisions may be stated as follows:

It is perpetual in its terms and provisions.

It includes the Little Miami road, and all roads and other property, by the Little Miami company owned or operated under leases from other companies.

It takes effect as of the first day of December, 1869, and vests in the lessee in addition to the leased property, all the property of every kind and description owned by this company on that day.

It provides that the capital stock of this company may be increased so that the aggregate capital stock of this and the C. and X. companies will be $6,000,000,—and that the rental to be paid shall be equal to eight per cent. on that amount of capital, or $480,000 per annum, payable in quarterly instalments at the office of this company in this city; that such rental shall be free from all taxes, State and National; that the lessee will pay all taxes upon the property, leased, assigned or conveyed; will assume and pay all debts, obligations and liabilities of every kind and description against this company, accrued or accruing, on the day on which the lease is to take effect.

It contains all the provisions deemed necessary to the full and perfect protection of this company, and the property leased.

The performance of the terms and covenants of the lease by the lessee is guaranteed by the Pennsylvania Railroad company.

The lengths of the roads owned and leased by the L. M. Co. are described as follows:

	Line.	2d track.	Sidings.	Total.
L. M. R. R.	82.50	26.30	18.61	127.41
C. and X. R.R.	54.50	—	12.74	67.24
D. and X. R.R.	15.25	—	1.50	16.75
Total	152.25	26.30	32.85	211.40
D. and W. R.R.	42.00	—	3.20	45.20

The L. M. company own 47 locomotives of

which 15 are for passenger and 82 for freight service. The number of passenger cars owned is 85, of baggage, mail and express, 20, and of freight cars, 714. Of the freight cars 438 are box, 140 stock, 35 low rack, 20 coal, 67 flat and 14 caboose cars. Thirty-six of the above are in the White Line and forty in the South Shore Line.

Passenger trains run 521,562, freight 319,868, wood and construction 41,173 and other 139,732, or a total of 1,021,335 miles. Passenger cars run 2,691,657 and freight cars, 6,778,631 miles—total, 9,470,288 miles.

The total number of passengers carried exclusive of commuters (115,008) was 455,370, of which 126,374 were through and 328,996 local. The freight movement was 465,887 tons, of which 263,658 tons were through and 202,284 local.

The increase over the previous year was: trains 80,118 miles, and cars 728,043 miles. Passengers decreased by 16,712. Freights increased by 96,044 tons.

The Auditor in his report explains certain items in the general and balance sheet as follows:

Under the terms of our lease of the C. and X. R. R., the entire interest of the C. and X. company in the joint assets and liabilities of the L. M. and C. and X. partnership, was transferred to us, as specified and conditioned in sections 3 and 8 of the lease. This interest is stated among our liabilities in the amount standing to the credit of the C. and X. company.

The following is an abstract of the general balances as found at the close of the fiscal year 1868–'69:

Liabilities.	
Capital stock	$3,572,400 00
Cincinnati Loan due Dec. 31, 1880	100,000 00
Mortgage bonds due May 2, 1883	1,480,000 00
Bills payable	27,031 58
Due to agents	2,579 21
Due to Transportation Cos.	134,767 38
Unpaid dividends	147,721 41
C. and X. R. R. Co	643,989 54
Street Connection Loan	125,000 00
Personal accounts, pay rolls and supplies	219,869 49
Surplus	595,191 59
Total	$7,048,490 20

Property and Assets.	
Construction	$2,964,723 85
Real estate and depots	965,803 68
Rolling stock and shop machinery	1,061,094 12
Street Connection track	64,639 00
Dayton and Xenia Branch	412,285 12
Col. and Xenia stock	529,550 00
L. M. Elevator stock	20,000 00
Col. and X. R. R. bonds	54,000 00
L. M. R. R. bonds	13,000 00
P. C. and St. Louis R. R. bonds at 80 per cent	160,000 00
Street Connection bonds at 80 pr ct.	158,000 00
Dayton on Western R.R. b'ds at cost	22,900 00
Yellow Springs Impv. bonds at par.	2,000 00
Wharf boat	4,874 76
Supplies on hand	171,484 19
Bills receivable	51,510 50
Personal and company accounts	172,731 11
Cash	229,353 27
Total	$7,048,490 20

President.—H. J. Jewett.

Directors.—Jos. C. Butler, Chas. P. Cassilly, W. H. Clement, Edmund Dexter, Henry Hanna, L. B. Harrison, H. J. Jewett, Richard Lewis, and J. H. Rogers, of Cincinnati; John Bacon, of Springfield; Abraham Hivling, of Xenia, and Jos. R. Swan, of Columbus.

Treasurer.—Chas. P. Cassilly.

Secretary.—Joseph C. Butler.

State Tax on Passenger Travel.

In the Superior Court of this city, yesterday, the important and much-talked-of case of the State of Maryland *vs.* The Baltimore and Ohio Railroad Company, which has been on trial for the past week, terminated, under the instructions of the court, by a verdict in favor of the company. This suit, as our readers are aware, was instituted in pursuance of joint resolutions to that effect passed at the last session of the Legislature, for the purpose of compelling payment by the company of the one fifth of the gross receipts of the road from passenger travel on the Washington Branch, required by the act of 1832, chapter 175, and its supplements, to be paid into the State treasury, but which for the past two years the company has refused to pay over, upon the ground that such exaction by the State was in the nature of a tax or restriction upon passenger travel, declared by the Supreme Court of the United States, in the case of Crandall *vs.* The State of Nevada, to be unconstitutional.

In the case before the Superior Court two questions were involved—First whether the reservation of the one-fifth receipts was in the nature of a passenger tax, and within the application of the principle of the Nevada case; secondly, whether admitting the unconstitutionality of the State law requiring the company to pay over one-fifth of its receipts from passenger travel, the company had any right to retain the amount already collected on that account, it being conceded that no reduction in the rate of fare charged on the Washington Branch has taken place since the company refused to pay over to the State. Both points were ruled in favor of the company by Judge Dobbin, which ruling necessarily put an end to the case, leaving no question to be determined by the jury.

An exception was reserved by the counsel for the State, with the view of taking the case to the Court of Appeals.

Another important point in the case, however, it will be recollected, had been previously determined adversely to the company, that is, its claim of set-off for $185,000 alleged to have been advanced for the premium on gold to pay interest in London, the court holding that as the State, as a sovereign, could not be sued no cross-action in the shape of a set-off could be allowed, and it was necessary to rely on the justice of the State in all claims against her.

To the public at large, perhaps the most interesting feature connected with the case is the announcement that from and after to-day the rate of fare between Baltimore and Washington will be reduced from one dollar and fifty cents to one dollar and twenty cents—the reduction representing the one-fifth heretofore claimed by and for more than thirty years paid to the State, but which the court has now decided that the State has no right to exact. A corresponding reduction will be made in the rate of fare between intermediate stations on the same road. This measure, it will be remembered, was recommended by the finance committee of the company at the time their resolution was taken to contest the legality of the State's claim, and has only been deferred pending the decision of the legal questions in controversy. —*Baltimore Sun, Dec.* 10.

☞ The Boonton Branch of the Delaware, Lackawanna and Western railroad is now open for travel. The new route leaves the main road at Denville Station, running directly through Boonton, Beavertown, Meade's Basin, Paterson, Clifton and Rutherford Park, to Bergen Tunnel. Two daily trains will run the entire length of the Branch, 34 miles.

☞ The stockholders of the Camilla and Cuthbert Railroad, at their meeting at Newton, Ga., on the 15th instant, choose Gen. A. H. Colquitt as President, and A. L Hawes as Secretary and Treasurer.

Sale of the St. Paul and Pacific Railroad to the Northern Pacific.

The New York *Tribune*, of November 23, has the following very important announcement:

"The Northern Pacific Railroad Company has purchased from E. D. Litchfield, of London, the main and branch lines of the St. Paul and Pacific Railroad—about 300 miles in length. Mr. Litchfield is to complete the main line to Breckinridge. From this point it will be extended to the Great Bend of the Missouri. The extension of the branch to Pembina, on the British boundary line, will be commenced immediately. We understand that the principal officers of the St. Paul and Pacific retain their positions."

Mr. E. D. Litchfield, the gentleman referred to, arrived in this city last evening, accompanied by Mr. L. Wilmar, of London, the gentleman through whom the bonds of the St. Paul and Pacific Railroad Company were negotiated at Amsterdam. On being applied to by a reporter of the Press, to ascertain whether the startling information contained in the above paragraph was correct, it was corroborated by them in every particular. The sale was effected in New York on last Tuesday, Mr. Litchfield disposing of his entire interest, and he and Mr. Wilmar return on Tuesday next to complete the arrangements. While the principal officers of the company will retain their positions at present, there will be some change in the directory in consequence of the retirement of Mr. Litchfield from the company.

Mr. Litchfield declined to give any information at present as to the terms and conditions of the sale, and as to the future policy of the Northern Pacific Railroad Company in relation to these lines, beyond what is contained in the above paragraph to the *Tribune*, except to express his belief that the sale would redound to the advantage of the State at large and of St. Paul in particular, as it removed all ground of conflict between the companies, and made them one in interest. We understand from another source that Mr. Wilmar, to whose agency in the negotiation of the bonds of the St. Paul and Pacific that enterprise is mainly due, will now take hold of the bonds of the Northern Pacific, and that the Amsterdam parties are to be financial agents of that company in Europe.

There can be no question of the correctness of Mr. Litchfield's judgment, that the consolidation of the St. Paul and Pacific with the Northern Pacific will redound to the advantage of the State, of St. Paul, and both of the systems of roads which it now unites under one control. They are, in fact, inseparable parts of the same great system, and by their consolidation, the Northern Pacific obtains the much needed advantage of a direct outlet to the Mississippi river and Chicago; makes the St. Paul and Pacific an integral part of that great highway between the oceans, and lifts it up from a mere isolated local system to the importance of a leading continental trunk line. It solves, too, the question of the position of St. Paul in relation to the Northern Pacific Railway system, and makes it the Mississippi base or starting point of that great thoroughfare.

Two highly important results are already assured by the sale of the road:

First, The immediate extension of the main line of the St. Paul and Pacific to Breckinridge, and thence to the Great Bend of the Missouri; and

Second, The immediate extension of the branch line from St. Cloud to Pembina.—*St. Paul Press, Nov.* 27.

☞ At a meeting of the stockholders of the Salt Works and Coal Mine Railroad Company, held at Lebanon, Va., on the 9th inst., W. A. Stuart, Esq., of Saltville, was elected President. The Chief Engineer estimates the total cost of the road at $1,700,000.

☞ The Baltimore, Pittsburg and Chicago Railroad company was organized at Aurora, Ind., a few days since, by the election of a board of directors with Hon. Wm. M. Clapp as President,

The Pacific Railroads.

EXTRACT FROM THE REPORT OF THE SECRETARY OF THE INTERIOR.

The subscriptions to the stock of the Union Pacific Railroad Company amount to $33,783,000 of which $33,762,300 has been paid. The receipts for the transportation of passengers, freight, &c., for the year ending June 30, 1870, were $8,344,371 08, and expenses $5,649,573 45, leaving as net earnings $2,694,797 63. The entire cost of the road and fixtures at that date, not including unadjusted balances to contractors, was $108,722,134 35, and the then indebtedness of the company $76,480,698 61, of which $27,286.512 was for bonds of the United States, and $1,602,157 98 on account of interest paid thereon by the Treasury and not refunded by the company.

A copy of "articles of association, of amalgamation and consolidation of the Central Pacific Railroad Company of California with the Western Pacific Railroad Company," certified to by the Secretary of the State of California, has been filed in this Department, as proof that these two companies, on the 22d of June, 1870, were consolidated, in conformity with the laws of the State of California, under the name of the "Central Pacific Railroad Company." Stock of the Central Pacific Railroad Company to the amount of $48,400,100 has been subscribed, and $48,378,740 paid. The receipts from transportation of passengers and freight for the year ending June 30, 1870, were $6,070,172 90, and their expenses $3,542,212 59, leaving net earnings to the amount of $2,527,960 31. At its close the indebetdness of the company amounted to $67,079,730 54, of which $27,851,000 was to the United States.

The act of Congress approved May 6, 1870, provides for fixing the point of junction of the Union and Central Pacific Railroads within the limits of certain sections of land therein specified. I have not been officially advised of the selection of such point.

The last section of the Western Pacific Railroad, of 20.16 miles, was accepted January 21, 1870. This, with the preceding sections accepted, makes the whole length of the road 123.16 miles.

The stock subscription of the Central Branch Union Pacific Railroad is $1,000,000, of which $980,600 has been paid. The receipts for transportation of passengers from August 1, 1869, to June 30, 1870, were $67,899 96, and for freight $114,663 50. The expenses on account of the road and fixtures have been $3,723,700, and the indebtedness of the company, for borrowed money, railroad iron and freights, is $43,561 80.

Stock of the Kansas Pacific Railroad Company to the amount of $5,072,500 has been subscribed and paid in. The receipts for the transportation of passengers, freight, &c., from September 1, 1869, to June 30, 1870, were $2,530,283 90, and the expenses $1,488,815 75. The net earnings of the company were $1,041,468 15. The indebtedness of the company at the last date was $18,462,350, of which $6,303,000 was to the United States. The cost of construction and equipment of 533 miles of the main line and branch is estimated at $26,000,000. The line has been definitely located to Denver, 639 miles distant from the initial point. On the 30th of June last the road was in successful operation to the 500th mile-post, and work was energetically prosecuting on the remaining 139 miles. The cost of surveys during the year has been about $50,000.

The initial point of the Atlantic and Pacific Railroad is near the town of Springfield, Mo., "upon the west line of the northeast quarter of the southeast quarter of section 12, township 29, range 22 west." Work was commenced on the 4th of July, 1868, and fifty miles of road completed, equipped and opened for business on the 13th day of last June. On the report of the commissioners you accepted the work. In October, 1866, stock to the amount of $1,000,000 was subscribed, on which ten per cent. was paid. Certificates of stock to the amount of $3,008,200 have been issued in payment for the Southwest Pacific Railroad. The cost of surveys to July 1, 1870, was $30,585 57. The amount received from passengers to same date was $1,937, and that for freight $311 40. The cost of the road and fixtures, west of Springfield, to that date, was $2,760,841 63. The company has issued bonds, secured by mortgage on its lands, to the amount of $3,000,000, of which $1,281,561 64 have been sold; and there is a floating debt, on account of construction and equipment of $1,735,592 32.

The amount of the stock of the Sioux City and Pacific Railroad Company subscribed is $4,470,000, of which $1,788,000 has been paid. The receipts from the transportation of passengers, freights, &c., for the year ending June, 30, 1870, were $201,428 10, and the operating expenses $189,900 10, the net earnings being $111,528. The cost of the road and fixtures is $4,644,820, and the indebtedness of the company, $5,044,320.

At the close of the last fiscal year the amount of subscribed stock of the Southern Pacific Company was $1,800,000, and the amount actually paid in $280,800. Two corps of engineers have been in the field, and explored 510 miles. Notes for a full topographical map of the country thus examined have been taken. The cost of the surveys has been $4,037 50. The completed portion of the road between San Jose and Gilroy has not been surrendered by the contractors. The company has been at no expense in running it, nor has it received any of the income from transportation of freights and passengers. The indebtedness of the company is $480,000. It has contracted for the purchase of the San Francisco and San Jose Railroad for the sum of $2,770,000 in gold coin. Payment is to be made and possession taken on or before the 31st of December next.

The Northern Pacific Railroad Company filed a map designating the route of their road from the mouth of the Montreal river, in Wisconsin, to Cimiahmoo Bay, at the forty-ninth parallel of latitude, in Washington Territory. Instructions were thereupon issued for a withdrawal in Wisconsin, Minnesota and Oregon, of the odd numbered sections of land, to which prior adverse rights had not attached, within twenty miles, and in Washington Territory, south of Seattle of such sections within forty miles of each side of the road.

The first section of twenty miles of the Oregon Central Railroad Company, commencing at East Portland, Oregon, and terminating near Parrott's Creek, has been accepted as constructed in conformity with the requirements of the act of Congress. Evidence has been filed in this department that this company, on the 29th of March, 1870, assigned all their rights and interests to the Oregon and California Railroad Company of Portland, Oregon.

The commissioner appointed to examine and report on the first section of twenty miles of the Little Rock and Fort Smith Railroad reported that it was properly constructed, except as to ballasting. It was, therefore, accepted but on the express condition that this deficiency should be supplied prior to the completion of the whole line.

The report of the commissioners on 77.6 miles of the California and Oregon Railroad, commencing at Roseville and terminating near Chico, was received some time since. I declined to advise the acceptance of this portion, as it did not meet the description of a first class railroad. I informed the commissioners that on being duly notified by the company that these sections had been brought up to the standard adopted for the construction and equipment of the Union Pacific Railroad, they should re-examine them and report to me the result. I subsequently received representations on the subject from a source entitled to great respect, and I so far modified the order as to allow the chief engineer of the company to file with the commissioners a sworn statement, setting forth specifically the deviations from that standard, and showing in what manner the interests of the public would be thereby benefited. The commissioners were directed to forward such statement when received, with their report thereon, for the final determination of my successor.

The attorneys of the Union Pacific Railway Company, southern branch (now the Missouri, Kansas and Texas Railway Company) the Kansas and Neosho Valley Railroad Company, and the Leavenworth, Lawrence and Fort Gibson Railroad Company were fully heard on the right of their respective companies to construct a railroad from the southern boundary of Kansas through the Indian Territory. I also considered the objections of the representatives of certain Indian tribes through whose lands the projected lines of road would pass. After a most careful examination I reached the conclusion that existing laws and treaties authorized the construction of but one such road on certain conditions, which neither company had then performed. On a subsequent hearing it was shown that the first named company had completed its road to the designated point on that boundary, and I held that it was entitled to extend its line through said Territory. My action in the premises received your approval, and the companies were duly notified thereof.

The semi-annual accruing interest, paid by the United States and not refunded or otherwise discharged by a railroad company on the bonds issued in aid of the construction of its road, forms a part of its just debts. The companies furnish no statement of it. I called their attention to this obvious omission, but in no instance was it supplied except by the Union Pacific Railroad Company. On the 30th of June last there was due from the other companies, on account of such interest, $8,131,891 87.

List of U. S. Patents.

Issued for Improvements relating to Railroad Construction, Rolling Stock, &c., for the week ending Dec. 6, 1870, and each bearing that date. Reported weekly for the AMERICAN RAILROAD JOURNAL, from the Office of DAVID A. BURR, Solicitor of Patents and Attorney in Patent cases, Washington City, D. C.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "§."

American Railroad Journal.

Saturday, December 17, 1870.

Stock Exchange and Money Market.

There has been a less urgent inquiry noted for Money, since our last, and the advantage as to rates has been in favor of borrowers. The offerings of capital have been liberal, especially through private channels. There has been a moderate outflow of currency reported, chiefly to Cincinnati, and New Orleans. Call loans have been quoted generally at 5@6; and mercantile credits at 7@8¼ per cent. per annum. The City banks, in their last weekly return, show a loss of $2,133,634 of legal tender notes, $1,172,218 of specie, and $809,964 of deposits. They added $1,884,089 to their loan and discount average. The U. S. Sub Treasury lost $379,193 of specie, and $689,382 of currency, as the result of the week's business.

The specie reserve of the city banks according to the latest return is $15,935,848, against $29,716,362 same time last year. The city bank deposits are now $194,181,355, against $182,179,798 week ending Dec. 11, 1869. The legal tender reserve amounts to $49,124,022, against $46,884,429 same time last year. The circulation now stands at $32,185,477, against $24,128,117 same time last year. The loans are now $268,147,232, against $252,729,955 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $88,932,250 a day, against a daily average of $81,952,324 the preceding week. The current week's exchanges average about 93 millions a day. The city banks, last week, reported a loss of $1,172,218 of specie, $809,964 of deposits, and $2,133,634 of legal tender notes. They increased their loans $1,884,089; and reduced their circulation, $52,911.

The city bank exchanges on Wednesday were 88 millions.

National Bank notes to the amount of $204,260 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $337,007,058, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $33,143,524 leaving, with the existing 1,612 banks, (having an aggregate capital of $430,299,301,) an actual circulation at this date, of $303,863,534. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $346,181,750; and for the public deposits, $15,834,500—making a total of $361,716,250. The Treasury Department last week redeemed and destroyed $567,906 of worn and mutilated fractional currency, and issued $589,557 of new.

The cash balance in the Treasury Department at the close of business on Monday, was $29,000,000 in currency, and $97,600,000 in coin, including $16,900,000 in certificates.

The U. S. Sub-Treasury receipts, week ending with Dec. 10, were $3,024,735 in coin, (including $1,808,759 from customs duties,) and $3,090,387 in currency; payments, $3,408,929 in coin, (including $1,541,048 of coin interest,) and $3,779,769 in currency; balance at the close of the week, included $60,112,170, of coin, against $60,491,363 the preceding Saturday, and $6,889,480 of currency, against $7,078,812 at the close of the preceding week. The business of the Office on the first two days of the current week, was as follows. On Monday, receipts, $273,566 in coin, (including $187,064 from customs,) and $280,695 in currency; payments $609,793 of coin (including $81,017 of coin interest), and $382,465, of currency. On Tuesday, receipts, $789,848 in coin (including $367,890 from customs), and $210,653 in currency; payments, $295,614 in coin (including $278,976 of coin interest) and $444,684 of currency. The balance at the close of business on Tuesday included $6,053,628 of currency, and $60,269,677 of coin against a balance a week previous of $6,770,483 currency, and $60,439,016 coin.

The aggregate receipts of the U. S. Sub-Treasury in November were $56,296,837, including $9,576,224 from customs; aggregate payments, $62,134,566, including $14,025,558 of coin interest.

The U. S. Sub-Treasurer issued in November $4,741,000 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $1,579,759 of coin certificates, received for customs.

The U. S. Sub-Treasury balance at the close of

business on Wednesday was $60,707,233 of coin, and $5,944,255 of currency.

Government revenues were on a moderate scale, during the week. The excises during the week yielded about 2¾ millions; customs at the port of New York, $1,808,759, and at the outports about $600,000 (in coin) more, making the grand total income for the week equal to about $5,500,000 in currency. The income of the Government, from excises, since July 1, 1870, has been about 78 millions.

There has been less activity in the Gold speculation, since our last, and less buoyancy has been noted in the price. The range has been from 110⅛@111⅛, and the closing quotation on Wednesday was 110⅞@111, against 110¾@110⅞ the preceding Wednesday. The customs call has been light. The export drain was rather heavier. On Wednesday, Government sold $1,000,000 of gold at from 110 64@110 71. The aggregate of the bids was $5,900,000.

The customs revenue on Wednesday was $260,000. The coin interest disbursements at the Sub-Treasury were $55,353.

Under the December programme of the Treasury Department Government will sell Gold, during the month, as follows: Wednesday, December 21, $1,000,000; Wednesday, December 28, $1,000,000. And will buy in, during the month, of Five-Twenties as follows: Thursday, December 22, $1,000,000; Thursday, December 29, $1,000,000.

The export drain was $800,468, week ending with Dec. 10, against $519,868 week ending with December 3; $449,984 week ending with November 26; $655,078 week ending with November 19; $410,134 week ending with Nov. 12; $3,156,924 week ending with Nov. 5; $303,562 week ending Oct. 29; $556,180 week ending Oct. 22; $654,328 week ending with Oct. 15; $802,174 week ending with Oct. 8; and $465,260 week ending with Oct. 1. The shipments thus far this year have been about 57⅛ millions, against 30⅛ millions same time in 1869; nearly 69⅜ millions same time in 1868; 45⅜ millions same time in 1867; over 59⅛ millions same time in 1866; and 27⅞ millions same time in 1865. The exchanges at the Gold Exchange Bank, which were 26⅛ millions on Friday, of last week, were 26¾ millions on Monday of this week, 39⅞ millions on Tuesday, and 21¾ millions on Wednesday.

The customs demand for Gold last week, averaged $301,460 a day; thus far, this week, it has averaged $277,472, a day, or equal to a weekly aggregate of $1,664,832. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $105,227; and since Jan. 1, 1870, $11,492,784, against $14,928,616 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $134,711,673 against $125,403,841, same time in 1869.

The exports of specie, from this port, last week, were $800,468 against $380,399 same week last year; and since Jan. 1870, $57,538,762, against $30,536,829 same time in 1869. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,541,048; and since Jan. 1, 1870, $84,769,464 against $89,085,346 same time in 1869.

Foreign exchange has been in quite moderate demand, but, with reduced offerings, has been quoted firmer. Bankers' sixty day bills on London closed on Wednesday at 108¾@109; sight bills on London, 109⅝@109⅞. The offerings of produce bills have been fair. The week's exports of domestic produce have been to the currency value of $4,679,671, and since January 1, 1870, $184,848,526, against $189,274,281 same time in 1869.

The customs revenue at the port of San Francisco, from Jan. 1 to Nov. 30th, was $7,147,000, against $7,804,000 same time last year.

The specie exports by steamer and railway, from San Francisco, from Jan. 1, 1870 to Nov. 30th, were $31,439,759, against $34,883,581 same time last year.

Government securities have been in more active demand, especially the later issues of the Five Twenties, which have advanced in price, closing firmly and buoyantly, on a lighter offering of bonds.

U. S. sixes of 1881 closed here on Wednesday of the current week at 113⅛@113⅜; U. S. Five-Twenties of 1862, 107⅝@107¾; U. S. Five-Twenties of 1864 at 107⅛@107⅜; U. S. Five-Twenties of 1865, 107⅜@107⅝; U. S. Five-twenties of 1865 consolidated, 109¾@109⅞; U. S. Five Twenties of 1867, 110⅜@110¼; U. S. Five-twenties of 1868, 110⅜@110½; U. S. Ten-forties at 106⅜@106½; U. S. Six per cent. currency bonds, 110¼@110½.

State bonds have been in moderate demand, through the week, but irregular in price.

Railway bonds have been more sought after for investment purposes at generally firmer prices. Central Pacific Sixes have been in lively demand, and have been quoted decidedly stronger in price, closing with 92⅛ bid, and 92¾ asked, on a reduced offering of the bonds. The inquiry has been largely stimulated by the reports of the very remarkable growth of the business of the road, which yielded gross earnings to the company last year of $6,000,000, and will produce a total of about $8,000,000 for the whole of 1870, or an aggregate of $14,000,000 for the two years, of which aggregate full 50 per cent., or equal to $7,000,000, are net earnings over and above expenses. Chesapeake and Ohio Sixes have been in request at 90 and interest; Union Pacific Sixes have been quoted at 80⅞@81.

Railway and miscellaneous share property has been moderately active, at variable prices, closing heavily as a rule. Union Pacific stock has been pressed for sale, and quoted down to 13⅛@13⅞ closing at 14@14¼. Western Union Telegraph closed at 46¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 30.	Dec. 7.	Dec. 13.

* Ex-dividend.

General Business has been less active, and as a rule, values have been more favorable to purchasers. Flour and Wheat closed with more steadiness, on an improved export inquiry. Provisions have been depressed. Middling upland cotton closed on Wednesday at 15¼ cts. per lb. The stock of cotton now here is given at about 75,000 bales. The receipts at the port this week, have averaged about 8,450 bales a day. The receipts at all the ports, since Sept. 1, 1870, have been 1,209,275 bales, against 976,325 bales same time in 1869–'70; exports same time 640,500 bales, against 510,500 bales same time in 1869–'70; stock on hand at latest dates, 434,500 bales, against 300,325 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 14,129 pkgs., against 20,268 pkgs., same time in 1869. From Boston, 7,478 pkgs. in 1870, against 7,002 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves have been in more request from 9@16¼c. per lb.; week's receipts, 7,056. Milch cows quiet at $40@$110 each, receipts, 89. Veal calves have been in more demand at from 5@11c. per lb.; receipts, 2,175. Sheep have been in request at from 3½@6¼c.; lambs at 5@7½c. per lb.; receipts, 33,853. Swine have been in fair demand at 7¼@7⅝c. per lb., all live weight; receipts, 26,670.

Foreign Goods have been less freely dealt in as a rule, at less buoyant prices. The dry goods entries at this port, last week, were $1,380,918, making with the general merchandise imports a total of $6,012,490, against $5,947,679 the preceding week.

Freights have been less active, and rates have been quoted weaker. For Liverpool we quote flour at 2s. 6d.@2s. 9d. by sail, and 3s. by steamer per bbl.; grain at 6¼@6½d. by sail, and 7½d. by steamer per bushel; cotton at 5/16@3/8d. by sail and 5/16@⅜d. by steamer per lb.; and heavy goods 20s.@30s. by sail, and 30s.@50s. by steamer, per ton. Total number of vessels in port on Wednesday, 551.

The following will show the exports (exclusive of specie) from New York to foreign ports or the week ending December 13th, and since the beginning of the year:

	1869.	1870.
For the week	$3,646,286	$4,679,671
Previously reported	185,627,995	180,168,855
Since Jan. 1	$189,274,281	$184,848,526

The imports for the week ending Dec. 10, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,041,720	$1,380,918
Gen. merchandise	3,839,963	4,631,572
Total for the week	$4,881,683	$6,012,490
Previously reported	273,967,290	282,108,694
Since January 1	$278,848,973	$288,121,184

☞ Articles of association of the Baltimore, Pittsburg and Chicago Railroad have been filed with the Secretary of State at Indianapolis. The capital stock is fixed at three millions of dollars, in sixty thousand shares. One hundred and forty-five miles of the road runs through the State of Indiana, in the counties of DeKalb, Noble, Kosciusko, Elkhart, Marshal, St. Joseph, Porter and Lake.

☞ The earnings of the Richmond and Danville Railroad for the year ending September 30, 1870, were $692,366, and the operating expenses $467,633, leaving the net earnings over working expenses $224,733. Of the net earnings $163,000 was applied to the payment of interest on the bonded debt of the company, $45,000 for lease of the Piedmont Railroad, and the balance for additions to the permanent property of the company.

☞ The first section of the new Milwaukee and Northern Railroad, from Milwaukee to Cedarburg, twenty miles, was completed last week. The line has been surveyed to Green Bay, and the right of way acquired to Fox river.

☞ The Macon and Augusta road was opened for the transportation of freight and passengers on the first of December.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

☞ FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,

No. 5 NASSAU ST.,
NEW YORK, Dec. 15, 1870.

FUNDING FIVE TWENTY BONDS.

Within the past three months a very large amount of Five-Twenty Bonds have been funded through our office into the FIRST MORTGAGE BONDS of the CENTRAL PACIFIC RAILROAD COMPANY, besides large sales of the same securities for new investments.

We deal in Central Pacific Bonds the same as in Government Securities, and regard them as affording the desired medium for funding Five-Twenty Bonds, *without reduction of interest and with unimpaired security.*

They are all Coupon Bonds of $1,000 each, interest payable Jan. 1 and July 1.

☞ *They are well known, and have a ready market in all the money centres in this country and Europe, are daily quoted at the Stock Exchange, and can be sold at current market price as readily as the Bonds of the Government.*

The EARNINGS of the Road for 1870 will reach *Eight Million Dollars*, and the increase is shown in the following figures:

Earnings from Jan. 1 to Dec. 1, 1870...	$7,417,317
Earnings from Jan. 1 to Dec. 1, 1869...	5,260,882
Increase	$2,156,435

We keep a supply of these Securities on hand, and furnish them at current market price, which to-day is 92½.

This price includes the coupon due Jan. 1, for which three per cent. in gold will be received by the purchaser, on bonds bought during this month.

Proceeds of $1,000 5-20 bond of 1867, sold to-day at 109¼	$1,100 00
Cost of $1,000 Central Pacific bond, to-day at 92½	925 00
Difference realized	$175 00

We continue, as heretofore, to buy and sell Government Bonds, make Collections, receive deposits subject to check at sight without notice, and allow interest on balances, and do a general Banking business.

FISK & HATCH.

☞ LOUISVILLE AND NASHVILLE SEVEN PER CENT. CONSOLIDATED MORTGAGE BONDS.—The small amount left of the last issue of these bonds will be sold at 90 and accrued interest. Parties desiring an *entirely safe* investment are invited to call for information on either of the undersigned.

J. B. ALEXANDER & CO.,
19 Nassau-st.
JOHN J. CISCO & SON,
59 Wall st.

☞ The Missouri, Kansas and Texas railroad has been completed from Sedalia, on the Missouri Pacific railroad, to Fort Scott, in Kansas, which opens up Southern Kansas to St. Louis by a short route. The Company is pushing the road southward from Fort Scott at the rate of two miles per day, and expect to reach Fort Gibson, on the Arkansas river, by the 1st of May, and cross Red river within a year. Thence the road will be vigorously constructed to the Rio Grande and beyond.

Journal of Railroad Law.

RAILROAD COMPANIES—RULE OF DAMAGES TO OWNERS OF REAL ESTATE DEPRIVED OF PROPERTY IN CONSTRUCTION OF RAILROAD.

The facts in the late case of The Western Pennsylvania Railroad Company *vs.* Hill, (56 Penn., 460,) are fully stated in the following able opinion by

THOMPSON, C. J.—The Court admitted evidence and submitted as a ground of recovery in favor of the plaintiffs below, whether the direct and immediate effect of the construction and use of the company's railroad over the plaintiffs' land, had the effect to destroy the business of their mill, and consequently to lessen its value. The testimony is full to this point, and leaves no doubt of the fact. If the taking of the plaintiffs' land directly resulted in this, in a way capable of being certainly ascertained, it is not easy to see why compensation should not result from one cause of injury as well as another. This I suppose would not be disputed as a general proposition; but it is denied that the occurrence of the injury in this particular case is a ground of damage.

What is it? Many witnesses testified that the plaintiffs owned an ancient custom mill; that after the railroad was built and begun to be operated, they ceased to carry their grain to be ground there, and that at least one-half of their custom had fallen off. The reason given for this was simply the danger in going to the mill with horses and teams, owing to the location of the railroad with reference to the mill.

The mill stands on a narrow strip of land, between the Kiskeminetas River, on the one side, and a high bluff or hill on the other. A township road starts at the mill, and after running along the narrow strip for some 15 or 20 rods, leaves the valley and passes in the open country. Side by side, with his township road is the railroad, elevated a few feet above it, and so passes the mill at a distance of some thirty feet from it door. There is no room for another road, it appears; between the township road and the river, and along this road, teams and horses must pass to and from the mill; a precipitous bank and the river being on the one side, and the railroad on the other. In the opinion of the witnesses this presented a case of such peril and inconvenience in freightening teams and horses, as to compel them and others to carry their grain to be ground at other mills. If this resulted as an immediate and direct consequence of the taking of the plaintiffs' property, on which to build the railroad, and if the fear and danger in the circumstances of the case were reasonable, and prevented people from coming to the mill, the court advised the jury that the depreciation in the value of the property, therefore, ought to be compensated by the railroad company.

This view, in its application o the admission of testimony and to the charge of the learned judge, forms the principal assignments of error in the case.

I regard the testimony as but a mode of ascertaining a measure of damage, sanctioned by the court from Thoburn's case, 7 S. and R. 411, down to Hornstein's case 1 P. F. Smith 87, namely, the difference between the value of the property after the construction of the railroad and before; the amount of deterioration, when ascertained by proper tests, being the amount the owner should be entitled to. This must almost always be arrived at through a variety of details in evidence, to enable the jury to find a result. When the deterioration results from actual and not speculative causes, and, to all human appearance, from causes which promise to continue, then it must be admitted as a ground of damage.

At common law, depreciation of property by agencies that would destroy its value, would undoubtedly be a ground for the recovery of damages. The maxim *sic utere tuo ut alienum non laedas*, embodies the duty, and the law must enforce it, or the maxim would be idle. In 3 Casey 99, repeated in 1 Wright 469, and other cases, it was held "that the construction which has been given to legislative charters for improvement companies generally, has been, that they are intended to secure compensation for such injuries as the common law recognises as fit objects for compensation." In this last case, a practical application of the rule is given, and it goes far to justify the ruling of the learned judge in this case. In the opinion of the court, my brother Strong said: "The exclusive appropriation of a part, the inconvenience arising from divisions or from increased difficulty of access, and the cost of additional necessary fencing, are alike the direct and immediate results of the construction of the rail road," and entitled to be compensated. See also Patten *vs.* The Northern Central Railroad Co., 9 Casey 426. These cases would compensate the inconvenience to a land owner, whose property is taken to build a railroad. The direct and immediate result of the construction of a road over land taken, if injurious, gives title to damages, even to the extent of estimated inconveniences.

The rule in its breadth, applies generally, only to cases where there is an exclusive taking of a portion of the owner's property under the right of eminent domain. This is apparent from the Monongahela Nav. Co., *vs* .Coons, 6 W. & S. 101, and subsequent cases.

It is not necessary to elaborate much the nature of the injury here, or its direct character. It results solely from the taking a portion of the plaintiffs' land, and the construction and use of the defendant's road. I see not much difference in the nature and certainty of the exclusion of the customers of this mill, between an absolute physical obstruction, directly in their way, and others which continually threaten their lives and limbs in the use of the ordinary means of getting there. Without enlarging, however, we think the testimony in regard to the loss of custom to the mill, from the construction of the road over the ground of the owner, and the reason for it were properly received and properly submitted to the jury as grounds of compensation to be made to the plaintiffs, for the deterioration their property.

It was not error to refuse to instruct the jury that they must state in detail the items which should constitute their verdict. It was not even necessary, under a similar provision, in case of appraisers of damages; Tucker *et al vs.* The Erie and N. E. Railroad Co., 3 Casey 281. Nor was the contrary decided in the case of Patten *vs.* The Northern Central Railroad Co. *supra.* That was not a point in that case. A jury might, if they chose, state the items composing the sum of their verdict, but it would amount to nothing. They must find an aggregate sum, no matter of how many items it is composed. We have carefully considered all the assignments of error in the case, and see nothing to correct.

The Judgment is affirmed.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 30th of November, inclusive, during the years 1869 and 1870, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1869..	521,300	18,028,800	7,038,800	3,159,300
1870..	430,400	17,124,700	4,805,100	3,984,700
Dec..	90,900	904,100	2,233,700	*825,400

* Increase.

The barley received in 1870 is all new crop but 82,000 bushels. By reducing the wheat to flour the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a decrease of 271,700 bbls. of flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of November in the years indicated:

	1868.	1869.	1870
Canal opened—	April 23.	May 6.	May 10.
Flour, bbls.	440,900	521,300	430,400
Wheat, bushels.	13,757,900	18,028,800	17,124,700
Corn, bushels	16,810,500	7,038,800	4,805,100
Barley, bushels.	3,587,600	3,159,300	3,984,700
Oats, bushels	11,646,600	4,830,000	5,967,500
Rye, bushels	348,900	251,400	587,500
Malt, bushels	436,400	238,400	761,200
Feed, lbs.	.....	13,066,200	14,461,500

United States Mint.

The report of the Director of the Mint for the year ending with last June, gives the total deposits of bullion at $32,990,210 96; coinage, $33,334,863 91. The coinage in Philadelphia was $4,961,860 98; at San Francisco, $19,910,550; at Carson, $132,369 05. The redeemed nickels amounted to $66,872 26, or $34,592 99 less than last year. The Director opposes redeeming the lowest bronze coinage. The profit from bronze and nickel coinage last year was $275,000. Silver token coinage is again urged in pieces of ten, twenty-five and fifty cent pieces, of reduced weight but standard purity, for fractional currency and United States notes. The silver could be got from Nevada and Colorado. Tables show that from 1859 to 1869, both inclusive, the Philadelphia Mint coined $143,490,741 38, and the San Francisco branch $184,439,199 15.

☞ The Water Commissioners of Fitchburg, Mass., will, at an early day, issue Proposals for the construction of three miles of Brick Conduit, three dams containing an aggregate of about 60,000 yards of material, and the laying of from six to seven miles of cement lined wrought iron pipe. Contractors desiring to look at the surface before it shall be covered with snow will do well to examine it at once, for which purpose the Commissioners will furnish every facility in their power.

☞ Fourteen miles of track of the Pittsburg and Cumberland Railroad have been laid from Cumberland westwardly, and about twelve miles from Connellsville eastwardly. A line of telegraph follows the construction of the road from the Connellsville end.

Commerce of New York.

The foreign imports at New York for the month of October, 1869 and 1870, are officially stated as follows:

	1869.	1870.
Entered for consumpt'n.	$10,288,541	$14,087,056
Do. for warehousing	5,841,349	7,168,067
Free goods	879,329	1,193,348
Specie and bullion	3,580,817	417,860
Total entered at port...	$20,590,036	$22,861,331
Withdrawn fr. wareh'use	10,704,752	8,802,588

The foreign imports at New York for the ten months from January 1, were:

	1869.	1870.
Entered for consumpt'n.	$132,338,648	$144,010,203
Do. for warehousing...	108,505,972	100,299,719
Free goods	12,489,960	11,174,186
Specie and bullion.....	15,319,395	8,799,031
Total entered at port...	$268,653,975	$264,283,139
Withdrawn fr. wareh'se	94,670,950	99,738,423

The revenue from customs at New York for ten months from January 1, were:

	1869.	1870.
1st quar..	$34,640,194 91	$38,568,250 47
2d quar..	28,827,215 03	34,013,560 63
3d quar..	35,865,913 58	39,858,870 39
In Oct	10,554,660 92	11,161,364 60
Ten months..	$109,887,984 44	$118,597,046 09

The exports from New York to foreign ports in the month of October, were:

	1869.	1870.
Domestic produce	$18,419,645	$16,018,569
Foreign free goods	71,862	1,905
Do. dutiable.....	577,748	638,930
Specie and bullion.....	2,531,076	2,416,356
Total exports	$21,600,331	$19,075,760
Do. exclusive of specie.	19,069,255	16,659,404

The exports from New York to foreign ports for ten months from January 1, were:

	1869.	1870.
Domestic produce.....	$135,147,985	$142,440,575
Foreign free goods	827,068	334,800
Do. dutiable	5,799,784	8,416,680
Specie and bullion..	29,248,704	51,344,339
Total exports....	$188,523,541	$202,536,394
Do. exclusive of specie .	159,274,837	151,192,055

☞ The President has appointed Isaac H. Sturgeon, of Missouri; J. A. Thatcher, of Minnesota, and Hollon Richardson, of Maryland, Commissioners of the Kansas and Denver Pacific railways, and they have been instructed by the Secretary of the Interior to meet at Kansas City on the 19th inst. to examine and report on the roads and telegraph lines of said companies.

☞ Articles of incorporation have been filed with the Secretary of State of Wyoming Territory incorporating the Cheyenne, Iron Mountain and Pacific Railroad, to start from Cheyenne and connect with the Helena, Big Horn and Cheyenne Railroad at the northern boundary of Wyoming. General Silas Reed, Surveyor General, has been elected President, and Governor J. R. Campbell Vice President of the road.

☞ The receipts of the Orange, Alexandria and Manassas railroad for the year ending September 30, 1870, were $939,697 99, and the expenditures for the same time $580,063 34, leaving a net revenue of $359,676 65. During the year the aggregate number of passengers transported over the road was 185,604, and of freight, 121,111 tons.

North Shore (Canada) Railroad.

Conferences having been held with the Quebec Government in reference to land grants for the railway running north of the St. Lawrence from Quebec to Montreal, the Quebec *Chronicle* gives the following as the answer of the Government:

The Government will grant to a company which will undertake the Piles Road and the establishment of the navigation of the St. Maurice:

1.—The North Shore Road between Quebec and Montreal.

2.—The Colonization Road north of Montreal.

3.—That part of the Central Canada Railroad continuing the road last mentioned, on the north bank of the Ottawa towards Aylmer.

Three million acres of land to be chosen by the government in the territory watered by the Ottawa, the St. Maurice, the Batiscan and their tributaries, this grant to stand in place of every previous grant in favor of these roads.

And this grant will be made subject to the following conditions:

1.—The government shall nominate one-third of the Directors.

2.—All the works to be executed in full within five years, and all the enactments contained in the 14th section of the act incorporating the St. Maurice Railroad Company, to remain in force; and it being further stipulated that no Crown Lands shall be pledged in the event of the company not proceeding diligently to the execution of the work.

3.—Every road to be of the first-class.

4.—The government can buy the works by giving 10 per cent. profit to the company.

Worthington's Valley, Hamstead and Bachman's Valley Railroad.

We have received the report of a preliminary survey of the contemplated railroad from Chestnut Hill Ore Banks to Westminster, by Joseph S. Gitt, Esq., Civil Engineer. This survey was made at the instance of a committee of gentlemen interested in the property lying upon and adjacent to the line of the contemplated road, in order to determine the feasibility of constructing it, and to ascertain the cost of the same. The proposed railroad is to run between Chestnut Hill Ore Banks and Westminster, a distance of eight and three quarter miles, through a region rich in mineral wealth, abounding in beds of valuable iron ore, and in quarries of richest lime stone; remarkable, also, for the beauty of its scenery, the fertility of its soil, its forests of valuable timber, and for the industry, enterprise and public spirit of its inhabitants. It is believed that the two articles of iron and lime, of themselves, will afford an immense carrying trade to the road, while the valuable products of the forests and the fields along the line of the road will swell its trade to dimensions fully equal to its capacity for transportation. The history of railroads has proved them to be paying institutions, wherever located, if properly conducted. They are remunerative not only in the appreciation of their stock and the value of their dividends, but also in the rapid advance in the value of property and in the general improvement of the regions through which they pass. The friends and projectors of this road will doubtless find their profit in it in this way, independent of the development of the abundant resources of their section, and of the conveniences of speedy travel and transportation of freight. Many local roads have improved the property along their routes and at their respective termini more than a hundred per cent.—*Balt. Am., Nov. 3.*

☞ By the opening of the Utica, Chenango and Susquehanna Valley Railroad to Norwich, trains can now run through from New York to that place via Scranton, and the coal fields of Pennsylvania are placed in direct connection with the Chenango Valley and Central New York.

State Tax on Railroads.

Judge Strong has rendered his decision in the case of Minot *vs.* The Philadelphia, Wilmington and Baltimore Railroad Company, recently argued in the Circuit Court of the United States in the District of Delaware. This action was one brought by Mr. Minot a stockholder in the above named company and a citizen of Massachusetts, to have the State of Delaware enjoined from levying certain taxes on the Philadelphia, Wilmington and Baltimore Railroad Company, and the Railroad Company from paying them. The Court decided that the tax on the capital stock of this company and on net earnings is constitutional; but the tax on locomotives, passenger cars and other rolling stock is unconstitutional. Judge Strong concludes as follows:

The case, in any view of it, decides that a State cannot directly or indirectly tax persons for passing through or out of it. That is enough for the case I have before me. The Delaware statute of April 8th, 1869, does directly levy a tax upon both persons and property for transit through the State, into it and out of it. It is, therefore, in my opinion, so far in conflict with the Constitution of the United States.

I shall therefore enjoin against any steps for the assessment, collection or payment of the tax prescribed by the twenty-first section of the act of April 8th, 1869, namely, the tax for the use of locomotives, passenger cars, freight cars and trucks, and I shall refuse the injunction prayed for to prevent the collection and payment of the taxes prescribed by the fifteenth section upon the actual cash value of every share of the capital stock of the company defendant, and I shall also refuse an injunction against the collection and payment of the tax described by the twentieth section upon the net earnings or increase of the company.

☞ The Secretary of War, in his annual report, says that but little progress has been made by the railway companies in settling the debts contracted by them at the close of the war by the purchase of the material of the military railroads. The total debt remaining due and unpaid on June 30, 1870, was $6,912,106 97, principally owing from southwestern companies. Their payments during the year amounted to the sum of $365,820 45, but owing to the amount of interest the entire reduction was only $58,128 04.

☞ The Arkansas *Gazette* says the Mississippi, Ouachita and Red River Railroad, under the vigorous management of Hon. Thos. M. Bowen, its president, is making rapid strides towards completion. The track has already been laid for about twenty miles running west from Eunice, and all the necessary arrangements have been made to complete the road to Camden—a distance of about one hundred miles, by the first of April next.

☞ The Bangor and Piscataquis Railroad Company have made a compromise with the European and North American Railroad Company, and in consideration of the payment of $25,000 by the latter have withdrawn their objection to the payment to them by the Governor and Council of the amount received from the Government on account of the Maine and Massachusetts war claims.

☞ Trains are now running regularly from LaCrosse to Wells, on the Southern Minnesota road, and the track is being rapidly extended northwestward to Winnebago city.

Illinois Central Railroad.

The statement of this Company for the month of November, 1870, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	3,888.33 for	$36,793 93
Acres Int. Fund Lands sold		
Acres Free Lands sold	160.00 for	2,961 00
Total sales during month of November, 1870	4,048.33 for	$39,754 93
To which add Town Lot Sales		120 00
Total of all	4,048.33 for	$39,874 93
Cash collected in November, 1870		$208,777 78

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois 707 Miles.	In Iowa 400¼ Miles.	Total. 1107¼ Miles.
Freight	$452,050 00	$91,031 00	$543,081 00
Passengers	135,381 90	44,627 85	180,009 75
Mails	6,375 00	1,029 08	7,404 08
Other sources	109,000 00	2,495 92	111,495 92
Tot. Nov., '70.	$702,806 90	$139,183 85	$841,990 75
Total actual earn'gs, Nov. 1869	$666,658 35	$177,754 80	$814,413 15

☞ Maine's portion of the certificates of indebtedness issued by the United States, in payment of the interest on Massachusetts' war claim of 1812, was transferred to the European and North American Railway Company on the 7th inst. The company had previously received Massachusetts' portion—two-thirds. The value of Maine's part is $226,000.

NOTICE TO THE PUBLIC.

EXECUTIVE DEPARTMENT,
ATLANTA, GA., October 26th, 1870.

To Whom it May Concern:

By an Act of the General Assembly of the State of Georgia, approved October 24, 1870, authority is given to the Governor to lease the Western and Atlantic Railroad, the property of the State, together with all of its houses, workshops, depots, rolling stock and appurtenances of every character, for the term of twenty years, upon certain terms, and subject to certain restrictions therein named, to-wit:

The monthly rental shall not be less than twenty-five thousand dollars ($25,000) payable monthly. The lessees shall give a bond for the sum of eight millions of dollars ($8,000,000) to securing the prompt payment of the amount of rental agreed upon, and for the return of the road and its appurtenances at the expiration of the lease, or on the termination or forfeiture thereof, in as good condition as at the time of leasing, five millions ($5,000,000) of which security shall be within this State and the balance, if out of the State, shall be upon real estate or railroad property. The lessees to be worth over and above their indebtedness, at least five hundred thousand dollars ($500,000.)

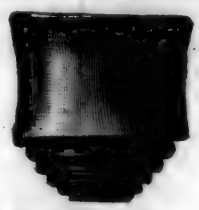
The Legislature reserves to itself the right, from time to time, to examine into the affairs of the lessees, and to require that the amount of security above recited shall be maintained unimpaired.

The lessees shall not be less than seven in number, a majority of whom shall have been for five years *bona fide* residents of this State, and shall represent a majority of the whole interest in the lease. No railroad or express company, or any combination of them, shall, in any event, become the lessees, but they may become sureties on the bonds of the lessees. The lessees shall not charge a higher rate for local freights over said road than the average rate charged by the Georgia Railroad and Banking Company, the Central Railroad and Banking Company, and the Macon and Western Railroad Company, for like local freights over said roads, and the said lessees shall have the same rights, exemptions, privileges, immunities and guarantees, except the establishment of banks, and shall be subject to the same liabilities, disabilities, and public burdens of said railroad companies last mentioned. The faith of the State is pledged to redeem all mortgage bonds and coupons now resting on the State Road as they fall due, and to save the lessees harmless against all such bonds and coupons.

The lessees are by this act constituted a body corporate and politic for the term of twenty years, under the name and style of the Western and Atlantic Railroad Company, having such powers, liabilities and immunities, as are usual with railroad companies, and not in conflict with the Constitution and Laws of the United States, or of the State of Georgia; but they will not be allowed to make or permit any discrimination in favor of or against any other road or persons having business connections with the said Western and Atlantic Railroad.

For the purpose of carrying out this act, proposals will be received until and including the 25th day of December next and must be addressed "to the Governor of the State of Georgia, at Atlanta," and marked on the wrapper, "Proposals for the lease of the Western and Atlantic Railroad, in accordance with an Act approved October 24, 1870." The proposals must state in full the names and residence of the parties uniting to make proposition, the amount that each of the parties therein named are worth over and above their debts and liabilities, together with a full description of the character of the security which will be offered to complete the bond.

The property to be leased is a single track railroad, one hundred and thirty-eight miles in length, with full and complete equipment of shops, depots, turnouts, sidelings, engines, cars, etc., etc., etc., now in successful operation between the cities of Atlanta, in Georgia, and Chattanooga, in Tennessee. At Chattanooga the line is in direct rail connection with the Memphis and Charleston, Nashville and Chattanooga, Chattanooga and New Orleans, East Tennessee and Georgia, and the Chattanooga and Cincinnati, (now in progress of construction,) railroads, and at Atlanta with the Atlanta and Montgomery, Atlanta and Charleston, Atlanta and Savannah, and the Atlanta and Gulf lines of road, being the only railroad connection between the system of railways centering at Chattanooga and at Atlanta.



Copies of "An Act to authorize the lease of the Western and Atlantic Railroad, and for other purposes therein mentioned," approved October 24th, 1870, can be had upon application at the Executive office.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

☞ TO SUBSCRIBERS.—This, being the *Fifty-second* number of the JOURNAL, closes the volume for the year. No paper will be issued from this office next Saturday. The first number of the new year will contain our usual elaborate Tables showing the Length and Cost of all the Railroads in the United States at the close of the financial year ending nearest to January 1, 1871. The Index to Volume XLIII. accompanies the present number.

☞ We gave in our issue of December 17th, a "List of Railroad Purchasing Agents," compiled from the best sources of information then at our command. We find, however, that in several instances it is not strictly correct. We shall therefore defer its re-publication until the first number of the new year, when we shall make such corrections in and additions to it as may in the meantime be brought to our notice.

☞ MR. SAMUEL L. CAMPBELL has been appointed Paymaster and Purchasing Agent of the Marietta and Cincinnati Railroad Company. Mr. Campbell's address will be Cincinnati, Ohio.

☞ MR. THOMAS L. COURTNEY, of Richmond, Va., is Purchasing Agent of the Richmond, Fredericksburg and Potomac Railroad Co.

The Hudson Suspension Bridge and New England Railway Company.

The rapidly increasing demand for the manufactured products of the New England States by the growing population of the West, and the consequent increased consumption of Western products and the Coal of Pennsylvania in the Eastern States, renders it necessary that additional facilities should be provided for the transportation of freight and passengers between these sections, by a route free from the delay and expense of transshipment and not liable to interruption from ice during the Winter months.

With a view to establishing a means of communication so urgently needed, the Hudson Suspension Bridge and New England Railway Company has been organized under a charter and amendment granted by the Legislature of the State of New York, copies of which are annexed hereto.

The proposed line will be built from a point at or near Turners on the Erie Railway running eastwardly through a very productive iron region at a grade in favor of trade to the Hudson River at Fort Clinton. From this point to Anthony's Nose on the east bank of the Hudson about four miles north of Peekskill, it is proposed to construct the bridge; and thence the road will run towards the Connecticut State line, connecting at or near Brewsters with the various lines radiating through New England.

By reference to the accompanying map, the importance of this road as a connecting line cannot fail to be seen, as it will secure a continuous line of rail from the New England States to the coal fields of Pennsylvania and to the great West, overcoming the disadvantages of ferrying and change or any break of bulk.

The Western connections of the line will be:

1. With the proposed West Shore Hudson River Railroad.

2. With the Erie Railway, its branches to the coal mines and numerous other points and its connections with the West.

3. With the New York and Oswego Midland, now being rapidly constructed to Oswego, and its connections through Northern New York.

4. With the Longwood Valley Railroad, a projected line passing the extensive iron mines at Sterling and through New Jersey to connect with the Morris and Essex or direct to Easton; from which point by the Lehigh Valley and Reading Railroads all the coal fields of Pennsylvania will be reached; and the East Pennsylvania and Lebanon Valley Railroads bring us to Harrisburg, there forming most important connections, with the most remote sections of the West and Southwest, through the numberless branches and connections of the Pennsylvania Railroad and to Erie over the Northern Central and Philadelphia and Erie Railroads.

The extensions now in progress, of the Cumberland Valley Railroad will secure a connection with the entire railway system of the South and South West.

East of the Hudson River, the line will connect with:

1. The Hudson River Railroad.
2. The Dutchess and Columbia by a short branch.
3. The New York and Boston.
4. The Harlem.
5. The New York, Housatonic and Northern.
6. The Boston, Hartford and Erie and the various lines intersecting it as follows.

Housatonic, Danbury and Norwalk, Naugatuck, New Haven and Northampton, New Haven, Hartford and Springfield, New London Northern, Connecticut River, Norwich and Worcester, Fitchburg and Worcester, Providence and Worcester and Boston and Providence.

7. With the projected line to New Haven.

All of which as feeders must necessarily contribute largely to the business of this line, and afford to its connecting roads on the West, a means of distributing coal and freight through every corner of the New England States.

By preliminary surveys a desirable route has been found from Turners to the Hudson river, passing the celebrated Forest of Dean and numerous other Iron mines. Most of the mines lying contiguous to the line are at present neglected, from a want of fuel and the means of getting their ore to market at a reasonable cost. These obstacles being overcome by the completion of this road, the mines now lying idle can be profitably worked, new ones will be developed and become a source of considerable revenue to this section of the line.

A board of Engineers was convened to make the requisite examination and determine the best location for the bridge, who after careful deliberation decided that from Fort Clinton to Anthony's Nose would be the most practicable site, and that a suspension bridge can be constructed between these points that will be perfectly safe and durable.

The following table will show the estimated dimensions and strength of the proposed bridge.

Clear span	1,600	feet.
Length of Bridge between the Towers.	1,665	"
Total length of Bridge including approaches	2,449	"
Height of Bridge above high water	155	"
Working safe load for the Railr'd lines	2,400	tons
Working safe load for Highways	2,880	"
Total safe load for the Bridge	5,280	"
Load that would break the Bridge	25,171	"

There are to be 20 cables in 4 systems.

Each cable will be about 14 inches in diameter.

The cables will contain 871,195,750 feet or about 70,302 miles of steel wire.

Total weight of iron and steel in the Bridge 17,005 tons.

Total amount of Masonry 58,084 cubic yards.

The supended weight 9,651 tons.

Height of towers above water 280 feet.

Leaving the eastern end of the bridge and bearing arouud Anthony's Nose, the line will run near Peekskill, thence in a north easterly direction, passing near Lake Mahopac, the Tillie Foster and other mines, to its junction with its eastern, southern and northern connections. The preliminary examinations and surveys made upon the line have demonstrated the entire practicability of the whole route from Turners to the Eastern terminus.

The principal sources from which the company will derive its revenue are the transportation of passengers, coal, iron, general merchandise and live stock.

The item of Coal demands particular attention. The quantity of coal consumed in the states of Connecticut, Rhode Island and Massachusetts in 1869 was over 3,000,000 tons, which by existing means of communication with the mines was subjected first to railroad or canal, then to river, sound or ocean transportation and in many instances again to railroad transportation, before reaching its place of consumption. Without dwelling on the disadvantages arising from obstruction of navigation by ice for three months in the year and the expense attendant upon laying in a supply for the entire winter, so long in advance of the time the coal is consumed, attention is called to the following facts and comparative statement of the cost of transporting a ton of coal from shipping points to a few Eastern cities.

From the mines to Elizabethport, Philadelphia and the proposed bridge at the Hudson river the cost of freight and expenses is about the same. Starting even therefore, from these points and adding to the freight by water the shipping expenses, insurance, loss on two shipments and the usual allowance of five per cent. made by railroad companies, we have this result.

	From Elizabethport by Water.	From Philadelphia by Water.	From Hudson Suspension Bridge all rail 1¼c.p. ton p. m.
To New Haven	1.55 pr ton	2.55 pr ton	0.67 pr ton
" Hartford	2.05 "	3.05 "	1.14 "
" New London	1.75 "	2.80 "	1.30 "
" Providence	1.90 "	2.80 "	2.26 "
" Boston	2.25 "	3.15 "	2.61 "

In addition to the lower cost of freight, many other and important advantages will be derived from shipping by this all rail route. By purchasing direct at the mines the commissions of the coal shippers will be saved; the coal can be forwarded in quantities to suit dealers and at all seasons of the year, and property of much less value than wharves can be used; while a smaller area will be required, as it will not be necessary to have such large quantities of the article on hand.

In 1869 the shipments of Pig Iron from Elizabethport, Jersey City, and Hoboken to Massachusetts, Rhode Island, and Connecticut amounted to 54,086 tons.

The population of the Eastern states being in a great measure dependent on the West for the necessaries of life and exchanging as it were for them, the manufactured article required for the cultivation of the soil and household purposes, the interchange of the productions of the two sections results in an immense traffic, for which the present means of communications are inadequate.

From statistics obtained from official sources it is estimated that about one and a half million tons of through freight, consisting mainly of manufactures, grain, flour, wool, cotton, oil, and live stock, are annually transported between New England and the Western States, a large proportion of which is subjected to the expense and delay of ferryage and transhipment, a serious loss that would be avoided by the completion of an additional continuous line of railroad.

Taking the statistics of the present traffic as a basis on which to estimate the probable business of this line when completed, it may be reasonably expected that its revenue will be about as follows.

1,500,000 tons of coal 37 miles at 1¼ ct. per ton per mile	$690,000
500,000 tons of merchandise including live stock and tolls on Bridge	1,000,000
Mails and passengers	300,000
	$1,990,000
Deduct operating expenses 60 per cent.	1,194,000
Leaving a net profit of	$796,000

It is confidently believed that a careful consideration of the facts presented will show the necessity for an outlet from the coal region to New England, practicable at all seasons of the year, and an additional link between the Eastern and Western States affording facilities for cheap and quick transportation, and that a better opportunity than this project for a safe and profitable investment is seldom offered.

The preliminary arrangements of the company are so far advanced, that the attention of capitalists is now invited to the enterprise, with a view to procuring the funds necessary for an immediate prosecution of the work.

The undersigned will be happy to furnish any further particulars that may be desired.

CHARLES J. PUSEY, *Treasurer*,
78 & 80 Broadway, N. Y.

New York, Providence and Boston R. R.

The receipts from operations of this company for the years ending August 31, 1869 and 1870, were as follows:

	1869.	1870.
From passengers	$368,633 73	$376,752 95
" freight	244,493 00	269,189 78

Sold to cover interest in Steamboat Co.	$425,000
Issued in exchange for 6 per cent. bonds	87,000
	$512,000
7 per cent. improvement bond, issued 1866, due 1876, (not secured by mort.)	$100,000

DEBT OF EXTENSION ROAD FROM STONINGTON TO GROTON.

6 per cent. bonds due 1878	$200,000
6 per cent. bonds due 1881	50,000
	$250,000

The foregoing statement shows that the business of the road is steadily increasing, the gross earnings of the past year being $46,901 in excess of the year previous. Of this $26,056 was derived from local business.

The road has received very extensive repairs, and is now in better condition than it has been for several past years. 35,694 new ties and upwards of 1,300 tons of new English rails, all with the fish-bar fastenings, have been put on the track. 6,475 rails have been repaired and relaid. The truss and pile bridges have had the necessary repairs. Considerable progress has been made in filling the latter, and it is intended to complete the work during the next two years, and thus save a large annual outlay in repairs.

The company has paid one-half of the cost of a commodious depot at Hill's Grove. The depots, both for freight and passengers, at other stations, have received requisite repairs. The depot and freight house at Westerly are inadequate to meet the requirements of the traffic at that point, and new and large accommodations should speedily be afforded. Improvements are also required at Kingston. In the company's shop one first class passenger car, one new baggage car, and six eight-wheel platform cars, have been built.

A machine shop 100 feet in length, with a proper supply of new tools, has been built at Providence.

A first class new locomotive from the R. I. Locomotive Works, (the Narragansett,) has been added to the equipment of the road.

Turnouts, each over 400 feet in length, have been constructed at Noank and Quiambaug.

A branch road 1½ miles in length, has been constructed to the Westerly Granite Quarry by its

proprietors, to whom the company has lent 134 tons of rails, for which a rental of about $1,000 is to be paid annually.

Another branch has also been completed to Wickford by the Wickford R. R. Co., (about 3½ miles in length,) to be run in connection with a steamboat to Newport, thus enabling passengers to make the trip between the latter place and New York in less than eight hours. This connection is likely to prove of considerable value to us in the future.

The valuation of stock and materials on hand, including fuel, is $111,567.

The number of miles run for the year is 338,959, at a cost of 15.27 cents per mile for fuel.

The bridge over the Connecticut River has been completed, and the travel by the Shore Line has been larger than in any previous year. In connection with the other companies composing the Line it is proposed to build for the ferry between New London and Groton a boat of sufficient capacity to take over not less than four passenger cars, and with a commodious saloon for refreshments, thus obviating the only objection made by the traveling public to the route.

The company holds $488,000 7 per cent. bonds of the issue authorized in 1867, and $112,600 of stock. Of the former $163,000 is reserved to retire the remainder of the 6 per cent. bonds due in 1873 and 1878, leaving available in stock and bonds for future outlay $437,600.

In the opinion of your directors, it will soon be expedient to lay a second track from Providence to Wickford, the cost of which, it is estimated, will not exceed $300,000. Authority was given at the last annual meeting to do the work. Under the vigilant care of the Superintendent and his subordinates, the work on the road has been satisfactorily performed, and no accident has occurred during the year.

☞ The purchasing agent of the Baltimore and Potomac Railroad advertises in the *Prince Georgian* for 50,000 cross-ties, to be delivered along the line of the road in Charles county.

Portland and Rutland Railroad.

The first meeting of the stockholders of this company took place at Portland on the 15th inst. Some thirty or more gentlemen were present. Hon. Geo. W. Woodman was elected chairman, and John Neal, Esq., clerk. Mr. John A. Poor, chairman of the executive committee, announced that the requisite amount of stock had been subscribed to authorize the organization of the company, and that the proper legal notices had been given. It was therefore

Voted—That the stockholders accept an act in addition to an act to incorporate the Portland and Rutland Company, approved March 16th, 1870, authorizing the Portand and Rutland Railroad Co. to take the name of the Portland, Rutland, Oswego and Chicago Railway Company, by vote of the stockholders thereof at the time of the organization of the company.

A code of by-laws was adopted for the government of the corporation. Addresses were made by several gentlemen, among them Mr. Poor, who spoke of the great advantages that would be derived from the building of the road, and of the assistance and good wishes promised on every hand. "When this line is completed," he said, "the circuit of the globe will be reduced from 80 to 68 days. On the 27th of last September, the surveyors reported a very easy line from Oswego to the Hudson River. Prominent men have subscribed largely to this road. Gov. Stearns, of N. H., has expressed his sympathies with the road, and said that he would build 41 miles towards Portland. The friends of the line in Woodstock have elected Mr. Wm. Billings a director in it. At Woodstock was the only obstacle to contend against in the shape of the Green Mountains. Commodore Vanderbilt wanted to build the road, but the friends of the road were already committed elsewhere." The following gentlemen were elected directors: Gilbert Mollison of Oswego, N. Y.; William McEchron of Glen Falls, N. Y.; R. T. Hough, West Leyden, N. Y.; John Cain, Rutland, Vt.; Fred Billings, Woodstock, Vt.; O. F. Fowler, Bristol, N. H.; John A. Poor, Portland, N. C. Rice, Portland, and J. W. Lane, Hollis.

On motion the first Wednesday in August was appointed for the annual meetings of the company.

The contract of consolidation of the roads was not read, but it was

Voted, That the directors be authorized to enter into a contract for the purposes therein set forth, in such form or manner and such stipulations and agreements, as will enable said compmny to form a line of railway, under one management, between Portland and Oswego, or any portion of the distance, with the right to create a mortgage and issue mortgage bonds to the amount of one-half the estimated cost of each section of said line as held by the several companies named, and, that on the consummation of such contract of union and the execution of such mortgage, the said Directors may enter into contract for the building of said line, or of any section thereof, and said Directors are hereby authorized to appoint three Trustees as contemplated by said contract of union, the same to be Trustees under the mortgage, or mortgages, contemplated in such contract of union.

The meeting then adjourned to meet in Portland on the third Wednesday in January, 1871.

☞ One hundred men are at work at Hopefield, Arkansas, on the Memphis and St. Louis Railroad under the contractors, Messrs. McKee & Co.

Utica, Clinton and Binghamton Railroad.

We are authorized to state that an agreement has been made for leasing the Utica, Clinton and Binghamton railroad to the New York and Oswego Midland Railroad Company and the Delaware and Hudson Canal Company, and the necessary papers have been executed by the proper officers of the three companies. This subject has been for some time under consideration, and has been carefully examined in all its aspects; the plan proposed has been submitted to the Board of Directors of the Utica, Clinton and Binghamton Railroad Company, and has received their unanimous approval, and the whole matter will be presented, in detail, to the stockholders of the road at an early day. The terms of the arrangement are liberal, ensuring an interest of about six per cent. on the cost of the road, and must prove entirely satisfactory to the stockholders. The contract is made with the condition that the road shall be completed as a steam road to Utica, so as to connect with the New York Central at or near the depot, and this condition must be carried out before the contract goes into full operation. In order to do this, means must be provided and the Directors of the Utica, Clinton and Binghamton Railroad Company will be prepared in a few days to present their plan of operations.

We make this announcement with great satisfaction. The officers of the Utica, Clinton and Binghamton Company, who have given much time and anxious labor to the discreet accomplishment of the arrangement, deserve the praise alike of their stockholders and our citizens—*Utica Observer, Dec.* 16.

Cincinnati, Sandusky and Cleveland R. R.

A practically perpetual lease of twenty-five miles of this road, from Springfield to Dayton, has been made to the Cincinnati and Springfield Railroad for 35 per cent. of the gross earnings, the lessee to pay not only the running expenses, but all repairs, renewals, taxes, &c. The lease has been completed by the directors, and only awaits the confirmation of the stockholders of both roads. This twenty-five miles will become a part of the through line from the East, and thus will gain its pro rata of travel which has hitherto gone by another route. In addition to this an arrangement has been made with the Cleveland, Columbus, Cincinnati and Indianapolis which will throw a large North and Northwestern traffic, including the entire lumber business, over the entire length of the Sandusky road. The arrangement also contemplates of the "Red Line" a fast freight line over the whole road. This contract, together with some concession granted to the road from Springfield to Columbus, which is leased to the Sandusky, will, it is believed, add very largely to the earnings of the Sandusky, and make it soon a dividend paying road—*Boston Journal, Dec.* 17.

☞ The Boston *Advertiser* says: "It proves to be true, as reported, that the Rutland and Burlington railroad has leased the Vermont and Massachusetts railroad from Brattleborough to Grout's Corner for ten years. The terms of the lease, as currently reported at Brattleborough, are that the Rutland and Burlington road pay $48,000 a year for the first five years, and $60,000 for the last five years, and that they took possession Monday, December 12."

☞ The Delaware, Lackawanna and Western Railroad Company has declared a dividend of six per cent., payable on 31st December inst., in the stock of Morris and Essex Railroad Company.

☞ It is expected that the Frederick and Pennsylvania Line Railroad will be completed as far as Taneytown by the first of February.

Baltimore and Ohio Railroad.

At the regular monthly meeting of the Directors of this company in Baltimore on the 14th inst., John W. Garrett, Esq., was unanimously re-elected President for the ensuing year.

Upon taking the chair, Mr. Garrett delivered an address, in which he stated his appreciation of the high honor conferred upon him by the unanimous vote of the Board in calling him for the thirteenth year to the Presidency of the Company. He referred to the fact that the period during which he had acted in this capacity was one not always of fair weather and smooth seas, but the Company had often encountered severe tempests and great perils.

In the early part of his administration the Directors of the State of Maryland, of the City of Baltimore, and of the stockholders were frequently divided. It had been his aim to pursue under the auspices of the Board, such a policy as would prove to *all* interests that the objects of the management were, whilst properly protecting the great capital invested, and thus securing the relief due, by just returns on that capital, to the tax payers of the State and the city, and to the stockholders, to inaugurate and assist in the interests of the public the numerous great enterprises which have tended so much to develop the wealth of the City of Baltimore and our State, and of the vast territories which have been embraced through the connections of the Baltimore and Ohio Railroad. He would do injustice to his strongest feelings were he to fail to express his gratification that his efforts had been so far successful, as was shown by the unanimous vote which had just been announced, recalling him as in previous years to the Executive chair.

It was an evidence that the policy of the Board —broad, liberal, comprehensive—had been appreciated by the constituencies represented here, and was calculated to insure the successful prosecution of the great works that are yet to be accomplished.

Whilst the Washington County Road, the Winchester and Strasburg Road and the Parkersburg Branch Road had been completed; whilst the Central Ohio and Lake Erie Divisions and the Marietta and Cincinnati Road had been so largely improved and were prepared for the increasing business which is being commanded through these routes; whilst on yesterday the last channel-span of the great bridge over the Ohio river at Parkersburg had been closed; whilst that entire structure, as well as the similar grand and costly bridge at Benwood, would be soon completed; whilst the Pittsburg and Connellsville Road—an enterprise of vast significance and power, through which a volume of prosperity would flow upon our city—would in a few weeks be opened, yet much remains to be done.

The very facts of the vast growth of the commerce of Baltimore, and of the successful extensions of the Baltimore and Ohio Road, create necessities for new and additional routes and outlets. He therefore fully recognized the onerous nature of the duties which he consented again to undertake. When the fruition of the great business of the road to Pittsburg is about being realized, the importance of a continuous line through that city to Chicago becomes more palpable. The City of New York has derived an immense portion of its wealth from the trade of the Northwest. The Northwest, by availing of this most economical route, can add largely to its prosperity and power. Arrangements are in progress by which the early construction of this great line will be undertaken.

The heavy and costly work upon the Metropolitan Branch Road is being rapidly pressed, and it is hoped that this short and strong line, so interesting and important to the National Capital, will be completed within nine months.

The Valley Railroad of Virginia, through which results can be achieved most desirable and important to all interests connected with the line, should be vigorously prosecuted.

Baltimore and Washington possess the advantage of the use of the important Virginia North and South trunk road—the Orange, Alexandria and Manassas—extending from Alexandria to Lynchburg, one hundred and seventy miles. It is of special importance to the trade of Baltimore that this road shall be extended from Lynchburg to Danville.

It was unfortunate that the wise action of the City Council in aid of this road was defeated, chiefly by the active and illegitimate interference with the election in Baltimore of hostile Pennsylvania railroad interests. The object of these parties is to arrange to control Southern business, and by passing it by a tunnel through Baltimore, use their power and connections to force the trade over their lines in the interests of rival cities.

It becomes, therefore, of grave moment, in order to preserve the true geographical relations of Baltimore in a contest for Southern business, that the road from Lynchburg to Danville shall be built; and it will be proper to extend aid for this valuable object. By that road connections will be opened with the railways of North and South Carolina, Georgia, Florida, Alabama and Mississippi.

By effecting these connections the Baltimore and Ohio Company can maintain the interests of the commerce of Baltimore, and by framing its tariff so as to give the proper rates of transportation proportionate with distance, compel the Pennsylvania Road, after it has expended money in the South, as it has compelled its Northern Central Branch, to work under our influence and control at such reduced rate to Baltimore, in order to complete, as to subordinate its schemes and plans and force it, most unwillingly, to aid us in promoting the interests of Baltimore.

Heretofore this Company has succeeded not only in maintaining such low rates to Western points as to increase business vastly, but has forced the Pennsylvania Road to maintain a uniformly large difference of rates in favor of Baltimore, and against its own nominal terminal city, Philadelphia.

The Lynchburg and Danville Company will soon be prepared to present a programme under which it is hoped the work upon the extension can be soon commenced.

Mr. Garrett had the satisfaction of stating to the Board that a first-class line of steamships had been organized, and was now in operation between Liverpool and Baltimore. A few weeks since it became desirable for the Baltimore and Ohio Company to order the shipment from Liverpool of two thousand tons of steel rails by steamers. These shipments formed the basis for two cargoes, viz: of the steamships Ottawa and Caspian. These fine steamships are now on their way to this port. They are owned by Messrs. Allan, of Montreal and Liverpool, who control a fleet of twenty-three first-class steamships. The Hon. Mr. Hugh Allan has recently visited our city, and after examining its advantages and relations with the West and South, determined to instruct that, for the purpose of testing the route, a fortnightly line should be established. The first-class steamers of the Messrs. Allan will therefore hereafter sail regularly every two weeks from each side.

It proper to add that the Oceanic Steamship Company desire to make arrangements also for a line between Liverpool and Baltimore, and it is probable that this enterprising company will build a number of superior steamers to form a permanent Liverpool and Baltimore line.

The rapid development of the commerce of Baltimore must soon demand that a first-class ship canal be constructed to unite the waters of the Upper Chesapeake with those of the Delaware Bay. In view of the vast regions, Northwest, West, Southwest and South, which are using, and to a continuously increasing extent, Baltimore as their entrepot, the economy that can be effected by this canal makes the enterprise one of national importance.

Baltimore enjoys striking advantages for coastwise commerce with the Southern States, with the West Indies and with South America. If, by the construction of a canal of but twenty miles in length, more than twenty-four hours' navigation can be economized in another and extensive branch of commerce, the work must be undertaken at no distant period.

As showing the effect of the combinations of the Baltimore and Ohio Company, the President stated that the revenue for the past month of the road and its branches was $1,076,365 72.

Mr. Garrett, in closing, stated that from that strength which is the result of union and vigorous co-operation, he trusted all the valuable enterprises to which he had referred would be accomplished.

List of U. S. Patents.

Issued for Improvements relating to Railroad Construction, Rolling Stock, &c., for the week ending Dec. 13, 1870, and each bearing that date. Reported weekly for the AMERICAN RAILROAD JOURNAL, from the Office of DAVID A. BURR, Solicitor of Patents and Attorney in Patent cases, Washington City, D. C.

No.

110,008.—Exhaust Valve, William A. Carns, Malden, Mass.

110,035.—Piston Rod Packing, William Hartley, Rockford, Ills.

110,044.—Steam Jet Boiler Tube Cleaner, Roland C. Hussey, Milford, assignor to himself and Augustus O. Corbett, Boston, Mass.

110,082.—Safety Valve, Henry F. Snyder, Williamsport, Pa.

110,088.—Car Coupling, Augustus F. Street, Zanesville, Ohio.

110,093.—Railway Axle Box, James Wardrobe, Charles D. B. Fisk, John F. Curtis and George Fetley, Carlin, Nevada.

110,114.—Steam Pipe Coupling for Railroad Cars, Joseph Conner, Philadelphia.

110,117.—Car Axle Box Cover, David Cowley, Erie, Pa.

REISSUE.

4,202.—Combined India Rubber and Steel Springs, The National Spring Company of New York, assignee of Erastus T. Bussell, Patent No. 10,280, dated November 29, 1853, extended seven years.

EXTENSIONS.

Improvement in R. R. Car Seats and Couches, Theodore T. Woodruff, of Philadelphia. Letters Patent No. 16,160, dated Dec. 2, 1856 and 16,159 dated Dec. 2, 1856, reissued March 17, 1863.

Holyoke and Westfield Railroad.

Work on the Holyoke and Westfield railroad was commenced at Westfield on the 10th inst. The contract with the Canal railroad is for $375,000, of which $175,000 is to be paid in cash by monthly instalments until the road is completed, and the remainder in the bonds of the road, which are to be issued and guaranteed by the Canal road. The expense incurred for preliminary surveys is assumed by the contractors, who also agree to construct in Holyoke a passenger house 80 by 80 feet, and a freight house 60 by 150 feet, both of brick, with slate roofs. The contract includes turn tables, tanks, and all the appurtenances of the road complete, and the branch roads necessary for connection with the mills in Holyoke. The land damages are assumed by the Holyoke and Westfield company. Smith & Ripley, of New York, have sub-contracted for all the grading and masonry, which they agree to complete by October, 1871.

Cheap Fuel.

Washington, D. C., Dec. 19, 1870.

EDITOR AMERICAN RAILROAD JOURNAL.

SIR:—In your issue of the 3d inst., I find a long, interesting, and useful article on Peat, and calling on parties who have information to communicate in regard to "cheap fuel for the people" Under this invitation I write to point out an invention to supply not only the poor man with fuel at a cheap rate, but a fuel adapted to rich and poor for domestic, manufacturing and railroad purposes, &c. I was witness to the making of specimens the other day by the patentee who has just got a patent for the article. It is made of coal dust, waste, or refuse of coal, of which I understand there are millions of tons now of no use to miners, dealers in coal, or anyone else. The patentee takes this stuff and mixes it in certain proportions with Silicate, *with*, or *without* peat, sawdust, or saltpetre, and after the mixture has gone through a chemical process incident to it, and pressure applied, a coal is formed which is hard and fit for transportation in 10 or 12 days, and when broken with a hatchet into junks, presents as near as possible the natural appearance of coal proper, is easily ignited, and burns with but little smoke, no sulphur or disagreeable smell, and leaves little or no ash, no clinkers, nor slates, and gives out more heat for the size and weight of the fuel than coal proper. It can be manufactured, I am told, at from a dollar to two dollars a ton, and will compete in price, &c., &c., with the *best coal*, and is really what may be called "*a cheap fuel for the people.*" This discovery invites attention and gives promise of reward not only to mine owners, who have mountains of waste coal dust, but dealers in coal in cities and towns who are pushed to get rid of it as a useless incumbrance.

Respectfully,

H. W. DERMODY.

Silver Mine in Wisconsin.

From Mr. H. W. Wheeler, of Oneota, who was of the party which lately visited this mine on the Amethyst, we have learned some further particulars in relation to the mine in addition to what we published last week. The vein is about four feet wide, well defined and projects above the surface from four to six feet, the rock being much harder than that surrounding it. It can be traced for miles through the country, and into the waters of Thunder Bay. Captain Beck had a force of twelve or fifteen men employed, and had sunk a shaft about ten feet in depth on the vein. Mr. Wheeler states that at least fifty per cent. of the rock obtained from the shaft seemed to be pure silver. An assay of a small piece of the ore from this mine—an average specimen—made yesterday by Dr. S. S. Walbank shows it to contain $5,293 60 to the ton! A marvellous yield, indeed. The ore or vein rock is a rich argentiferous galena, containing native silver, both brittle and crystalized sulphide of silver, a small quantity of zinc blende and very little or no other base metals. There is no question but that the north shore, in the vicinity of Thunder Bay, is very rich in silver veins. It is thought by many that the disclosures at Silver Island and at the mine above referred to, are but the precursors of other and richer discoveries that will follow from a more thorough examination of the country.—*Superior Times*, Dec. 10.

☞ The sale of the Gettysburg (Pa.) Railroad, with all its appurtenances and franchises, to Mr. James M. Townsend, of New Haven, Conn., for the sum of $181,000 has been confirmed by the Supreme Court.

Philadelphia and Reading Railroad.

Points of supply and distribution of Anthracite Coal from Schuylkill County, of Bituminous from Harrisburg, and Anthracite from Harrisburg, Allentown and Alburtis, on the Philadelphia and Reading Railroad, for the year ending November 30, 1870.

Amount of coal received from various Lateral Railroads in Schuylkill Coal Region:

Schuylkill Valley Railroad	109,068
Mill Creek Railroad	122,303
Mahanoy and Shamokin Railroad	1,066,694
Total at Port Carbon	1,298,065
Mount Carbon R. R. at Mount Carbon	121,525
Mine Hill and Schuylkill Haven Road at Schuylkill Haven	978,863
Schuylkill and Susquehanna Railroad at Auburn, and via P. G. & L. C. R. R.	151,852
Little Schuylkill Railroad at Port Clinton	477,160
	3,022,465
Received at Harrisb'g & Dauphin. 205,145	
" Allentown & Alburtis 83,397	
	288,543
	3,311,008
Bituminous received at Harrisburg	439,981
Total	3,750,989
Coal passing over laterals for shipment by canal	531,070
Coal shipped west via N. C. R.R.	196 358
Coal shipped west from Pinegrove via S. & S. R. R.	30,413
Coal consumed on laterals	124,673
	882,515
Total of all, tons 2240 lbs	4,633,504

Narrow Gauge Railroad.

A number of gentlemen from Reading, Lebanon, Harrisburg and Allentown are making arrangements to build a two feet six inch gauge railroad from Allentown via Reading and Lebanon to Harrisburg, running along the Tulpehocken and Swatara creeks, for the purpose of carrying local freights and passengers.

They propose using the Farley engines on a narrow track, as the cost of construction and equipment is only one-third that of the wide gauge roads of four feet eight inches. The speed on these roads is from twenty to twenty-five miles an hour, and freight can be carried at one cent per ton per mile and yield a handsome revenue upon the investment.

These roads are used extensively in Wales and in many places on the Continent, in Australia and in Canada. In the latter place they are now building a road of this kind a distance of one hundred and twenty miles. The Pacific Railroad Company are building one a distance of ninety miles as a tributary to their main road.—*Lebanon (Pa.) Courier.*

☞ Edward S. Scranton has been elected Secretary and Treasurer of the Shore Line Railroad *vice* W. T. Bartlett, resigned. After this month the office of the company at New Haven will be closed, and its general business transacted at the New York offices of the New York and New Haven Railroad to which the Shore Line is leased.

☞ Trains on the Portland and Ogdensburg Railroad are now running to Baldwin, 4½ miles beyond Steep Falls.

☞ The contract to build the last six miles of the Great Falls and Conway Railroad extension has been taken and the work begun.

☞ The Hecla Mining Company will pay a dividend of $5 per share Jan. 5.

Railways in Russia.

The following is a list of railways constructed and in course of construction:

OPEN.	Miles.
St. Petersburg to Pavlovsk	17
" Oranienbaum	32½
" Warsaw	669½
Branch from Wilna to Wirballen	118
" to Baltic Port	258½
" to Moscow	402½
Rybinsk to Bologoe	186½
Torjok to Ostachkoff	66
Moscow to Yaroslav	144
" to Nizhni-Novgorod	273½
Branch to Ivanovo	56½
" to Smolensk	262
" to Voronezh	367½
Riazhsk to Skopin	22
" to Morshansk	80½
Kozlof to Tambof and Umet	117½
Riga to Mitau	26
" to Dunaburg, Vitebsk to Orel	623
Orel to Griazi	189
Griazi to Borisogliebsk	130
Tsaritsin to Kalatch	481
Moscow to Kursk	335
Kursk-Kharkof-Taganrog-Rostof	520
Rostof-Novo Tcherkask	48
Kursk to Kief	294½
Kief to Odessa	545½
Branch to Wolotchisk	100
" to Tiraspol	29½
Balta to Krementchug	253
Warsaw to Brest	128
Warsaw to Thorn	142
Branches to Austrian Frontier	210
Finland Railway—St. Petersburg to Helsingfors and Tavarthus	297½
	6,997

IN COURSE OF CONSTRUCTION.	
Smolensk to Brest	353
Libau to Kovno	183
Novgorod to Tchudovo	45
Lyk-Byalortok-Brest	150
Brest to Berditchef	334
Voronezh to Rostof	337
Tambof-Saratof	155
Borisogliebsk to Tsaritsin	233
Tiflis to Poti	156
Tiraspol to Kishinef-Jassy	41½
Ivanovo-Kineshma	58
	2,055

It will be seen thus that there are in Russia some 7,000 miles actually open (one only—the branch of the Kief-Oders line—though finished, not being yet publicly open) and some 2,000 more in actual construction, parts of which will be opened in a few months. There are besides many others which are projected and agreed on by the Government, but for which the concessions are not granted. During the Crimean war there existed but two railways, the suburban one of St. Petersburg to Tsarskoe-Selo (17 miles), and the Moscow-Petersburg (400).—*London Railway Times.*

☞ The railway bridge over the Sutlej river, completing through railway communication between Calcutta and Lahore, was opened in state by the Maharajah of Putteala on the 15th of October.

☞ Track laying has been commenced on the line of the new railroad from Schenectady to Duanesburg, on the Albany and Susquehanna railroad. The road is about 14 miles in length.

☞ The Cayuga Midland Railroad Company has just been formed, to build a road from Auburn to Ithica, with a branch from some point in Lansing to Freeville or Dryden village.

☞ The Chesapeake and Ohio Canal will be closed on the 25th of December.

American Railroad Journal.

Saturday, December 24, 1870.

Stock Exchange and Money Market.

There has been unusual excitement in the Money line since our last. The available supply has been much less liberal, owing partly to the outflow of currency to the West and South West, but mainly to the manipulations of speculative operators interested in breaking down values at the Stock Exchange. The demand for temporary aid has been decidedly urgent, on the more active days of the week, and to even the more prominent of the Stock Exchange firms 7 per cent. per annum in currency on call has been the minimum rate; while in many instances, the full legal rate in gold has been paid, and not unfrequently a fractional commission has been exacted for the use of funds from one day to another. The pinch has been severely felt in the Stock line. The Government houses have had their wants provided for, with satisfactory promptness, at 6@7 per cent. per annum in currency. The discount market has been moderately active at from 7@9 per cent. per annum, on the better grades of business paper, which have been most sought after by private buyers, the banks having shown less partiality for permanent engagements, in the face of the pressing need and high price of Money on call. The city banks in their last weekly return, made an unexpectedly favorable exhibit, the specie reserve having been augmented over two millions; while the loss of deposits was $2,156,964, and of legal tender notes, $1,681,942; and the loan and discount averages were cut down $1,768,314. The reserve of gold and legal tender notes, over the 25 per cent. of obligations required by the Banking Act, was $9,377,966 against $8,468,162 the preceding week, showing a gain of nearly a million dollars. The city bank exchanges last week averaged nearly 93 millions a day. The exchanges on Monday were up to $139,664,404; and on Tuesday of the current week, they were $102,866,191. The U. S. Sub-Treasury reports a slight increase in its coin balance, with a very decided gain in its currency reserve, the latter chiefly through transfers of funds from other points. At the close of Wednesday there was an easier feeling apparent in Money with 7 per cent. currency quoted as the ruling figures.

Washington dispatches of Wednesday made the coin reserve of the Treasury Department on that day $99,700,751 including $19,228,500 represented by outstanding coin certificates, and the currency balance, $27,948,944.

The specie reserve of the city banks according to the latest return is $17,980,573, against $30,068,095 same time last year. The city bank deposits are now $192,024,391, against $181,073,455 week ending Dec. 18. 1869. The legal tender reserve amounts to $47,442,080, against $44,812,278 same time last year. The circulation now stands at $32,154,358, against $24,102,303 same time last year. The loans are now $266,378,918, against $252,834,914 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $97,967,251 a day, against a daily average of $88,932,250 the preceding week. The current week's exchanges average about 121¼ millions a day. The city banks, last week reported a gain of $2,044,725 of specie, with a loss of $2,156,964 of deposits, and $1,681,942 of legal tender notes. They reduced their loans $1,768,314; and their circulation, $81,119.

The city bank exchanges on Wednesday were 83⅝ millions.

National Bank notes to the amount of $660,040 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $387,667,098, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $33,171,339 leaving, with the existing 1,612 banks, (having an aggregate capital of $430,299,301,) an actual circulation at this date, of $304,495,759. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $345,707,650; and for the public deposits, $15,819,500—making a total of $361,527,150. The Treasury Department last week redeemed and destroyed $493,200 of worn and mutilated fractional currency, and issued $421,335 of new.

The cash balance in the Treasury Department at the close of business on Monday, was $28,699,948 in currency, and $99,518,353 in coin, including $19,500,000 in certificates.

The U. S. Sub-Treasury receipts, week ending with Dec. 17, were $4,926,822 in coin, (including $1,431,000 from customs duties,) and $7,708,659 in currency; payments, $4,718,837 in coin, (including $849,000 of coin interest,) and $6,056,519 in currency; balance at the close of the week, included $60,320,156, of coin, against $60,112,170 the preceding Saturday, and $8,041,570 of currency, against $6,389,430 at the close of the preceding week. The business of the Office on the first two days of the current week, was as follows. On Monday, receipts, $426,306 in coin, (including $198,862 from customs,) and $270,523 in currency; payments $87,693 of coin (including $61,238 of coin interest), and $593,850, of currency. On Tuesday, receipts, $309,780 in coin (including $269,759 from customs), and $5,447,956 in currency; payments, $68,873 in coin (including $26,115 of coin interest) and $330,569 of currency. The balance at the close of business on Tuesday included $12,885,630 of currency, and $60,899,676 of coin, against a balance a week previous of $6,053,628 currency, and $60,269,677 coin.

The aggregate receipts of the U. S. Sub-Treasury in November were $56,296,837, including $9,576,224 from customs; aggregate payments, $62,134,566, including $14,025,558 of coin interest.

The U. S. Sub-Treasurer issued in November $4,741,000 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $1,177,381 of coin certificates, received for customs.

The U. S. Sub-Treasury balance, at the close of business on Wednesday was $61,395,360 of coin, and $12,726,481 of currency.

Government revenues has been quite moderate in yield, since our last. The excises during the week yielded about 3¼ millions; customs at the port of New York, $1,367,381, and at the outports about $455,000 (in coin) more, making the grand total income for the week equal to about $5,301,000 in currency. The income of the Government, from excises, since July 1, 1870, has been about 81¼ millions.

In view of the activity in Money and the excitement in Stocks, the Gold speculation has been of less than customary interest to operators, and the price has fluctuated but little, the range of the week having been from 110⅝@111¼, and the closing quotation on Wednesday 110¾, against 111 the preceding Wednesday. There has been a very moderate custom and light export inquiry noted. On Wednesday, Government sold $1,000,000 of gold at from 110 62@110 65. The aggregate of the bids was $4,518,500.

The customs revenue on Wednesday was $398,000. The coin interest disbursements at the Sub-Treasury were $32,901.

Under the December programme of the Treasury Department, Government will sell Gold during the remainder of the month, as follows: Wednesday, December 28, $1,000,000. And will buy in, of Five-Twenties as follows: Thursday, December 29, $1,000,000.

The export drain was $265,929 week ending with December 17, against $800,468, week ending with December 10, $519,868 week ending with December 3; $449,984 week ending with November 26; $655,078 week ending with November 19; $410,134 week ending with Nov. 12; $3,156,924 week ending with Nov. 5; $303,562 week ending Oct. 29; $556,180 week ending Oct. 22; $654,323 week ending with Oct. 15; $802,174 week ending with Oct. 8; and $465,260 week ending with Oct. 1. The shipments thus far this year have been about 57⅞ millions, against nearly 31 millions same time in 1869; nearly 69⅞ millions same time in 1868; 47⅛ millions same time in 1867; over 60⅛ millions same time in 1866; and 29¼ millions same time in 1865. The exchanges at the Gold Exchange Bank, which were 57⅜ millions on Friday, of last week, were 34⅜ millions on Monday of this week, 15½ millions on Tuesday, and 15⅜ millions on Wednesday.

The customs demand for Gold last week, averaged $238,500 a day; thus far, this week, it has averaged $234,315 a day, or equal to a weekly aggregate of $1,405,890. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $40,710; and since Jan. 1, 1870, $11,533,494, against $14,734,162 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $136,144,673 against $127,106,409, same time in 1869.

The exports of specie, from this port, last week, were $265,929 against $309,946 same week last year; and since Jan. 1870, $57,804,691, against $30,917,244 same time in 1869. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $849,000; and since Jan. 1, 1870, $85,618,464 against $89,607,344 same time in 1869.

The customs revenue at the port of San Francisco, from Jan. 1 to Dec. 8th, was $7,228,190, against $8,018,902 same time last year.

The specie exports by steamer and railway, from San Francisco, from Jan. 1, 1870 to Dec. 8th, were $31,982,246, against $37,078,813 same time last year.

Foreign exchange has been rather firmer, on a lighter offering of bills, but has been without notable activity. Bankers' sixty day bills on London closed on Wednesday at 108⅞@109⅛; sight bills on London, 109¾@110. The offerings of produce bills have been quite liberal. The week's exports of domestic produce have been to the currency value of $5,903,096, and since January 1, 1870, $190,751,622, against $192,778,201 same time in 1869.

Government securities have been rather stronger in price, notwithstanding the Money pressure; and the offerings of bonds have been quite moderate, but the demand has not been active for any issue.

U. S. sixes of 1881 closed here on Wednesday of the current week at 113⅛@113⅜; U. S. Five-Twenties of 1862, 107¾@107⅞; U. S. Five-Twenties of 1864 at 107¼@107½; U. S. Five-Twenties of 1865, 107⅜@107⅝; U. S. Five-twenties of 1865 consolidated, 109⅝@109¾; U. S. Five-Twenties of 1867, 109⅞@110; U. S. Five-twenties of 1868, 110⅛@110¾; U. S. Ten-forties at 106⅛@106¾; U. S. Six per cent. currency bonds, 110@110¼.

State bonds have been in fair demand, but at irregular prices, closing generally higher.

Railway bonds have been in good request for investment purposes at generally firm prices. Central Pacific Sixes have met with a free sale closing with 92¾ bid and 93 asked. Chesapeake and Ohio Sixes have been inquired for at 90 and interest. Union Pacific Sixes have been quoted at 80¼@80½.

Railway and miscellaneous share property has been very active, but much depressed and unusually variable as to price, under the artificial stringency in Money, closing feverishly and irregularly. Union Pacific stock has been quoted down to 11⅞@12, closing at 12@12⅛. Western Union Telegraph closed at 45⅝.

The latest quotations at the London Stock Exchange compare as follows with former returns:

* Ex-dividend.

General Business has been more active in the Cotton, Breadstuff and Provision lines, at, however, variable prices. Breadstuffs and Provisions closed with more firmness. Cotton left off about steadily. Middling upland cotton closed on Wednesday at 15⅜@15½ cts. per lb. The stock of cotton now here is given at about 78,500 bales. The receipts at the port this week, have averaged about 7,250 bales a day. The receipts at all the ports, since Sept. 1, 1870, have been 1,366,943 bales, against 1,090,355 bales same time in 1869–'70; exports same time 742,750 bales, against 575,275 bales same time in 1869–'70; stock on hand at latest dates, 473,100 bales, against 326,500 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 14,290 pkgs., against 20,580 pkgs., same time in 1869. From Boston, 7,478 pkgs. in 1870, against 7,076 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves have been in good request from 10@20c. per lb.; week's receipts, 5,704. Milch cows quiet at $40@$110 each, receipts, 91. Veal calves have been in fair demand at from 5@12c. per lb.; receipts, 1,511. Sheep have been in good request at from 4@10½c.; lambs at 5½@11c. per lb.; receipts, 28,993. Swine continue in fair demand at 7½@7⅝c. per lb.. all live weight; receipts, 25,043.

Foreign Goods have been less active, in the wholesale line, and values have been unsettled. The dry goods entries at this port, last week, were $1,644,104, making with the general merchandise imports a total of $6,318,552, against $6,012,490 the preceding week.

Freights have been moderately active, and rates have been quoted firmer. For Liverpool we quote flour at 2s. 6d.@2s. 9d. by sail, and 3s. by steamer per bbl.; grain at 6½d. by sail, and 7½d. by steamer per bushel; cotton at ⅝@$\frac{5}{16}$d. by sail and ½@$\frac{9}{16}$d. by steamer per lb.; and heavy goods 20s.@30s. by sail, and 30s.@55s. by steamer, per ton. Total number of vessels in port on Wednesday, 488.

The following will show the exports (exclusive of specie) from New York to foreign ports or

the week ending December 20th, and since the beginning of the year:

	1869.	1870.
For the week.....	$3,503,920	$5,903,096
Previously reported..	189,274,281	184,848,526
Since Jan. 1.....	$192,778,201	$190,751,622

The imports for the week ending Dec. 17, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,043,778	$1,644,104
Gen. merchandise.....	2,660,438	4,674,448
Total for the week.....	$3,704,216	$6,318,552
Previously reported....	278,848,973	288,121,184
Since January 1.....	$282,553,189	$294,439,736

☞ The Eastern (Mass.) Railroad is about to extend its double track from Beverly to Ipswich.

HARVEY FISK. A. S. HATCH.

☞ FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,

No. 5 NASSAU ST.,
NEW YORK, Dec. 22, 1870.

FUNDING FIVE TWENTY BONDS.

Within the past three months a very large amount of Five-Twenty Bonds have been funded through our office into the FIRST MORTGAGE BONDS of the CENTRAL PACIFIC RAILROAD COMPANY, besides large sales of the same securities for new investments.

We deal in Central Pacific Bonds the same as in Government Securities, and regard them as affording the desired medium for funding Five-Twenty Bonds, *without reduction of interest and with unimpaired security.*

☞ *They are well known, and have a ready market in all the money centres in this country and Europe, are daily quoted at the Stock Exchange, and can be sold at current market price as readily as the Bonds of the Government.*

We keep a supply of these Securities on hand, and furnish them at current market price, which to day is 92½@93.

This price includes the coupon due Jan. 1, for which three per cent. in gold will be received by the purchaser, on bonds bought during this month.

Proceeds of $1,000 5-20 bond of 1867, sold to-day at 109¼	$1,100 00
Cost of $1,000 Central Pacific bond, to-day at 92½	925 00
Difference realized	$175 00

We continue, as heretofore, to buy and sell Government Bonds, make Collections, receive deposits subject to check at sight without notice, and allow interest on balances, and do a general Banking business.

FISK & HATCH.

☞ The Dayton and Ohio Mineral Region railroad has filed certificates. The proposed road runs through Montgomery, Green, Clarke, Madison, Fayette, Franklin, Pickaway, Fairfield, Perry, Morgan, Muskingum, Noble, Guernsey, Monroe and Belmont counties to Bellair. Capital $2,500,000.

☞ The formal opening of the Walkill Valley Railroad from Goshen to Newpaltz took place on the 20th inst. This road is a part of the proposed West Shore Hudson River Railroad from New York to Albany.

☞ A record of the killed and wounded on the railroads of the United States during the year ending October 31st, 1870, has been published. The total number of killed was 168, and the wounded 484.

☞ The change of gauge in the track of the Great Western Railway of Canada, between Hamilton and Toronto, has been completed.

☞ The branch road from Windsor Locks, on the New Haven, Hartford and Springfield railroad, to Suffield has been opened for regular travel. The road will eventually be extended to Westfield.

☞ Nearly eight miles of iron have been laid on the Cairo and Fulton Railroad. The whole twenty miles will be down by the 1st of January,

Journal of Railroad Law.

RAILROAD COMPANIES—DUTY IN CONSTRUCTING WORKS—WHEN LIABLE FOR NEGLIGENCE—NO LIABILITY FOR CULVERT BROKEN BY EXTRAORDINARY FLOODS.

The facts in the late case of The Pittsburg, Fort Wayne and Chicago Railroad Company *vs.* Gilleland, and Same *vs.* McClinton, (56 Penn., 445,) are stated in the following important opinion by

AGNEW, J.—The *narr.* in this case is not free from circumlocution, and is perhaps faulty in this respect; but we cannot avoid seeing that it is for an injury caused by the continuance, after notice, of an insufficient culvert so unskilfully and negligently constructed by the former proprietors of the railroad, as not to vent all the water that flows down the channel, over which it is built, in the ordinary seasons of high water. It is founded upon the duty of a railroad company to construct its works with proper skill and care, and with a due regard to the features of the ground over which its road passes. This stream is not large, yet it is obviously so important, that the safety of the railroad and the welfare of the landowner require its waters to be passed by an adequate culvert. The declaration is, therefore, sufficient to support the judgment, and we must proceed to examine the assigoments of error involving the principles on which the case was tried.

The 1st point of the defendants asked the Court to charge that the injury from an insufficient culvert fell within the special remedy given for the appropriation of the land, and the damages arising therefrom. The charter requires a description to be filed of the rights and interests intended to be appropriated, and delivery of a copy to the owner, and thereupon the Court, or a judge in vacation "shall appoint by warrant three disinterested freeholders of such County, to appaise the damages which the owner of the land may sustain by such appropriation;" "they shall consider the benefit as well as the injury which such owner shall sustain by reason of such railroad, and shall forthwith return their assessment of damages, setting forth, etc." Thus with the survey before the viewers, the natural surface of the ground indicates the embankments and excavations to be made, the streams to be crossed, and the chasms to be filled.

When the question arises to the mind of the viewer what injuries the property will suffer from the railroad on the line before him, the answer will be indicated by the works to be put there. Then the question springs up how put there? Clearly it must be answered, in the way such works are ordinarily constructed, according to the usual practice and mode of skilful engineering. If it be a fill or an excavation, by ascertaining its height or its depth, and considering its effect upon the land, and its uses, an estimate of the injury may be formed. If a chasm is to be bridged or stream to be culverted, its effect may also be perceived. All the probable and natural consequences of the works in producing injury must be allowed for, such as would fairly arise to the mind of an intelligent viewer in considering the effects of such works. So far judgment and reason have a guide, but no estimate of damages can be founded upon an expectation that the company will omit its duty, or on the supposition that it will so negligently and unskilfully construct its works as to produce injury. The extent of its failure, or whether it will fail at all, is unknown, and can furnish no guide to govern the estimate. It would be unjust to the company, and a violent presumption on the part of the viewer, to assume that a railroad company would fail to build a culvert as necessary to the security of its road-bed as the welfare of the landowner. On such a principle of estimating damages, roads could not be built, and a Court on appeal, would set such a finding aside. If, then, a water course must be culverted, the presumption must be that it will be sufficiently done, and any neglect of duty, must be left for future remedy. The contrary presumption is more violent than that adjacent property may take fire from the sparks of a passing engine, and yet, though this often happens, it is held to be too remote, uncertain and contingent to be a proper ground of damages: Lehigh Valley Railroad Co. *vs.* Lazarus, 4 Casey, 203. It is the "real damage, and no more," the legislature intends to provide for: id., 206. Or, as said in Watson *vs.* Railroad Co., 1 Wright, 480, the damages which are the direct and immediate consequence of construction. The principle and the distinction are well stated by Shaw, C. J. in Dodge *vs.* County Commissioners o' Essex, 1 Am. Railway Cases, 336. After stating that authority to construct any public work carries with it an authority to use the appropriate means, and damages arising from such use may be compensated, he proceeds to say: "Of course this reasoning will not apply to damages occasioned by carelessness or negligence in executing such work. Such careless or negligent act would be a tort for which an action at law would arise against him who commits or him who commands it. But where all due precautions are taken, and damage is still necessarily done to fixed property, it alike is within the letter, and the equity of the statute, and the County commissioners have authority to assess the damages." The statutory view was therefore not the remedy for the insufficiency of the culvert afterwards built, and we are brought now to consider more directly the common-law liability of the defendants for the injury.

And on this point there is no doubt, upon general principles and adjudicated cases. The entry of a company to build its railroad being lawful, it stands as if it were on its own ground, and the maxim applies, *sic utere tuo ut alienum non ladas.* It should so perform its act as not to carry over its injurious consequences beyond the hurt it may lawfully inflict. It is said in Hilliard on Torts, 125, and numerous examples are there adduced, that acts innocent and lawful in themselves may become wrongful when done without a just regard to the rights of others, and without suitable reference to the time, place or manner of performing them. The test of exemption from liability for injury arising from the use of one's own property, is said to be the legitimate use or appropriation of the property in a reasonable, usual and proper manner, without any unskilfulness, negligence or malice: Carbars *vs.* Auburn, 22 Barb., 297. The distinction is vital, says Thomas J. in Rockwood *vs.* Wilson, 11 Cush., 221, for nothing is better settled than that if one do a lawful act upon his own premises, he cannot be held responsible for injurious consequences that may result from it, unless it was so done as to constitute actionable negligence. But lawful acts may be performed in such a manner, so carelessly, negligently, and with so little regard to the rights of others, that he who, in performing them, injures another, must be responsible for the damage: Burroughs *vs.* Housatonic Railroad Co., 2 Amer. Railway cas., 35. If one should build a road from his house to his barn over a rivulet just below his neighbor's land, he would clearly be liable for the injury arising from an insufficient culvert which backed up the water when ordinarily high, and by its overflow destroyed his neighbor's garden, filled his cellar with water, and cracked the walls of his house. The only difference between a railroad company and an individual, in such a case is, that the former is not liable for the necessary consequences of the location and proper construction of its road, except so far as it is made liable by its charter. But the very exemption from the necessary consequences is a reason why the work should be skilfully and carefully done, so as not to extend their hurtful effects beyond the actual necessity of the case. The company exercises a part of the public right, but the State, as *parens patriæ* is always careful to her children, doing no unnecessary hurt, and in delegating this power to a private company of men, she does not intend that they shall be less careful of the interests of her people than herself. These principles would apply to a company standing upon its own ground, and certainly their force is not lessened when the entry is upon the land of another, and the right of eminent domain exercised there. The citizen must often suffer for the public good, but his suffering should not be aggravated by unskilfulness and carelessness. The principles are found underlying many cases, which though varied in circumstances, are based upon the same foundation of good morals and beneficent government. The rule, says Gibson, C. J., is that unless there has been supineness on the other side, negligence in the enjoyment of property or the exercise of a right is cause of redress in equity and at law: Fisher *vs.* Knox, 1 Harris, 622. Thus it was held in Commissioners of Kensington *vs.* Wood, 10 Barr., 93, that those Commissioners who were authorized to grade and pave a public street, were liable for injuries accruing to a private right of way down which the water was diverted, for they were bound to make proper provision for carrying off the water. So a city in possession of a public wharf, exercising exclusive jurisdiction over it, and receiving tolls for its use, was held liable for negligence in permitting a pile of iron to lie there until a rise in the river drove a steamboat upon it, which was injured by a floating body, while backing off from the pile into the stream: Pittsburg *vs.* Grier, 10 Harris, 54. See also Erie City *vs.* Schwingle, id., 384. The principle was pushed still farther in Godley *vs.* Hagerty, 8 id., 387, and Carson *vs.* Godley, 2 Casey, 111, in which the owner of a warehouse was held liable to his tenant and his tenant's laborer for the insufficiency of its structure to answer the purpose of storing away property.

A case more to the point of the present is Davis *vs.* The London and Blackwall Railway Company, 2 English Railway Cases, 225, where the company was held liable for negligence in making an ex-

cavation near to another's house which caused it to fall upon the house of the plaintiff and injure it. So it was said by Wilde, J. in Lowell *vs.* Boston and Lowell Corporation, 1 Am. Railway, Cas. 289, that it is not true that all the defendant's duties and liabilities are created and prescribed by the act of incorporation. Corporations, as well as individuals, by the principles of the common law, are bound so to exercise their rights as not to injure others. The principle, *sic utere tuo ut alienum non laedas*, is of universal application. Therefore it was held in that case that a railway company, having a right to cut through the street of a city, though not bound by its charter to put up barriers for the protection of travellers upon the street, was liable for the neglect of those in their employ to put up the barriers at night which it had voluntarily placed there for safety. We have also the case of the City of New York *vs.* Bailey, 2 Denio, 433, in which the city was held liable for the defective construction of a dam erected upon the Croton to supply water to the city, which broke and injured a lower riparian owner, notwithstanding the work was done by commissioners appointed by the Governor and Senate. In this State it is held that the relation of a mere contractor doing the work devolves no responsibility upon the city: Painter *vs.* Pittsburg, 10 Wright, 213. The doctrine of negligence in the mode of work, however, was not denied. We must conclude, therefore, that though the State's right of eminent domain is committed to the company, and it may lawfully enter and build all structures proper to accomplish the purpose of its charter without liability for damages farther than is provided for in the charter: yet this does not justify unskilfulness and unnecessary injury in the mode of performing the work, or in the character of the structures erected. The company is bound to bring to their execution the engineering knowledge and skill ordinarily known and practised in the construction of such works. See also Redfield on Railways, 157, 170, 171, and the authorities there cited.

In the present case, then, if the culvert was so unskilfully and negligently constructed as to be insufficient to vent the ordinary high water of the stream, the railroad company building it would have been liable for the injury thereby caused. The apparent facts indicated the duty. The stream, though small, must find a vent, or overflow the adjacent land and undermine the railroad. Its size, the character of its channel and the declivity of the circumjacent territory which forms the water-shed, indicated the probable quantity of water to be passed through. Proper engineering skill should observe these circumstances, and supply the means of avoiding the injury which would result from locking up the natural flow, or obstructing its passage so as to cause a reflux in times of ordinary high water. Beyond this, prudent circumspection cannot be expected to look, and there is therefore no liability for extraordinary floods, those unexpected visitations, whose comings are not foreshadowed by the usual course of nature, and must be laid to the account of Providence, whose dealings, though they may afflict, wrong no one. If, then, there were an original wrong in the construction of the culvert, and a nuisance created thereby, the present owners of the road would be responsible for its continuance after notice.

Up to this point we discover no error in the charge of the learned judge. He laid down the rule for ordinary freshets and that for ordinary floods, but in coming to the fact that three very extraordinary floods had happened following in close succession, he seems to have had some impression that a new rule was applicable which the jury might apply themselves. His instructions on this subject seem to be incompatible with those he had already given. After noticing the remarkable succession of extraordinary floods, he said: "Now, under these circumstances, it will be for you to determine whether the defendants ought or ought not, after the first, or first and second floods, to alter their culvert by enlarging its cavity. Considering the frequency of these floods, was it or was it not negligence in them not to do so, after such repeated instances and positive notices, coupled with the request testified to by Gilleland." In effect this was to leave it to the jury to find a liability for extraordinary floods, because a second and third happening like the first, came in rapid succession. If all were extraordinary, as the instruction concedes, the surprise at the second and third could not be less than at the first, and it was still more surprising that they should come in this rapid succession. Being extraordinary neither second nor third could have been expected more than the first. The rule as to extraordinary floods was therefore not changed. But the frequent recurrence of what was supposed to be extraordinary was some evidence that the real character of all these floods had been mistaken by those who testified as to their extraordinary character, and that they were really only ordinary freshets, though measuring up to the highest altitude of that class. It was proper, therefore, to submit this question to the jury with instruction, if they so found the fact, to apply the rule as to ordinary freshets. But from the manner of submitting the instructions, doubtless the jury might understand they were permitted to allow damages for these extraordinary floods because of their recurrence one after another in so short a time. In this there was error, and the judgment is therefore reversed, and a *venire de novo* awarded in both actions.

Union Pacific Railroad.

The earnings of this road for the five months ending Oct. 31, 1870, were $3,502,178 01; the expenses, $1,789,594 56; net income, $1,712,583 45. The land sales of the Union Pacific railroad for September, October and November, were 58,781 36-100 acres, for which the company received $71,000 in their Land Grant bonds, $1,708 15 in cash, and $145,689 32 in settlers' notes, secured by mortgage on land sold. The total sales of land to Dec. 9, 1870, were 258,404 12-100 acres, for which the company received $1,270,784 44, or an average price of $4 42 per acre. The trustees of the Land Grant bonds have canceled $723,000 of Land Grant bonds, and hold $488,409 60 of settlers' notes, secured by mortgage on land sold.

☞ Track laying on the extension of the Maryland and Delaware railroad toward Oxford, Del., is being rapidly pushed forward, and it is expected the road will be completed by the close of this month.

☞ The Welland Canal was closed on the 15 of December.

Arkansas Western Railroad.

The stockholders of this company met at the circuit court room in this city on the 29th ult., and under the supervision of a majority of commissioners proceeded to hold an election for nine directors for said company, which resulted in the selection of the following named gentlemen:

David Walker, Alfred M. Wilson and George W. M. Reed, of Washington county; A. M. Dinsmore, Oliver M. Young and R. W. Ellis, of Benton county; William M. Fishback, Henry E. McKee and Thomas Lanagan, of Sebastian county.

A majority of said directors being present, they proceeded at once to organize by the election of David Walker President, and A. M. Wilson Secretary.

So at last this company is in a position that propositions can be entertained from capitalists for the building of the road. We believe that the road will be built, either on this line or under the charter of Pierce City, Fayetteville and Fort Smith Railroad Company, which latter charter is in the hands of citizens of this city.—*Fayetteville (Ark.) Democrat.*

Lehigh Valley Railroad.

The coal transported over this road was received as follows, in the following years:

		1869.	1870.
From Wyoming	Region	450,355	588,596
" Hazleton	do.....	948,623	2,007,027
" Upper Lehigh	do.....	8,581	12,002
" Beaver Meadow	do.....	504,796	703,684
" Mahanoy	do.....	431,988	295,164
" Mauch Chunk	do.....	827	2,164
		2,310,170	3,608,587
			2,310,170
Increase in 1870.....			1,298,417

☞ The Williamsport (Md.) *Pilot* says that before the first day of the new year the Western Maryland Railroad will be in full operation to Mechanicstown, distant about thirty miles from Williamsport, with most of the road graded to Hagerstown, leaving the two ends—from Owings' Mills to Hagerstown, and from Hagerstown to Williamsport—still untouched. From the best information to be had, its affairs are in a healthy and prosperous condition, and the work in steady progress on toward Hagerstown, which it is expected to reach before the opening of spring.

☞ The Sheboygan and Fond du Lac Railroad has been purchased by James F. Joy, of Detroit. Mr. Joy's plan is to extend the road to St. Paul via Ripon, connecting with the Northern Pacific at the former point. A line of steamers is to connect the road with the Detroit, Howell and Lansing Railway, now in process of construction, and which will terminate either at Whitehall or Pentwater.

☞ Charles McFadden, of Philadelphia, has obtained the contract for building the Alexandria and Fredericksburg Railroad from section 20, about a mile and a half this side of Colchester, to Chapawamsic, where it will connect with the Richmond, Fredericksburg and Potomac Railroad.

☞ The first train of cars passed over the Chartiers Valley Railroad as far as the town of Cannonsburg, eighteen miles from the point of departure at Mansfield station on the Pan Handle Railroad, on the 12th inst.

☞ The New York Central Railroad has now a double track from Albany to Buffalo. The only gap that existed for a long time was at Churchville, and it has just been filled.

☞ The Pittsburg Railroad and Coal Company is extending its road, now running from East St. Louis, about six miles east, to Pittsburg, on the bluffs, to a point thirty miles further into the coal section of St. Clair and other counties of Illinois.

CLARKE, REEVES & CO.

Philadelphia Dec. 20, 1870.

Proposals for $250,000 DOCK BONDS of the City of New York.

Sealed proposals will be received at the Comptroller's Office until WEDNESDAY, Dec. 28, 1870, at 2 o'clock p. m., when the same will be publicly opened, for the whole or any part of the sum of $250,000 of DOCK BONDS of the City of NEW YORK, authorized by Chap. 383 of the Laws of 1870, and by a resolution of the Commissioners of the Sinking Fund passed Dec. 14, 1870.

Said Bonds will bear interest at the rate of 7 per cent. per annum, payable on the first day of May and November in each year, and the principal will be redeemed on the first day of November, 1901.

The Proposals will state the amount of Bonds desired, and the price per one hundred dollars thereof; and the persons whose proposals are accepted will thereupon be required to deposit with the Chamberlain the sums awarded to them respectively, together with any premiums thereon.

On presenting to the Comptroller the receipts of the Chamberlain for such deposit, the parties will be entitled to receive certificates for equal amounts of the par value of the sums awarded to them, bearing interest from the dates of payment.

Each Proposal should be sealed and indorsed "PROPOSAL FOR DOCK BONDS OF THE CITY OF NEW YORK," and inclosed in a second envelope addressed to the Comptroller.

The right is reserved on the part of the Comptroller to reject any or all of the bids, if in his judgment the interests of the Corporation require it.

RICHARD B. CONNOLLY, Comptroller.

City of New York, Department of Finance, Comptroller's Office, December 20, 1870.

Notice to Contractors.

SEALED PROPOSALS addressed to the undersigned will be received until Wednesday, Dec. 28, 1870, for the gradation, masonry, and bridging of the Newburg and Midland Railway, extending from Newburg, N. Y., to a junction with the New York and Oswego Midland Railroad, near the village of Fair Oaks, a distance of twenty-five miles, or of any part thereof. Profiles and specifications can be seen at the office of the Company. The Company reserves the right to reject all proposals not deemed for their interest to accept.

DANAS & LITCHFIELD,
49tf 18 William street.

PROCLAMATION of the SALE of the HOUSTON TAP AND BRAZORIA RAILROAD, by the Governor of the State of Texas, in the name and by the authority of the State of Texas.—Whereas, The railroad company known as that of the "Houston Tap and Brazoria Railroad" is largely indebted to the School Fund of the State of Texas, for principal and interest of the Special School Fund loaned to the same under the act of the Legislature of August 13th, 1856, entitled "An Act to provide for the investment of the Special School Fund in the bonds of railroad companies incorporated by the State," and the amendments thereto, which principal and interest is secured by the bonds of said railroad company, made and executed to the State of Texas under said act and amendments; and

Whereas, Said railroad company, by failure to pay the interest and sinking fund of said indebtedness, has not complied with its obligations under said act of August 13th, 1856, and the amendments thereto, and has also not complied with the act of 13th of August 1870, entitled "An Act for the relief of railroad companies indebted to the State for loans from the School Fund;" and

Whereas, Because of such failure, the Governor of the State is required, by said acts of the Legislature, to cause said railroad to be sold in satisfaction of said indebtedness;

Now, therefore, be it known that in conformity with said acts of the Legislature, I, EDMUND J. DAVIS, Governor of said State, will, on WEDNESDAY, the 15th day of February, A. D. 1871, cause to be sold the said "Houston Tap and Brazoria Railroad," and the charter rights of said company, including the road-bed, right of way, grading, bridges, iron rails, equipments and masonry, and all the stock subscribed for in said company, all the depots and depot stations, and all the property owned by said company as necessary to its business—said railroad being about (50) fifty miles long.

Such sale to take place, at public auction, on sa'd (15th) fifteenth day of February, A. D. 1871, at the door of the Capitol of the State at Austin, between the hours of 10 a. m. and 12 o'clock m., and the sale to be to the highest cash bidder; *provided, however*, that the Governor reserves the right, should he deem it advisable, to buy said property in, for the benefit of the School Fund, should no cash bid be made sufficient to cover the principal and interest due on the School Fund.

In testimony whereof I have hereunto signed my name, and have caused the great seal of the State to be [L. S.] affixed, at the City of Austin, this 12th day November, A. D. 1870, and of the independence of Texas the thirty-fifth. EDMUND J. DAVIS, Governor.

By the Governor: JAMES P. NEWCOMBE, Secretary of State.

PROCLAMATION of SALE of the TEXAS AND NEW ORLEANS RAILROAD—By the Governor of the STATE OF TEXAS—in the name and by the authority of the State of Texas—Whereas, The railroad company known as that of the "Texas and New Orleans Railroad" is largely indebted to the school fund of the State of Texas, for principal and interest of the special school fund, loaned to the same under the act of the Legislature of August 13th, 1856, entitled "An Act to provide for the investment of the special school fund in the bonds of railroad companies incorporated by the State," and the amendments thereto—which principal and interest is secured by the bonds of said railroad company, made and executed to the State of Texas, under said acts and amendments; and

Whereas, Said railroad company, by failure to pay the interest and sinking fund of said indebtedness, has not complied with its obligations under said act of August 13th, 1856, and the amendments thereto, and has also not complied with the act of 13th of August, 1870, entitled "An Act for the relief of railroad companies indebted to the State for loans from the special school fund;" and

Whereas, Because of such failure, the Governor of the State is required, by said acts of the Legislature, to cause said railroad to be sold in satisfaction of said indebtedness:

Now, therefore, be it known, that in conformity with said acts of the Legislature, I, EDMUND J. DAVIS, Governor of said State, will, on TUESDAY, the 14th day of February, A. D. 1871, cause to be sold the said "Texas and New Orleans Railroad," and the charter rights of said Company, including the road-bed, right of way, grading, bridges, iron rails, equipments, and masonry, and all the stock subscribed for in said Company, all the depots and depot stations, and all the property owned by said Company as necessary to its business—said railroad being about one hundred and eight (108) miles long.

Such sale to take place, at public auction, on said 14th day of February, A. D. 1871, at the door of the Capitol of the State, at Austin, between the hours of 10 a. m. and 12 o'clock m., and the sale to be to the highest cash bidder; *provided, however*, that the Governor reserves the right, should he deem it advisable, to buy said property in, for the benefit of the school fund, should no cash bid be made sufficient to cover the principal and interest due the school fund.

In testimony whereof, I have hereunto signed my name, and have caused the great seal of the State to be [L. S.] affixed at the City of Austin, this 12th day of November, A. D. 1870, and of the independence of Texas the thirty-fifth. EDMUND J. DAVIS, Governor.

By the Governor: JAS. P. NEWCOMB, Secretary of State.

THE Firm of WM. J. YOUNG & CO., MATHEMATICAL INSTRUMENT Makers, consisting of WM. J. YOUNG & CHAS. S. HELLER, was dissolved shortly before the death of Wm. J. Young. The undersigned, the late Partner of said Firm, (who was with Mr. Young continuously for 15 years), will continue in the same line of business at No. 33 North Seventh Street, (corner of Filbert).

NOTICE TO THE PUBLIC.

EXECUTIVE DEPARTMENT,
ATLANTA, GA., October 26th, 1870.

To Whom it May Concern:

By an Act of the General Assembly of the State of Georgia, approved October 24, 1870, authority is given to the Governor to lease the Western and Atlantic Railroad, the property of the State, together with all of its houses, workshops, depots, rolling stock and appurtenances of every character, for the term of twenty years, upon certain terms, and subject to certain restrictions therein named, to-wit:

The monthly rental shall not be less than twenty-five thousand dollars ($25,000) payable monthly. The lessees shall give a bond for the sum of eight millions of dollars ($8,000,000) to securing the prompt payment of the amount of rental agreed upon, and for the return of the road and its appurtenances at the expiration of the lease, or on the termination or forfeiture thereof, in as good condition as at the time of leasing, five millions ($5,000,000) of which security shall be within this State and the balance, if out of the State, shall be upon real estate or railroad property. The lessees to be worth over and above their indebtedness, at least five hundred thousand dollars ($500,000.)

The Legislature reserves to itself the right, from time to time, to examine into the affairs of the lessees, and to require that the amount of security above recited shall be maintained unimpaired.

The lessees shall not be less than seven in number, a majority of whom shall have been for five years *bona fide* residents of this State, and shall represent a majority of the whole interest in the lease. No railroad or express company, or any combination of them, shall, in any event, become the lessees, but they may become sureties on the bonds of the lessees. The lessees shall not charge a higher rate for local freights over said road than the average rate charged by the Georgia Railroad and Banking Company, the Central Railroad and Banking Company, and the Macon and Western Railroad Company, for like local freights over said roads, and the said lessees shall have the same rights, exemptions, privileges, immunities and guarantees, except the establishment of banks, and shall be subject to the same liabilities, disabilities, and public burdens of said railroad companies last mentioned. The faith of the State is pledged to redeem all mortgage bonds and coupons now resting on the State Road as they fall due, and to save the lessees harmless against all such bonds and coupons.

The lessees are by this act constituted a body corporate and politic for the term of twenty years, under the name and style of the Western and Atlantic Railroad Company, having such powers, liabilities and immunities, as are usual with railroad companies, and not in conflict with the Constitution and Laws of the United States, or of the State of Georgia; but they will not be allowed to make or permit any discrimination in favor of or against any other road or persons having business connections with the said Western and Atlantic Railroad.

For the purpose of carrying out this act, proposals will be received until and including the 25th day of December next and must be addressed "to the Governor of the State of Georgia, at Atlanta," and marked on the wrapper, "Proposals for the lease of the Western and Atlantic Railroad, in accordance with an Act approved October 24, 1870." The proposals must state in full the names and residence of the parties uniting to make proposition, the amount that each of the parties therein named are worth over and above their debts and liabilities, together with a full description of the character of the security which will be offered to complete the bond.

The property to be leased is a single track railroad, one hundred and thirty-eight miles in length, with full and complete equipment of shops, depots, turnouts, sidelings, engines, cars, etc., etc, etc., now in successful operation between the cities of Atlanta, in Georgia, and Chattanooga, in Tennessee. At Chattanooga the line is in direct rail connection with the Memphis and Charleston, Nashville and Chattanooga, Chattanooga and New Orleans, East Tennessee and Georgia, and the Chattanooga and Cincinnati, (now in progress of construction,) railroads, and at Atlanta with the Atlanta and Montgomery, Atlanta and Charleston, Atlanta and Savannah, and the Atlanta and Gulf lines of road, being the only railroad connection between the system of railways centering at Chattanooga and at Atlanta.

Copies of "An Act to authorize the lease of the Western and Atlantic Railroad, and for other purposes therein mentioned," approved October 24th, 1870, can be had upon application at the Executive office.

RUFUS B. BULLOCK.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

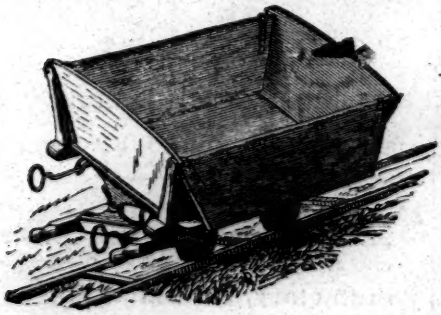
Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.



That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.
